STEWART CLIPPING MACHINES AND ATTACHMENTS

Prices on Application

NO. 1 STEWART BALL BEARING, ENCLOSED TYPE CLIPPING MACHINE FOR HORSES, MULES AND COWS

The gearing is all enclosed in a dust and dirt proof case and runs in oil constantly.

It has a solid tripod base, a strong upright and its gears are all cut from solid steel made file hard.

A slow turning of the handle is transformed by the ingenious mechanism of the gears to a tremendous speed in the knife.

It turns so easily that it is mere play to run it.

The entire machine is sturdy, compact and perfect in every detail of material and workmanship.

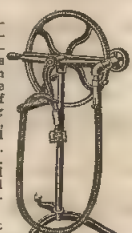
The price puts it within reach of every farmer and horse owner.

No. 1—Ball bearing, complete with 6 ft. of flexible shaft and Stewart clipping knife and handle, shipping w't 36 lbs. .....each *$10.75*

No. 18—Combination machine for **clipping horses,** mules and cows, **and shearing sheep** and goats, consists of No. 1 Stewart ball bearing clipping machine and shearing attachments, shipping w't 52 lbs., each *$21.25*

NO. 2 CHICAGO CLIPPING MACHINE FOR HORSES, MULES AND COWS

STEWART Patent.



A big, strong machine and a special favorite with livery men, blacksmiths, and all who have much clipping to do. 18 inch large gear, is carefully machined all over, the teeth are cut from solid metal and engage with perfect precision in the teeth of the hardened steel pinion. Wearing parts are all hardened tool steel, shaft revolves with great speed and completely equalizes the motion. Easily turned with either hand. Light running and noiseless, will clip a horse in 30 minutes. Rigid tripod base and strong tubular upright.

No. 2—Equipped with 6½ ft. highest grade flexible shaft and Stewart one nut clipping knife and handle, w't boxed 75 lbs. ....each *$17.00*

CHICAGO VETERINARY POWER FLOATS

These floats keep the teeth of horses in good condition. Half the food will do more good if the teeth are in good condition to chew it properly. Can be attached very easily to any of our hand power horse clipping machines.

Chicago veterinary power float including one rasp, each *$4.50*

Extra rasps .....each *$0.50*

PACKED IN CARDBOARD BOXES. WEIGHT 3 LBS.

Grinding sheep shear knives ....per set of two *.25*

Prices on Application

STEWART ELECTRIC CLIPPING MACHINE

PEDESTAL TYPE

For Horses, Cows and Mules.

Where there is considerable clipping to do this machine quickly pays for itself. Equipped with ¾ H. P. motor, at a speed of 1600 R. P. M., it clips very fast and takes care of a large amount of work. Clips horses, mules and cows.

For the efficiency and smooth, easy running required in clipping, no machine equals the Stewart.

Pedestal Type.

The 6-foot flexible shaft is connected by universal joint to armature shaft of motor, making a positive drive with no chance for lost motion.

Fitted with improved Stewart Single Tension Clipping Head, requiring less tension than any other style of head; knives stay sharp longer and give more efficient service.

Used for sheep shearing by fitting with a Special Sheep Shearing Attachment.

Has good length cord and convenient switch for starting and stopping.

Furnished in 32, 110 or 220 volt, direct current; 110 or 220 volt, 60 cycle alternating current.

No. 85—Stewart electric clipping machine, shipping w't 100 lbs. ..... each *$85.00*

No. 15—Stewart sheep shearing attachment, shipping w't 15 lbs. ..... each *$15.00*

No. 1000—Stewart combination electric shearing and clipping machine, shipping w't 115 lbs., each *$100.00*

Specify on orders whether machine is for direct or alternating current, also if 32V, 110V, or 220V.

STEWART ELECTRIC SHEARING MACHINES

PEDESTAL TYPE

This machine is especially adaptable where a large flock of sheep is to be shorn.

Includes ¾ H. P. motor, at a speed of 1600 R. P. M. It saves time in shearing and removes the wool in one unbroken blanket, leaving a smooth, even stubble for the following year's growth.

The universal jointed shaft that drives the shear is connected direct to armature shaft of motor, driving shearing head smoothly without any lost power. Equipped with Stewart Air Cooled Shearing Head. For fast shearing, economy and durability it cannot be equalled. It gets the wool faster, and because of its perfected mechanism runs absolutely smooth.

Pedestal Type.

Used as a clipping machine, by fitting with a Special Clipping Attachment.

Has good length cord and convenient switch for starting and stopping.

Furnished in 32, 110 or 220 volt, direct current; 110 or 220 volt, 60 cycle alternating current.

No. 900—Stewart electric shearing machine, shipping w't 100 lbs. ..... each *$90.00*

No. 10—Stewart clipping attachment, shipping w't 15 lbs. ..... each *$10.00*

No. 1000—Stewart combination electric shearing and clipping machine, shipping w't 115 lbs., each *$100.00*

Specify on orders whether machine is for direct or alternating current, also if 32V, 110V, or 220V.

SHIPPING FACILITIES

With our immense stock and very modern facilities for shipments we are enabled to fill orders with unequaled promptness. On some of the roads we have special through cars which enable us to reach distant points 24 hours ahead of shipments made in the regular way.

Prices on Application

PARTS FOR STEWART CUTTING HEAD FOR HORSE CLIPPING MACHINES

Patented.

AS SUPPLIED SINCE JANUARY 1, 1915

Caution—Do not file or grind any part of the clipping head in any way. It is exactly right to cut best. The only grinding to be done is to re-sharpen the cutting plates when they get dull, and that must be done right.

Be sure to let parts Nos. 358 and 359 alone. If they should be removed in any way, do not attempt to use the clipper head until they are properly replaced. Remove before grinding and replace after.

Complete.

This clipping handle and knife will fit **only the square end type of shaft** as furnished with all Stewart horse clipping machines since January 1, 1915.

No. 707—Tripod .....each 2.50

No. 708—Drive wheel .....each 3.00

No. 709—3 in. ferrule for No. 700 shaft (old style) .....each .30

No. 709A—3 in. ferrule for No. 700A shaft (new style) .....each .30

No. 710—Balance wheel .....each 1.35

No. 711—Crank rod only .....each .50

No. 712—Wood handle for crank .....each .20

No. 713—Axle .....each .65

No. 714—Handle bolt .....each .25

No. 715—Upright .....each 1.35

No. 716—Pinion .....each .60

No. 876—Eye Spindle .....each .50

No. 718—Pinion shaft .....each .50

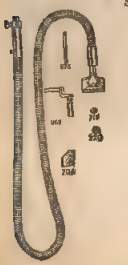
No. 889—Small cog .....each .35

No. 720—Large cog .....each .50

No. 721—Hexagon nut for handle bolt .....each .05

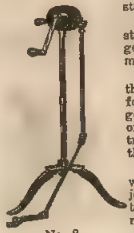
CLIPPING ATTACHMENTS FOR CLIPPING HORSES, MULES AND COWS

For Use on Nos. 6, 8, 9 and "New Model" Sheep Shearing Machines.



No. 550—Clipping attachment, complete with 6 ft. of high grade flexible shaft and chain, eye spindle, Stewart horse clipping knife and handle and connecting parts as illustrated, shipping w't 10 lbs., each $7.00

STEWART SHEEP AND GOAT SHEARING MACHINES



No. 8.

The gearing is all enclosed in a dust and dirt proof case, and runs in oil constantly.

Solid tripod base, strong upright, and gears cut from steel made file hard.

A slow turning of the handle is transformed, by the ingenious mechanism of the gears, to a tremendous speed in the knife.

Solid core shaft with universal joints, may be turned in any direction.

No. 9, Ball Bearing.

Shears are of simple adjustment and of equal tension throughout. Perfectly balanced, will shear all grades of wool.

No. 8—Complete with Stewart No. 5 shear, 4 combs and 4 cutters, w't boxed 45 lbs. .....each $14.25

No. 9—Ball bearing, each joint in the shaft and the shear is fitted with ball bearings, has a larger gear case than the No. 8 machine and a larger balance wheel aids in easy turning, fitted with No. 7 Stewart ball bearing shear, 4 combs and 4 cutters, w't boxed 50 lbs., each $16.00

New Model.

18 in. large gear, enclosed in a stationary frame and drives a steel cut pinion to which is attached a solid core jointed shaft having universal joints permitting it to be turned in any direction, small turned balance wheel fitted to the pinion shaft runs at a high speed and steadies the motion of the machine at all times, all parts are interchangeable.

No. 6.

New Model—Complete with No. 5 Stewart shear, 4 combs and 4 cutters, w't boxed 60 lbs. .....each $18.00

No. 6—Set upon rigid tripod standard and strong tubular upright, w't boxed 75 lbs., otherwise same as New Model sheep shearing machine described .....each $20.00

The knives can be re-sharpened many times and made equal to new by using the automatic grinder shown on this page.

No. 06—Combination machine for clipping horses, mules and cows and shearing sheep and goats, consists of New Model shearing machine mounted on tripod stand, also clipping attachment consisting of 6 ft. flexible shaft and clipping knife and handle, shipping w't 80 lbs., each $27.00

Prices on Application

THE IMPROVED STEWART NO. 11 GRINDERS

For use on the No. 1 horse clipping machine and on the Nos. 8 or 9 sheep shearing machines. Constructed of metal throughout, may be attached to the machine in place of the shaft by means of an ingenious mechanism. This attachment makes it possible to put a perfect edge on the knives of No. 1 horse clipper or Nos. 8 or 9 sheep shearer in a few seconds time, obviating the time and expense incurred in sending them away to be sharpened.

No. 11—Grinder attachment complete, w't boxed 8 lbs., each *$5.00*

NO. 3 STEWART AUTOMATIC HAND GRINDER

Requires no skill or experience as it is automatic and cannot go wrong. A grinding compound is used on the grinding disc and the knives to be sharpened are held in holder.

This machine will sharpen a knife in a few minutes to cut as good as new. Saves sending plates to the factory to be ground. Made of metal throughout. Can be run by power by substituting a pulley for the crank handle.

Customers ordering machines for sharpening both horse clipping and sheep shearing machine plates receive two sets of plate clamps or holders and two eccentric cams. Unless otherwise ordered the sheep shearing machine plate clamps will be for Nos. 276 and 277 cutting plates.

The eccentric cams are alike but for the position for holes where they fit on axle. The one with the hole nearest center is for use when sharpening Nos. 90, 99, 360 and 361 horse clipping machine plates, the other when sharpening sheep shearing machine plates.

This latter cam is also used when Nos. 216 and 217 sheep shearing machine plates are sharpened. Cams are easily changed by merely loosening set screw and working them off axle. If, when using machine, the cutting plate clamps strike cross arm you will know the wrong cam is in position. This can only occur when sharpening Nos. 90, 99, 360 and 361 horse clipping machine plates.

NOTE—Shearing knives for No. 4 shear cannot be used with holders for Nos. 5 and 7 shears and vice versa.

No. 3S—For sheep shearing knives ..... each *$16.00*

No. 3H—For horse clipper knives ..... each *16.00*

No. 3Sh.—For both horse clipper and sheep shearing knives ..... each *$16.50*

WEIGHT BOXED 45 LBS.

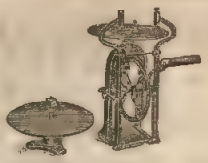
Extra holders for knives for Nos. 5 and 7 shears, per pair *$2.50*

Extra holders for knives for No. 4 shear, per pair *$0.50*

Extra holders for horse clipping knives, per pair *$2.50*

Emery paste grinder preparation, in 1 lb. package, per package *$0.40*

THE NEW NO. 2 STEWART AUTOMATIC GRINDER



The best hand operated sharpening device made for horse clipping or sheep shearing machine plates.

Grinding disc is covered with emery cloth on the same principle as the large power grinding machines used in large shearing plants. This emery cloth surface can be renewed any time at very little expense. Grinder is practically everlasting. It is the most practical grinder for dealers or others who have considerable grinding to do and who do not wish to purchase a power grinder.

In ordering give our names and numbers of plates to be sharpened so proper clamp rods will be supplied. No cams to change on this grinder. Each grinder shipped complete with emery cloth, liquid cement, clamp block and clamp rod. Diameter of disc 14½ in., height of grinder over all 2 ft., w't boxed for shipment 110 lbs.

No. 2—Automatic grinder, complete as described, each *$30.00*

COMBS AND CUTTERS FOR STEWART HAND POWER SHEEP SHEARING MACHINES

No. 276.

No. 277.

No. 276—Cutter or top plate ..... each *$0.20*
No. 277—Comb or bottom plate ..... each *.65*

The No. 277 Comb and No. 276 Cutter here shown are for the Stewart No. 5 and Stewart No. 7 Shears. They will not fit the Stewart No. 12 or No. 4 Shears.

No. 216

No. 217

No. 217—Cutter or top plate ..... each *$0.65*
No. 216—Comb or bottom plate ..... each *.65*

The No. 217 cutter and No. 216 comb are very similar to the top and bottom knives used on Stewart horse clipping machine heads **and fit only the Stewart No. 4 Shear and Special A Shear.**

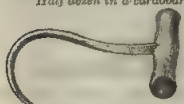
HAY HOOKS

Cast steel hook, polished, square body, tempered, round tapering point; round shank passes through handle and riveted; polished hardwood handle.

Per Dozen

No. 6—Size hook 3½ in.; lgth. handle 5½ ins.; lgth. over all 6½ ins. $9 45

Half dozen in a cardboard box; weight per dozen 6 lbs.

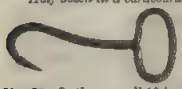


Cast steel hook, forged finish; round tapering point, tempered; flat shank extends through handle and riveted with washer; polished hardwood handle.

Per Dozen

No. 114—Dia. hook 3½ in.; lgth. handle 5¼ ins.; lgth. over all 9 ins. $10 95

Half dozen in a cardboard box; weight per dozen 6½ lbs.



Made of ¾ in. round steel, oil finish; tapering point; loop handle.

Per Dozen

No. 20—Lgth. over all 13 ins.; size handle 4x2½ ins. $6 60

Packed loose; weight per dozen 8 lbs.

COTTON HOOKS

—BLUE GRASS—

Texas Pattern.

Extra quality steel hook, polished, hardened point; oval shank passes through handle and riveted; square body; round tapering point; polished hardwood handle.

Nos.	7	10
Length over all, inches	6	8
Size hook, inches	⅛	⅛
Length of handle, inches	6½	6½
Weight per dozen, lbs	6½	6
Per Dozen	$9 75	10 80

One dozen in a cardboard box.

Cast steel hook, polished, tempered point; shank passes through handle and riveted; round tapering point, black hardwood handle.

New Orleans Pattern, Curved Hook.

Per Dozen

No. 320—Diameter hook ⅜ inch; length of handle 5½ inches; length over all 7 inches; weight per dozen 5 lbs. $8 25

Red River Pattern, Straight Hook.

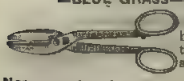
Per Dozen

No. 321—Diameter hook ⅜ inch; length of handle 5½ inches; length over all 7 inches; weight per dozen 6 lbs. $9 75

One dozen in a cardboard box.

TINNERS' SNIPS

—BLUE GRASS—Combination Pattern.



Perfect tempered straight blade, but jaws are ground and shaped so they will cut curves and irregular shapes as well as straight work.

Nos.	199	198
Cut, inches	3	3½
Length over all, inches	12½	13½
Weight per pair, lbs.	2	2¾
Per Pair	$6 60	7 50

One pair in a carton.

TINNERS' SNIPS

—BLUE GRASS—

Made of forged steel, with crucible tool steel laid blades; full polished; gun metal finished handles; every snip carefully tested.

Nos.	Cut, in.	Lgth. over all, inches	Weight per pair, lbs.	Per Pair
412	2	8	1½	$3 30
411	2¼	9	1¾	4 05
410	2½	11½	2⅛	5 25

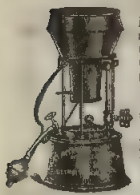
One pair in a paper.

FIRE POTS

CLAYTON AND LAMBERT

Burns Gasoline Only.



Heavy galvanized iron tank, galvanized cast iron top plate and bottom ring, soldered to body; brass filler plug, removable sheet steel hood, steel coil burner, and stand pipe; brass fitting, cast iron grip on needle point valve, which are fitted with stuffing boxes; top grate cast iron fastened by three ¼ in. steel rods, screwed to top plate of tank; rubber bulb and hose fastened to brass fitting with check valve; wire bail with wood handle.

Each

No. 10—Capacity 1 gallon; ht. over all 17 in.; diameter of base 8½ ins. *$15 00* 20 25

One in a carton; weight each 9¾ lbs.

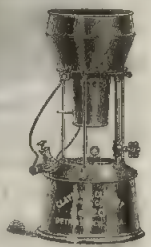
METAL POTS FOR NO. 10 FIRE POTS

Each

No. 10-MP—Metal pot for No. 10, extra *$1 20* 1 65

CLAYTON AND LAMBERT

Burns Gasoline Only.



Fitted with automatic brass air pump.

The tank is of heavy galvanized iron, fitted with galvanized cast iron top plate and bottom ring. All small or light castings are malleable iron or brass. The coil is made of extra heavy pipe and the burner of steel. The needle point valves are fitted with stuffing boxes.

Each

No. 20—Capacity 1 gal.; ht. over all 17 in.; diam. of base 8½ ins. *$16 60* 22 50

One in a carton; weight each 9¾ lbs.

METAL POTS FOR No. 20 FIRE POTS

Each

No. 20-MP—Metal pot for No. 20, extra *$1 20* 1 65

BLOW TORCHES

CLAYTON AND LAMBERT

Burns Gasoline or Kerosene.

Polished drawn brass seamless top and body, heavy brass soldered concaved bottom; cast iron drip cup and pipe. These torches are symmetrical, well balanced, strong and servicable, using very little fuel, the burner will produce an ideal blue flame of great heat efficiency.

Especially designed for heavy work in the wind or zero weather, in repair shops and garages for brazing, tempering and straightening of automobile frames and axels. Equipped with automatic brass pump; the burner is made of generator metal, having upper cleaner and lower shut off needle and hardwood handle. Height 15 inches; diameter 5¾ inches.

Each

No. 206—Capacity two quarts *$52 00* 43 20

One in a cardboard box; weight each 10 lbs.

BLOW TORCHES

CLAYTON AND LAMBERT

Burns Gasoline or Kerosene.

Especially designed for general mechanics use, will work perfectly in the wind or zero weather. Equipped with an automatic brass pump; the burner is made from generator metal, having upper cleaner and lower shut-off needle. Height 11 ins.; diameter 5¾ inches.

Each

No. 208—Capacity one qt. *$17 00* 22 95

One in a cardboard box; weight each 5 lbs.

CLAYTON AND LAMBERT

Burns Gasoline Only.

Capacity one quart; diameter 5¾ inches. Equipped with automatic brass pump.

Each

No. 31—Without soldering iron attachment; height over all 9½ ins.; weight each, 5½ lbs. *$15 20* 20 52

No. 32—With soldering attachment height over all 11 ins.; weight each 6 lbs. *16 00* 21 60

One in a cardboard box.

CLAYTON AND LAMBERT

Burns Gasoline Only.

Capacity one pint; diameter 4¾ inches. Equipped with automatic brass pump.

Each

No. 37—Without soldering iron attachment; height over all 8 inches weight each 3¾ lbs. *$13 60* 19 44

No. 38—With soldering iron attachment height over all 8¾ inches; weight each 4½ lbs. *14 40* 19 44

One in a cardboard box.

CLAYTON AND LAMBERT

Burns Gasoline Only.

Capacity one pint; diameter 3½ inches Equipped with combination brass pump and handle.

Each

No. 18 Without soldering iron attachment; height over all 7½ ins.; weight each 3½ lbs. *$12 80* 17 28

No. 19 With soldering iron attachment; height 8½ inches; weight each 3½ lbs *13 60* 18 36

One in a cardboard box.

CLAYTON AND LAMBERT

Burns Gasoline Only.

The tank is made of seamless drawn brass equipped with a double spring brass pump. Concaved bottom to serve as a funnel when filling

Bronze metal burner; tapered burner tube fitted with solid hook and support for holding soldering coppers.

Each

No. 130—Capacity one quart; diameter 4½ ins.; height 11 ½ ins. *$12 00* 16 20

One in a cardboard box; weight each 4¼ lbs.

GASOLINE BLOW TORCHES

TURNER, DOUBLE JET

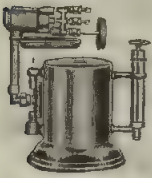
For Gasoline Only.

Polished heavy brass tank; concaved bottom, with brass filler plug; double jet bronze metal burners, produces a much higher degree of heat than other hydro carbon burners. The adjustment is simple and easily regulated. Pump is in the handle of the torch and air valve is located at base of pump barrel. Reccommended for all ordinary work for which a common blow torch is used and especially for light brazing, annealing light material, brazing on rubber tires and paint burning.

Each

No. 92—Capacity 1 quart; diameter 4 inches; height over all 9½ inches $23 07

One in a carton; weight each 5 lbs.



For Gasline Only.

Burner is mounted on a swivel so that it can be turned on either side of tank.

Each

No. 95—Capacity 1 quart; diameter 4 inches; height over all 11¼ inches $24 45

One in a carton; weight each 5¼ lbs.

THE "IMP"

All brass, nickel plated. Will heat or solder anything; starts with a match; has no pump or valve; is entirely automatic and burns two hours on one filling. For hand or bench work. Produces a perfect Bunsen flame of over 2,000 degrees Fahrenheit

Per Dozen

No. 372—Height over all 5 in.; diameter 2 in. $54 00

One in a carton, one dozen in a wood box; weight per dozen 8¼ lbs.

RIVET SETS AND HEADERS

TINNERS' STAKES

P. S. & W., Bottom.

Wrought iron, polished steel face. Each

No. 951—Width face, 1¾ ins.; height over all 13½ inches $13 50

Packed loose; weight each 3 lbs.

P. S. & W., Bevel Edged Square.

Wrought iron, polished steel face.

Each

No. 932—Size face 2½x4½ inches, height over all 12 inches $36 00

Packed loose; weight each 14 lbs.

TINNERS' STAKES

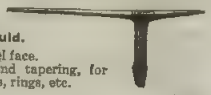
P. S. & W. CONDUCTOR

Wrought iron, polished steel face. Both arms round, for locking seams on conductor pipe.

Each

No. 971—Size large end 16x2¼ ins.; small end 11⁄16x 1⅜ ins.; height over all 10½ inches..... $33 00

Packed loose; weight each 29 lbs.



P. S. & W. Candle Mould.

Wrought iron, polished steel face. With both arms round and tapering, for forming small cylinders, tubes, rings, etc.

Each

No. 956—Length large end 18⅛ ins.; length small end 9⅛ ins.; height over all 10 ins $30 00

Packed loose; weight each 7½ lbs.

BENCH PLATES

P. S. & W. Revolving.

Cast iron, polished face. This plate can be readily inserted in any bench of ordinary thickness, and revolves.

Each

No. 983—Size 8½x8½ in.; height over all 7½ in.; wt. each 19 lbs $24 00

One in a box.

STOVE PIPE MANDRELS

For Seaming Or Riveting Stove Pipe.

P. & B., Hollow. Cast iron, polished, smooth and true, with heavy clamp for attaching to bench.

Each

No. 35½—**P. & B. Holdfast.** Length of shoulder 10 inches; width 4 inches, length over all 35½ inches $12 00

Packed loose; weight each 36 lbs.

TINNERS' TOOLS

P. S. & W. ROOFING TONGS Handy.

Japanned malleable iron with steel clamps; length over all 10 inches; a useful tool for general use; for inside and outside work.

Each

No. 765—Width of clamp 6½ in.; with ⅜ inch gauge..... $15 00

Packed loose; weight each 3 lbs.

P. S. & W. ADJUSTABLE ROOFING TONGS Stow's Pattern.

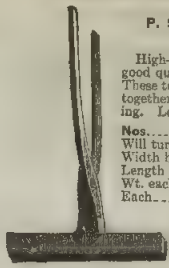
Handles are forged from high-grade steel; blades are accurately milled and are made of special steel with planed and polished bending edges. Will turn five different widths of locks—⅜, ¾, 1, 1¼, and 1½ inch.

Each

No. 773—Length handles 21 in.; width blades 2 in.; length blades 18⅛ in.....$24 00

Packed loose; weight each 9¼ lbs.

TINNERS' STAKES



P. S. & W. REGULAR ROOFING TONGS

High-grade special tough steel handles; good quality steel blades, accurately milled. These tongs are used on the roof for drawing together the two layers of tin before cleating. Length handles 21 inches.

Nos.	771	771¼	771½
Will turn lock, in	1	1¼	1½
Width blades, in.	1½	1¾	2
Length blades, in.	18½	18½	18½
Wt. each, lbs	8	9	9½
Each	$21 00	21 00	21 00

Packed loose.

P. S. & W. GUTTER TONGS

Handles are forged from a high grade special tough steel; blades are accurately milled and are made of a good steel with planed and polished bending edges.

Each

No. 777—Depth of jaws 14 in.; length handles 24½ in.; width blades 1¾ in.; length blades 12½ in.....$25 50

Packed loose; weight each 10 lbs.

P. S. & W. HAND ROOFING DOUBLE SEAMERS

Cast iron. Used for laying standing seam roofing by hand following the roofing tongs.

Nos.	744	745
Inches	¾x1	1x1¼
Match up with roofing tongs, in.	1x1¼	1¼x1½
Wt. each, lbs	8	9½
Per set of 2	$13 50	15 75

Packed loose.

P. S. & W. DOUBLE ROOFING SEAMERS Burritts Patent.

Will do the work more evenly than by any other process, and leave the formed lock of uniform height. Will work well over uneven roof boarding and will double seam hips and ridges with perfect ease. Fitted for I. C. tin. Set consists of two pairs.

Per Set

No. 742—Common gauge. Follows 1 and 1¼ inch tongs finishing a lock ⅞ inch high.....$66 75

No. 742½—Wide gauge. Follows 1¾ and 1½ inch tongs finishing a lock 1 inch high..... 66 75

Packed loose; weight per set 40 lbs.

P. S. & W. SCRATCH AWLS

Solid steel, twisted; with ring. Natural finish.

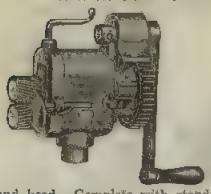
Per Dozen

No. 01—Length over all 8½ inches..... $6 75

One dozen in a cardboard box; weight per dozen 5 lbs.

TINNERS' MACHINES

P. S. & W. CORNICE MAKERS' CRIMPERS



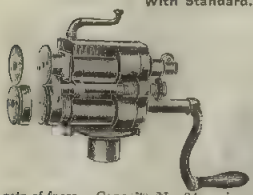
Rolls are made of a high-grade steel, scientifically hardened and the gauge is of extra wide proportions made from tool steel properly hardened.

For producing a neat, uniform crimp and bead or crimp without bead. Adjustments are provided for regulating the relative depth of crimp and bead. Complete with standard. Capacity No. 22 ga. iron and lighter. Each

No. 592—Diam. crimping rolls 1 1/16 in.; width crimping rolls 1 1/4 in.; ratio gearing 3:1; distance between shaft centers 1 3/4 ins $105 00

One in a wood box; weight each 63 lbs.

P. S. & W. TURNING MACHINE
With Standard.



Intended for turning or curving the tops of vessels to receive wire. The wire is first formed into shapefor vessel and then inserted in groove made by machine. The gearing being enclosed are protected from dirt, thus working more freely and requiring less attention.

Complete with two sets of faces. Capacity No. 24 ga. iron and lighter.

No.	546
Length over all, in	13 1/2
Height over all from bench, in	18
Diam. of rolls, in.	3
Smallest diam. of wire that can be used, in.	1/8
Largest diam. of wire that can be used, in	5/16
Weight each, lbs.	28
Each	$117 00

One in a wood box.

NIAGARA SUPERIOR WIRING MACHINES

For running wire in all kinds of square and circular work, to turn down edge over wire in drip pans, cans, washboilers, etc. Enclosed gearing is protected from dirt; work more freely and require less attention. Each

No. 38-W With standard; dia. of upper roll 3 1/16 ins.; dia. of lower roll 2 7/8 ins.; lgth. over all 15 ins.; width 6 ins.; ht. over all 29 5/8 ins.; lgth. handle 4 inches $88 35

One in a wood box, weight each 33 lbs.

NIAGARA ADJUSTABLE GUTTER BEADERS

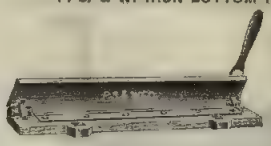
These machines possess the advantage of being adjustable for rods from 3/8 to 3/4 inch; after forming the bead the jaws can be opened quickly to remove the work and rod. Each

No. 30-AB—Lgth. 30 in.; dia. of rod 1/4 in.; lgth. over all 33 ins.; width 6 in.; ht. 5 in.; lgth. handle 9 ins $66 00

One in a wood box; weight each 65 lbs.

TINNERS' MACHINES

P. S. & W. IRON BOTTOM FOLDERS



Rigid in construction and very accurate. Capacity 22 ga. iron and lighter. Will form locks 5/16 to 5/8 inch. Each

No. 28 Lgth. over all 30 ins $72 00

One in a wood box; weight each 105 lbs.

P. S. & W. IMPROVED SHEET IRON FOLDERS

Fitted with machined steel bending blades, and gauges are well constructed for general work. The gauge is adjustable and moves upon a line parallel with the edge of the folding blade. Capacity 22 ga. iron and lighter.

Each

No. 10A Lgth. over all 31 ins.; will form locks 1/4 to 1/2 in $90 00

One in a wood box; weight each 85 lbs.

P. S. & W. ADJUSTABLE PIPE FOLDERS

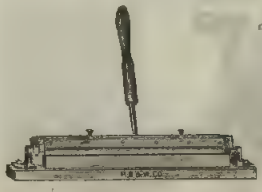
Will produce a lock of uniform width the entire length, variations in the hardness of the material have no influence whatever; has adjustable gauge for locks from 5/16 to 3/4 inch, and on sheets longer than the machine, edges can be bent enough to be readily hammered down; for No. 24 iron and lighter.

Each

No. 11—For iron 30 ins. wide or less; lgth. over all 37 ins.; width 8 ins.; ht. 9 3/4 ins.; lgth. handle 24 ins $135 00

One in a wood box; weight each 90 lbs.

P. S. & W. SHEET IRON FOLDERS
Wood Bottom.



For ordinary work and will form locks on flat sheets from 1/16 to 1 1/2 inch. Well constructed, fitted with milled bar, and gauges are adjustable and accurate.

Capacity No. 22 Gauge Iron and lighter.

Each

No. 39—For folding iron 30 ins. wide or less; lgth. over all 42 1/2 ins.; ht. less handle 5 1/4 ins.; lgth. of handle 22 1/2 ins $88 50

One in a wood box, weight each 75 lbs.

TINNERS' MACHINES

P. S. & W. IMPROVED ADJUSTABLE BAR FOLDER

For folding or edging sheets or strips of sheet iron, soft steel, brass and copper. The movement of the gauge is instantaneous and operated by means of a hand wheel in front and center of machine. Set screw in front and at the left of machine holds the gauge firmly in place and secures a fold or lock of uniform width the entire length. All parts are interchangeable.

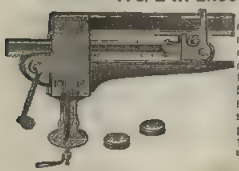
These machines will form square joints or angles and turn narrow or wide locks of uniform width the entire length. Will turn sharp edges, also round edges for inserting wire. Locks can be formed as narrow as 1/8 inch and as wide as 1 inch.

Capacity No. 22 gauge iron and lighter.

Nos.	62
Length, inches	28
Width, inches	10 1/4
Height, inches	6
Length of lever, inches	9 1/4
Greatest length with fold, in	20 1/2
Weight each, lbs.	100
Each	$210 00

Crated

P. S. & W. GROOVERS



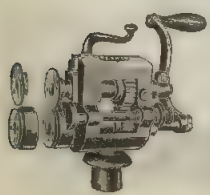
Seams on this machine can be formed on the inside or outside of the cylinder and can be used on all vessels not less than 2 inches in diameter. Steel folding plate and supporting bar; lever screw bench clamp. This groover is supplied with three groover dolls, 1/8, 5/32, and 7/32 inch wide.

Each

No. 502—For iron 20 ins. wide; lgth. over all 33 ins., width 11 ins.; ht. over all 18 ins.; lgth. handle 8 ins. $105 00

One in a wood box; weight each 100 lbs.

P. S. & W. COLUMBIAN TURNING MACHINE
With Standard.



Turning machines are intended for turning or curving the tops of vessels to receive wire. The wire is first formed into shape of vessel and then inserted in groove made by the turning machine. The operation is completed by the use of a wiring machine, closing metal completely around wire, adding finish and durability to the vessel. Two sets of faces furnished with each machine.

Capacity No. 22 Ga. Iron and lighter.

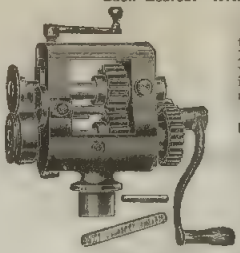
Each

No. 541—Diameter face 2 1/16 inches; length over all 12 ins.; height from bench 18 ins.; length handle 7 inches. $81 00

One in a wood box; weight each 25 lbs.

TINNERS' MACHINES

P. S. & W. TURNING MACHINE
Back Geared. With Standard.



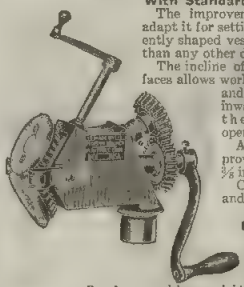
This machine is intended for heavy work. It is adapted for 3/16 inch wire and No. 20 gauge iron. It has cut gears and is back-geared 2 to 1.

Each

No. 547—Length over all 18 1/4 in.; height over all from bench 22 in.; length of handle 10 1/4 ins. $201 00

One in a wood box; wt. each 110 lbs.

P. S. & W. SETTING DOWN MACHINES
With Standard.



The improvements on this machine adapt it for setting down seams of differently shaped vessels to better advantage than any other design.

The incline of both upper and lower faces allows work to be held up or down, and seams to be started inward while setting down, thereby facilitating the operation of double-seaming.

An adjustable gauge is provided for seams up to 3/4 inch.

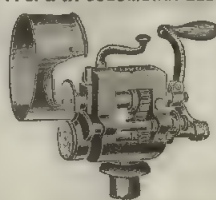
Capacity 24 Ga. Iron and lighter.

Each

No. 561—Lgth. over all 16 1/4 ins.; ht. over all from bench 19 in.; lgth. of handle 10 ins. $105 00

One in a wood box; weight each 31 lbs.

P. S. & W. COLUMBIAN ELBOW EDGING MACHINES
With Standard.



For edging elbows or pipe. Diameter of faces 2 1/16 inches.

Capacity No. 24 Ga. Iron and lighter.

Each

No. 551—Lgth. over all 12 in.; height over all from bench 18 in.; length of handle 7 ins. $76 50

One in a wood box; weight each 25 lbs.

METAL WORKERS' PUNCHES

P. S. & W IMPROVED LEVER PUNCH

It is made to remove light weight with strength. The gauges, both back and side, are easily adjusted.

Three dies and three punches accompany each machine. The sizes of the punches are 1/8, 1/16 and 1/4 inch and can be used on material as thick as No. 20 gauge.

Each

No. 780—Length 17 in.; height 6 1/4 in. $31 50

One in a wood box; weight each 9 1/2 lbs.

HOUSEHOLD LUBRICANT

For lawn mowers, sewing machines, bicycles, etc.; will not gum or corrode; put up in tins.

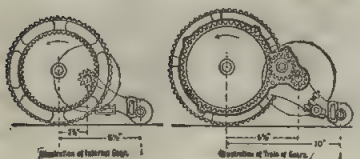
Per Dozen

No. 4—4 ounce cans..... $3 75

Three dozen in a wood case; wt. per dozen 6 lbs.

LAWN MOWERS

"TRAIN OF GEARS"



No. 47 No. 1890

Used On Blue Grass Mowers No. 1890 and No. 47.

Advantage of a Train of Gears over Internal Gear.

Train geared mowers run more easily and steadily owing to their great length of wheel base. Driving wheels may drop in a rut, but before the knives reach it the wheels are out again and the grass is cut smoothly, because the wheels and roller span the rut.

There is an additional advantage of better distribution of wear and tear and increased power and speed. The action is on the forward side of pinion and pull is down toward bed-knife, so when strain or cutting occurs the revolving cutter is always firm against bed-knife and cuts smooth.

Ball-Bearing Device used on Blue Grass Mowers.

Has 7/32 inch best quality steel balls. All of the ball-bearing cones used on these lawn mowers are made of the best quality of steel, thoroughly case hardened and the ball race ground to a perfect cylinder. These cones are tested before adjusted to the revolving cutter shaft.

All perfectly ground, dust proof, and made with as great a degree of perfection as the finest bicycle.

All blades used on these mowers are of the highest grade of crucible steel tempered in oil. The revolving cutters on these mowers are made a perfect cylinder by being ground on special grinding machines.

The success of the Blue Grass Mowers has been largely due to the patented ball-bearing adjustment, the stationary knife and the mode of adjusting the stationary knife bar; together with manner of fitting stationary knife bar.

LAWN MOWERS

—BLUE GRASS—

Stationary Knife Bar On Blue Grass Mowers.

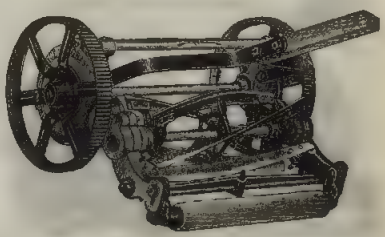
On all Blue Grass Mowers the stationary knife bar is squared in a most particular manner. The ends of the knife bar being faced and the bottom of the bar planed where stationary blade is attached. In the end of each stationary knife bar is inserted a steel cone, which is pivoted in the side plates and held firmly in place by heavy machine bolts, making the machine absolutely rigid. We do not know of any other lawn mower having as much machine work or expense on the stationary knife bar, as is used on these machines.

Stationary Blade On Blue Grass Mowers.

The stationary blade used on all Blue Grass Mowers is made from Disston saw steel and has a certain springy character that allows the revolving cutter to have a perfect joint at all times with the stationary blade; without frequent adjustment of the stationary blade; as is the case with most lawn mowers, using the thick heavy stationary blade which is very stiff and will not allow for any slight difference in the wearing qualities of the revolving blades.

The ratchets used on the Blue Grass Mowers are noiseless and never in operation when the mower is trundled from place to place or pulled backward. All mowers of similar character have noisy ratchets with working pins that are in operation at all times, shortening their life.

—BLUE GRASS—



Ball-Bearing. High Grass. Triple Gear.

Drive Wheels 10½ Inches Diameter, Cutter 6 Inches Diameter.

Triple gear open frame, long wheel base, five high grade crucible cast steel cutter blades, dust proof ball-bearing journals, knife bar mounted on milled steel cones, has a train of gears and drives from both ends; both revolving cutter and driving wheels operate on ball-bearings, so constructed that they never require adjusting. Silent in operation. Has patented center adjustment for adjusting the stationary blade at center to the revolving blades, independent of the ends.

Finished in red, silver and gold; varnished hardwood handle.

Nos.	1890-14	1890-16	1890-18	1890-20
Width cut, inches	14	16	18	20
Weight each boxed, lbs.	68	65	68	72
Each	$41 25	42 00	44 25	46 05

One in a wood box; handle loose.

LAWN MOWERS

—BLUE GRASS—

Ball-Bearing. High Grass. Double Gear.

Drive Wheels 11 Inches Diameter, Cutter 6 Inches Diameter.

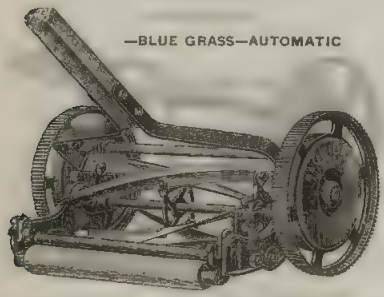
Extra long wheel base causing mower to run smoothly and cut easier over rough ground. Five heavy revolving cutter blades of extra heavy crucible cast steel. Stationary blade made of Disston crucible cast saw steel tempered in oil. Stationary knife bar is pivoted on steel cones. Highest quality dust proof cone and steel balls. Patented ball retainer. Center adjustment of stationary knife bar. By loosing jamb nut and running down screw, stationary blade can be raised at center to revolving cutter independent of the ends. Ball-bearing parts. Ball bearing cones and cups guaranteed never to wear out or require replacing.

Furnished in red and gold, varnished hardwood handle.

Nos.	4714	4716	4718	4720
Width cut, inches	14	16	18	20
Weight each, boxed, lbs	55	58	61	63
Each	$34 05	36 00	38 25	40 05

One in a wood box, handle loose.

—BLUE GRASS—AUTOMATIC



Ball-Bearing, High Grass, Drive Wheels 10 inches Diameter, Revolving Cutter 6 Inches Diameter.

Simplicity, durability and self-sharpening, no screws or bolts to adjust or rust, without complications, the only adjustment necessary is made with finger and thumb.

Extra long wheel base; four revolving cutter blades made of crucible steel, equipped with ball-bearings, that will never wear or require adjusting. Silent in operation, adjustable throughout; stationary knife bar pivoted on steel cones. No pressed cups used, cups and cones made of solid cone steel, ground perfect, best quality steel balls.

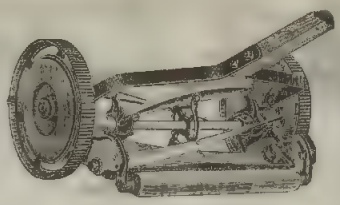
Finished in gold and carmine, varnished hardwood handle

Nos.	25-14	25-16	25-18	25-20
Width, cut, inches	14	16	18	20
Weight each boxed, lbs	55	58	61	63
Each	$34 05	36 00	38 25	40 05

One in a wood box, handle loose.

LAWN MOWERS

—BLUE GRASS—



Ball-Bearing.

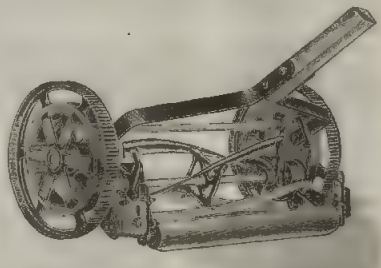
High wheel 10 inches, cutter 6 inches diameter, four revolving crucible cast steel cutter blades, bed knife of saw steel, cups, balls and cones ground perfect and are dust proof, ball bearing, silent in operation.

Finished in blue, silver and gold; varnished hardwood handle. Same ratchet as on ball-bearing high grass lawn mowers.

Nos.	1900-14	1900-16	1900-18	1900-20
Width cut, inches	14	16	18	20
Weight each boxed, lbs	48	50	53	58
Each	$30 00	31 20	32 55	34 80

One in a wood box, handle loose.

—BLUE GRASS—



Ball-Bearing, High Grass, Drive Wheels 10 Inches Diameter, Revolving Cutter 6 Inches Diameter.

Crucible spring steel ball-pivoted bed-knife; all shafting full ⅝ inch diameter; cones and cups will never wear or require adjustment and are made of solid cone steel; ground perfect; dust proof; adjustable throughout; silent in operation; best quality steel balls; patented ball retainer; steel wheel bearings; hardwood roller.

Finished in red, gold and silver; varnished hardwood handle.

Nos.	35-14	35-16	35-18
Width cut, inches	14	16	18
Weight each boxed, lbs	48	50	53
Each	$28 50	30 00	31 50

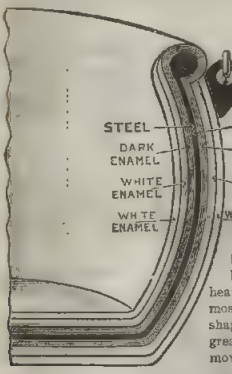
One in a wood box, handle loose.

—LEYDEN—ENAMELED WARE

Made from the best quality sheet steel triple coated with enamel. The outside is neatly marbleized a light blue and white, the inside is a pure white porcelain enamel, acid proof and free from poisonous substances. Rim, ears and handles are enameled a pure black.

This ware is made specially for us. Each piece is guaranteed thoroughly coated. This is a strictly high grade line of enamel ware at a reasonable price and one on which you can build up a large and satisfactory business.

Each piece is carefully selected, wrapped and labeled.



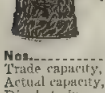
Note How Leyden Ware Is Made

Three separate and distinct coats of enamel protect the steel body in **Leyden Ware.** The body (STEEL), is much heavier than that used in most enameled ware. After shaping the body, all dirt, grease, etc. is entirely removed.

The first coat of enamel (DARK ENAMEL) is fused into the steel so thoroughly that it practically becomes part of the body, because the **liquid** enamel enters the pores of the steel and takes a most tenacious hold.

The second coat (WHITE ENAMEL), gives **Leyden Ware** its remarkable durability and quick selling value. Most ware lacks this protection.

The third coat (WHITE & BLUE ENAMEL), is a beautifully marbleized white and blue effect, with a hard porcelain finish very easy to keep clean.



COFFEE POTS

Seamed bottom. Enameled cover, hinged; riveted lip and round handle; spun knob on lid.

65	7 in.	1⅝ in.	1⅞ lb.	$4.50

DOUBLE END BLOCK

These planes have two slots, reversible cutters, seats and clamps. Can be used to plane close up in corners.

Not Adjustable.

NO.	Length	Cutter	Wt. Each	EACH
130	8 in.	1⅝ in.	1⅜ lb.	$2.50
131	8 in.	1⅝ in.	1⅝ lb.	4.00

BLOCK AND RABBET

A detachable side will easily change this tool from a block plane to a rabbet plane or vise versa. The cutter is set on a skew.

NO.	Length	Cutter	Wt. Each	EACH
140	7 in.	1⅜ in.	1⅝ lb.	$4.50

STANLEY PLANES

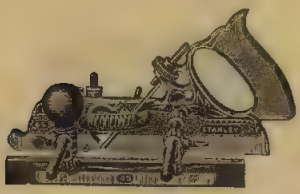
COMBINED BEADING AND MATCHING

Very handy for light work. Consist of a main stock, carrying a spur and a depth gauge, and forming a support for one side of the cutter, a sliding section, carrying a spur and forming a support for the other side of the cutter, and a fence with a 5-inch adjustment. The handle is metal, being a part of the main stock. Nickeled finish.

Seven plow and dado bits, 1-4, 5-16, 3-8, 7-16, 1-2, 5-8 and 7-8 inch; seven beading tools, 1-8, 3-16, 1-4, 5-16, 3-8, 7-16 and 1-2 inch; and a 1-4 inch tonguing tool.

NO.	Length	Wgt. Each	EACH
50	9¾ in.	3½ lb.	$10.00

BEADING, MATCHING AND RABBETING



This plane combines a main stock and a sliding section so arranged that cutters of different widths can be used. Each plane is fitted with adjustable fence or guide and a depth gauge, and also spurs for use in working across the grain. This plane can be used right or left hand.

This plane embraces (1) beading and center beading plane; (2) rabbet and fillister; (3) dado; (4) plow; (5) matching plane; (6) sash plane; and (7) superior slitting plane.

Each plane has seven beading tools (⅛, 3-16, ¼, 5-16, ⅜, 7-16, and ½ inch), ten plow and dado bits ⅛, 3-16, ¼, 5-16, ⅜, 7-16, ½, ⅝, ¾, and ⅞ inch), a slitting blade, a tonguing tool and a sash tool. Complete with twenty tools, bits, etc.

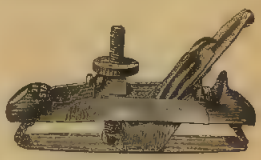
NO.	Length	Wt. Each	EACH
45	9¾ in.	10 lb	$20.00

CIRCULAR

Adjustable

This plane has a flexible steel face and may be shaped to any required arc, either concave or convex, by turning knob on the front of plane

NO.	Length	Cutter	Wgt. Each	EACH
113	16 in.	1¾ in.	3⅝ lb.	$12.00

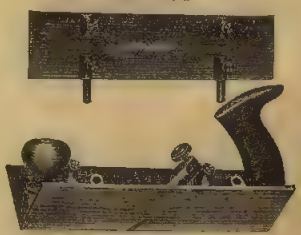


Victor—Nickel Plated

This is a very superior tool, and all its parts are specially designed with the object of eliminating any lost motion due to wear. There are less parts subject to lost motion in this plane than in any other circular plane. The ends of the flexible face being fixed and the force applied at the center, great accuracy of adjustment is possible and the face is most firmly held in position.

NO.	Cutter	Wt. Each	EACH
20	10 in.	1¾ in.	4 lb.	$12.50

CORE BOX



Nickel Plated

A tool much needed by pattern-makers, wheelwrights and others, for planing out semi-circles.

This plane is constructed so that the sides can be extended by additional sections, 2¾ inch wide, until a diameter of 10 inches can be worked, if desired.

Has one pair of additional sections for working semi-circles up to 5 inches in diameter.

NO.	Cutter	Wt. Each	EACH
57	10 in.	¾ in. 6¾ lb	$12.00

ONE IN A BOX.

STANLEY PLANES

IMPROVED DADO

The cutter is set on a skew. Plane is fitted with a depth gauge, adjustable by means of a thumb screw. Also with two adjustable spurs, which can be adjusted to take up wear as well as for depth of cut. Equipped with depth gauge and two adjustable spurs.

NO.	Length	Cutter	Wt. Each	EACH
39½	8 in.	⅝ in.	3¼ lb.	$4.50
39¼	8 in.	½ in.	3¼ lb.	4.75
39½	8 in.	⅝ in.	3¼ lb.	5.50
39¾	8 in.	¾ in.	3¼ lb.	5.50

TRAUT ADJUSTABLE DADO

This tool is accompanied by eight plow and dado bits (3-16, ¼, 5-16, ⅜, ½, ⅝, ¾, and 1¼ in.), a fillister cutter, a slitting-tool and a tonguing-tool. All except the slitting-blade are secured in the main stock on a skew. Nickel plated, with 11 tools, including plow bits, slitting and tongueing tools.

NO.	Length	Wt. Each	EACH
46	10½ in.	5 lb.	$15.00

IMPROVED RABBET

Improved

These planes will lie perfectly flat on either side and can be used equally as well with right or left hand while planing into corners or up against perpendicular surface. All have an iron stock and are fitted with a depth gauge and spur.

NO.	Length	Cutter	Wt. Each	EACH
190	8 in.	1¼ in.	2¾ lb.	$4.50
191	8 in.	1½ in.	2¾ lb.	4.00

93	6½ in.	1 in.	2¾ lb.	7.00

STANLEY PLANES

RABBET

Carriage Makers

Especially adapted for the heavy framing required in mining work, for carriage or wagon building, or in any work of similar nature. Cutters tempered and ground, honed ready for use, and are adjustable endwise by means of the adjusting wheel at the back of the frog. Also adjustable sidewise by lever located near the top and at the back of the cutter. The handles and knobs are made of highly finished, thoroughly seasoned rosewood.

NO.	Length	Cutter	Wt. Each	EACH
10½	9 in.	2⅜ in.	3½ lb	$8.00
10	18 in.	2⅜ in.	4½ lb	9.50

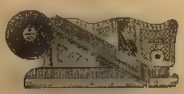
RABBET AND FILLISTER

The arm to which the fence is secured may be screwed into either side of the stock, thus making a superior right or left hand fillister, with adjustable spur and depth gauge.

Remove the arm to which the fence is secured, and a handled rabbet plane is had, and with two seats for the cutter so that tool can be used as a bull-nose rabbet if required.

NO.	Length	Cutter	Wt. Each	EACH
78	8½ in.	1⅝ in.	3 lb.	$5.00

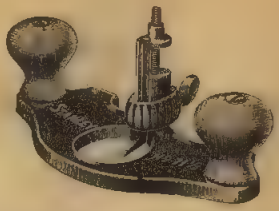
SIDE RABBET



Convenient tools for side rabbeting and turning dados, mouldings and grooves of all sorts. A reversible nose piece will give the tool a form by which it will work close up into corners when required. Nickel plated. Right and left hand.

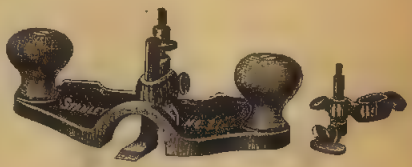
NO.	Length	Cutter	Wt. Each	EACH
98R	4 in.	½ in.	¾ lb.	$3.00
99L	4 in.	½ in.	¾ lb.	3.00

ROUTER



This tool will smoothe out the bottom of grooves, panels and all depressions below the general surface of any wood work and will rapidly rout out mortises for sash frame pulleys. Nickel plated, closed throat.

NO.	Length	Cutter	Wt. Each	EACH
71½	7½ lb.	¼, ⅜ in.	2½ lb.	$4.75



This improved tool will smooth bottom of grooves, panels and all depressions below surface of any wood work and will rapidly rout out mortises for sash frame pulleys.

7½ in. wide, nickel plated, open throat and with throat attachment, ¼ and ⅜ in. steel bits.

NO.	Wt. Each	EACH
71	2 ½ lb.	$6.00

SCRUB OR ROUGHING

For quickly planing down to rough dimensions any wide board. Has heavy round cutter, beech handle and knob, and nickel trimmings.

NO.	Length	Cutter	Wt. Each	EACH
40	9½ in.	1¾ in.	2 lb.	$3.25
40½	10½ in.	1¾ in.	2½ lb.	4.50

STANLEY PLANES

TONGUE AND GROOVE

The plane has two separate cutters, a suitable distance apart. When the guide, or fence, is set, both cutters work and a tongue can be made

The fence is hung on a pivot, and can be swung around, end for end. This movement covers one of the cutters, and also furnishes a guide for grooving an exact match for the tongue

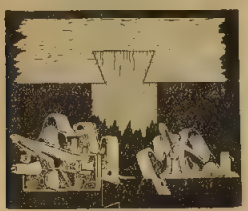
Nickel plated, adjustable cutter, stock and fence for ⅜ to 1¼ inch boards, including tongueing and grooving tools, adjustable cutter.

NO.	Length	Cutter	Wt. Each	EACH
48	10½ in.	5-16 in.	3 lb.	$8.00

Nickel plated stock and fence for ⅜ to ⅝ inch boards.

NO.	Length	Cutter	Wt Each	EACH
49	10 in	3-16 in.	3 lb.	$8.00

DOVETAIL TONGUE AND GROOVE



This novel tool accomplishes a result sought for many years by wood workers in general, namely, to form a dove-tail tongue and groove with one hand tool.

It will cut any size grooves and tongues to fit with sides at a flare of 20 degrees, where the width of the neck is more than one-quarter of an inch and the depth of groove not more than three-quarters of an inch. The tongue and groove are cut separately, and can be made with parallel or tapering sides. A circular containing instructions for assembling and operating is packed with each tool, or will be sent upon request. This circular also gives valuable suggestions as to the use of dovetail joints.

The compactness of tool is shown in the illustration, where the cut on left shows the plane assembled for cutting the tongue, and that on the right the plane assembled for cutting the groove. Handsomely nickel plated.

NO.	Length	Wt Each	EACH
444	9 in.	6 lb.	$16.00

Packed in a neat wooden box with all parts complete.

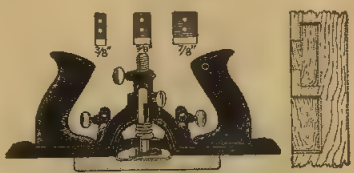
DOUBLE END MATCH

This tool has both tongue and groove irons. With one side a tongue can be cut, and by reversing ends the plow will cut a groove to fit. Tonguing tools are made wide on one side for use on thicker stuff than the plane will tongue and groove in the center.

NO.	Matches Boards	Cuts Grooves	Weight Each	EACH
146	⅜ in.	⅜ in.	1⅞ lb	$6.00
148	⅝ in.	½ in.	2⅝ lb.	6.75

ONE IN A BOX

DOOR TRIM



Will make mortises for butts, face plates, strike plates, escutcheons, etc., up to a depth of 5-16 and a width of 3 inches. The cutter can be instantly set to work from either end of plane or across it. In addition the cutter is cushioned by a spring which prevents taking a heavier chip than can be easily carried. A fence regulates the position of the cut and insures the sides of the cut being parallel. The depth of the cut is governed by a positive stop.

By removing the fence and locking the cutter post with the thumb screw instead of using the spring a very superior router plane is obtained. The bottom is designed so that an extra wooden bottom of any size desired can be screwed on, enabling the user to router on larger openings. Japanned finish. Rosewood handles.

Three forged steel cutters, ⅝, ¾ and ⅞ inches wide.

NO.	Length	Wt. Each	EACH
171	11 in.	3 lb.	$9.00

ONE IN A BOX.

EDGE TRIMMING PLANE

Designed for smoothing the edges of boards, has right angle guide and cutter works on a skew, giving an easy shaving cut, beveled wood blocks may be attached to guide for making slanting cuts.

NO.	Length	Cutter	Wt. Each	EACH
95	6 in.	⅝ in.	1¼ lb.	$3.75

STANLEY PATENT UNIVERSAL PLANES

This plane consists of:—

A Main Stock (A) with two sets of traverse sliding arms, a depth gauge (F) adjusted by a screw, and a slitting cutter with stop.

A Sliding Section (B) with a patent vertically adjusted bottom

The Auxiliary Center Bottom (C) is to be placed in front of the cutter, as an extra support, or stop, when needed. The bottom is adjustable both vertically and laterally.

Fences (D) and (E). Fence D has a lateral adjustment by means of a screw, for extra fine work. The fences can be used on either side of the plane, and the rosewood guides can be tilted to any desired angle, up to 45 deg., by loosening the screws on the face. Fence E can be reversed for center beading wide boards.

An Adjustable Stop to be used in beading the edges of matched boards is inserted on the left hand side of sliding section (B).

Tools and Bits for No. 55 Plane

2 sash tools, 2 match tools, 1 slitting tool, 1 fillister tool, 10 plow and dado bits, 9 beading tools, 8 fluting tools, 6 pair hollows and rounds, 6 reversible ogee bits, 6 pair quarter hollows and rounds, 6 Roman ogee bits, 6 Grecian ogee bits, 12 reed tools, 6 quarter rounds with bead.

This tool in the hands of an ordinary carpenter can be used on all lines of work covered by a full assortment of so called fancy planes.

Nickel plated Universal plane with 52 bits, etc., adapted to 93 different uses. Arranged in four separate cases.

NO.	Length	Wt. Set	SET EACH
55	10 in.	16 lb.	$42.00

PRICE LIST OF PLANE IRONS

It will be noted in many cases the same single iron fits a number of different planes, but the cap iron (which combined with the single iron makes the double iron), is not the same on the iron, wood and circular planes and consequently is not interchangeable. In ordering, it is necessary to give the number of the plane, size of iron and state whether single or double iron is required.

BEADERS AND BURNISHERS

UNIVERSAL HAND BEADERS

Excellent for beading, reeding or fluting straight or irregular surfaces and for light routering. Furnished with a square gauge for straight work and an oval gauge for curved work. Handles are curved so as to insure ample room between the workman's hands and the surface of work. Made entirely of metal. Nickeled finish.

Eight cutters, sharpened at both ends, comprising: six single beads, 1-8, 3-16, 1-4, 5-16, 3-8 and 1-2 inch; two fluting tools, 3-16 and 1-4 inch; four reeding tools, (2 beads 3-16 inch, 3 beads 1-4 inch, 3 beads 1-8 inch, and 4 beads 1-8 inch); two routers, 1-8 and 1-4 inch; and a 5-8 inch blank which can be shaped as desired.

NO.	Length	Wgt. Each	EACH
66	5 in.	1⅞ lb.	$29 00

SINGLE HAND BEADERS

For all kinds of straight beading, reeding for fluting. Metal body; maple handle, well ferruled; nickeled finish.

Seven cutters, sharpened at both ends, comprising: six single beads, 1-8, 3-16, 1-4, 5-16, 3-8 and 1-2 inch; two fluting tools, 3-16 and 1-4 inch; four reeding tools, (3 beads 3-16 inch, 2 beads 1-4 inch, 3 beads 1-8 inch, 4 beads 1-8 inch); and a 5-8 inch blank.

WARREN STANDARD HARDWARE STORE FIXTURES

Warren Standard Hardware Store Fixtures are made on the sectional, interchangeable unit system.

All cabinets units are exactly the same outside dimension and the base units correspond to the cabinet units in length. When set up and fastened together they come into perfect alignment, and are as solid as if built in the store A merchant can fit up his entire store in one day, or at any time he wishes to rearrange the location of any line of goods or move into another building, these sections can be moved as easily as a fitting cabinet or office desk.

Cabinets—Standard are 100⅞ in. long -105⅞ in with end cornice—54 in. high, 15⅞ in. deep—17⅞ in. including cornice. .

Bases—All Warren bases are 100⅞ in long, 31½ in. high, 30 in. deep

Material—The outside exposure is made of select white oak. All interior construction of soft wood usually poplar.

Finish—The finish for all Warren Standard Fixtures is antique oak, hand rubbed dull This finish will always be sent unless otherwise specified Samples of finish sent on application.

Felt—Unless instructed, all sample boards will be covered and sliding glass door cabinets lined with all wool red felt

How to Order—To make up an order it will be only necessary to use catalogue numbers of different units desired in order they are to be placed in the store. Send pencil sketch with numbers of different units—cabinet and bases inserted—showing relative location of each. State whether fixtures are to be placed on RIGHT or LEFT side of store as you enter front door.

WARREN STANDARD "B" HARDWARE STORE FIXTURES

Warren's productions are made on the Sectional, Interchangeable Unit System.

The Bases are 8 ft. 4⅝ in. long, 2 ft. 7½ in. high, and 2 ft. 6 in. deep. All Cabinets are 8 ft. 4⅝ in. long, 4 ft. 6 in. high and 1 ft. 3⅜ in. deep.

All outside exposures made of White Oak. All interior constructions of soft wood, usually poplar.

All Standard "B" Fixtures have a matched and beaded back, protecting stock from damp walls or possible loss of goods by being misplaced or falling down back of fixtures. All fixtures are built amply strong to sustain the weight of all Hardware Goods and every detail of trimming is complete, including Display Stands, Racks, Brackets, Shelves, Drawer-Pulls, Card Frames, etc.

The regular finish for Warren Standard "B" Fixtures is "Mission Tavern Oak" and this finish will always be furnished unless otherwise ordered. Samples sent on application.

Unless otherwise specified, Sample Boards will be covered and Sliding Glass Door Cabinets lined with rich Green felt.

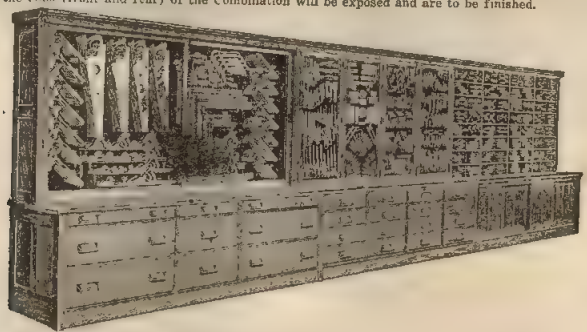
When ordering Warren Standard "B" Fixtures, use the catalog numbers of the Combination or single Units desired.

Advise on which side of store, entering the front (right or left) Fixtures will be placed, and send a list of catalog numbers of the different Units desired.

Advise the order the different Units (Cabinets and Bases) will be placed in the store, i. e., which Base will be first, second, third, fourth, etc., and which Cabinet will be first, second, third, fourth, etc., from the front of store.

Advise if Fixtures will be used in conjunction with, joined to or used in any way with "Warren" or other fixtures.

Advise if the ends (front and rear) of the Combination will be exposed and are to be finished.



No. 200 Cabinet. No. 100 Base. | No. 242 Cabinet. No. 112 Base. | No. 270 Cabinet. No. 118 Base.

HIBBARD POCKET KNIVES

FULLY GUARANTEED TO GIVE PERFECT SATISFACTION

Made by American workmen. Blades are finest quality Crucible Steel, TEMPERED BY A NEW METHOD WHICH INSURES A UNIFORM AND LASTING EDGE. Sharpened ready for use. In whetting, hold at an angle of 18 degrees on an OIL STONE, not a grindstone.

WE ETCH YOUR NAME, FREE OF CHARGE, ON THESE KNIVES WHEN REQUESTED

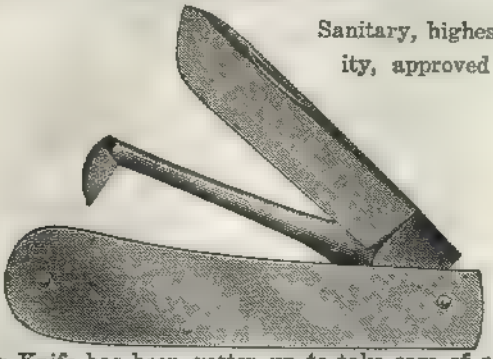
NICKEL SILVER HANDLE VETERINARY AND CASTRATING KNIFE

Sanitary, highest quality, approved shape.



This Knife has been gotten up to take care of an ever-increasing demand for a knife of this kind, originating not only from the Professional Veterinarian but also from the Farmer and Stockman who himself prefers to perform operations on his live stock.

On account of the handle being made of nickel silver the knife can be freely immersed in boiling water to be sterilized, the handle will not crack or absorb dirt, thereby making this knife **Absolutely Sanitary.**

The shape is of the most approved pattern and comfortably fits the hand. The speying and hook blade are made of the finest Wardlows' English Crucible Cutlery Steel, properly tempered, ground and whetted to a very keen and lasting edge. Every knife is unconditionally warranted.

No. 2541½P—1 large speying blade and 1 hook blade, nickel silver handle, length 3½ in. when closed, per dozen **$24.00**

HALF DOZEN IN A BOX

NICKEL SILVER HANDLE SPEYING KNIFE

Sanitary, highest quality, approved shape.

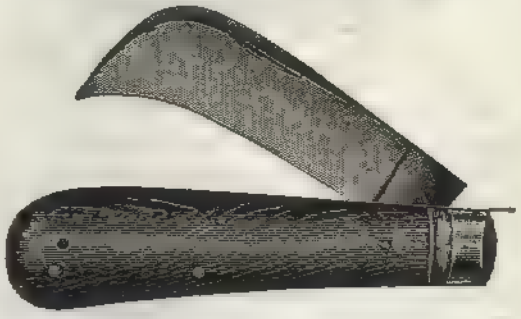
The result of an ever-increasing demand for a pocket knife of this kind.

Perfectly sanitary, can be immersed in boiling water to be sterilized. The shape is of the most approved pattern and properly fits the hand. The Speying blade is made of the finest Wardlow's English Crucible Cutlery Steel, tempered, ground and whetted to a firm and lasting edge. Every knife is unconditionally warranted.

No. 104½—1 large Speying blade, handsomely etched **speying,** nickel silver handle, length 3½ in. when closed, per dozen **$10.50**

HALF DOZEN IN A BOX

PRUNING, KAFFIR CORN, MAIZE, LINOLEUM AND ROOFING KNIFE COMBINED IN ONE



Most desirable shape for pruning and trimming shrubbery, trees, etc., for cutting Kaffir Corn and Maize, also for cutting Linoleum, Roofing, Rubber, etc.

The blade is of a very heavy gauge, and is made of the finest Wardlows' English Crucible Cutlery Steel, tempered ground and whetted to keen and lasting cutting edge.

The handle is of the finest South American Cocobola, steel lined, and has hole through end for attaching to chain or rope.

Each knife is unconditionally warranted.

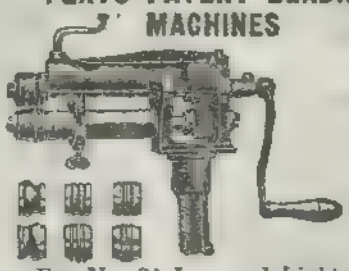
PEXTO PATENT CRIMPING AND BEADING MACHINES

For 26 Gauge and Lighter.

For crimping or beading stove pipe, elbows, furnace pipe, etc., construction throughout is exceedingly strong and rigid, and permits of easy and rapid adjustment, depression of rolls accomplished by foot treadle, contact of upper beading roll is adjusted by lever, which also gives an independent adjustment for raising upper beading roll, taking same out of contact with lower roll, if crimping only is desired, adjustment of this lever is affected by means of an eccentric device, handy and practically instantaneous in action. Application of this feature greatly increases simplicity, as operation of crimping alone can be performed without substituting blank collars for beading rolls. Crank adjustable to light or heavy work.

No. F602—With treadle, w't each 38 lbs.★ .....each $56 00

PEXTO PATENT BEADING MACHINES

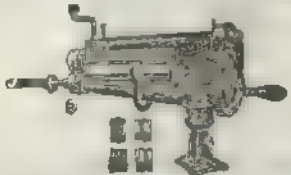


For No. 24 Iron and Lighter.

Size of beads, Ogre ¾ in., Triple ⅝ in., Triple Coffee Pit ⅝ in., Single ⅜ in.

Beading or swaging machines are intended for stiffening and ornamenting pipe, bodies of pails, cans, boilers, etc.

No. E620—6 in. throat, with four pairs rollers and stand, w't 50 lbs., each $56.00



For No. 20 Iron and Lighter.

Illustration shows single beading rolls and supporting arm attached

No. F617—13 in. throat, with three pairs rollers and stand, w't 140 lbs., each★ $110.00

STEEL CORNICE BRAKES

The Apron or Bending Leaf reinforced by angular shaped strengthening plate. Substantial truss rods provided for additional support and adjustment.

Five Formers, all sizes in general use for making moulding, furnished.

A Steel Angle Bar is bolted to apron to give additional leverage when bending extra heavy material.

Stop Gauges furnished free of cost.

The Clamping of material is done by means of an eccentric on each end.

When ordered with Eccentric Levers, connected brakes are so fitted without additional cost.

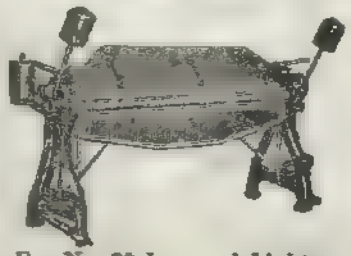
Set Screws provided on ends which move the upper jaw forward and back to accommodate heavy or light material and for sharp or rounding bends.

An Eccentric Bushing in lower part of connecting link allows for greater or less pressure on material.

The Angle Bar, as well as the special steel bar, is removable from the apron and narrow opposing members can then be formed. Apron edge is ⅜ inch, from which ¼ inch is detachable.

No. F4—Forming edge 8 ft. 1 in. long, for cornice and other light work as well as ¾ in. and more, bends on No. 18 gauge, **complete with angle bar** and five formers, w't 1000 lbs.★ .....each $324.00

HARE'S PATENT FOUR LEAF CORNICE BRAKES



For No. 20 Iron and Lighter.

The bending leaf is properly balanced by weights, and is provided with a forcing bar for beding heavy iron.

Seven formers to be attached to the brake for making circular bends are furnished, sizes 3, 2½, 2, 1½, 1¼, 1 and 1 in.

No. F685—98 in., w't 3650 lbs., each★ .....$.....

PEXTO TINNERS' MACHINES

TURNING

COLUMBIAN, solid frame, with two sets of faces, for 22 iron and lighter.

No. 542—Large, diam. of faces 3 in., with stand, w't 31 lbs., each $44 00

No. 541—Small, diam. of faces 2 1/16 in., with stand, w't 25 lbs., each $40.00

Encased, adjustable boxes, with two sets of faces, for 24 iron and lighter.

No. 546—Large, diam. of faces 3 in., with stand, w't 28 lbs...each $58.00

No. 545—Small, diam. of faces 2 1/16 in., with stand, w't 23 lbs., each $54.00

Turning machines are used for turning the tops of vessels to receive wire.

WIRING

COLUMBIAN, for 22 iron and solid frame, lighter.

No. 525—Diam. of faces 8 in., with stand, w't 31 lbs. .....each $46.00

Encased adjustable boxes, for 24 iron and ughter.

Wiring machines follow the turning machines. They are intended for rolling sheet metal tightly around wire after its seat has been prepared by the turning machine.

No. 526—Diam. of faces 3 in., with stand,w't 28 lbs, ...each $60.00

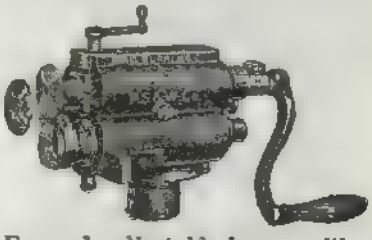
BURRING

COLUMBIAN, solid frame, with extra upper face, for 22 iron and lighter.

Burring machines are used for creasing, edging rims of covers for pails, boilers, etc. and for preparing circular edges of bottoms and bodies of vessels for double seaming.

No. 577—Large, diam. of face 2 1/8 in., with stand, w't 25 lbs...each $38 00

No. 576—Small, diam. of face 1 1/8 in., with stand, w't 21 lbs...each $34.00



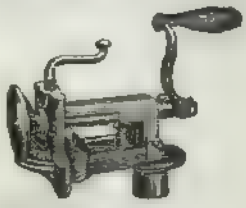
Encased, adjustable boxes, with extra upper face, for 24 iron and lighter.

Burring machines are used for creasing, edging rims of covers for pails, boilers, etc. and for preparing circular edges of bottoms and bodies of vessels for double seaming.

No. 580—Large, diam. of face 2 1/8 in., with stand, w't 23 lbs. ...each $52.00

No. 579—Small, diam. of face 1 1/8 in., each $48.00

SETTING DOWN

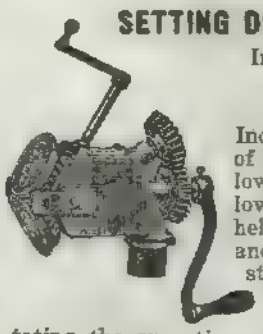


COLUMBIAN, solid frame, for 24 iron and lighter.

Setting down machines follow the burring machines pressing the edge of bottom onto the flange of body in preparation for double seaming.

No. 556—With stand, for seams up to 3/16 in., w't approximately 23 lbs., each $48.00

SETTING DOWN



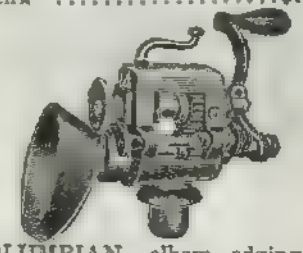
Improved with Adjustable Gauge.

Inclined position of both upper and lower faces allows work to be held up or down and seams to be started inward while setting down, facilitating the operation of double seaming.

No. 562 can be fitted with pulley for power at extra cost.

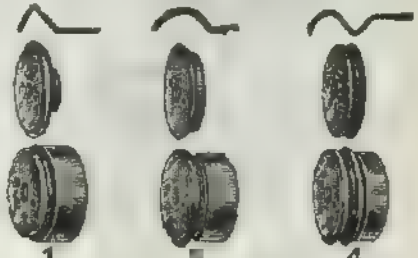
No. F561—Light, for seams up to 3/8 in., capacity 24 iron and lighter, with stand, w't 31 lbs.★ each $56.00

No. F562—Heavy, for seams up to 1/2 in., capacity 18 iron and lighter, with extra heavy stand, w't 100 lbs., each★ $110.00



COLUMBIAN, elbow edging machine, for 24 iron and lighter.

Cut shows position of an elbow in turning the edge; also the form of crease made by the machine to enter corresponding section in completing the elbow as made with Rolls No. 1.



Rolls type No. 1 produce V-shape edges on both elbow sections.

Rolls No. 3 and 4 are preferable for elbows riveted or grooved with loose joint. Faces can be used with and are readily adapted to either Columbia or Encased small turning machine.

Diameter of faces 2 1/8 in.

No. 551—Columbian Elbow Edging Machine, with standard and one pair of rolls, w't each 25 lbs., each $40.00

Specify Type of Rolls Desired.

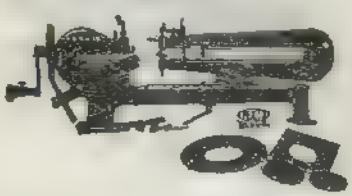
TINNERS' MACHINES

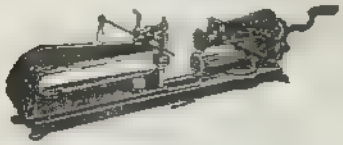
PEXTO RING AND CIRCULAR SHEARS



Intended for cutting circles or internal rings and irregular curves. In circular cutting the blanks are clamped between rubber covered discs by means of a quick acting, eccentric, lever device adjustable for exerting extreme uniform pressure to prevent the work from slipping and insuring more accurate cutting. The bed on which the Tail Piece slides is graduated in inches and fractions of inches for quick setting of the Tail Piece for the size circle to be cut. The angular position of Cutters allows for as clean cutting on the inside as on the outside of circle.

Nos.	F298	F299
Will cut circles, in.	3½ to 22	3½ to 38
W't, lbs.	195	290
Each	$140.00★	$80.00★

WAUGH'S PATENT CIRCULAR SHEARS



For No. 22 Iron and Lighter.

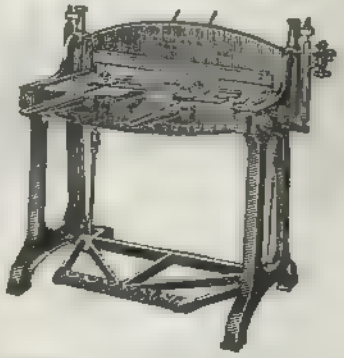
No. E278—Will cut circles from 2¾ to 22 in., w't 125 lbs. ....each $110.00

Suitable for cutting circles, trimming or squaring tin plate, sheet iron, brass and copper.

A graduated scale is attached to the bed for the purpose of securing quick and accurate adjustment of the sliding arm.

They are fitted with quick-acting eccentric lever, which clamps material between discs with great rapidity and releases the blank instantly.

PEXTO SQUARING SHEARS



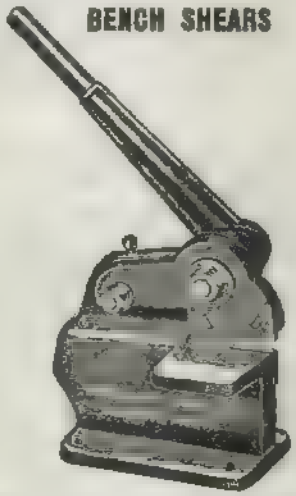
Capacity No. 18 Gauge Iron and Lighter.

No. E132A—Cuts 30 in., w't 540 lbs., each $190.00

No. E137A—Cuts 36 in., w't 650 lbs., each $260.00

Furnished with complete gauge equipment, one pair front arms. No. 137A has hold-down attachment.

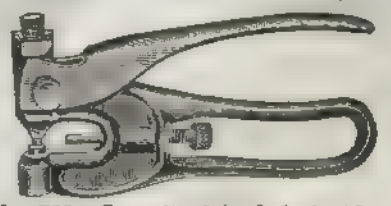
BENCH SHEARS



Made of best materials, blades of crucible tool steel, useful in all metal working shops, tool rooms, garages.

For cutting automobile brake bands, leather belting, strip steel.

No. F20—Length of blade, 3 in., capacity 12 gauge, w't each 24 lbs., each★ $30.00



No. 789—Capacity ¼ in. hole in 16 ga. iron with three punches and dies, ⅛, 5/16 and ¼ in. Length over all 8¼ in., depth of throat 1½ in., w't 3 lbs. .....each $15.60

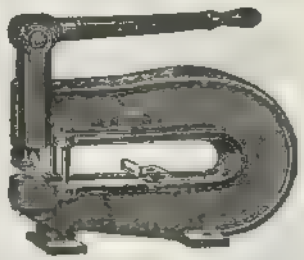
PEXTO COMBINATION SHEARS AND PUNCHES

These machines are suitable for both cutting and punching metal. They may be used for cutting ¼ inch iron and 5/16 and ½ inch narrow bars. The No. E678 will punch the center of a circle 5½ in. in diameter and the No. E679, 5½ in. Four Punches are put up with No. E678, viz., ⅛, 5/16, ¼ and 5/16 in. Five Punches are put up with No. E679, viz., ⅛, 5/16, ¼, 5/16 and ⅜ in.

No. E678—4½ in. cut, will punch ¼ in. iron, w't 105 lbs., each $72.00

No. F679—5½ in. cut, will punch 3-16 in. iron, w't 122 lbs., each★ $88.00

PEXTO SAMPSON PUNCHES



Will punch No. 9 iron with and No 12 without, "stay bolts" and will center on 30 in. sheets without and on 7 in. sheets with them.

No. E675—Improved, bolt fastened, adjustable gauge depth of gap 15 in., 3 sets of dies and punches, ⅛, 5/16 and ¼ in., w't 125 lbs. .....each $80.00

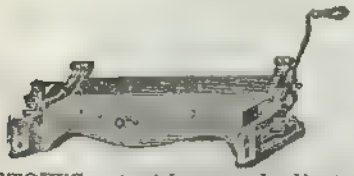
HAND PUNCHES

Made with compound lever principle, blades solid crucible tool steel, running full length of jaw.

No. F30—Total length 33 in., length of blade 8 in., length of cut 4½ in., capacity 12 gauge, w't each 16 lbs. each★ $38.00

TINNERS' MACHINES

FOLDING MACHINES

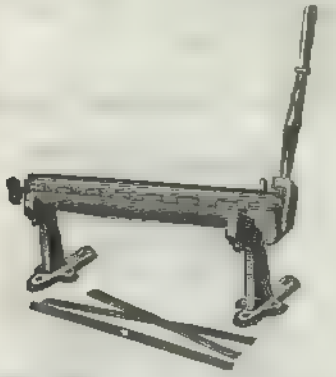


STOW'S patent improved adjustable bar folder for No. 22 iron and lighter.

The gauge is operated by hand wheel in front of machine. Set screw in front at left holds gauge firmly in place and secures a fold or lock of uniform width the entire length. These machines form square joints or angles and turn sharp edges, also round edges for inserting wire. Locks ⅛ in. to 1 in. can be formed.

No. E62—20 in., w't 100 lbs., each $110.00

No. E63—30 in., w't 180 lbs., each $130.00



WRIGHT'S, 30 in., improved, for No. 24 iron and lighter.

This machine will turn locks of different widths on any length of sheet. May be used on material as thick as No. 24 gauge.

No. E1—Will turn locks ¼ and ⅜ in., w't 80 lbs. .....each $56.00

No. E12A—Will turn locks ¼, ⅜, ½ and ⅝ in., w't 90 lbs., each $80.00

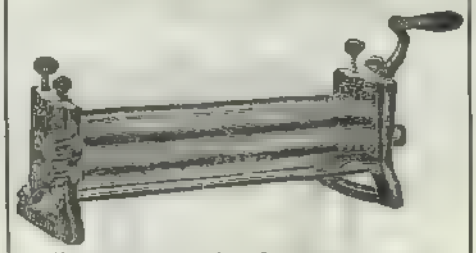
30 In. Long.

Will form 20 iron into 10 in. or 22 iron into 5 in. cylinders.

Grooves are cut in rolls to allow work being formed after wiring.

No. E357—2 in. rolls, w't 140 lbs., each $48.00

PEXTO FORMING MACHINE



Patent stove pipe formers, compensating gear, 30 in. long.

No. E374 will form 20 iron into 10 in., or 22 iron into 5 in. cylinders.

No. E373 will form 22 iron into 8 or 10 in. cylinders.

Gears are machine-cut steel and rolls are made of special rolled hard steel. Grooves are cut in rolls to allow forming of cylinders after wiring.

No. E373—2 in. rolls, w't 140 lbs., each $58.00

Will form 20 iron into 10 in., or 22 iron into 5 in. cylinders.

These machines are much more easily adjusted and can be set for forming any desired size of cylinder in much less time than is required to set others. They are made with Slip Rolls, so that small work can be readily taken from the end after it has been formed.

No. E382—Grannis', patent slip roll stove pipe former, with compensating gear, 2 in. rolls, 30 in. long, w't 150 lbs. .....each $72.00

EAVE TROUGH END FORMERS

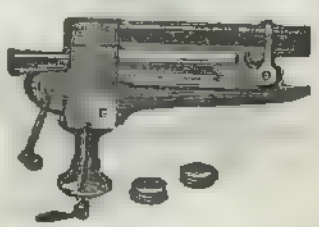
The Tool.

The Work.

No. 6—Bishop's, cast iron Trough, in.	4	4½	5
W't, lbs.	3½	4	5
Each $1.20		1.30	1.60

For closing end of eave trough in corrugations as shown in illustration.

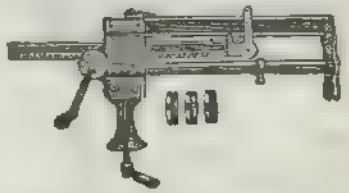
PEXTO BRASS MOUNTED GROOVING



With steel bar and milled horn, for No. 24 iron and lighter.

No. E502—20 in., three grooving rolls, one each ⅛, 5/32 and 7/32 in., with standard, w't 100 lbs.... each $64.00

IMPROVED PATENT GROOVING MACHINES



For No. 22 iron and lighter.

Grooving horn is reversible so that either the flat surface or one of the groves that are planned into the horn can be turned upward.

One smooth or flattening roll and three grooving rolls are furnished.

No. F507—30 in., rolls 5/32, ¼ and ⅜ in., w't 110 lbs.★ .....each $110.00

PEXTO IMPROVED PATENT GROOVING MACHINES

Improved Machine Standards.

No. 975—For use with all except wiring machine, size of hole 1⅜ in., height over all from bench 9¾ in., w't each 10½ lbs. .....each $3.00

No. 976—Wiring machine, size of hole 1⅜ in., height over all from bench 9¾ in., w't each 11 lbs., each $3.00

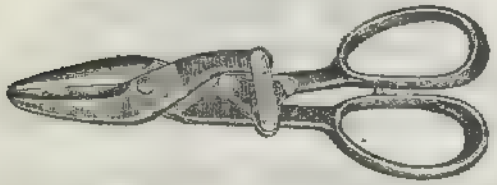
TINNERS' SHEARS OR SNIPS

CRUSO STRAIGHT

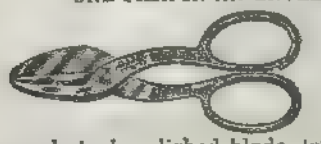


No. 19—Cruso, solid forged steel, 12½ in. long, cut 3 in., w't per pair 1¾ lbs. .....per pair $1.80
ONE PAIR IN AN ENVELOPE, FOUR PAIRS IN A BOX

HOUSEHOLD

No. 18—Cruso, solid forged steel, length 10 in., cut 2¾ in., w't per pair 1 lb., per pair $1.40
A good serviceable snip, suitable for general use, at a low price.
ONE PAIR IN AN ENVELOPE

Cast iron, ground blades, black handles.
No. 20—Length 11½ in., cut 2½ in., w't 2¾ lbs.. each $0.50
ONE PAIR IN AN ENVELOPE



POCKET SNIPS

Solid forged steel, polished blade, length 7 in., cut 2 in., w't per pair ½ lb.

No. 514 CVB—Polished and blued handles, per pair $1.50

No. 214 Cruso—Japanned handles, ...per pair $1.30
ONE PAIR IN AN ENVELOPE; SIX PAIRS IN A BOX

REYNOLDS DENTAL OR JEWELERS

Japanned handles, nickel plated blades.

Nos.	21	22
Length, in.	6½	6½
Cut, in.	1½	2
W't, pair, lbs.	½	⅝
Per pair	$1.30	1.50

HALF DOZEN IN A BOX

COMPOUND LEVER SNIPS
SEARIGHT PATENT

Finest quality crucible steel tempered by the most approved process.

Nos.	108	110	112	114
Length, in.	8	10	12	14
Length cut, in.	1½	2½	3	3½
W't, pr., lbs.	¾	1½	2½	3
Per pair	$5.50	6.50	9.00	10.50

Has three times the power at the point as the ordinary snip and is but a trifle heavier.

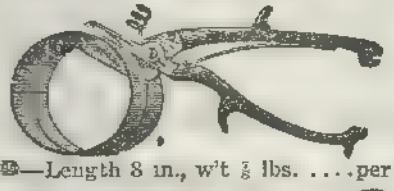
"TROJAN" SHARP POINTED SNIPS

No. 79—High grade steel, japanned handlse, length 13 in., 2½ in. cut, w't per pair 1⅝ lbs. .....per pair $6.00
Adapted for cutting sheet metal, pasteboard, mica, linoleum, veneering, etc. Straight or curved lines.
ONE PAIR IN A BOX

HAWK'S BILL

Improved pointed curved hand shears.
No. 15—Pointed snips, blade 3 in., entire length 11¾ in., w't per pair 1⅛ lbs. ..... per pair $6.00
Capable of cutting in sheet metal trimmings of any size and shape. Letters easily cut. Especially adapted for cutting off the bottoms of metal vessels and openings in pipes or cylinders.
ONE PAIR IN A BOX

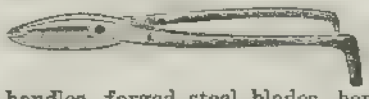
CVB COMBINED SHEARS AND PIPE CRIMPERS



No. 91 CVB—Length 8 in., w't ⅝ lbs. ....per pair $4.50

Polished blades, gun metal handles, drop forged steel.
No. 92 CVB—Combined double cutting shear and pipe crimper, interchangeable parts, steel crimping jaws, length 12¾ in., actual cut 1¾ in., w't 2¼ lbs., per pair $6.00
ONE PAIR IN A BOX

BENCH



Japanned handles, forged steel blades, bent heels.

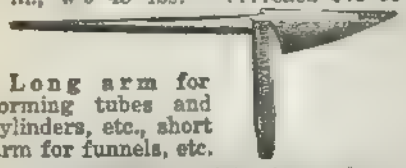
TINNERS' TOOLS

WROUGHT IRON STAKES WITH POLISHED STEEL FACES

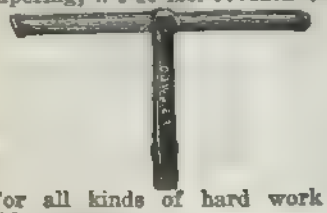
Used for beveled or square work.

No. E901—Beakhorn stake, round tapering end 16½ in., flat end 20-00 in., w't 45 lbs. ....each $48 00



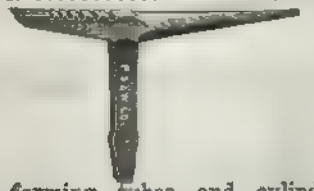
Long arm for forming tubes and cylinders, etc., short arm for funnels, etc.

No. 925—Common Blowhorn, large end 9 in., small end 17⅛ in., both tapering, w't 10 lbs. ...each $26.00



For all kinds of hard work and double seaming.

No. E921—Double Seaming, large end 17 in., small end 12 in., w't 84 lbs. .....each $42.00

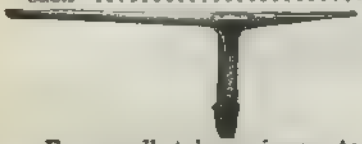


For forming tubes and cylinder creasing, etc.

No. 927—Creasing, with horn, round tapering end 9½ in., flat end 6½ in., w't 12½ lbs. .....each $26.00

For very small cylinders, etc.

No. 957—Needle case, flat end 8 in., small tapering end 10½ in., w't 4 lbs., each $13.00



For small tubes, rings, etc.

No. 956—Candle mould, small end 18 in., horn 8½ in., both arms round and tapering, w't 6½ lbs., each $16.00

WROUGHT IRON STAKES WITH STEEL FACE

Hatchet.

Nos.	943	944
Length of blade, in.	13	11
W't, lbs.	9	6
Each	$16.00	14.00

No. 936—Common square, face 2⅝×4½ in., w't 11 lbs. ...each $13.00

CAST IRON STAKES

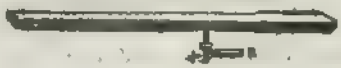
Polished faces, size A, 6 in.; size B, 8½×2⅝×3½ in.; size C, 5½×4½ in.; size D, 5½×4½×3⅝ in.

No. E949—Double seaming, with 4 heads, round, square, oblong and oval, w't 110 lbs. .....each $36.00

Cast iron, polished face, for locking seams on conductor pipe.

No. E971—Conductor, turned, large end 15 in., small end 11½ in. long, w't 30 lbs. .....each $18.00

HOLLOW MANDRELS



Cast iron, polished face, heavy clamps for attaching to bench.

No. E910—Entire length 3 ft. 4 in., flat part 9 in. long 6 in. wide, oval part 31 in. long, w't 60 lbs., each $18.00

PIPE MANDRELS

No. E65—Cast stove pipe, length 36 in., width 4½ in., w't 38 lbs., each $11.00

A low-priced mandrel for a dealer who does not have a regular tinshop.

BENCH PLATES

Cast iron, planed surface.

No. E981—37×8 in., w't 50 lbs., each $20.00

No. E982—30×8 in., w't 37 lbs., each $14.00

"HANDY" SEAMERS

Adjustable for seams of different widths up to ⅞ in. Can be used where larger seamers would not be practical. As it is light it can be carried in tool kit or pocket.

No. 791—Japanned, length 7 in., width 3⅜ in. ....per dozen $48.00

CUTTING NIPPERS

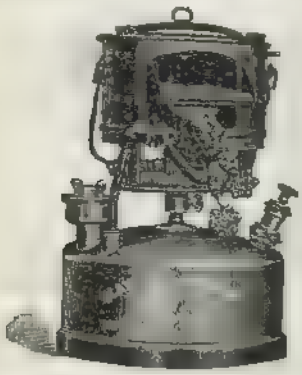
TINNERS' TOOLS

FIRE POTS

Burner produces an intensely hot flame, free from smoke, will heat irons and a pot of metal at one time. Top section may be removed and open flame used.

No. R50—Gasoline, heavy, welded steel tank, capacity 5 pts., fixed brass air pump, never leak type, positive needle valve, height 12 in., diam. at base 8¼ in., top 6 in., w't 13 lbs. .....each $22.30

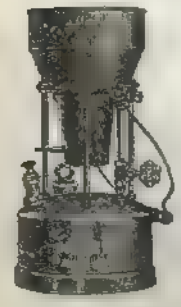


C and L.

Gasoline, seamless drawn steel tank with large funnel and filler, fixed brass pump, needle valve, fittings welded, not soldered. Heats irons and a pot of metal at samo time. Top section may be removed and open flame used.

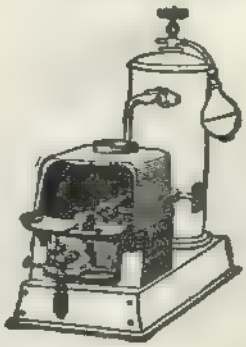
Nos.	R1	R5
Capacity, pts.	7	5
Height, in.	13	13
Diam. at base, in.	9¼	8¼
Diam. at top, in.	7	6¼
W't, lbs.	11	10¼
Each	$24.50	22.30

ONE IN A BOX

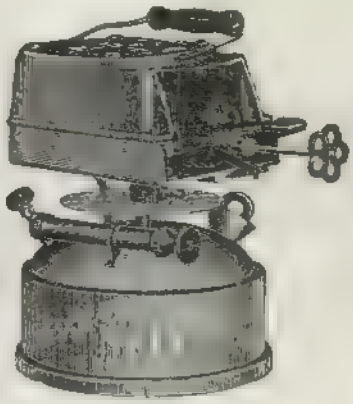


No. R21—C. and L., gasoline, seamless drawn steel tank, large funnel and filler, heavy uprights, large valve and heavy malleable top plate and one piece steel shield, burner and coils of extra heavy steel, needle point valve, automatic brass pump, height 17½ in., diam. at base 8½ in., w't each 9½ lbs. ..each $19.00

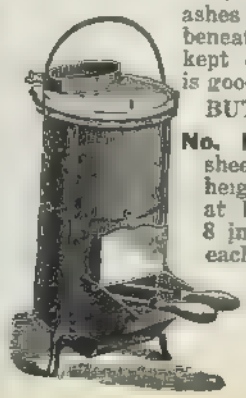
FIRE POTS



No. R3—Gem, gasoline, aluminum bronze, cast iron furnace, removable top, feed regulator, needle valve, all cast brass fittings, japanned wood handle, sliding drip cup, rubber pump bulb 21x7 in. sheet steel base, 10¼x4¾ in. sheet steel reservoir, w't 24 lbs. .....each $28.50



No. R15—Gasoline, seamless drawn steel tank, capacity 1 gal., brass air pump, needle valve, cast hood with opening for melting pot, cast "horse shoe" burner, w't 20 lbs..each $24.00



So constructed that ashes fall into pan beneath coal; fire is kept clear and draft is good.

BUTTLES Pattern

No. R76—Charcoal, sheet iron japanned, height 14 in., diam. at base 6 in., top 8 in., w't 32 lbs., each $9.00

ONE IN A BOX

RUBBER BULBS

No. 45—For gasoline fire pots, w't ¼ lb. .....each $1.00

MELTING POTS

Fits any Make Furnace

No. 65—Size 5 in., cast iron with bail, w't each about 3¾ lbs., each $1.20

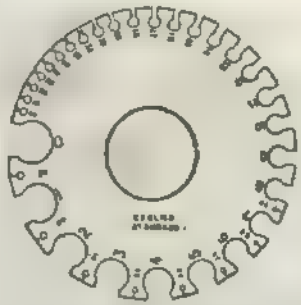
GAS FURNACES

DOUBLE BURNER, FOR NATURAL OR ARTIFICIAL GAS

Burner used gives an intense heat, makes no smoke and economizes time. Air blower not required when heating coppers.

No. R794—Sheet iron top, brick lined, arranged to receive two coppers, each $14.00

STANDARD WIRE GAUGES

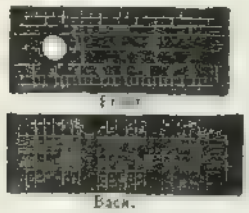


No. 2—Cast steel, round, small, gauges Nos. 6 to 36, w't per doz. each $28.80

No. 1—Cast steel, round, large, gauges Nos. 0 to 36, w't per doz. 2¾ lbs., per dozen $48.00

HALF DOZEN IN A BOX

RULES AND STRAIGHT EDGES



36 in. Long.

Laid off on one side with two rows of figures, the first like an ordinary steel square, by eights and inches up to three feet. The second is a line of circumferences divided into 113 equal parts; each of these divisions is again sub-divided into 8 equal parts, the large divisions representing an inch to a scale and sub-divisions an eighth of an inch. Therefore, against any diameter the circumference in this line to a scale in inches and eighths of inches can be found.

The reverse side of rule gives dimensions of measures and cans. The first two tables are for flaring measures. 1st. Liquid measures, 1 to 5 gal. 2d. Dry measures, 1 to 2 bu., giving diameter of top and bottom and height of each size and kind.

Third table is for cans with pitch or cone tops, 1 to 10 gal., giving diameter of top and body and compass marks for striking breast.

Fourth table is for flat top cans from 100 to 200 gal. (thirty-one different sizes), giving height and diameter.

Fifth table is for dry measure, from 1 qt. to 3 bu., giving height and diameter.

No. 5—Plain polished, w't 1¾ lbs., each $6.50

No. 95—Nickel plated, w't 1¾ lbs., each $8.00

MAGIC PATTERN RULES

Marked in circumference inches on the front and in inches and eighths on the back. The two slides have set screws into which trammel points are fastened. Particularly convenient for laying out elbow patterns.

No. 7—Lufkin's, nickel plated steel bar, length 4 ft. 7/16 in., square, with two slides, trammel points and flexible steel ribbon, with pattern chart mounted on linen, 19x23 in., hinged wooden case w't 7 lbs., each $26.00

TINNERS' RIVETS SETS

Forged from highest quality tool steel, blued finish.

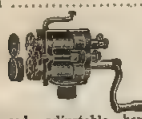
PEXTO TINNERS' MACHINES

TURNING

COLUMBIAN, solid frame, with two sets of faces, for 22 iron and lighter.

No. 542—Large, diam. of faces 3 in., with stand, w't 31 lbs., each $44.00

No. 541—Small, diam. of faces 2 1/16 in., with stand, w't 26 lbs., each $40.00



Encased, adjustable boxes, with two sets of faces, for 24 iron and lighter.

No. 546—Large, diam. of faces 3 in., with stand, w't 28 lbs...each $58.00

No. 545—Small, diam. of faces 2 1/16 in., with stand, w't 23 lbs., each $54.00

Turning machines are used for turning the tops of vessels to receive wire.

WIRING

COLUMBIAN, for 22 iron and solid frame, lighter.

No. 525—Diam. of faces 3 in., with stand, w't 31 lbs. .....each $46 00

Encased adjustable boxes, for 24 iron and lighter.

Wiring machines follow the turning machines. They are intended for rolling sheet metal tightly around wire after its seat has been prepared by the turning machine.

No. 526—Diam. of faces 3 in., with stand, w't 28 lbs, ...each $60.00

BURRING

COLUMBIAN, solid frame, with extra upper face, for 22 iron and lighter.

Burring machines are used for creasing, edging rims of covers for pails, boilers, etc. and for preparing circular edges of bottoms and bodies of vessels for double seaming.

No. 577—Large, diam. of face 2 1/2 in., with stand, w't 25 lbs...each $38 00

No. 576—Small, diam. of face 1 1/4 in., with stand, w't 21 lbs...each $34.00

Encased, adjustable boxes, with extra upper face, for 24 iron and lighter.

Burring machines are used for creasing, edging rims of covers for pails, boilers, etc. and for preparing circular edges of bottoms and bodies of vessels for double seaming.

No. 580—Large, diam. of face 2 1/2 in., with stand, w't 23 lbs. ..each $52.00

No. 579—Small, diam. of face 1 1/4 in., each $48 00

SETTING DOWN

COLUMBIAN, solid frame, for 24 iron and lighter.

Setting down machines follow the burring machines pressing the edge of bottom onto the flange of body in preparation for double seaming.

No. 556—With stand, for seams up to 5/16 in., w't approximately 23 lbs., each $48.00

SETTING DOWN

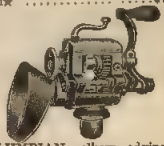
Improved with Adjustable Gauge.

Inclined position of both upper and lower faces allows work to be held up or down and seams to be started inward while setting down, facilitating the operation of double seaming.

No. 562 can be fitted with pulley for power at extra cost.

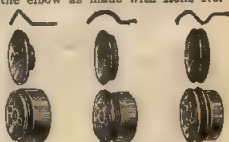
No. F561—Light, for seams up to 3/8 in., capacity 24 iron and lighter, with stand, w't 81 lbs.★ each $56.00

No. F562—Heavy, for seams up to 1/2 in., capacity 18 iron and lighter, with extra heavy stand, w't 100 lbs., each★ $110.00



COLUMBIAN, elbow edging machine, for 24 iron and lighter.

Cut shows position of an elbow in turning the edge; also the form of crease made by the machine to enter corresponding section in completing the elbow as made with Rolls No. 1.



Rolls type No. 1 produce V-shape edges on both elbow sections.

Rolls No. 3 and 4 are preferable for elbows riveted or grooved with loose joint. Faces can be used with and are readily adapted to either Columbia or Encased small turning machine.

Diameter of faces 2 1/2 in.

No. 551—Columbian Elbow Edging Machine, with standard and one pair of rolls, w't each 25 lbs., each $40.00

Specify Type of Rolls Desired.

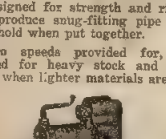
TINNERS' MACHINES

PEXTO CRIMPERS AND BEADERS

Connecting gears of machine cut steel, rolls of high grade steel, scientifically hardened. Adjustments are provided for regulating depth of crimp and bead.

Designed for strength and rigidity and produce snug-fitting pipe joints that hold when put together.

Two speeds provided for, back geared for heavy stock and direct drive when lighter materials are used.



Capacity—20 gauge iron and lighter, diameter beading rolls 1⅜₃₂ in., diameter crimping rolls, 1⅛₁₆ in., back gear, 3 to 1.

No. E585—Stove Pipe with crank screw, for depressing rolls, w't each 66 lbs. .....each $52.00

No. E591—Cornice Maker, diam. of rolls 1¹⁵⁄₁₆ in., back geared 3 to 1, w't each 65 lbs., each $50.00

CRIMPING

No. E285—Packham's for stove and conductor pipe, with standard, w't 24 lbs. .....each $24.00

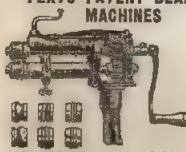
PEXTO PATENT CRIMPING AND BEADING MACHINES

For 26 Gauge and Lighter.

For crimping or beading stove pipe, elbows, furnace pipe, etc., construction throughout is exceedingly strong and rigid, and permits of easy and rapid adjustment, depression of rolls accomplished by foot treadle, contact of upper beading roll is adjusted by lever, which also gives an independent adjustment for raising upper beading roll, taking same out of contact with lower roll, if crimping only is desired, adjustment of this lever is affected by means of an eccentric device, handy and practically instantaneous in action. Application of this feature greatly increases simplicity, as operation of crimping alone can be performed without substituting blank collars for beading rolls. Crank adjustable to light or heavy work.

No. F602—With treadle, w't each 38 lbs.★ .....each $56.00

PEXTO PATENT BEADING MACHINES



For No. 24 Iron and Lighter.

Size of beads, Ogre 2 in., Triple ⅜ in., Triple Coffee Pit ⅜ in., Single ⅛₁₆ in.

Beading or swaging machines are intended for stiffening and ornamenting pipe, bodies of pails, cans, boilers, etc.

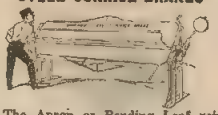
No. E620—9 in. throat, with four pairs rollers and stand, w't 50 lbs., each $56.00

For No. 20 Iron and Lighter.

Illustration shows single beading rolls and supporting arm attached.

No. F617—13 in. throat, with three pairs rollers and stand, w't 140 lbs., each★ $110.00

STEEL CORNICE BRAKES



The Apron or Beading Leaf reinforced by angular shaped strengthening plate. Substantial truss rods provided for additional support and adjustment.

Five Formers, all sizes in general use for making moulding, furnished.

A Steel Angle Bar is bolted to apron to give additional leverage when bending extra heavy material.

Stop Gauges furnished free of cost.

The Clamping of materials is done by means of an eccentric on each end.

When ordered with Eccentric Levers, connected brakes are so fitted without additional cost.

Set Screws provided on ends which move the upper jaw forward and back to accommodate heavy or light material and for sharp or rounding bends.

An Eccentric Bushing in lower part of connecting link allows for greater or less pressure on material.

The Angle Bar, as well as the special steel bar, is removable from the apron and narrow opposing members can then be formed. Apron edge is ⅛ inch, from which ¼ inch is detachable.

No. F4—Forming edge 8 ft. 1 in. long, for cornice and other light work as well as ⅜ in. and more, bends on No. 18 gauge, **complete with angle bar** and five formers, w't 1000 lbs.★ .....each $324.00

HARE'S PATENT FOUR LEAF CORNICE BRAKES

For No. 20 Iron and Lighter.

The bending leaf is properly balanced by weights, and is provided with a forcing bar for bading heavy iron.

Seven formers to be attached to the brake for making circular bends are furnished, sizes ⅜, 2½, 2, 1½, 1¼, 1 and 1 in.

No. F686—98 in., w't 3650 lbs., each★ .....$.....

TINNERS' MACHINES

FOLDING MACHINES

STOW'S patent improved adjustable bar folder for No. 22 iron and lighter.

The gauge is operated by hand wheel in front of machine. Set screw in front at left holds gauge firmly in place and secures a fold or lock of uniform width the entire length. These machines form square joints or angles and turn sharp edges, also round edges for inserting wire. Locks ¼ in. to 1 in. can be formed.

No. E62—20 in., w't 100 lbs., each $110.00

No. E63—30 in., w't 180 lbs., each $130.00

WRIGHT'S, 30 in., improved, for No. 24 iron and lighter.

This machine will turn locks of different widths on any length of sheet. May be used on material as thick as No. 24 gauge.

No. E1—Will turn locks ¼ and ⅜ in., w't 80 lbs. .....each $56.00

No. E12A—Will turn locks ¼, ⅜, ½ and ⅝ in., w't 90 lbs., each $80.00

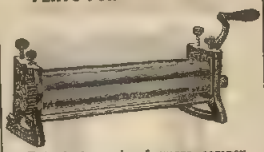
30 In. Long.

Will form 20 iron into 10 in. or 22 iron into 5 in. cylinders.

Grooves are cut in rolls to allow work being formed after wiring.

No. E357—2 in. rolls, w't 140 lbs., each $48 00

PEXTO FORMING MACHINE



Patent stove pipe formers, compensating gear, 30 in. long.

No. E374 will form 20 iron into 10 in., or 22 iron into 5 in. cylinders.

No. E373 will form 22 iron into 8 or 10 in. cylinders.

Gears are machine-cut steel and rolls are made of special rolled hard steel. Grooves are cut in rolls to allow forming of cylinders after wiring.

No. E373—2 in. rolls, w't 140 lbs., each $58.00

Will form 20 iron into 10 in., or 22 iron into 5 in. cylinders.

These machines are much more easily adjusted and can be set for forming any desired size of cylinder in much less time than is required to set others. They are made with Slip Rolls, so that small work can be readily taken from the end after it has been formed.

No. E382—Grannis', patent slip roll stove pipe former, with compensating gear, 2 in. rolls, 30 in. long, w't 160 lbs. .....each $72.00

EAVE TROUGH END FORMERS

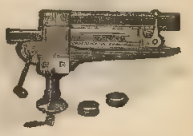
The Tool.

The Work.

No. 6—Bishop's, cast Iron Trough, in.	4	4½	5
W't, lbs.	3½	4	5
Each $1.20	1.30	1.60	

For closing end of eave trough in corrugations as shown in illustration.

PEXTO BRASS MOUNTED GROOVING



With steel bar and milled horn, for No. 24 iron and lighter.

No. E502—20 in., three grooving rolls, one each ⅜, 9/32 and 7/32 in., with standard, w't 100 lbs... each $64.00

IMPROVED PATENT GROOVING MACHINES

For No. 22 iron and lighter.

Grooving horn is reversible so that either the flat surface or one of the groves that are planned into the horn can be turned upward.

One smooth or flattening roll and three grooving rolls are furnished.

No. F507—30 in., rolls 9/32, ¼ and ⅜ in., w't 110 lbs.★ .....each $110.00

PEXTO IMPROVED PATENT GROOVING MACHINES

Improved Machine Standards.

No. 975—For use with all except wiring machine, size of hole 1⅛ in., height over all from bench 9¾ in., w't each 10½ lbs. .....each $3.00

No. 976—Wiring machine, size of hole 1⅛ in., height over all from bench 9¾ in., w't each 11 lbs., each $3.00

Ask for Special Tinners' Tools Catalogue Showing a More Complete Line than Shown Here.

TINNERS' MACHINES

PEXTO RING AND CIRCULAR SHEARS

Intended for cutting circles or internal rings and irregular curves. In circular cutting the blanks are clamped between rubber covered discs by means of a quick acting, eccentric, lever device adjustable for exerting extreme uniform pressure to prevent the work from slipping and insuring more accurate cutting. The bed on which the Tail Piece slides is graduated in inches and fractions of inches for quick setting of the Tail Piece for the size circle to be cut. The angular position of Cutters allows for as clean cutting on the inside as on the outside of circle.

No.	F298	F299
Will cut circles, in.	3½ to 22	3½ to 38
Wt., lbs.	195	290
Each	$140.00★	180.00★

WAUGH'S PATENT CIRCULAR SHEARS

For No. 22 Iron and Lighter.

No. E278—Will cut circles from 2¾ to 22 in., wt 125 lbs. ....each $110.00

Suitable for cutting circles, trimming or squaring tin plate, sheet iron, brass and copper.

A graduated scale is attached to the bed for the purpose of securing quick and accurate adjustment of the sliding [redacted].

They are fitted with quick-acting eccentric lever, which clamps material between discs with great rapidity and releases the blank instantly.

PEXTO SQUARING SHEARS

Capacity No. 18 Gauge Iron and Lighter.

No. E132A—Cuts 30 in., wt 540 lbs., each $190.00

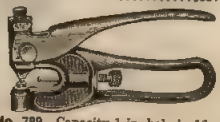
No. E137A—Cuts 36 in., wt 650 lbs., each $260.00

Furnished with complete gauge equipment, one pair front arms. No. 137A has hold-down attachment.

BENCH SHEARS

Made of best materials, blades of crucible tool steel, useful in all metal working shops, tool rooms, garages. For cutting automobile brake bands, leather belting, strip steel.

No. F20—Length of blade, 3 in., capacity 12 gauge, wt each 24 lbs., each★ $30.00



No. 789—Capacity ¼ in. hole in 16 ga. iron with three punches and dies, ⅛, 3/16 and ¼ in. Length over all 8½ in., depth of throat 1½ in., wt 3 lbs. .....each $15.60

PEXTO COMBINATION SHEARS AND PUNCHES

These machines are suitable for both cutting and punching metal. They may be used for cutting ¼ inch iron and ⅜ and ½ inch narrow bars. The No. E678 will punch the center of a circle 5½ in. in diameter and the No. E679, 5½ in. Four Punches are put up with No. E678, viz., ⅛, 3/16, ¼ and 5/16 in. Five Punches are put up with No. E679, viz., ⅛, 3/16, ¼, 5/16 and ⅜ in.

No. E678—4½ in. cut, will punch ¼ in. iron, wt 105 lbs., each $72.00

No. F679—5½ in. cut, will punch 3-16 in. iron, wt 122 lbs., each★ $88.00

PEXTO SAMPSON PUNCHES

Will punch No. 9 iron with and No 12 without, "stay bolts" and will center on 30 in. sheets without and on 7 in. sheets with them.

No. E675—Improved, bolt fastened, adjustable gauge depth of gap 15 in., 3 sets of dies and punches, ⅛, 3/16 and ¼ in., wt 125 lbs. .....each $80.00

HAND PUNCHES

Made with compound lever principle, blades solid crucible tool steel, running full length of jaw.

No. F30—Total length 33 in., length of blade 8 in., length of cut 4¾ in., capacity 12 gauge, wt each 16 lbs. each★ $38.00

ALL OF ABOVE ONE PAIR IN A BOX

Illustrations show left hand shears, which have the lower blade on left side—Left hand shears are generally used and are always sent unless otherwise specified.

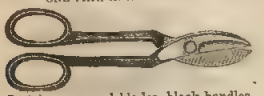
TINNERS' SHEARS OR SNIPS

CRUSO STRAIGHT

No. 19—Cruso, solid forged steel, 12⅜ in. long, cut 3 in., w't per pair 1⅞ lbs. .....per pair $1.80
ONE PAIR IN AN ENVELOPE; FOUR PAIRS IN A BOX

HOUSEHOLD

No. 18—Cruso, solid forged steel, length 10 in., cut 2¼ in., w't per pair 1 lb., per pair $1.40
A good serviceable snip, suitable for general use, at a low price.
ONE PAIR IN AN ENVELOPE



Cast iron, ground blades, black handles.
No. 20—Length 11¼ in., cut 2¼ in., w't 2¾ lbs., each $0.50
ONE PAIR IN AN ENVELOPE

POCKET SNIPS

Solid forged steel, polished blade, length 7 in., cut 2 in., w't per pair ½ lb.
No. 514 C†B—Polished and blued handles, per pair $1.50
No. 214 Cruso—Japanned handles, ...per pair $1.30
ONE PAIR IN AN ENVELOPE, SIX PAIRS IN A BOX

REVONOC DENTAL OR JEWELERS

Japanned handles, nickel plated blades.

Nos.	21	22
Length, in.	6½	6½
Cut, in.	1½	2
W't, pair, lbs.	½	¾
Per pair	$1.30	1.50

HALF DOZEN IN A BOX

COMPOUND LEVER SNIPS
SEARIGHT PATENT

Finest quality crucible steel tempered by the most approved process.

Nos.	108	110	112	114
Length, in.	8	10	12	14
Length cut, in.	1½	2½	3	3½
W't, pr., lbs.	⅞	1½	2½	3
Per pair	$5 50	6.50	9.00	10 50

Has three times the power at the point as the ordinary snip and is but a trifle heavier.

"TROJAN" SHARP POINTED SNIPS

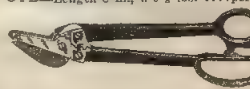
No. 78—High grade steel, japanned handles, length 13 in., 2¾ in. cut, w't per pair 1⅞ lbs. .....per pair $6.00
Adapted for cutting sheet metal, pasteboard, mica, linoleum, veneering, etc. Straight or curved lines.
ONE PAIR IN A BOX

HAWK'S BILL

Improved pointed curved hand shears.
No. 15—Pointed snips, blade 8 in., entire length 11⅞ in., w't per pair 1⅛ lbs. .....per pair $6.00
Capable of cutting in sheet metal trimmings of any size and shape. Letters easily cut. Especially adapted for cutting off the bottoms of metal vessels and openings in pipes or cylinders.
ONE PAIR IN A BOX

C†B COMBINED SHEARS AND PIPE CRIMPERS

No. 91 C†B—Length 8 in., w't ¾ lbs. ....per pair $4.50



Polished blades, gun metal handles, drop forged steel.
No. 92 C†B—Combined double cutting shear and pipe crimper, interchangeable parts, steel crimping jaws, length 12⅞ in., actual cut 1⅞ in., w't 2¼ lbs., per pair $6.00
ONE PAIR IN A BOX

BENCH

HALF DOZEN IN A BOX

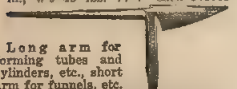
TINNERS' TOOLS

WROUGHT IRON STAKES WITH POLISHED STEEL FACES

Used for beveled or square work.

No. E901—Beakhorn stake, round tapering end 16¼ in., flat end 20×00 in., w't 45 lbs. . . . each **$48.00**

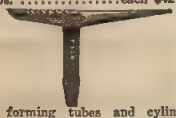


Long arm for forming tubes and cylinders, etc., short arm for funnels, etc.

No. 925—Common Blowhorn, large end 9 in., small end 17⅛ in., both tapering, w't 10 lbs. ...each **$26.00**

For all kinds of hard work and double seaming.

No. E921—Double Seaming, large end 17 in., small end 12 in., w't 24 lbs. .....each **$42.00**



For forming tubes and cylinder creasing, etc.

No. 927—Creasing, with horn, round tapering end 9⅜ in., flat end 6½ in., w't 12¾ lbs. .....each **$26.00**

For very small cylinders, etc.

No. 967—Needle case, flat end 8 in., small tapering end 10¼ in., w't 4 lbs., each **$13.00**

For small tubes, rings, etc.

No. 956—Candle mould, small end 18 in., horn 8¼ in., both arms round and tapering, w't 6½ lbs., each **$16.00**

WROUGHT IRON STAKES WITH STEEL FACE

Hatchet.

Nos.	943	944
Length of blade, in.	13	11
W't, lbs.	9	6
Each	$16.00	14.00

No. 936—Common square, face 2⅝×4½ in., w't 11 lbs. ...each **$13.00**

CAST IRON STAKES

Polished faces, size A, 6 in.; size B, 8½×2⅞×3¼ in.; size C, 5½×4½ in.; size D, 5⅞×4½×3⅞ in.

No. E949—Double seaming, with 4 heads, round, square, oblong and oval, w't 110 lbs. .....each **$36.00**

Cast iron, polished face, for locking seams on conductor pipe.

No. E971—Conductor, turned, large end 15 in., small end 11½ in. long, w't 30 lbs. .....each **$18.00**

HOLLOW MANDRELS

Cast iron, polished face, heavy clamps for attaching to bench.

No. E910—Entire length 3 ft. 4 in., flat part 9 in. long 6 in. wide, oval part 31 in. long, w't 60 lbs., each **$18.00**

PIPE MANDRELS

No. E65—Cast stove pipe, length 36 in., width 4¼ in., w't 38 lbs., each **$11.00**

A low-priced mandrel for a dealer who does not have a regular tinshop.

BENCH PLATES

Cast iron, planed surface.

No. E981—37×8 in., w't 50 lbs., each **$20.00**

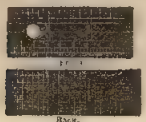
No. E982—30×8 in., w't 37 lbs., each **$14.00**

"HANDY" SEAMERS

Adjustable for seams of different widths up to ⅞ in. Can be used where larger seamers would not be practical. As it is light it can be carried in tool kit or pocket.

No. 791—Japanned, length 7 in., width 3⅜ in. ....per dozen **$48 00**

RULES AND STRAIGHT EDGES



Back.

36 in. Long.

Laid off on one side with two rows of figures, the first like an ordinary steel square, by eights and inches up to three feet. The second is a line of circumferences divided into 113 equal parts; each of these divisions is again sub divided into 8 equal parts, the large divisions representing an inch to a scale and sub-divisions an eighth of an inch. Therefore, against any diameter the circumference in this line to a scale in inches and eighths of inches can be found.

The reverse side of rule gives dimensions of measures and cans. The first two tables are for flaring measures. 1st. Liquid measures, 1 to 5 gal. 2d. Dry measures, 1 to 2 bu., giving diameter of top and bottom and height of each size and kind.

Third table is for cans with pitch or cone tops, 1 to 10 gal., giving diameter of top and body and compass marks for striking breast.

Fourth table is for flat top cans from 100 to 200 gal. (thirty-one different sizes), giving height and diameter.

Fifth table is for dry measure, from 1 qt. to 3 bu., giving height and diameter.

No. 5—Plain polished, w't 1⅔ lbs., each $8 50

No. 95—Nickel plated, w't 1⅔ lbs., each $8.00

MAGIC PATTERN RULES

Marked in circumference inches on the front and in inches and eighths on the back. The two slides have set screws into which trammel points are fastened. Particularly convenient for laying out elbow patterns.

No. 7—Lufkin's, nickel plated steel bar, length 4 ft. 7/10 in., square, with two slides, trammel points and flexible steel ribbon, with pattern chart mounted on linen, 19x28 in., hinged wooden case w't 7 lbs., each $26.00

TINNERS' RIVETS SETS

Forged from highest quality tool steel, blued finish.

No. 996—Solid steel, size ⅞ x 3 x 10 in., w't per doz. 2 lbs. per dozen $9.00

HALF DOZEN IN A PACKAGE

Our Very Best Is the Very Best.

H.S.B.&CO.
REV-O-NOC

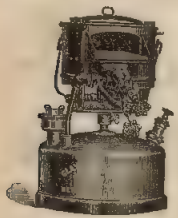
We Stand Behind Our Brand.

TINNERS' TOOLS

FIRE POTS

Burner produces an intensely hot flame, free from smoke, will heat irons and a pot of metal at one time. Top section may be removed and open flame used.

No. R50 Revised—Gasoline, heavy, welded steel tank, capacity 5 pts., fixed brass air pump, never leak type, positive needle valve, height 12 in., diam. at base 8¾ in., top 6 in., w't 13 lbs. .....each $22.30

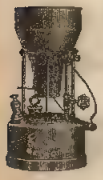


C and L.

Gasoline, seamless drawn steel tank with large funnel and filler, fixed brass pump, needle valve, fittings welded, not soldered. Heats irons and a pot of metal at same time. Top section may be removed and open flame used.

Nos.	R1	R5
Capacity, pts.	7	5
Height, in.	13	13
Diam. at base, in.	9¾	8¼
Diam. at top, in.	7	6¼
W't, lbs.	11	10¼
Each	$24.50	22 30

ONE IN A BOX

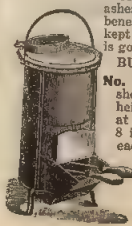


No. R21—C. and L., gasoline, seamless drawn steel tank, large funnel and filler, heavy uprights, large valve and heavy malleable top plate and one piece steel shield, burner and coils of extra heavy steel, needle point valve, automatic brass pump, height 17½ in., diam. at base 8¾ in., w't each 9¾ lbs. ..each $18.00

FIRE POTS

No. R3—Gem, gasoline, aluminum bronze, cast iron furnace, removable top, feed regulator, needle valve, all cast brass fittings, japanned wood handle, sliding drip cup, rubber pump bulb 21x7 in. sheet steel base, 10½x4¾ in. sheet steel reservoir, w't 24 lbs. .....each $28.50

No. R15—Gasoline, seamless drawn steel tank, capacity 1 gal., brass air pump, needle valve, cast hood with opening for melting pot, cast "horse shoe" burner, w't 20 lbs..each $24.00



So constructed that ashes fall into pan beneath coal; fire is kept clear and draft is good.

BUTTLES Pattern

No. R76—Charcoal, sheet iron japanned, height 14 in., diam. at base 6 in., top 8 in., w't 32 lbs., each $9.00

ONE IN A BOX

RUBBER BULBS

No. 45—For gasoline fire pots, w't ¾ lb. .....each $1.00

MELTING POTS

Fits any Make Furnace

No. 65—Size 5 in., cast iron with bail, w't each about 3¼ lbs., each $1.20

GAS FURNACES

DOUBLE BURNER, FOR NATURAL OR ARTIFICIAL GAS

Burner used gives an intense heat, makes no smoke and economizes time. Air blower not required when heating coppers.

No. R794—Sheet iron top, brick lined, arranged to receive two coppers, each $14.00

STANDARD WIRE GAUGES

No. 2—Cast steel, round, small, gauges Nos. 6 to 36, w't per doz. each $28.80

No. 1—Cast steel, round, large, gauges Nos. 0 to 36, w't per doz. 2½ lbs., per dozen $48.00

HALF DOZEN IN A BOX

NIEHOFF MAGNETO AND DISTRIBUTOR REPAIRS

These parts consist of practically all the popular items generally used for replacement on all makes of Automobiles, Trucks and Tractors. The material and workmanship is of the very highest grade. Every precaution has been taken to make each part accurate so that it will properly fit the system it is intended for.

F517	Six Cyl Distributor Cap (New Type) to fit Model 16 and 16C	2.70
F518	Six Cyl. Distributor Cap (Old Type) to fit Model 15T	3.00
F519	Terminal Nut to fit S16 and S18	3.00 .30
F520	Four Cyl. Distributor Cap (New Type) to fit Moleds 16 and 16C	2.70

PARTS TO FIT FORD COIL

234Q	Upper Contact Spring	{Popular Nue, to fit late Ford Coils} $0 30
235Q	Lower Contact Spring	
2360	{Springs fit Ford Coils (1914-1915)	.30
2370		

PARTS TO FIT FORDSON TRACTOR

		Pair
F285	Spring, with Large Size Tungsten Point	$0 60
F286	Bridge, with Large Size Tungsten Point	.40

PARTS TO FIT K. W. MASTER VIBRATOR

		Pair
F186	Lower Contact Spring	$0 80
F187	Upper Contact Spring	.80

PARTS TO FIT K. W. MAGNETO

		Each
F277	Plat. Breaker Arm	$7 00
F278	Plat. Breaker Screw	5 80
F311	Carbon Distributor Cover Plunger Brush, Model HK	30
F312	Carbon Distributor Brush, Model T	.30
F313	Carbon Distributor Brush, Model HK	30

MAGNETO AND DISTRIBUTOR REPAIR TOOLS

MAGNETO AND DISTRIBUTOR TOOLS

ELITE KIT

This kit contains a "2 in 1" magneto screw driver, various wrenches properly guaged to fit the following magnetos: Connecticut, Splitdorf, Dixie, Remy, Bosch, Simms, Eisemann, Mea, Berling, Delco, Westinghouse, Wagner,

The kit is conveniently arranged to carry in one's pocket. The material is water-proof and has exceptional wearing qualities. The finish is similar to a high-grade leather.

No. 718G .....Each $2.10

STANDARD KIT

The Standard Kit contains a complete set of magneto wrenches similar to the Elite set, with the exception of the "2 in 1" screw driver. The kit is arranged to roll, and makes a compact outfit either for a tool chest or pocket.

No. F719 .....Each $1.40

CONTACT BREAKER GAUGE

This device consists of a combination of gauges adapted for the various battery breaker systems, low and high tension magnetos and spark plugs.

No. F715—(Specify ignition system) .....Each $0.70

MAGNETO SCREW DRIVER

An ingenious "2 in 1" arrangement whereby the one fits in the other, making it both compact and practical.

No. F282 .....Each $0.40
No. F282½ .....Each .70

PLATINUM CONTACT FILES

These files are of the very highest grade for surfacing platinum contacts. Come in long and short types. They are furnished a dozen mounted on card.

No. F710—Platinum File, (Short.) .....Per Gross $36.00
No. F711—Platinum File, (Long.) .....Per Gross 40.00

TWEEZERS

A reliable and well constructed tweezer designed for the use of mechanics handling small intricate parts.

No. F716 .....Each $0.80

COIL FILES

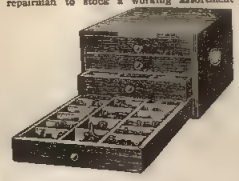
For spark gaps, spark plugs, magnetos, coils and contact points of all kinds.

No. 6470—6 in. long including handle, uniform thickness, bevel pointed w't per doz. 1 lb. .....per dozen $2.00

ONE DOZEN IN A BOX. WE DO NOT BREAK BOXES

CASH REGISTER ASSORTMENTS OF CONTACT PARTS AND STARTER AND GENERATOR BRUSHES

This is our standard cabinet which has become very popular throughout the country because it meets the needs of the average dealer and repairman to stock a working assortment of either contacts only, or a combination of contacts and starter and generator brushes according to the requirements of the respective dealers. This cabinet contains four drawers each divided into thirteen compartments. The compartments are all labeled as to the respective parts they contain. The assortments as made up contain a supply of such parts for which there is an active call. These parts are all standard and fully guaranteed. If you find that certain parts are more in demand in your territory than some of the items contained in the Cash Register of Contact Parts, you have the privilege of exchanging any such parts for others of equivalent value, for one year from date of purchase.



These privileges are extended so as to make the Cash Register of Contact Parts meet the particular needs of all. No dealer or repairman should be without this Cash Register Assortment as it is a live proposition which places him in a position to render ignition replacement service to the trade that will prove to be very profitable, because it enables him to take care of practically all of the popular cars.

As above mentioned, the Cash Register may be had in either one of three assortments. Contacts only, Combination of Contacts and Brushes, or Brushes only.

No. F1A—Assortment, including cabinet.....Each $140.00

CASE OF GOOD BUSINESS ASSORTMENT

This cabinet was designed especially for the smaller repairmen and dealers who are beginning to handle ignition supplies and are not prepared for the larger outlay as is contained in the Cash Register Assortments. While this cabinet has not as large an assortment as the Cash Register of Contact parts, nevertheless it has proven to be a Case of Good Business with many, and has led up into larger business along this line. The feature of this assortment, as with the Cash Register, is that of the service which it enables the dealer to give to the trade by having some of these popular items on hand.

This cabinet is also divided into compartments, each one marked as to its contents. The case of Good Business is similarly put up into three separate assortments to meet special demands, one containing Contacts only, another Contacts and Brushes, and the other, Brushes only

No. F2A—Including cabinet.....Each $58.00

Entire Page For Factory Shipment Only.

NIEHOFF MISCELLANEOUS REPLACEMENT PARTS

B. & S. REPLACEMENT CUTOUTS, REGULATORS, SWITCHES AND SWITCH KEYS. INSTRUMENT LIGHT.

No.	Description	Each
F1655-B—	6-V Reverse Current Cutout	$3.40
F1441-B—	12-V Reverse Current Cutout	3.40

The above numbers are used for replacement on instrument or dash. They have a 20 amp. capacity and are adapted for any 6 or 12 volt automobile generator.

F342-B—	6-V Reverse Current Cutout (large size)	7.10
F458-B—	12-V Reverse Current Cutout (large size)	7.30
F459-B—	32-V Reverse Current Cutout (large size, 15 amp.)	7.90
F1027-B—	32-V Reverse Current Cutout (large size, 15 amp.)	8.50

The above numbers are for use on automobiles, charging plants, farm lighting plants, etc. Equipped with carbon make and break. They are substantially made and have a resistance up to 64 volts and more.

F1522-B—Starter Switch 1.90

For automobiles, tractors, trucks, boats, etc. Adapted for any kind of mounting. Ruggedly constructed and waterproof.

F1660-B—Universal regulator and cutout 12.00

Used as replacement for any regulator, or for 3d brush control systems. Will charge battery at lower speed, also overcome trouble, due to overcharging batteries. It provides a means of adjusting the charging current as may be desired. Can be furnished with proper resistance for any type generator. Be sure and specify type.

F1884-B—Instrument Light 1.00

Especially designed for Ford cars, but can be used on any other make of car. Easily installed. Is well constructed and will eliminate all short circuiting. Highly polished, nickel finish.

No.	Description	Each
F486-B—	Panel Switch Key	.16

Used on Chevrolet, Olds, Saxon, Regal, Maxwell, 1917-18 19. Jordan, Dort, Kissel, Chandler, Grant, Northway, Jeffrey.

F636-B—	Panel Switch Key	.16

Used on Dodge and Jeffrey.

F639-B—	Panel Switch Key	.16

Used on Chalmers.

F726-B—	Panel Switch Key	.16

Used on Paige, Kissel, Velie.

F1121-B—	Panel Switch Key	.20

Used on Peerless, Stephens, National, Allen, Scripps-Booth, Maxwell 1920, Hupp, Stearns, Cleveland, Studebaker, Mitchell, Franklin, Columbia, Gardner, Elgin, Nash 1919, Kissel 1920.

F1126-B—	Panel Switch Key	.16

Used with Remy.

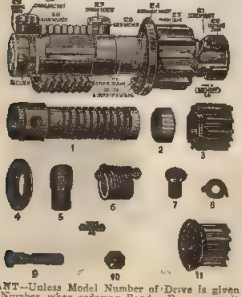
F2369-B—	Panel Switch Key	.18

Used on Nash 1920.

F2051-B—	Universal Switch for Lighting and Ignition	5.60

Can be used as replacement on any make of automobile having either battery or magneto ignition, two bulb resistance or series parallel dimming, provided with a special constructed lighting device furnished in a series of different key changes insuring protection against theft. This assembly is furnished complete with one key and resistance coil for use where lights are dimmed and an extra connector to readily adapt switch to either battery or magneto ignition. Regularly furnished for six volt systems but upon request can also furnish for twelve volts.

ECLIPSE-BENDIX DRIVE PARTS



IMPORTANT—Unless Model Number of Drive is given in addition to our Part Number, when ordering Bendix Drive parts it is essential that you specify Year and Model of Car for which part is desired.

	Each
FEB- 1—Screw Shaft	$3 50

NIEHOFF AUTOMOTIVE REPAIR SHOP EQUIPMENT

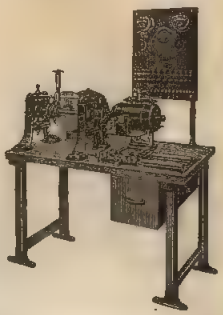
NIEHOFF HIGH POWER TEST BENCH

The Niehoff High Power Test Bench is the last word in Test Bench Construction. It is strongly built and smooth running. The control is so arranged that the repairman can conveniently take care of all speeds and tests from one position.

SPECIFICATIONS

One panel board mounted on angle steel legs and contains:

One 5-in. voltmeter reading 0-30;
One 5-in. ammeter, charge and discharge, reading 30-0-30;
One each 6 volt and 12 volt cutout;
One 0-3600 R. P. M. tachometer;
One double throw switch, 6 and 12 volt;
A set of six spark gaps and terminals.



On the table in connection with drive is a Proney brake and torque scale and a two hundred and fifty ampere starter switch. The bench is 68 in. high, 48 in. long, 28 in. wide. The table is of hardwood, and the legs of pressed steel. The vise is adjustable in all directions and absolutely does not vibrate under any speed. It will positively hold any magneto, starter or generator made.

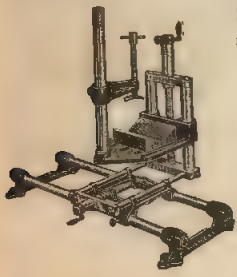
This Teest Bench is furnished in wto models, A and B.

Model A. Direct current bench with Allen Bradley Electric Control. Including motor.

No. F16TB—Each★ $1300.00

Specify voltage when ordering this bench.

Model B. Same as Model A, with the exception of friction drive in place of motor. Power to be taken from line shaft or independent motor. Line shaft pulley is 18 in. diameter, running at 300 R. P. M. will give this bench a speed range of 0 to 4500 R. P. M. forward or reverse by friction drive. This is a powerful outfit and no doubt the most practical of all benches produced. It enables the shop to operate drill press, speed lathe, etc., with one motor. "No counter shaft required." Idle pulley is furnished.



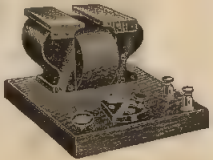
No. F17TB—Each★ $1100.00

HIGH POWER TEST VISE

This vise is identical to that used on our High Power Test Bench. It may be easily adjusted in all directions. May be mounted on any bench. As a practical and substantial outfit this vise is said by repairmen to be by far the best thing of its kind that has ever been offered to the trade. It measures 28 in. long by 14 in. wide by 15½ in. high and weighs 33 lbs.

No. F4TV—Each★ $100.00

NIEHOFF LAMINATED MAGNETIZER



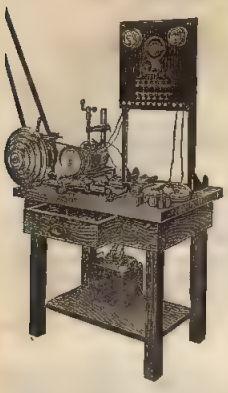
The Niehoff Laminated Magnetizer is distinctly superior to anything of its kind on the market. It will generate far more magnetism than any of the two spool types. It will fully recharge all makes of magnets in less time and at a saving of current. The poles are absolutely equal, insuring a perfect flow of magnetism to the magnets. It does not heat up quickly. The top pieces are interchangeable and may be replaced at a small cost when worn. This is the only Magnetizer having this feature which practically makes it permanent equipment. It may be had either for battery or direct current.

No. F6MG—For six-volt battery model★ ..... each $40.00

No. F7MG—For 110 DC Current Model★ ..... each 48.00

★ Items Marked Thus ★ Are Shipped From Factory Only.

NIEHOFF AUTOMOTIVE REPAIR SHOP EQUIPMENT



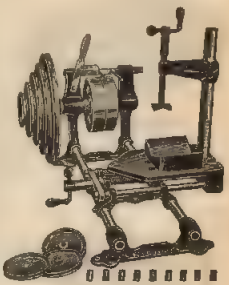
LIBERTY TEST BENCH

This equipment meets a large demand from the smaller automotive repair shops. It is for universal work and enables the repairman to make a running test on all generators and magnetos. Also to run starting motors to wear in the bearings and brushes.

This equipment is provided with a test board containing one 3½ in. ammeter with a reading of 30-0-30; one voltmeter with a reading of 0-30; one six-volt relay; six spark gaps and ten binding posts; a combination variable speed pulley and adjustable vise. The speed step pulley is made of solid aluminum which has a speed range from 75 to 3600 R. P. M. This pulley is controlled by another line shaft pulley connected to lever to automatically throw off the line shaft drive.

The Liberty Bench may be connected with either an overhead line shaft or motor. The entire equipment is substantially constructed, measuring 60 in. high, 36 in. long, and 24 in. wide. Net weight, 138 lbs. It is the most practical outfit upon the market and is especially recommended in shops where Ford cars are repaired as a specialty.

No. F37TB—Bench complete★ ..... each **$350.00**



COMBINATION VARIABLE SPEED PULLEY AND ADJUSTABLE VISE

Including accessories consisting of three mounting pulleys, one iron "V" block and eight armature shaft gear bushings.

Size of outfit overall, 26½ in. long by 17½ in. high by 15 in. wide. Weight 47½ lbs.

A very desirable equipment to mount upon any shop bench. To be connected with either line shaft or motor.

No. F19SP—Each★ **$170.00**

TEST BOARD

It is in mahogany finish and contains one 3½ in. ammeter, one 3½ in. voltmeter, one six-volt relay, six spark gaps and ten binding posts. Board, size 18 inches high by 18 inches wide. Mounted on iron legs, 30 inches high.

This is a convenient and well balanced arrangement of meters and spark gaps for those who wish a simple test board of this kind to mount upon their own work bench.

No. F18TB—Each★ **$110.00**

NIEHOFF GENEROMETER

A scientifically constructed instrument for accurately locating shorts and grounds in generator and starting motor armatures. This instrument will enable the repairman to immediately determine in what manner the armature is defective. Sometimes the trouble is of a minor charcter that can be easily fixed by the electrician himself thus saving the time and money involved in sending it out to have it rewound. The adjustments are made to accommodate all makes of automotive armatures. This instrument is put up in a case of mahogany finish and measures 15½ in. long, 10½ in. wide, and 4½ in. high.

No. F5G—Each★ **$88.00**

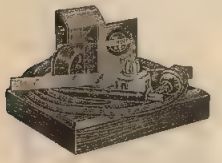
★ **Items Marked Thus ★ Are Shipped From Factory Only.**

NIEHOFF AUTOMOTIVE REPAIR SHOP EQUIPMENT

WIZARD UNDERCUTTER

A very desirable equipment for undercutting the mica insulation between the copper segments on commutators on such armatures as are used in automobiles, trucks and tractors. The time-saving features of this device commend itself to all repairmen. Not only is the work done in much less time but with greater ease. It is so simple to operate that the work may be done by an unskilled workman. The adjustments are all quickly and easily made to accommodate all types of armatures. The undercutting is done by direct motor power especially made for this device. It is universal and can be connected either to a direct or alternating current. The entire equipment is mounted on a heavy hardwood base, size 10x20x1¼ inches. The machine stands 9½ inches high with motor at its extreme elevation. A set of two size burrs are furnished.

No. F10UG—Each★ $108.00

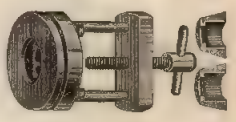


GROWLER

A well-known device for quickly locating shorts, grounds and opens in armatures. This Growler is of a new type and fully guaranteed. It will enable you to test all types of armatures anywhere from 2¼ to 12 inches in diameter. Operated from an alternating current.

No. F14G—Each★ $48.00

COMBINATION BALL BEARING AND SLIP RING PULLER



This is universally acclaimed by repairmen to be the most practical and substantial device upon the market for removing ball bearings and slip rings from all makes of magneto armatures The operation is done very easily and without any injury to any of the parts.

No. F100—Each★ $27.20

NIEHOFF DEFECTOMETER

The Niehoff Defectometer has been designed by an authority on magnetos. It is a valuable assistant to repairmen who do magneto repair work. The operation is simple and quick. With it you become expert. You can accurately determine the nature of the defect of an armature, also collector ring, condensor, and other high tension insulators. This instrument has adjustments to meet the different conditions found in making tests of various armatures It is thoroughly practical and reliable at all times. It operates from a six-volt storage battery. The case is finished in mahogany. It measures 15¾ in. long, 10¾ in. wide, and 4¼ in. high.

No. F4D—Each★ $90.00

A practical equipment for fully recharging Ford magnets without removing them from the car. The operation is very quick and simple . This instrument is also provided with means to make various kinds of tests of the electrical mechanism on Ford cars. You may accurately test the voltage of the magneto, the spark plug and also test and adjust the ignition coil. Single and double contact bulbs may also be tested. This instrument is a necessity in every Ford repair shop.

No. F12MG—Each★ $108.00

★ Items Marked Thus ★ Are Shipped From Factory Only.

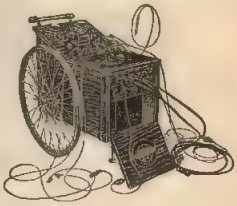
NIEHOFF AUTOMOTIVE REPAIR SHOP EQUIPMENT

BATTERY SERVICE TEST KART

This wagon was designed for the use of battery Service Stations to facilitate all necessary battery tests both internal and external. It is arranged to hold an independent battery and is provided with all the necessary cable connections.

The discharge tester is conveniently located so that a turn of the knob will cause it to immediately function with the ammeter giving you a reading at the same time. The three voltmeters will show accurately the individual cell voltage, so that the motorist can see exactly what is taking place while the inspection is being made With this instrument the following tests can be made.

1. Generator charging rate
2. Starter discharge rate
3. Testing starter by using Kart battery, thereby eliminating necessity of removing battery from car
4. Cell voltage test
5. Discharge test showing voltage of each of these cells under discharge at same time
6. Cadmium test
7. Will prove current consumption of horn and lights
8. Test for short in wiring circuit
9. Test for current consumption of ignition unit
10. Test for condition of individual cells
11. Test for voltage loss in wiring circuit.



The Battery Kart measures 36 in. long, 28 in. wide, by 36 in. high. Net weight, crated, 300 lbs.

No. F15T—Each★ $750.00

NIEHOFF CADMIUM VOLTMETER

This cadmium voltmeter is specially designed for Battery Service Stations. It is made of hardwood, walnut finish, with genuine leather handle, and has a hand-drawn scale assuring the highest degree of accuracy. The scale reading is: 2.0-3.0 and 0-15 and it is equipped with three terminals; one positive, one 3.0 and one 15-volt terminal. Therefore, both positive to cadmium, and negative to cadmium tests may be made without reversing the leads to the meter. Four red lines are drawn on the scale to indicate the reading, which should be obtained for charged and discharged positives and negatives. These lines are marked "Negative Charged," "Negative Discharged," "Positive Charged," and "Positive Discharged" respectively. This makes it possible to take a cadmium test quickly and eliminates the necessity of reading the exact indications in making the tests. Every battery man fully realizes that frequently the voltage or gravity of a battery, or both, may be satisfactory, and yet have the battery capacity very low because of the cell charge or discharge only being equal to its faulty plate. Hence, when some of the plates are not up to their proper condition the voltage will fall very rapidly under discharge and the capacity of the battery is greatly reduced. All these internal troubles with both negative and positive plates can be quickly determined by testing with the above cadmium voltmeter without taking the plates out of the jar or tearing the battery down, or even without taking battery out of car.

No. F20V—Each★ .....$47.20 **With Cadmium Leads**..each $59.00 **Cadmium Leads Only** $12 10

★ **Items Market Thus ★ Are Shipped From Factory Only.**

ACCESSORIES FOR FORD CARS

SPARK PLUGS

Special for Ford Cars—Also recommended for Overland and Studebaker pleasure and commercial cars. W't per doz. 3½ lbs.

No. 5246—½ in. standard thread, per box of 12 ..... $8.40

HERCULES Junior, manufactured from best of materials, gas tight, will not carbonize or foul, needs no attention after installing, made along scientific principles both electrically and mechanically, guaranteed by the factory for two years of constant use.

No. 5322—½ in., special for Fords, per box of 12 ..... $9.40

ONE IN A BOX

A. C. SPECIAL FOR FORDS

The AC 5159 No. 1075 spark plug for Ford cars is an AC product backed up by the AC trademark and therefore of AC quality throughout.

Spring terminal clip permits wire to be instantly detached and re-connected while motor is running. Facilitates testing spark plug and coil. No nut to be unscrewed or lost.

By unscrewing the bushing, plug may be completely disassembled. Only one gasket is used. Extra large body porcelain to withstand hard service.

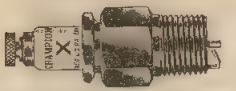
Patented CARBON PROOF porcelain. Saw tooth edges attain sufficient heat to burn oil deposits, thus offering effective resistance to carbon.

Large electrode will last indefinitely. Special shape forms natural drain preventing oil lodging in the spark gap.

No. 5159—1075—W't per box 3½ lbs., per box of 10 ..... $8.80

No. 5160—Porcelain for above, w't per box 1 lb., per box of 10 ..... $4.40

SPARK PLUGS



CHAMPION, best grade porcelain, separable cone gasket construction, similar to regular champion.

Adopted by the Ford Motor Co. as standard equipment on Ford cars since 1911.

The Champion X plug has no equal for the price and will not foul or soot.

No. 5280—A15—½ in. petticoat core, two-piece, w't per box 4 lbs., per box of 10 ..... $9.00

TEN IN A BOX

CHAMPION "PRIMING"

Will start any motor on the first quarter turn. Brings gasoline right to the sparking point. A good winter seller.

This plug is particularly adapted to Ford Cars

No. 5310—A14—½ in., petticoat core, two piece, w't per box 5 lbs., per box of 10 ..... $14.00

ONE IN A BOX

PRIMING PLUG MERCHANDISING CASE

Very attractive display case, contains 20 No. 5310-A14 Spark Plugs, case 10x8¼x7 in.

No. F5300—W't each 12 lbs., each* $28.00

SPARK PLUGS

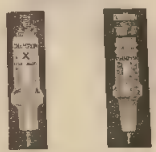
CHAMPION "FORDSON"

½ Inch Long.

Equipment on Fordson tractors and for use in engines requiring this type of plug.

No. 5295—A25—½ in. long, for Fordson tractors, petticoat core, two piece, w't per box 4 lbs., per box of 10 ..... $9.00

CHAMPION PORCELAIN INSULATORS



5288 5299

Conical Petticoat "X" Heavy Stone Insulator plug type. Gaskets furnished with all porcelains. Symbols ending with 3 are Conical Insulators. Symbols ending with 4 are Petticoat Insulators.

No. 5283—A105, to fit plugs A15, per box of 10 ..... $4.40

No. 5299—A205, to fit plugs A25, per box of 10 ..... $4.40

ABOVE ONE IN A BOX; TEN IN A CARTON

No. 5272A—½ in. special for Fords, open end Splitdorf plug, w't per doz. 4 lbs. ..... per box of 10 $10.00

ACCESSORIES FOR FORD CARS

HEISSLER STORAGE STARTING BATTERIES

Prices on Application

Built as well as it is possible for storage batteries to be constructed.

Connections are lead burned, and elements are carefully locked in high-grade rubber jars. These are completely encompassed by a cushion of resilient and acid resisting sealing compound. The outside container is constructed of an especially prepared and treated wood interchangeable with all makes as standard equipment on American cars.

Specify car, year model and electric system, when ordering.

The HEISSLER is manufactured in the only factory devoted exclusively to the making of automobile starting and lighting batteries.

Weight each 65 lbs.

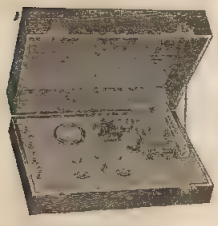
NIEHOFF MAG-CHARGER



A practical equipment for fully recharging **Ford** magnets without removing them from the car. The operation is very quick and simple. This instrument is also provided with means to make various kinds of tests of the electrical mechanism on Ford cars. You may accurately test the voltage of the magneto, the spark plug and also test and adjust the ignition coil. Single and double contact bulbs may also be tested. This instrument is a necessity in every Ford repair shop.

No. F12MG—Each★ $80.00

COIL UNITS

KINGSTON

Interchangeable with any Unit in the Ford Metal Coil box. The core is made of a special grade of soft Norway iron, the windings, condenser and vibrators being constructed of good quality service-giving materials. Recomended to all Ford Agencies or Branches, as this unit is the same as furnished as regular equipment.

No. 7422—4732—W't each 2 lbs., each $2.70

LOOSE

Our Very Best is the Very Best.

GENERATOR CUT-OUTS

KINGSTON

This generator cut-out is constructed so that it may be placed directly upon the generator, and no extra wiring is required. This cut-out is fully guaranteed. Heavy steel cover renders it waterproof. Will reduce battery expenses and pay for itself in a short time. Designed especially for Ford Generators, but adaptable to any 6 volt system.

No. 7423—W't each à lb., each $1.50

SWITCH KEYS

No. 4731Q—Round type, brass finish, to lift metal box coils, per dozen $0.60

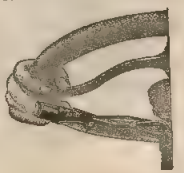
PUSH BUTTONS FOR HORNS



The present Horn Button on the Ford is located at the front of the steering post where it is very hard to reach and a more unhandy place would be hard to find. The Apco Horn Button is attached to the gas lever under the wheel where the operator's hand is most of the time, and even with heavy gloves on, the horn can be sounded easily. To install simply fasten attachment to lever and connect wire to the wire now on the present button, wrapping exposed parts with tape.

No. 7120—Per dozen $16.80

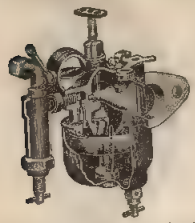
ACCESSORIES FOR FORD CARS

KINGSTON CARBURETORS



The factory advise that the Ford Motor Co., has adopted this Carburetor as standard equipment.

This carburetor owes its success to the construction which makes it possible to thoroughly impregnate all air with atomized gasoline directly at the nozzle and at point of highest air velocities. This is the reason that Ford cars equipped with the Kingston can be throttled down to a speed as slow as walking and accelerated to 40 miles per hour in 20 seconds and every cylinder doing the full share of work all the time. These carburetors start surely and easily because of their perfect atomizing of fuel.

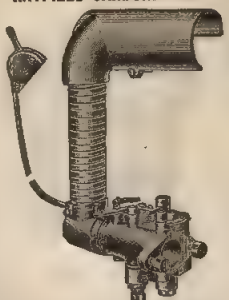
Equipped with new design laminated cork float. Fuel valve made of Monel metal. The compensating air valve is made of bronze. Is equipped with a spray nozzle.

This carburetor will, without any extra fittings, perfectly fit the Ford manifold and operating rods.

No. 5470—W't each 4½ lbs., each $8.50

ONE IN A CARTON

RAYFIELD CARBURETORS



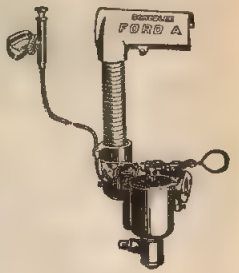
The Improved **Rayfield Carburetor Outfit** was designed especially for Ford motors and is of the plain tube type, having no loose attachments. There are two adjustments, one for low and one for intermediate speeds. The feature of this new Rayfield Outfit is the thermostatic hot air control involved in its construction, making it impossible to over-heat the Ford motor in the summer time. This feature alone will pay for the Carburetor in a short time. It is also adjusted for easy starting of the motor, quick pick-up, increased power, economy of gasoline consumption and uniformity of performance.

The outfit comes complete with all necessary fittings and can be attached in a few minutes.

No. 5467—Complete, w't each 8 lbs., each $27.00

ONE OUTFIT IN A BOX

CARBURETOR OUTFITS



Especially designed for Ford cars, has no moving parts. The new Pitot Tube Principle is introduced, which is an improved type of gasoline nozzle so built that it automatically furnishes a rich mixture for acceleration and thins out this mixture after the normal motor speed has been reached.

No. F5442—"Ford A" Outfit consists of a carburetor, steering column control, hot air drum, flexible tubing, manifold gasket, (2) ⅜x16 in. cap screws and radiator choke wire, w't each complete 12 lbs., complete outfit each★ $26.00

SPRING GOOSER WIRES

The Spring Gooser is a combination priming rod and carbureter spring. Used to replace the spring on carburetors which holds the choker valve open. For use on all Fords, whether choked from the dash or the front.

No. 7340—W't per doz. 1½ lbs., per dozen $3.15

LOOSE

STROMBERG CARBURETORS

In an officially observed test this carburetor gave 37 1/10 miles on one gallon of gasoline, more than 50% decrease in the usual Ford consumption.

No. F5458—The new Stromberg Carburetor for Ford Cars, complete with all necessary attachments ready to install, w't packed 11 lbs.★ .....each $30.40

ONE OUTFIT IN A BOX

ACCESSORIES FOR FORD CARS

ANCO TIMER

The Anco Brush gives approved wiping contact of best electrical practice. Cannot jump and wear bumby. Cleans itself and all contacts and avoids gumming, clogging and short circuits.

Brushed brass finish. Accurately manufactured, assembled and tested so that each timer gives the same perfect result. Fits exactly in place of timer now on Ford Car.

No. 5033—Timer complete, for all models of Fords, w't each ¾ lb., each $3.00

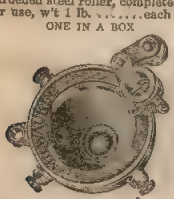
No. 5034—Timer complete, for all models of **Fordson Tractors,** w't each ¾ lb. .....each $3.00

ONE IN A STRIKING DISPLAY BOX. TEN IN A CARTON. ONE HUNDRED IN A CASE

TIMERS

No. 5030—Extra heavy pressed steel shell, aluminum finish, insulating ring of gray bone fibre, terminals insulated by fibre washers all the way through to contact points, one hand self-closing oiler, brush assembly has die cast rotor of white metal alloy, laminated pressed steel arm and hardened steel roller, complete ready for use, w't 1 lb. .....each $1.30

ONE IN A BOX



No. 5032—All parts are made of highest grade steel, machined, hardened, ground and polished. The case is a steel stamping of heavy section, copperized and nickel plated. The fibre ring is of inspected Egyptian fibre. The brush assembly is perfectly balanced of selected bronze and made with calibrated jigs insuring uniformity. Interchangeable with the regular Ford timer. Will fit Ford touring cars, trucks and tractors, w't each 2 lbs. .....each $2.70

ONE IN A BOX

TIMERS

These Timers are made of a quality unequaled in other timers. The roller is a 100-point carbon tool steel, accurately tempered. It is ground concentric within .001 of an inch and polished so as to remove even the slightest irregularity. This guarantees a smooth, even-running roller that will not jump or chatter against the race. A jumping roller causes arcing, which soon destroys both the roller and the race. High carbon steel is used in RED STAR Rollers because it is the only material that insures absolute uniformity in hardness and wear.

The bushing on which the roller rotates is of special chrome-nickel steel, hardened throughout. It has the toughness that provides a long-wearing, smooth bearing for the roller. The bushing is frozen to the accurately formed rivet pin.

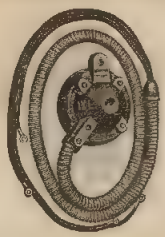
The race is made of finest selected fibre, tested for hardness and toughness. The race with contact shoes polished, leaving no possibility for the slightest inaccuracy that might cause the roller to jump and produce arcing. The assembly is gauged so that the roller rolls squarely on the race, giving perfect contact.

No. 5031—W't each 7 ozs., each $2.40

RED STAR

For Ford Cars, Trucks and Tractors

IXL SHORTPROOF TIMERS



This Timer is made throughout of machine molded Bakelite—the strongest and most durable non-conducting oil, water, and heat proof material used extensively for electrical purposes.

The Timer wires are enclosed in the case and touch no metal except the enclosed terminal screws to which they are attached and pass directly from the Timer case into a flexible metal conduit and are fully protected against wear, dirt, oil and water.

Easy starting and perfect timing under all conditions is accomplished by the use of copper contacts and a rotating copper-carbon brush carried in a die cast thin metal disc. The construction of this Brush Carrier is such that oil working the cam shaft bearing is thrown by centrifugal force from the contacts keeping them free of oil. Drain holes are provided in bottom of Bakelite cap for the escape of this oil.

This timer eliminates all ignition troubles and by insuring perfect timing and a spark of great intensity saves gas, increases power and reduces wear on the motor and component parts.

No. 5029—W't each 1¼ lbs., each $7.00

ONE IN A BOX

ACCESSORIES FOR FORD CARS

GLOBE BATTERY BOXES

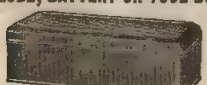
Designed to meet the demand for battery protection without changing location as originally installed. The unprotected location of the battery permits water, mud and slush to be splashed on it, the wood case swells and results in ruining the battery. This box completely covers the battery and protects it. Outside dimensions 9⅝ in. long, 7¼ in. wide, 9¾ in. high. Black enameled, rust proof steel.

A new globe box designed especially to hold the 1920 Ford battery.

It protects the battery against mud, water, snow and sleet which are likely to destroy the battery case and the battery.

No. 6610—C108FBS—Inside dimensions, 8⅜ in. long; 7⅛ in. wide; 10⅜ in. high; finished in fine black enamel, two suit case catches to hold down the snug fitting lid, w't each 7 lbs., each $3.10

GLOBE, BATTERY OR TOOL BOX

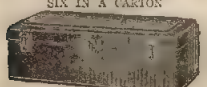


Black Enameled pressed steel. Equipped with two snap fasteners and Hasp and Staple which are welded to the Box. Beaded edge around the bottom making the box very substantial.

Designed for use on small cars.

No. 6613—F22—Length 22 in., width, 9. in., height, 6¾ in., w't each 8¾ lbs., each $3.00

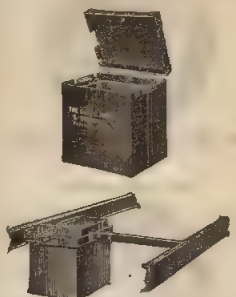
SIX IN A CARTON



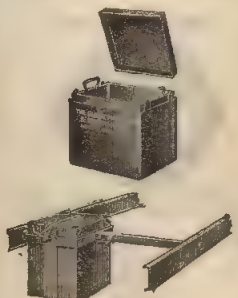
Made to fit on running boards. Black enameled pressed steel, double snap fasteners electrically welded, beaded edge around bottom.

No. 6607—Factory No. B2296, length 22 in., width 9 in., height 6¾ in., w't each, 14 lbs. .....each $3.40

ONE IN A CARTON



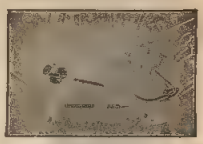
No. 6612—FUS978—**Fits inside the cradle,** no holes to drill or alterations to make, w't each 7 lbs., each $3.60



No. 6611—OS980—**Fits outside the cradle** and is installed without removing the Battery and hold-down bolts or without making alterations to the Battery Cradle. Water can be added, battery tested or entirely taken out without removing the box, w't 7 lbs. .....each $2.20

ONE IN A BOX
HALF DOZEN IN A CARTON

FOOT ACCELERATOR



Does not interfere with the handling of hand throttle. The instant the foot is removed from the accelerator to apply brake, the motor slows down.

No. 6297—Ewald, for Ford cars, w't each 1 lb. .....per set $1.10

ONE SET IN A BOX

Complete, will fit right in regular connections, no cutting or drilling required to attach. Does not interfere with any working part of the car. Works independent from the hand throttle, allowing driver to graduate flow of gas efficiently, thereby saving fuel.

No. 6296—For Ford cars, w't each 1 lb., complete .....per set $2.00

ONE SET IN A BOX

PEDAL RUBBERS

Each pedal pad constructed from high grade rubber securely fastened in heavy steel. The guard at side prevents the foot from slipping and the extra width given the pedal insures a firm foothold. Easily installed. Only one screw to tighten.

No. 6295—W't per set 1 lb., per set $1.70

SET OF THREE PADS IN A BOX

ACCESSORIES FOR FORD CARS

ACCESSORIES FOR FORD CARS

BOYCE MOTO-METERS

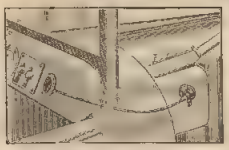
Indicates when unseen parts lack lubrication, when cooling water is getting low, or when there is an overheated condition anywhere throughout the mechanism of the car—a great trouble preventer and repair bill saver; can be attached to any radiator cap in ten minutes. Black dials with white letters.

No. 6629—Midget, new model for Fords, complete with a handsome rubber cap, ready for immediate use, w't each 1 lb. .....each **$5.25**

STEWART WARN-O-METERS

No. F5617—173B for Ford Cars. Finished in black and nickel and complete with Stewart Radiator Cap. Operates the same as the DeLuxe and standard models. Complete with all fittings, w't each 2 lbs., each **$13.35**

ONE IN A BOX



BORG AND BECK

The Hobbs Heat Indicator, accurately indicates on the dash motor temperature of the motor at all times.

Purely mechancial in operation—no electrical connections, nothing to break or get out of order.

Indicating hand on the dial is actuated through flexible, dental type shaft by a small but very efficient thermostat of novel design mounted against motor block by special clamping device. Each instrument is simply, quickly and permanently adjusted for running temperature of the individual motor at time of installation.

A precision instrument made of best possible materials, fully guaranteed by the manufacturers and should be on the instrument board of every car.

Can be installed in one hour or less One model for all cars.

You adjust this instrument to your motor. Whether the normal running point of the motor is low or high, you always know its exact condition.

By being attached to the motor it is not exposed to rain, snow or weather conditions.

The gauge is placed on the instrument board and is easily read day or night. The large white pointer and novel dial makes it readable at a glance.

It is theft proof. Its location is such that it is not liable to breakage.

The universal clamp for attaching the unit to the motor makes the installation easy. Full instructions accompany each instrument.

No. 5965—W't each 1 lb., each **$12.70**

ONE IN A BOX

RADIATOR CAPS

No. 7157—Brass, white enamel, black lacquered with rubberized top, w't per doz. 8 lbs. ....per dozen **$4.55**

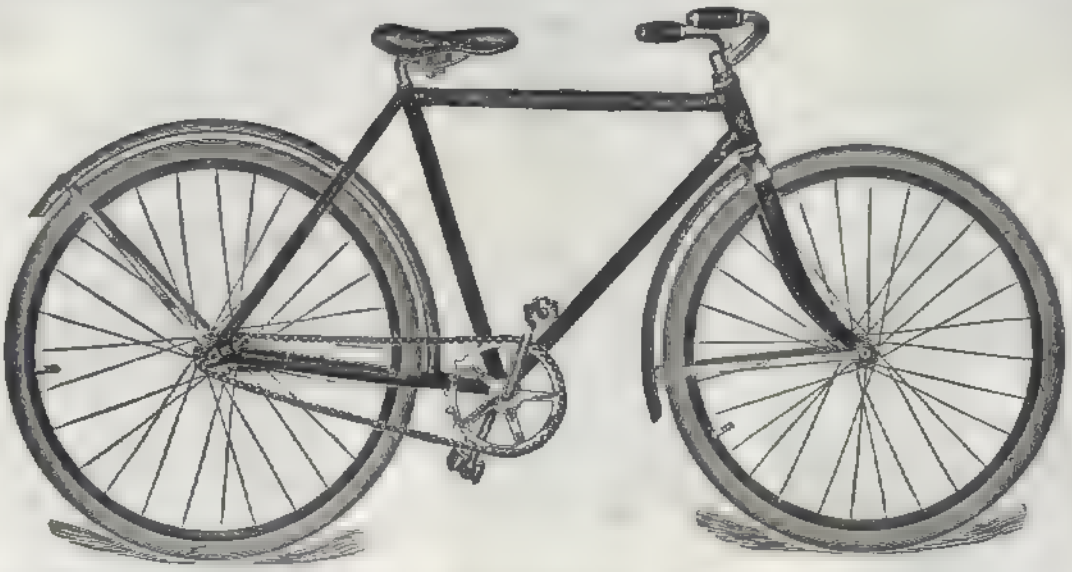
CHICAGO JUVENILE BICYCLES

The great increase in the sale of bicycles has extended to the juvenile as well as to the adult models. Our line did not contain a low priced model, within the reach of all the younger generation who wished to ride.

To meet the increasing demands we have added our Chicago Juvenile Bicycle, which we believe will answer the requirements of the trade that demands this priced machine.



Frame—Option 18 in. or 19 in. **External joints. All parts of frame reinforced.**

No. T1029—19 in. frame, 26 in. wheels, equipped with handle bar, pedals, saddle, tires and mud guards, each $37 60
No. T1029B—19 in. frame, 26 in. wheels, equipped with handle bar, pedals, saddle, tires, coaster brake and mud guards, each ..... each $43.60

We cannot deviate in any particular from the equipment on above bicycles.

WT, PACKED FOR SHIPMENT, WITHOUT COASTER BRAKE, 40 LBS., WITH COASTER BRAKE, 41 LBS.

BICYCLE GUARANTY

We agree with the purchaser of ANY OF OUR BICYCLES to make good by repair or replacement any defects in material or workmanship, provided the defective part is delivered to us, transportation charges prepaid.

This guaranty does not cover cost of repairing bicycles damaged by accident, misuse, or neglect, and expires 12 months after date the purchase is made.

In returning defective parts, do not fail to put your own name and address on the tag, and to write a letter giving full particulars. Failure to do this may be the cause of much unnecessary delay.

TIRE GUARANTY

We guarantee ANY OF OUR BRANDED TIRES to be perfect in workmanship and material, and if any defect should develop within the season on goods purchased from us, we will repair or replace without charge, provided they are returned to us charges prepaid.

Rim cut, punctured, or tires abused, misused or worn out in service will not be replaced.

This guaranty continues in effect 12 months following date of purchase.

See that every package sent has your full address—name, town, street No. or county and state—securely fastened to it.

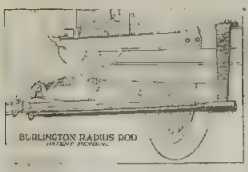
FRONT RADIUS RODS

BURLINGTON, FOR FORD CARS



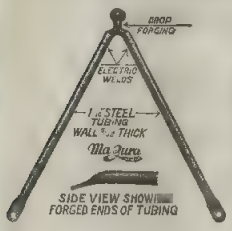
Made of steel, black japanned. Can easily be installed on any Ford Car or truck. Requires only three bolts on a side. No holes to drill. All parts interchangeable, no rights or lefts. Improves steering, insures safe and smoother driving over rough roads. The normal road shocks are cushioned through a spring.

Per Set

No. A-61BRR—Complete with all necessary bolts ready to install $10 50

Packed loose; weight per set 15 lbs.

MAZURA
FOR 1920 AND 21 MODEL FORD CARS



New Type, Attaches beneath the Axle.

An extra strong rod made of heavy Bessemer butt-welded straight steel tubing. The "Y" drop-forging is of unusual strength, and open ends of tubing are forged into shape to secure an extra strong construction at these points.

No. **A-27338**
Less than 25, Each $3 60
Lots of 25 or more, Each 3 30

Six in a bundle; weight each 6¼ lbs.

FRONT RADIUS ROD SUPPORTS

AUXILIARY, FOR FORD CARS

These rods are for reinforcing the regular Ford radius rod. They assist to brace the front axle, keep it straight, prevent bending or breakage of regular rod. No vibration; makes steering easier on rough roads; easily and quickly attached.

FOR FORD CARS, All Models Previous to 1920.

Each

No. A-701 ¾ inch solid steel rods, malleable iron clamp; black japanned finish $8 70

Packed loose, wrapped; weight per dozen 145 lbs.

FOR FORD CARS, All Models Previous to 1920.

Each

No. A-704—½ inch steel tubing; malleable iron threaded clamp; black japanned finish $3 75

Packed loose, wrapped; weight each 5 lbs.

FRONT RADIUS ROD SUPPORTS

MAZURA, FOR 1920 and 21 MODEL FORD CARS

Tubular steel rod, 1 inch in diameter; black japanned finish. An adequate brace for front axle. Holds axle in line, making steering easier. Will fit all cars having the radius rod attached to bottom of axle.

No. **A-420**
Lots of 1 to 25, Each $2 76
Lots of 25 or more, Each 2 61

One in a carton; weight each 5 lbs.

PERFECTION FOR FORD CARS
Fits all Model Ford Cars.

In attaching to 1920 and 1921 models it necessitates bending of bar about 1/16 of an inch.

Made of steel angle 1x1x⅛ inches. For reinforcing the radius rod and to brace the front axle, preventing it from bending. Will not rattle nor become loose; easily and quickly attached.

Each

No. A-1P—Weight each 7 lbs $1 95

Packed loose; wrapped.

No. A-590—Assortment as described above..... Per Ass't. ✚$157 50

One assortment in a carton; weight 100 lbs.

Automobile Tires and Accessories is a "dandy" line to carry. If you are not already handling this profitable line—do so at once—and it's well to buy them from Belknap's.

✚F. O. B. Ohio Factory Only.

Seat Covers for Ford Cars

Made strong and durable, being double stitched where strain is greatest. Arm rests are made of imitation leather. All seams and doors are bound with a high grade black imitation leather binding. Coverings for back cushions are put on with snap buttons, doors are tacked on with large head leatherette nails. Covers are for all the upholstery in the car—backs, cushions and doors. Packed one set to a carton. Prices are without kick pad or dust cover.

Japanned, tapped ⅞ inch. Made in two sizes, 1¼ and 1⅛ inch across face.

	Each
1¼ inch	$0.05
1⅛ inch	.05

Peerless Radiators

1917-21 Models
This model will not fit old model Fords unless used with special hood and shield outfit. On the 1917 to 1921 models it fits the hood regularly furnished.

No. 11 Black enamel, weight 60 lbs ..... each $28.00

No. 11 Nickel plated ..... each, $30.00

One in a Box

Peerless Radiators

1909 to 1916

Will fit all models up to 1917. Has large water capacity and cooling surface.

No. 10 Black enamel, weight 50 lbs ..... each, $30.00

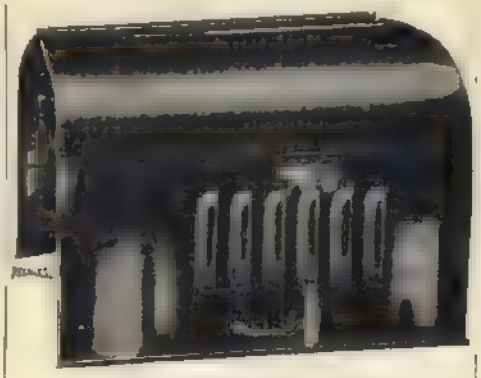
One in a Box

Combination Radiator, Hood and Splash Pan

This combination of radiator, hood and shield is produced particularly to convert the 1915-1916 Ford cars into the latest model. The tapered hood gives the car the new stream-line effect. The change is easily and quickly made. The front shield adds to the appearance of the car and keeps dust from the springs. The radiator is the regular Peerless No. 11, with honeycomb core which has proven most efficient.

No. 12 Combination, complete with malleable iron engine connection and 4 hood latches.....each $40.00

Hoods for Ford Cars



For 1917 and later Ford cars. Built of heavy gauge steel and finished with two coats of black enamel, baked on. Of four piece construction, strongly and rigidly made.

No. 4050B Hood, 1917-21 model ....each, $8.00

Radiator Caps

Made of aluminum alloy, black japan finish.

Each
No. 40 ..... $0.35

Black Rubberized Radiator Caps

Made of extra heavy metal, with black rubberized finish.

No. 55 .....each, $0.30

Ford Radiator Caps

Made of heavy gauge brass, polished. Unique top assures easy removal. Furnished in regular type. Regular Ford $0.20

Boyce MotoMeters

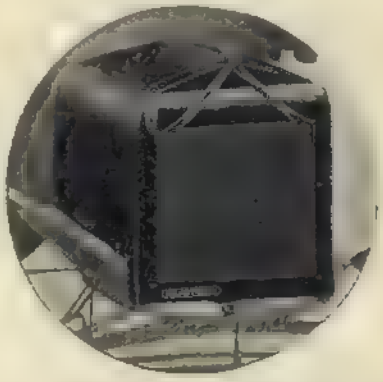
Special for Ford

Boyce MotoMeters have a heavily nickeled frame thermometer tube protected against breakage by two metal ribs. They are noted for their accuracy. Can be attached to the radiator cap in a few minutes.

Ford Special Model.....each, 3.50

Hood and Radiator Covers

For Ford Cars



Our Hood and Radiator Covers save engine and radiator. Keeps water warm and makes starting easy. With motor hot one or two turns of the crank starts the engine. Saves gasoline by using a lean mixture, and does away with warming up motor. A quick getaway is insured in spite of zero weather. Made in two pieces, so radiator cover can be used without hood cover in moderate weather. Hood and radiator cover held in place by snap buttons.

When car is standing curtain can be closed tight, keeping engine and water hot.

All covers are lined with heavy felt. Top materials are waterproof. Heavy reinforcing is made around cut-out places for handles and radiator filling spout. Made for any model Ford.

Hood and Radiator Cover Complete

No. 544 Enamel Drill.....each, $5.00

Radiator Cover Only

No. 546 Enamel Drill.....each, $3.00

Radiator Hose

This hose differs from the usual radiator hose furnished for Ford cars.

It is a 3 ply hose specially prepared in proper lengths. It will withstand the destructive action of heat and oil and will not blow out.

Its heavy stock is compounded so that it will withstand all the requisites of a good hose.

No. 3944. 1¾ x 2¾ in. outlet connection hose.....each, $0.15
No. 3006. 2 x 4 in. cylinder head outlet hose .....each, .30

One Dozen in a Box

Thompson Hose Clamps

Galvanized steel made especially for Ford hose connections.

No. 3945. Outlet connection hose clamps .....each, $0.05
No. 3007. Cylinder head outlet hose clamps .....each, .05

Twenty-five in a Box

Uniq Running Boards

Board is made of California redwood, covered with aluminum and bound with aluminum molding. Furnished complete with bolts ready to attach to car. Used in place of the plain boards furnished with the Ford, and radically improves its appearance, at the same time furnishing a step that is not slippery in wet weather and that will not rust, dent, sag or rattle.

Style A.....per pair, $8.00

Ford Running Boards

These are exact duplicates in every respect of the 1921 Ford Model T, made of 18 gauge automobile steel and finished in two coats of high grade baked on black enamel.

Per pair $5.00

Fenders for Ford Cars

Front Left

Front Right

Rear Left

Rear Right

These fenders are exact duplicates of those supplied with Ford cars and are interchangeable with them.

Built of all 20-gauge, full finished steel. This is an exception to the general method of Ford fender manufacture.

Fenders made of lighter steel than 20 gauge will not stand the vibration and wear that is encountered on a Ford car.

Peerless Fenders are finished in two coats of hard, lustrous enamel baked on.

New Peerless Fenders add greatly to the appearance and resale value of a used Ford car. There is nothing that depreciates the appearance and value of the Ford car as loose, rattly, rusty, shapeless, broken fenders.

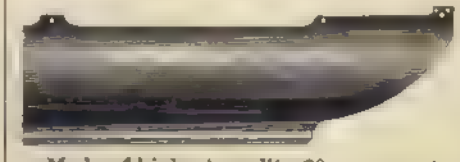
They are crated to withstand shipping without damage.

No. 16 Fenders fit all old models to and including 1916.

No. 17 Fenders fit 1917 and later model cars.

Per set of four.....$22.00
Front Fenders only.... per pair, 12.00
Rear Fenders only.... . per pair, 10.00

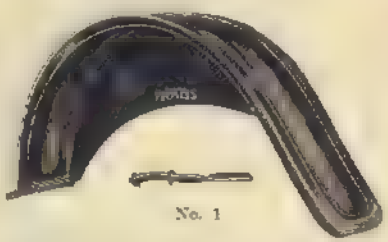
Running Board Shields



Made of highest quality 20 gauge automobile steel. Will match fenders and will fit any model car from 1915 to 1920. Finished in gloss black enamel.

Running Board Shields for Fords...
.....per pair, $6.00

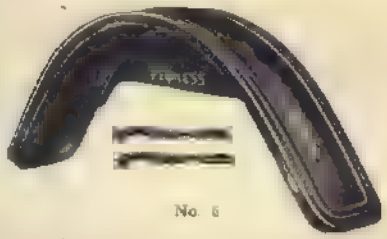
Commercial Fenders



No. 1

A general purpose truck fender. The best truck fender on the market and in constant demand. Made of heavy gauge steel, finished with two coats of black japan baked on. Especially recommended for use when a Ford car is converted into a commercial car. Complete with wrought iron brackets, bolts and washers.

No. 1 Commercial Fenders, per pair, $6.00



No. 5

Especially built for Ford one ton trucks when equipped with 32 x 4½ pneumatic tires but is also a general utility fender for other trucks. Made of heavy gauge full finished steel with two coats of black enamel baked on. Strong and rigid construction. Complete with wrought iron brackets, bolts and washers.

No. 5 Commercial Fenders, per pair, $7.50

Fender Braces

Front

Rear

A device which eliminates the rattle of the fenders on Ford cars. Can be attached by any one in a few minutes. Made of steel and black japanned. The small size is used on the rear fender, the large size on front fenders.

Front Fender Braces .....each, $0.10
Rear Fender Braces..... .10

Running Board Truss Rods

4816

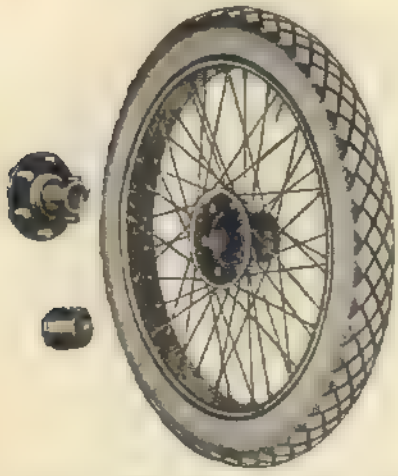
4817

These rods are made of ⅜ in. round steel fitted with A. L. A. M. hexagon nuts at each end.

They connect the two running boards together underneath the car. These rods are duplicates of regular Ford equipment.

No. 4816..... . . .each, $0.50
No. 4817..... each, .50

DAYTON QUICK DETACHABLE WIRE WHEELS



Dayton quick detachable wire wheels are laced with the system of balanced triple spoke lacing, the strongest and only satisfactory system of lacing yet devised for motor car service.

Five wheels and four inner hubs constitute a set. The wheels are made detachable and interchangeable. The inner hub mountings for the axle spindles are so arranged that any wheel may be changed from one position to another, with no other operation than the simple unscrewing and replacing of the hub cap. The spare wheel is carried with inflated tire and can be applied to any of the hub mountings.

Wire wheels are known as "suspension" wheels, which means that the weight of the car is hung from the top half of the wheel. You could knock out the wire spokes in the bottom halves of the wheels and the car would still be perfectly supported. Wire wheels "cradle" the car and make a difference in its riding qualities which few shock absorbers equal and none surpass.

Wire wheels give more tire mileage due to resiliency and heat radiation. The steel rim with its numerous radiating steel spokes carries off the heat, whereas in a wood wheel the wood felloe, which is practically a non-conductor of heat, locks the heat securely in the tire.

These facts coupled with the light weight of Dayton Wire Wheels account for a tire saving of at least 25 per cent.

Dayton Wire Wheels will not collapse, no matter how violent the skid. They are five times as strong as wood wheels. There is no shrinkage and cracking from weather conditions and climatic changes.

The extra or spare wheel makes tire changing quicker and easier than with any demountable rim.

The stylish appearance of Dayton Wire Wheels commends itself to every Ford owner.

Installation

The fitting of the car for the reception of Dayton Quick Detachable Wire Wheels is a very simple matter. The wood wheels are removed from the axle spindles and the balls which are located in the front wheels are changed over into the front wire wheel mountings. These are then placed on the spindles exactly the same as were the wood wheel hubs.

Similarly the brake drums are removed from the rear wood wheels and bolted on to the flanges of the rear wire wheel mountings, using the bolts and nuts attached for this purpose.

Hubs and hub caps are marked right and left side, and are applied to the right or left of the driver when seated in car.

Speedometer

The regular Ford size (Model 100) Stewart-Warner Speedometer Sprocket will fit the Dayton Wire Wheels.

For All Models of Ford Cars Only

Set consists of 5 wheels, with 30x3½ in. plain clincher rims, 4 inner hubs, 4 hub caps, hub cap wrench, spoke nipple wrench, and outer hub dust cover for spare wheel.

White, black, cream or red enamel finish .....per set, $80.00

Other colors, enamel finish. per set, 85.00

Repair Parts for Dayton Wire Wheels for Fords

Spokes and Nipples (not enameled) .....each, $0.10

Always specify length of spokes when ordering.

Inner Front Hubs, right or left..... .....each, 4.50

Inner Rear Hubs, right or left.... .....each, 5.25

Hub Caps, right or left, nickeled.... .....each, 3.50

Hub Cap Washers.....each, .60

Wire Wheel Carriers

A strong, durable wire wheel carrier that can be easily attached to the rear of the car. Holds spare wheel rigidly and securely. The wheel can be easily put on and removed.

All Models Ford..... .. ...$12.95

Peerless Wheel Discs

Made in two styles, for Ford regulation and demountable wheels, make Ford wheels equal in appearance to those of highest priced cars.

These discs are stamped in one piece from high grade 20 gauge cold rolled, full finished automobile sheet steel. The design makes them sturdy, rigid and elegant.

They are simple in construction. They fit over the hub cap on the outside, bolted with four bolts to the felloe of the Ford regulation wood wheel or demountable wheel.

They can be attached by anyone in a few minutes and require no special tools.

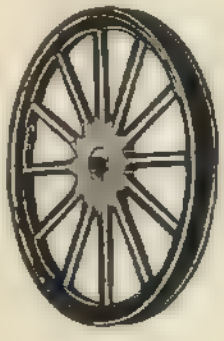
Packed one set (4 discs) in a carton. Finished bright red enamel.

For regulation wheels (per set of 4) $10.00

For demountable wheels (per set of 4) 10.00

When ordering discs for demountable wheels be sure to specify whether they are for four or five lug wheels.

Front and Rear Wheels



Standard Ford Type

Painted black and varnished, equipped with plain clincher rims.

No. 2800 Front wheel, 30x3 in., without hub .....each, $6.00

No. 2814C Rear wheel, 30x3½ in., without hub .....each, 6.00

Demountable Rims and Wheels For Ford Cars

30x3½ demountable clincher rims mounted on first grade hickory wheels, ready to receive Ford hubs.

Set consists of five rims, four wheels, wheel bolts and nuts and rim wrench. Furnished in black or natural finish.

No. 116 Set Demountable Rims and wheels for Fords, complete, ... per set, $35.00

Extra Rims ..... each, 3.50

One Complete Set in a Crate

Pneumatic Demountable Wheels and Rims for Ford One Ton Trucks

For 32x4½ S. S. pneumatic tire. Furnished to replace solid tires on rear wheels for Ford truck.

Wheels are equipped with split rim, straight side type. The set includes two wheels, 3 rims, one socket wrench, 12 new hub flange bolts and one rim tool. Black finish.

Set complete ..... each, $40.00

Extra Rims ..... each, 6.00

Roller Bearings for Front Wheels

The concave rollers of this bearing are placed at an angle of approximately 20° on ball shaped (or convex surfaced) cups and cones, allowing the rollers to travel in natural alignment, the same as in a ball bearing.

The outer surface of the inner cone is convex, having the contour of a perfect ball; the rollers being concave, permit the cone to move in any direction similar to universal joint action and allow it to swing to meet any misalignment due to machining a shaft deflection. These Roller Bearings need little or no attention, but can be easily adjusted for any small wear by slight lateral adjustment of cup or cone.

	Each
Ford	$10.00
Chevrolet 490	10.00

All bearings are listed for two wheel sets.

Bailey Ball Thrusts

Replaces thrust washers at left (gear) side of Ford and Chevrolet 490 differential.

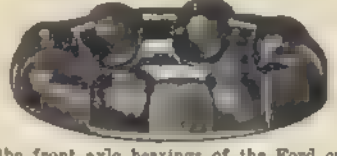
Holds the gears in mesh, reducing the possibility of stripped gears, noise and wear.

They are an exact replacement and are made to a thousandth part of an inch.

Bailey Ball Thrusts..... each, $3.75

Goodrich Ball Retainers

For Fords and Chevrolet 490 Cars



In the front axle bearings of the Ford car the balls run loose. They are merely poured into the raceway, and allowed to take care of themselves. The Goodrich National Ball Retainer separates the balls, so that each runs alone in the raceway, reducing friction to about one-third.

Complete with balls, per set of four, two large and two small..... $2.25

Hub Caps

Regular Pattern

Threaded to fit all models of Ford cars. Stamped from 18 gauge brass, polished nickel plated.

		Each
No. 2819	Brass, nickel plated.....	$0.20

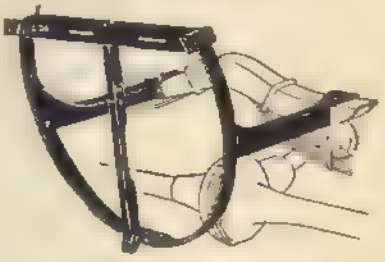
Humboldt Rear Tire Holders with Locking Base

For Ford Cars

It fastens to the rear frame in an easily accessible manner, and the license bracket is rigidly clamped around the two vertical supporting arms, thus eliminating any possibility of the lamp blowing out due to the excessive vibration. The locking base is another notable feature, making the tires secure against theft. Tires are carried in a vertical position clear of the exhaust. Strongly built from malleable iron and steel throughout and finished in our exclusive baked ebony enamel. Suitable for one or two tires. Each set packed complete with straps in an individual carton.

No. 1287 Each $5.00

Emco Tire Carriers



No more fussing with rusted bolts or balky straps. The spare tire or rim on the Emco Tire Carrier goes on or comes off with a quick-and-easy motion of the hand. Attaches easily to any type Ford and to 490 Chevrolet. Guaranteed for the life of the car. Made in the following styles.

FD3 Single demountable, Fords.... . . . . each, $5.00

FD4 Double demountable, Fords... . . . . each, 8.90

NOTE—Model FD3 is regular equipment on Ford sedans and coupes.

Hub Cap Wrenches

Is made of pressed steel, fits hub caps, also spark plugs and several other places on the car.

No. 1349 Each $0.20

Tuthill Titanic Springs

Front Spring for Fords

Titanic front springs are made without weakening center bolt hole and that is why we guarantee them forever against center breakage.

No. 102 7 leaves.... .....each, $6.00

Harvey Boltless Front Springs

Front Spring for Fords

Harvey Boltless Front Springs eliminate all front spring trouble. Guaranteed against sagging or breaking for one year. We recommend No. C1 for passenger cars and No. C7 for commercial cars and one ton trucks.

No. C1 7 leaves . ..... each, $6.00
No. C7 9 leaves .. . .each, 7.00

Front Springs for Fords

No. 3800 7 leaf standard, regular Ford Front Spring.....each, $4.00

No. 10 10 leaf Ford Front Spring, recommended for commercial cars and one ton trucks.....each, 8.50

Standard Rear Springs for Fords

A standard 8 leaf Ford Rear Spring which fits all models from 1910 to 1921.

No. 3824 Rear Springs.....each, $12.00

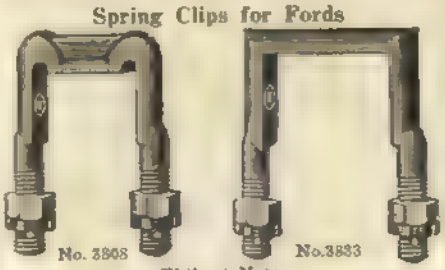
Harvey Rear Springs

Rear Spring for Fords

A high grade, long lasting Ford rear spring for all regular model Ford cars. Guaranteed against breaking and sagging for one year. We recommend the 10 leaf spring for sedans and commercial cars.

No. C2 8 leaves .....each, $15.00
No. C10 10 leaves .....each, 18.30

Spring Clips for Fords



Without Nuts

No. 3808 Front spring clips .....each, $0.30
Extra long for 9 and 10 leaf .....each, .50
No. 3833 Rear spring clips . . each, .25
Extra long for 9 and 10 leaf each, .50

Hyatt Roller Bearings for Fords

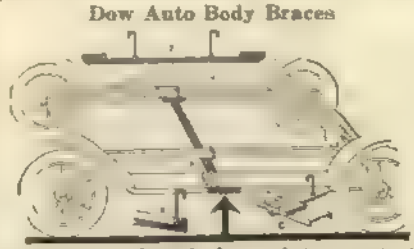
No. 2508 Axle shaft bearing.....
.. ..each, $1.50

No. 2587 Drive shaft bearing.....
....each, 1.75

Hyatt Roller Bearing Sleeves for Fords

		Each
No. 2509	Axle shaft bearing sleeve, right	$0.30
No. 2509B	Axle shaft bearing sleeve, left .	.30
No. 2593	Drive shaft roller bearing sleeve	1 90
No. 2596	Drive shaft sleeve..... .	1 20

Dow Auto Body Braces



A strong steel angle brace that supports the car. Stops the rattle, prevents uneven loading and keeps the springs from breaking. Fastens to the chassis. No holes to bore.

Each $3.00

Rear Axle Truss Rods

Prevents sagging or breaking of axles. Quickly attached.

No. 706 Weight 2½ lb.....each, $1.75

Apco Brake Rod Supports

Made of malleable iron with enclosed spring and a self lubricating stud. Can be attached without disturbing the original supports.

No. 45 Brake rod supports pair, $1.00

Auxiliary Front Radius Rods

For reinforcing the regular Ford radius rods. Made of angle steel. Keeps the axle true.

No. 50 Weight 5 lb., complete....$1.50

Ten in a Crate

Angle Bar Auxiliary Radius Rods

Adapted to those models of Ford cars having the radius rod attached beneath the front axle. Operates independently of radius rod. Holds front axle in line and aids easy steering.

No. 220 Angle bar for 1920-21 model Fords $2.00

Balcrank Stabilizers

This is a new steering help that is attached to the front axle and tie rod of Fords and other light cars. Its heavy coil spring absorbs the wobbly motion of the front wheels and prevents these vibrations from reaching the steering wheel. This relieves drivers of arm strain, making the car itself easier and safer to drive.

The stabilizer is simple in construction, but as dependable as any other part of the car. It can't lock and it is mechanically impossible for it to get off center. It can be put on with a monkey wrench in ten minutes.

Balcrank Stabilizers.....each, $6.75

One in a Box

Radius Rod Anti-Rattlers

Will permanently stop all rattling.

No. 21.....each, $0.50

Steering Rod Anti-Rattlers

The steering rod type has steel spring and adjustable screw.

No. 51 . ...per pair, $0.50

Door Anti-Rattlers

Makes the door rattle proof. Very easily attached. Screws on to door jamb with two screws. Can also be used as window anti-rattlers.

Door Anti-Rattlers .....each, $0.15

Little Giant Steering Rod Anti-Rattlers

These are specially shaped springs which stop the rattling of worn bushings, etc.

Per pair $0.75

Baby Giant Brake Rod Silencers

These little devices weigh only two ounces and will wear forever. They insure safety and silence of brake rod joints and tight brake rod connections.

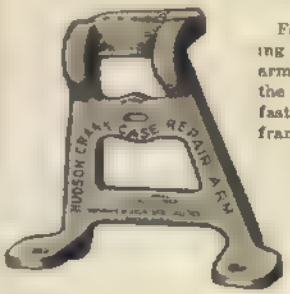
Price per set of 4.....$0.50

Steering Column Braces

As the Ford steering column has no support except four bolts at the dash, the Apco Brace was designed to make the column rigid. Made of malleable iron, black enameled.

No. 42.....each, $1.00

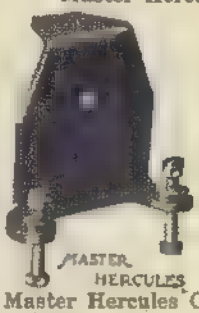
Hudson Crank Case Repair Arms



For use in repairing broken crank case arms. To use, remove the two bolts that fasten the arm to the frame and two in the crank case flange, set the repair arm in place and bolt to the crank case and to the frame.

Each $1.50

Master Hercules Repair Arms



Made of frame steel, strong and durable.

Will fit any model Ford crank case. Guaranteed to stand all legitimate tests.

All necessary bolts and nuts furnished.

Master Hercules Crank Case Repair Arms .....each, $1.25

Gemco Non-Tilting Steering Wheels

For Ford Cars

A high grade 17-inch steering wheel with walnut finished, corrugated rim.

The increased rim leverage makes driving easier and adds to the appearance of the car.

No. 1 Black enameled spider, each, $5.00
No. 5 Nickel plated spider...each, 5.50

Non-Tilting Steering Wheels

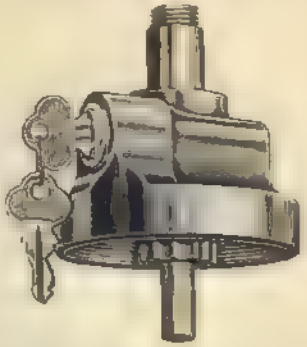
For Chevrolet "490"

A high grade 17-inch steering wheel, with walnut finished rim and non-tilting malleable iron spider

Larger in diameter than regular equipment, making steering easier

Chevrolet "490" steering wheels.... ....each, $6.00

Simplex Locks for Fords



For the steering wheel on all model Ford cars. Light, strong. Made of highly polished aluminum. Holds steering wheel disengaged, spinning, locked secure against theft. Unpickable two-way tumbler lock; hard machine, steel turnbolt will resist even sledge hammer. Die-cast aluminum body, thick walled.

Can be attached by anyone in fifteen minutes.

Complete with two keys.....$6.50

Lyon Front Ford Bumpers

In the Lyon Bumper a strong bracket two feet long is firmly attached under the car, and acts as a lever to rigidly support the bumper and balance it. It will not rattle. Is thirty pounds of the highest quality steel, scientifically constructed into a perfect bumper. The two reinforced spring leaves absorb the shock of a collision at fifteen miles an hour without damage.

No. 8 Front, nickeled.....each, $12.00
No. 58 Rear, nickeled.....each, 14.00

Special Ford Bumpers

Can be quickly attached to any Ford car, being secured by a U bolt passing around the lamp bracket support and a set screw tightened against the frame.

Each

No. 24C Channel bar, 1¾ x 1¼ in., nickel plated $10.60

Hilliard Anti-Shock Springs for Ford Passenger Cars

Aid the original Ford Springs to withstand the road strain, either up or down. A positive rebound check that prevents upthrow either up or down. Positively no side throw. They are neat appearing and easy to install. Have brass bushings in all wearing parts. They do not interfere with the original spring action but absorb the rebound.

Sedan type made of 1-32 in. heavier spring steel than other passenger cars.

Regular Type Hilliard Anti-Shock Springs for touring cars, roadsters and coupes.....per set, $19.50

For Sedans .....per set, 19.50

Hilliard Anti-Shock Springs for One Ton Trucks

Hilliard anti-shock springs for Ford one ton trucks save wear on car, motor and tires, eliminate danger of broken springs, do away with tipping and side sway and interfere in no way with the original spring action.

Easy to install and will give a cushion to relieve shock of 1000 lb. overload.

No coil springs used. Brass bushings on all wearing parts.

Hilliard Ford One Ton Anti-Shock Springs.....per set, $40.00

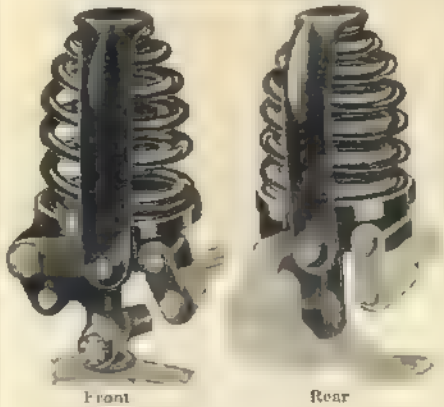
Ford Front License Brackets

These clips hold the license plate below the radiator on the Ford car.

No. 97 Neverout Ford Front Clips .....per pair, $0.30

One Pair in a Box

Halladay Direct Suspension Shock Absorbers for Fords

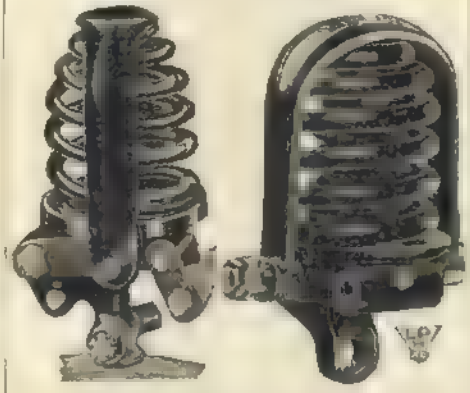


Front Rear

Halladay Shock Absorbers prevent rebound by eliminating the cause. The "beehive" spring is the most resilient and durable possible to make. No frictional bearing to interfere with spring action and no light breakable parts to be lost. Absorbs greater part of up or down movement leaving only a small amount of spring displacement. Save wear on tires, axles and other working parts

Touring Model . . . per set of four, $16.50
Sedan or Light Truck Model . . . . . per set of four, 18.50
Roadster Model . . . . per set of four, 18.50

Halladay Direct Suspension Shock Absorbers for Ford One Ton Trucks



Truck springs are necessarily very rigid to carry the maximum load. To meet this condition the springs used in these shock absorbers are the largest ever used for shock absorber purposes on a truck of this character. They have ample capacity to absorb jolts and jars.

Light loads up to 1000 lb. are carried on the "beehive" shaped outer springs. Large loads are carried on the outer and also the inner supplementary springs assuring easy riding, whatever the load.

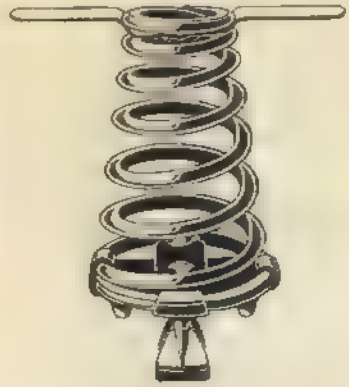
One Ton Truck Model... .. per set of 4, $42.00
One Ton Truck Model .... .. rear only, 24 00

Combination Crank Holder, Lock and License Tag Brackets

Attaches to front spring clips and fitted with a folding prong which holds the crank in a vertical position. Eliminates swinging and rattle. Made of malleable iron, finished in black enamel.

No. 250 Without padlock....each, $1.50

ARG. Auxiliary Springs



Made from the highest grade of spring steel obtainable.

It has a special patented plate at the top which locks under the spring clips, another special plate clamps on the bottom and ties to the axle by a clip.

A combination shock absorber and snubber. Adds long life to front spring.

ARG. Auxiliary Springs.....each, $5.00

Robe Rails

These rails are highly finished and will fit any car.

	Each
No. 19N Nickel plated, black ends, ⅝ in. hollow.....	$1.25

One in a Package

Foot Accelerators

Permits a perfect foot control, independent of steering wheel control. Is applied in 20 minutes without boring holes or marring the car. Is so attached that floor boards can be removed or replaced without interference from the accelerator pedal. Finished in baked ebony enamel.

No. 71.....each, $1.50

Bulldog Foot Accelerators for Fords

The foot rest makes it easy to hold throttle steady. Floor boards can be removed by simply unscrewing button on foot pedal.

Each $1.50

Mufflers for Fords

Especially for Fords. Built of heavy sheet steel. Reduces all exhaust noises to a gentle purr, with the least possible back pressure.

Each

No. 4025 Complete with brackets..$2.00

Apco Ford Mufflers

The Apco Muffler for Ford cars was designed after many years of experimental work.

It is a one-piece cast outfit with a testing valve which acts as an automatic relief in case of a muffler explosion.

The valve when open gives the exhaust free access to the air and a missing cylinder can be detected easily.

The muffler proper is made from a one-piece casting with no bolts, plates, nuts, rivets, etc., to work loose and rattle.

Outfit furnished complete with pedal, chain, screws, etc., ready to attach. Weighs six pounds.

No. 99. . .. . each, $5.00

Taber Combined Cut-Outs and Mufflers for Ford Cars

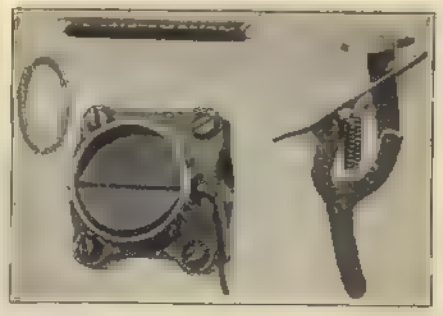
A patented device now in use on thousands of Ford cars throughout the world. It does away with the danger of muffler blow-outs. It minimizes back pressure. It keeps the motor running sweet and clean under all conditions. It does away with carbon. It is mud proof and rattle proof. It helps starting in all kinds of weather and tends to economize on gas consumption.

Outfit complete consists of patented cut-out and muffler, wear proof pedal, strap iron support, tail pipe, 5½ in. coil spring, wire leader and full directions for installation.

Each $5.85

Cut-Out Outfits

For Ford Cars



Consists of a gray iron, solid back valve, locking pedal, locking devices, spring and cable.

Valve is made with a one-piece lever and lever is mounted so that it is parallel with the exhaust pipe, a construction which enables installation without the use of a pulley.

Valves are carefully ground, bored accurately to size and tested for defects before leaving factory.

F1 Ford Cut-Out Outfits....each, $1.25

One Set in a Box

Petry Cut-Out Outfits

For Ford Cars

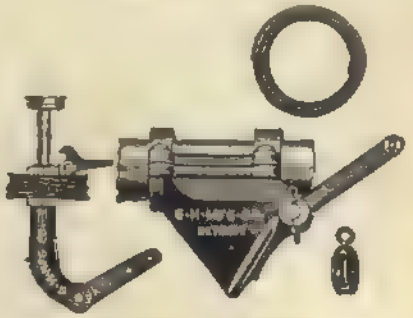
Special 1½ in. complete with chain and pedal.

Petry Cut-Out Outfit for Fords....$4.50

One Set in a Box

Gray-Hawley Muffler Cut-Out Outfits

Special Ford Outfit



Puts Pep in Your Motor

Saves muffler in case of backfire.

Neatly designed, best material and accurately machined to be instantly attached without any fitting. Entirely different from the cheap outfits usually offered for Ford cars. It's up to the Gray-Hawley standard in every way.

Gray-Hawley Cut-Out Outfit for Fords $2.00

One Set in a Box

Jiffy Crank Holders

A heavy spring which hooks over the lamp bracket on one end and holds the starting crank on the other end. Does away with all rattling of the starting crank. Baked on glossy black japan finish.

Each $0.25

Ford Fan and Pulley Assemblies

Made of pressed steel blades on a malleable iron hub, with high grade bronze bushings.

Each

No. 3960...$1.50

Juelson Ford Fans

The Juelson fan is well built, being made from highest quality material. Has a cone-shaped hub which protects the bushings against dirt. The blades and bushings are instantly detachable.

It is so constructed that the air currents are directed and driven over all of the surfaces of all of the cylinders.

The two-bladed design concentrates all the air currents on the vital parts of your engine. It is so well balanced that very little power is required to turn the fan. Vibration and fan noises are entirely eliminated. It can be easily attached and is furnished complete with all necessary attachments.

Each

Juelson Ford Fan.....$1.60

One in a Carton

Federal Fan Belts

Federal fan belts are made up of multiple plies of specially treated fabric, impervious to oil and grease. They are practically unstretchable and are very durable. They will outlast the ordinary belts supplied for the purpose.

They are very economical and will be a great saving to the Ford owner.

No.	Model of Car	Each
1	Ford 1910-1916	$0.50
2	Ford 1917-1920	.55
42	Ford 1921 starter models	.60
20	Fordson Tractor	1.50

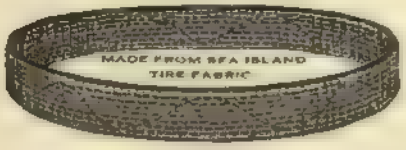
Securely Packed, Five Belts in a Carton

Old Hickory Cord Belts

Made endless of Sea Island tire fabric impregnated with a special compound, making belts impervious to oil and water.

		Each
No. 32	For 1911 to 1916 Ford cars	$0.40
No. 33	For 1917 to 1920 Ford cars	.40
No. 13	For 1921 Ford cars	.55

Old Hickory Fordson Tractor Belts



Made from Sea Island tire fabric, four ply with strong linen thread and treated with a chemical preservative which makes them strong and durable.

No. 218 Fordson Tractor Belts .. each, $1.70

Fan Belts

Best oak tanned belting leather, all stretch removed, lap stitched and cemented. Specially treated to withstand the action of heat and water.

		Each
No. 3	For Fords up to 1916 incl.,	$0.45
No. 37	For 1917-1920 models	.50
No. 1921	For 1921 models	.60

Fan Belt Guides

A new Apco guide. Is made of two pieces of steel and is attached to a square bolt as shown.

No. 36 Fan Belt Guide.....each, $0.25

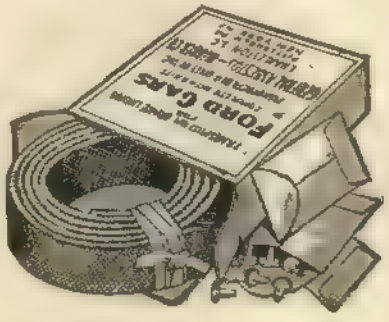
One in a Box, Weight 2 Oz.

White Stripe Transmission Lining For Ford Cars

Does not harden under the action of hot oil and friction. But keeps soft and pliable—and thus presents an ideal braking surface to the drum of the Ford through a long service.

White Stripe. Per set of 3 linings .$2.25

Garco Transmission Linings



Built to give long, efficient and satisfactory service on Ford cars. Garco Transmission Lining is woven of a high grade material and contains no wire. Cannot short circuit the Ford magneto—is not affected by oil. Sets for Ford cars consist of three pieces of lining 23½ in. long by 1⅛ in. wide by ⅛ in. thick. Packed in boxes with rivets needed for applying.

Garco. Per set of three.....$2.00

Raybestos Transmission Linings

Raybestos lining for Ford transmission is made without the wire insert to preclude the possibility of short circuiting the magneto. One set of three pieces 23x1¼x⅛ in., in a box with rivets

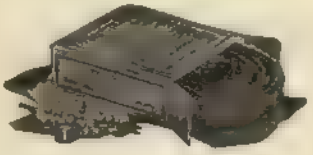
Raybestos. Per set of three.. . . $2.25

Advance Cork Insert Transmission Linings

These linings are made of best transmission fabric into which circular pieces of cork are inserted. The surfaces of the corks protrude slightly. The corks never become smooth or glassy, and will outlast three ordinary linings.

Advance. Per set of three.. . . $3.50

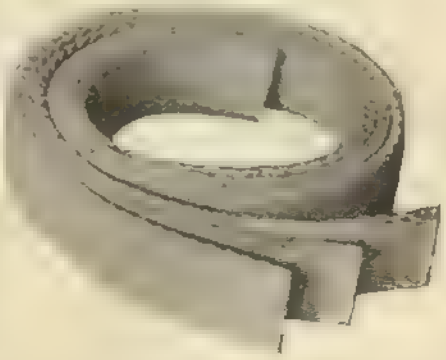
Chatterless Transmission Linings



Boxes contain three pieces of lining 23 in. long, 1⅛ in. wide and ⅛ in. thick, with sufficient rivets for attachment.

Chatterless. Per set of three.. ..... .$1.25

Standard Transmission Linings



The same lining as furnished as standard equipment.

Made of tightly woven twill weave fabric 1⅛ x ⅛ in. in strips 23½ in. long to fit Ford car. Plain white. No rivets furnished with this set.

Standard Transmission Lining in sets of 3 strips.....per set, $0.75
50 or 100 ft. rolls.. . . per ft. .12½

Apco Ford Transmission Tools

For holding transmission bands together while assembling.

Clamp holds bands in perfect alignment. Wrench drop forged and milled to correct size. Finished in black enamel.

No. 123.....each, $0.75

Brake Shoes

Gray iron, one piece. Interchangeable with regular Ford shoes.

Each

No. 2566 With springs.....$0.40

2 in 1 Copper Gaskets

For Ford intake and exhaust manifolds, replaces Ford parts No. 3068 and No. 3064.

2 in 1 Manifold Gaskets...per 100, $5.85

Split Brass Rivets

Put Up in Boxes

Style A—For Ford Transmission Bands

LAWN MOWERS

—BLUE GRASS—

Ball-Bearing. High Grass. Double Gear.

Drive Wheels 11 Inches Diameter, Cutter 6 Inches Diameter.

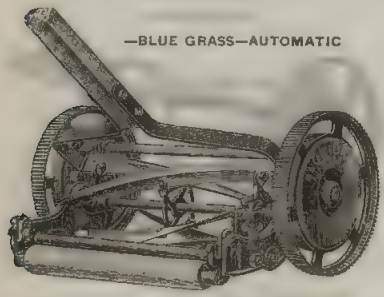
Extra long wheel base causing mower to run smoothly and cut easier over rough ground. Five heavy revolving cutter blades of extra heavy crucible cast steel. Stationary blade made of Disston crucible cast saw steel tempered in oil. Stationary knife bar is pivoted on steel cones. Highest quality dust proof cone and steel balls. Patented ball retainer. Center adjustment of stationary knife bar. By loosing jamb nut and running down screw, stationary blade can be raised at center to revolving cutter independent of the ends. Ball-bearing parts. Ball bearing cones and cups guaranteed never to wear out or require replacing.

Furnished in red and gold, varnished hardwood handle.

Nos.	4714	4716	4718	4720
Width cut, inches	14	16	18	20
Weight each, boxed, lbs	55	58	61	63
Each	$34 05	36 00	38 25	40 05

One in a wood box, handle loose.

—BLUE GRASS—AUTOMATIC



Ball-Bearing, High Grass, Drive Wheels 10 inches Diameter, Revolving Cutter 6 Inches Diameter.

Simplicity, durability and self-sharpening, no screws or bolts to adjust or rust, without complications, the only adjustment necessary is made with finger and thumb.

Extra long wheel base; four revolving cutter blades made of crucible steel, equipped with ball-bearings, that will never wear or require adjusting. Silent in operation, adjustable throughout; stationary knife bar pivoted on steel cones. No pressed cups used, cups and cones made of solid cone steel, ground perfect, best quality steel balls.

Finished in gold and carmine, varnished hardwood handle

HOUSEHOLD LUBRICANT

For lawn mowers, sewing machines, bicycles, etc.; will not gum or corrode; put up in tins.

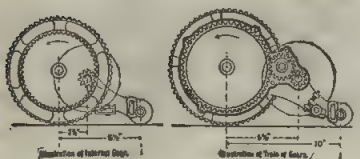
Per Dozen

No. 4—4 ounce cans..... $3 75

Three dozen in a wood case; wt. per dozen 6 lbs.

LAWN MOWERS

"TRAIN OF GEARS"



No. 47 No. 1890

Used On Blue Grass Mowers No. 1890 and No. 47.

Advantage of a Train of Gears over Internal Gear.

Train geared mowers run more easily and steadily owing to their great length of wheel base. Driving wheels may drop in a rut, but before the knives reach it the wheels are out again and the grass is cut smoothly, because the wheels and roller span the rut.

There is an additional advantage of better distribution of wear and tear and increased power and speed. The action is on the forward side of pinion and pull is down toward bed-knife, so when strain or cutting occurs the revolving cutter is always firm against bed-knife and cuts smooth.

Ball-Bearing Device used on Blue Grass Mowers.

Has 7/32 inch best quality steel balls. All of the ball-bearing cones used on these lawn mowers are made of the best quality of steel, thoroughly case hardened and the ball race ground to a perfect cylinder. These cones are tested before adjusted to the revolving cutter shaft.

All perfectly ground, dust proof, and made with as great a degree of perfection as the finest bicycle.

All blades used on these mowers are of the highest grade of crucible steel tempered in oil. The revolving cutters on these mowers are made a perfect cylinder by being ground on special grinding machines.

The success of the Blue Grass Mowers has been largely due to the patented ball-bearing adjustment, the stationary knife and the mode of adjusting the stationary knife bar; together with manner of fitting stationary knife bar.

LAWN MOWERS

—BLUE GRASS—

Stationary Knife Bar On Blue Grass Mowers.

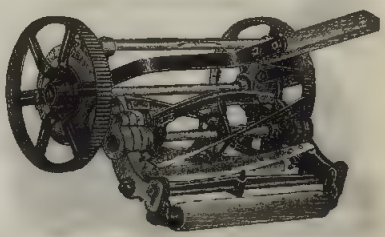
On all Blue Grass Mowers the stationary knife bar is squared in a most particular manner. The ends of the knife bar being faced and the bottom of the bar planed where stationary blade is attached. In the end of each stationary knife bar is inserted a steel cone, which is pivoted in the side plates and held firmly in place by heavy machine bolts, making the machine absolutely rigid. We do not know of any other lawn mower having as much machine work or expense on the stationary knife bar, as is used on these machines.

Stationary Blade On Blue Grass Mowers.

The stationary blade used on all Blue Grass Mowers is made from Disston saw steel and has a certain springy character that allows the revolving cutter to have a perfect joint at all times with the stationary blade; without frequent adjustment of the stationary blade; as is the case with most lawn mowers, using the thick heavy stationary blade which is very stiff and will not allow for any slight difference in the wearing qualities of the revolving blades.

The ratchets used on the Blue Grass Mowers are noiseless and never in operation when the mower is trundled from place to place or pulled backward. All mowers of similar character have noisy ratchets with working pins that are in operation at all times, shortening their life.

—BLUE GRASS—



Ball-Bearing. High Grass. Triple Gear.

Drive Wheels 10½ Inches Diameter, Cutter 6 Inches Diameter.

Triple gear open frame, long wheel base, five high grade crucible cast steel cutter blades, dust proof ball-bearing journals, knife bar mounted on milled steel cones, has a train of gears and drives from both ends; both revolving cutter and driving wheels operate on ball-bearings, so constructed that they never require adjusting. Silent in operation. Has patented center adjustment for adjusting the stationary blade at center to the revolving blades, independent of the ends.

Finished in red, silver and gold; varnished hardwood handle.

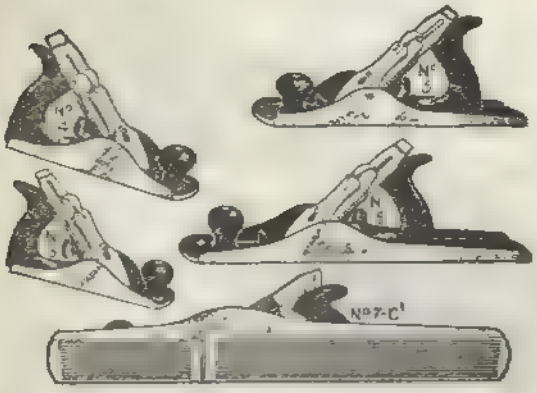
PLANES



"BAILEY" ADJUSTABLE IRON

The handle and knob are made of highly finished, thoroughly seasoned rosewood. The English steel cutter is tempered, ground and honed, ready for use, is adjustable both endwise and sidewise, and bedded to the heel of bevel. The width of mouth can be varied by changing the setting of the frog. Bottoms, either flat or corrugated—see cut 7C—as desired.

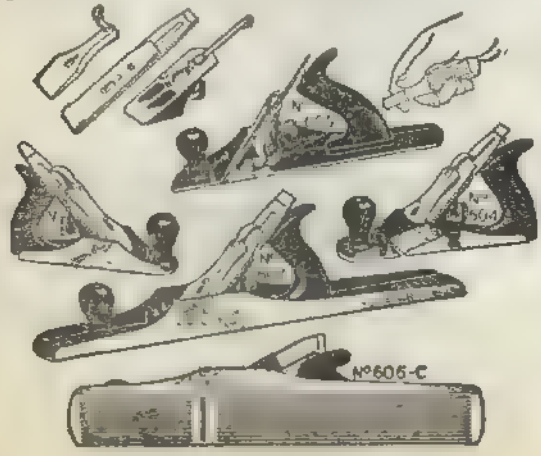
STANLEY "BED ROCK"

For fine work on hard and knotty wood, this plane surpasses all others.

The cutter, frog and bottom are so machined and fitted that they are practically one solid piece of metal, thus preventing any chance of vibration.



The frog travels in a groove, ensuring it being square with the mouth of the plane, and preventing shifting or "wobbling."

The width of the mouth can be regulated by use of a screw driver as shown in the cut, without removing the cutter and lever.

The cutters are made of the best English steel and are adjustable both endwise and sidewise.

The shape of the sides, a distinctive feature, adds greatly to the strength of the plane.

The handles and knobs are of rosewood and finely finished.

Bottoms either flat or corrugated (see No. 605C) as desired.

Length, in	9½	10½
Cutter, in.	1⅜	1⅝
Each	$3.10	4.20

ONE IN A BOX

STANLEY LOW ANGLE BLOCK

The construction of this plane is such that it is especially adapted for use in cutting across the grain on heavy work, where more power is required than can be obtained by use of the ordinary block plane. The plane is fitted with an adjustable throat, which enables the user to work equally well on hard or soft wood.

No. 62—14 in., 2 in. cutter, w't 4 lbs. .....each $7.20

ONE IN A BOX

STANLEY PLANES

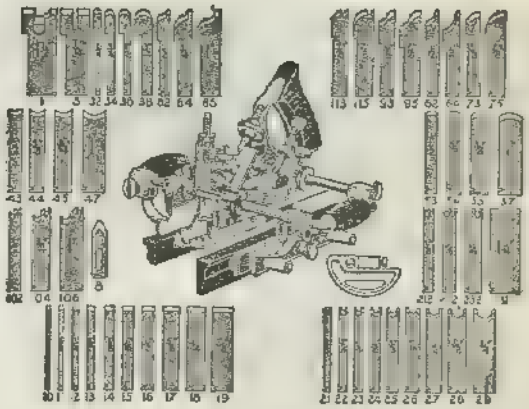
BEADING, CENTER, PLOW, DADO, RABBET, FILLISTER, MATCH, SASH, SLITTING AND MOULDING

THE MOST COMPLETE STANLEY SET

Will accomodate cutters of almost any shape and size. All metal parts nickel plated, handle and fences of selected rosewood, all parts well finished.

No. 55—Length 10 in., w't 15¼ lbs., complete with 52 cutters, each $39.00

ONE IN A BOX



BEADING, CENTER BEADING, PLOW, DADO, RABBET, FILLISTER, MATCH PLANE, SASH AND SLITTING

Seven beading tools, ¼ in., 5/16 in., ⅜ in., 7/16 in., ½ in., 9/16 in. and ⅝ in., ten plow and dado bits—⅛ in., 3/16 in., ¼ in., 5/16 in., ⅜ in., 7/16 in., ½ in., ⅝ in., ¾ in. and ⅞ in., a tonguing tool, a sash and a slitting cutter, are regularly furnished.

Each plane has an adjustable fence, a depth gauge, spurs for use across the grain, a cam leveling or steading rest and can be used either right or left hand.

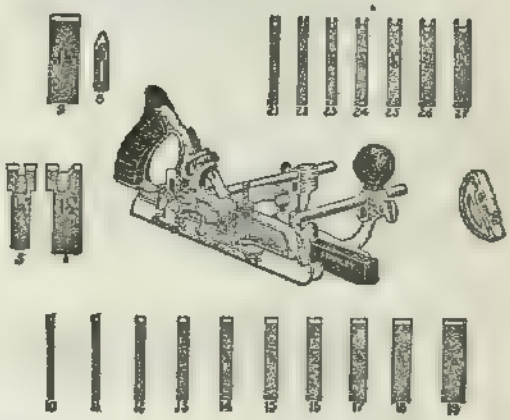
No. 45—Nickel plated, with twenty tools ..... each $19.80

Extra Bottoms and Cutters.

By substituting special bottoms for the sliding section, cutters as follows may be used. Special bottom required for each cutter. Prices of hollows and rounds include two cutters and two bottoms, of nosing tool, one cutter and one bottom.

No. 6—Hollow and round ¼ in. cutters work ½ in. circle, per pair $3.00
No. 8—Hollow and round ⅝ in. cutters work 1 in. circle, per pair 3.00
No. 10—Hollow and round ¾ in. cutters work 1¼ in. circle, per pair 3.30
No. 12—Hollow and round 1 in. cutters work 1½ in. circle, per pair 3.30
No. 5—Nosing tool, 1¼ in. cutters work 1½ in. circle ..... each 2.40
Extra Cutters, 20 tool bits, etc. ..... per set 10.00
Extra Screws ..... per dozen .96
Extra Spurs ..... per dozen .96

ONE IN A BOX



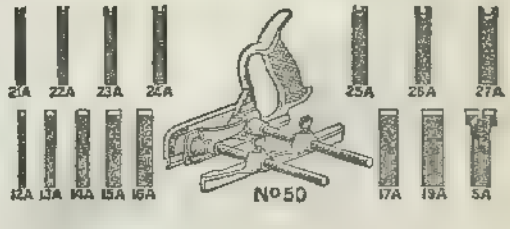
PLOW, BEADING AND MATCHING

For light work, consists of a main stock with metal handle, carrying a spur and a depth gauge and forming a support for one side of cutter, a sliding section carrying a spur and forming a support for other side of cutter, a fence with a 5 inch adjustment.

The cutters comprise 7 plow and dado bits—¼, 5/16, ⅜, 7/16, ½, ⅝ and ¾ inch, 7 beading tools, ⅛, 3/16, ¼, 5/16, ⅜, 7/16 and ½ inch, and a ¼ inch tonguing tool.

No. 50—Nickel plated, length 9¾ inches, 15 cutters, w't 3½ lbs., each $10.90

ONE IN A BOX



PLOW, DADO, FILLISTER AND MATCHING

Skew cutters are the feature of this plane, main stock carries a spur, depth gauge, slitting cutter, sliding section carrying a spur forming an extra sole for the plane. Rosewood handle and knob.

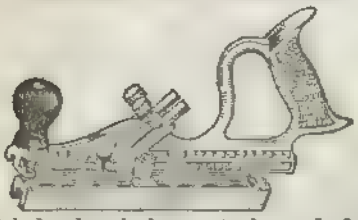
Cutters comprise 8 plow and dado bits—3/16, ¼, 5/16, ⅜, ½, ⅝, ¾, 1¼ in., 1½ in. fillister cutter, ¼ in. tonguing tool and slitting cutter.

No. 46—Nickel plated, length 10½ in., 11 cutters, w't 5¾ lbs., each $14.00

ONE IN A BOX

STANLEY ADJUSTABLE PLANES

TONGUING AND GROOVING



Nickel plated iron stock and face, including tonguing and grooving tools.

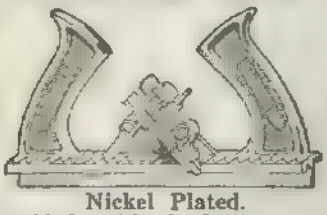
The fence is set in a center pivot and can be swung around and locked either way. Set one way it exposes two cutters for cutting the tongue and when reversed leaves only one exposed for making the groove.

No. 48—8¾ in., for ⅜ to 1¼ in. boards, w't 3 lbs. .....each $6.80

No. 49—¾ in., for ⅛ to ⅜ in boards, w't 2½ lbs. .....each $6.80

ONE IN A BOX

DOUBLE END MATCH



Nickel Plated.

Provided with both tongue and groove irons. With one side a tongue can be cut, and by reversing ends, the plane will cut a groove to fit.

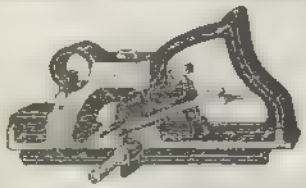
No. 146—Matches ⅜ in. boards, cuts groove ⅛ in., w't 1⅛ lbs., each $5.10

No. 147—Matches ⅝ in. boards, cuts groove 5/16 in., w't 2 lbs., each $5.45

No. 148—Matches ⅞ in. boards, cuts groove ¼ in., w't 2¾ lbs., each $5.75

ONE IN A BOX

RABBET AND FILLISTER



The sides and bottom being square with each other, the planes will lie perfectly flat on either side. Adjustable fence slides under bottom to regulate width of cut. Has one spur on each side and adjustable depth gauge. Is suitable for either right or left hand work. The front part of plane can be easily detached thus providing a bull nose plane.

No. 278—Japanned iron stock and fence, 6¾ in. long, 1 in. cutter, w't 2 lbs. .....each $4.10

ONE IN A BOX

IMPROVED RABBET

Iron stock, length 8 in., with depth gauge.

WITH SPUR

This plane will lie perfectly flat on either side, and can be used with right or left hand equally well, while planing into corners or up against perpendicular surfaces.

Nos.	190	191	192
Cutter, in.	1⅛	1½	1
W't, lbs.	2½	2¼	2
Each	$3 80	3.55	3.30

ONE IN A BOX

DUPLEX RABBET AND FILLISTER

This plane has two seats for the cutter, one for regular work and the other where a bull nose is required. Has spur and removable depth gauge. Adjustable fence can be used on either side and slides under the bottom regulating width of cut. To use as rabbet plane, remove fence and arms.

No. 78—8¼ in. iron stock and fence, 1⅛ in. cutter, w't 3 lbs., each $4.20

ONE IN A BOX

SKEW CUTTER, FILLISTER AND RABBET

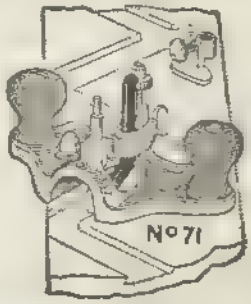
The fence and depth gauge can be attached to either side so that the plane can be used equally well for right or left hand work. The adjustable fence slides under the bottom, regulating the width of the cut. By removing arms and fence a skew cutter rabbet plane is obtained.

No. 289—8¼ in., japanned, 1⅝ in. cutter with fence and depth gauge and two adjustable spurs, one on each side, w't 4 lbs. .....each $4.90

ONE IN A BOX

WOODWORKERS' ROUTER

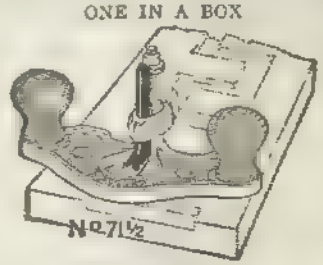
For surfacing the bottom of grooves and depressions parallel with the general surface of the work. The open throat design gives more freedom for chips and a better view of the work and cutter. The latter has an attachment for regulating the thickness of the chip and a second attachment for closing the throat for use on narrow surfaces.



Open Throat.

No. 71—Nickel plated, width 7⅛ in., ¼ and ⅜ in. steel bits, with throat attachment, w't 2⅛ lbs., each $5.20

ONE IN A BOX

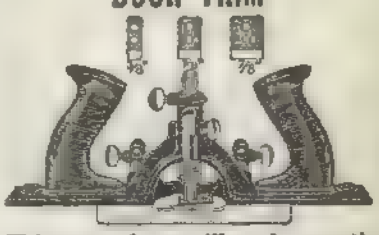


Closed Throat.

No. 71½—Nickel plated, width 7⅛ in., ¼ and ⅜ in. steel bits, w't 2⅛ lbs., each $4.10

ONE IN A BOX

DOOR TRIM



This new plane will make mortises for Butts, Face Plates, Strike Plates, Escutcheons, etc., without the use of a butt gauge or chisel. Cutter can be set to work from either end of the plane or across it. Spring prevents taking a heavier chip than can be easily carried.

No. 171—11 in., japanned, nickel plated trimmings, rosewood handles, 3 forged steel cutters, w't 3 lbs., each $7.50

ONE IN A BOX

"BAILEY" BLOCK PLANES

BAILEY NEW STYLE

BAILEY OLD STYLE.

An improvement has been made in the "Bailey" Iron Plane which necessitated a change in the construction of the Bottom and Frog, thereby making it impossible to use the new style Frog in an old style Bottom, or the old style Frog in a new style Bottom.

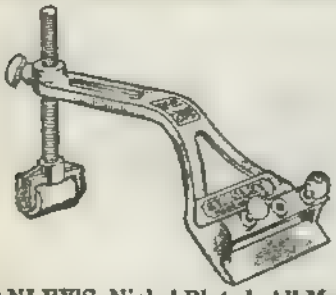
For a time an intermediate style was made having same Frog and Bottom as the latest design, except that there was no Frog adjusting screw, consequently no clip on the Frog.

The latest design Frog or Bottom will be furnished for both the intermediate and new style Planes. If your Plane is of the intermediate pattern, remove the steel clip from the Frog and the parts will fit.

In order that we may fill your order correctly, kindly advise us which style Plane you have.

The difference in construction of the Frogs and Bottoms is very clearly shown in the illustration above.

GUTTER AND CHISEL GRINDER



STANLEY'S, Nickel Plated, All Metal.
This device is designed for holding plane irons, chisels and other similar tools so that they may be ground or honed to any desired angle or bevel.

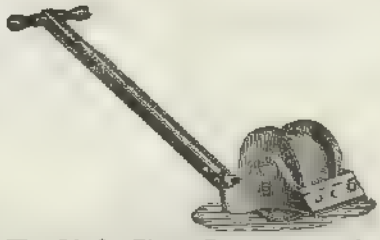
FLOOR SCRAPERS



The Little Giant floor scraper is a device used for scraping any kind of a floor. The blade is mounted on a frame at an angle of 60 degrees, and the frame is mounted on four rollers. The large roller is a weight of 65 lbs., and is used to give the pressure upon the blade when the scraper is in operation.

It has a capacity of from five to seven squares (100 square feet in a square) per day. The handle can be shortened, when necessary, for small rooms. Every inch of the floor can be scraped, as the blade extends to the full width of the frame and allows it to go along the base-board and quarter-round strip. Six blades are included with each machine, which will scrape 15,000 square feet of floor.

No. T90—"Little Giant," complete with 6 blades, 7⅞ in. long, 2⅛ in wide, w't crated 105 lbs. ....each $56.00

Each

No. 62—Length 14 inches, 2 inch cutter..... $11 97

One in a cardboard box; weight each 4 lbs.

PLANES

Japanned cast iron frame and caps, tool steel cutters, tempered and polished.

STANLEY, Iron Block.

Double End.

Easily used as a block plane or cutter; may be reversed for planing in close corners not easily reached with other planes.

Not Adjustable, Hardwood Knob.

Each

No. 130—Length 8 inches, 1⅝ inch cutter..... $3 63

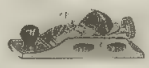
One in a cardboard box; weight each 1¾ lbs.

Per Dozen

Extra Cutters—1⅝ inch..... $9 06

Half dozen in a cardboard box; weight per dozen 1½ lbs.

STANLEY, Iron Block.



Adjustable Double End.

Hardwood knob; has two slots and movable cutter seat. When it is desired to use it as a bull nose plane the cap and cutter can be removed and the adjustable cutter seat reversed.

Each

No. 131—Length 8 inches, 1⅝ inch cutter..... $5 88

One in a cardboard box; weight each 1¾ lbs.

STANLEY, Rabbet and Block.

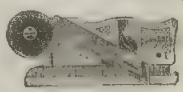
A detachable side will easily change this tool from a block plane to a rabbet plane or vice versa; the cutter is set on a skew.

Each

No. 140—Length 7 ins., 1¾ in. cutter..... $6 36

One in a cardboard box; weight each 2 lbs.

STANLEY, Side Rabbet.



For side-rabbeting and trimming dados, mouldings and grooves of all sorts. A reversible nose piece will give the tool a form by which it will work close up into corners when required.

Each

No. 98—Length 4 inches; 1½ inch cutter..... $4 20

One in a cardboard box; weight each about 1½ lbs.

STANLEY, Bull-nose Rabbet.

Non-adjustable, polished bottom, for general rabbeting and working into close corners.

Each

No. 75—Length 4 inches; 1 inch cutter..... $1 53

One in a cardboard box; weight about ¾ lb.

STANLEY, Carriage Makers' Rabbet.

Varnished rosewood handle and knob; with screw and lever adjustments, adjustable throat.

Each

No. 10½—Lgth. 9 ins., 2⅛ in. cutter..... $11 31

One in a cardboard box; wt. each about 9 lbs.

PLANES

Japanned cast iron frame, tool steel cutters, tempered and polished; true screw adjustment.

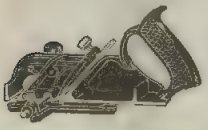
STANLEY, Improved Rabbet.

Japanned cast iron frame and handle. All fitted with detachable depth gauge. No. 190 with spur for working across grain.

	Each
No. 191—Length 8 ins.; 1¼ in. cutter	$5 98
No. 190—Length 8 ins.; 1½ in. cutter	6 27

One in a cardboard box; weight each 2½ lbs.

STANLEY, Duplex Rabbet and Filletster.



Japanned cast iron frame and handle, can be used as a bull nose rabbet. The arm to which the fence is secured can be screwed into either side of the stock, making a superior right or left hand filletster, with adjustable spur and depth gauge.

	Each
No. 78—Lgth. 8½ ins., 1½ in. cutter	$6 99

One in a cardboard box; weight each about 3 lbs.

STANLEY, Rabbet and Filletster.

Japanned cast iron frame, fence and handle. The arm to which the fence is secured can be screwed into either side of the stock, making a superior right or left hand filletster, with adjustable spur and depth gauge, allowing a groove to be cut any desired depth up to ½ inch. The screw at top of frame can be removed allowing the plane to be used as a bull nose rabbet. Plane is also equipped with spur for use in working across the grain.

	Each
No. 278—Length 6¾ in.; 1 in. cutter	$6 81

One in a cardboard box, weight each 2 lbs.

STANLEY, Tongueing and Grooving.

Nickel plated cast iron frame and handle, rosewood knob. Has two plow cutters of the same width, and one extra wide cutter. When the guide or fence is set both cutters work and a tongue can be made. Fence hung on a pivot, can be swung around end for end. This movement covers one of the cutters.

	Each
No. 48—Length 10½ inches; cuts 5/16 inch groove on boards ¾ to 1¼ inches; centers on ⅝ inch	$11 31

One in a cardboard box; weight each 8¾ lbs.

PLANES

Cast iron frame, tool steel cutters, tempered and polished; true screw adjustment.

STANLEY, Double End Match.

Nickel plated cast iron frame, handle and cap. Provided with both tongue and groove irons, both governed by one permanent fence. With one side a tongue can be cut and by reversing ends the plane will cut a groove to fit. Tongueing tools made wide on one side for use on thicker stuff than plane will tongue and groove in the center.

Nos.	147	148
Length, inches	8	9
Size of cutter, inches	5/16	¼
For boards, inches	½ to ¾	¾ to 1
Centers on, inches	⅝	⅞
Weight each, lbs.	2¼	2¾
Each	$9 06	9 60

One in a cardboard box.

STANLEY, Adjustable Circular.

Japanned cast iron frames, caps and handles; polished bottom, can be adjusted to work on concave or convex surfaces; graduated scale on the gears, face can be set to work an arc of the same circle, both concave and convex.

	Each
No. 113—Lgth. 10 ins.; 1¾ in. cutter	$15 81

One in a cardboard box; weight each about 4 lbs.

STANLEY, Plow, Dado, Filletster and Matching.

Nickel plated cast iron, rosewood handle and knob.

Has 8 plow and dado bits, 5/16 to 1¼ inch, one 1½ inch filletster cutter, 1 slitting blade, one ¼ inch tongueing tool. Is readily converted into a filletster, plow or matching plane. All the tools except the slitting blade are secured on the main stock askew.

	Each
No. 46—With 11 cutters, length 10½ inches	$20 94

One in a cardboard box; weight each 6 lbs.

STANLEY, Adjustable Beading, Rabbet and Matching.

Nickel plated cast iron, rosewood handle, knob and fence.

Fitted with an adjustable fence or guide and a depth gauge also with spurs for use when working across the grain.

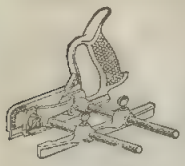
Has one 1½ inch sash tool, one ¼ inch match tool, one slitting tool, one 1¼ inch filletster, eleven plow and dado tools, ⅛ to ⅝ inch, seven beading tools, ⅛ to ½ inch.

	Each
No. 45—With 22 cutters, length 11 inches	$29 82

One in a cardboard box; weight each 9½ lbs.

PLANES

STANLEY, Adjustable. Beading and Matching.



Nickel plated cast iron stock and frame. For ordinary center beading. By adjusting fence, center beading can be done up to 5 inches from the edge of a board. Except for working across the grain, the spurs need not be used. Each plane furnished with 1/4, 1/16, 1/8, 3/16, 3/8, 7/16 and 1/2 inch beading tools, 1/4, 5/16, 3/8, 7/16, 1/2, 5/8, and 7/8 inch plow and dado bits, and a pair of 1/4 inch, tongueing tools.

Each

No. 50—With 15 cutters; length 9 1/4 inches $16 29

One in a cardboard box; weight 8 1/2 lbs.

STANLEY, Wood Workers' Handy Router.

Nickel plated, cast iron, beechwood knobs, open throat. Furnished with patented pointed cutters.

Perfectly adapted to smooth the bottom of grooves, panels or all depressions below the general surface of any wood work.

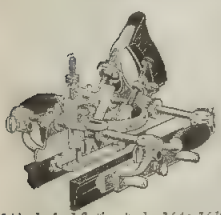
Bits can also be clamped to back side of upright post, and outside of stock. In this position will plane into corners, will router out mortises for sash frame pulleys, or will smooth surfaces not easily reached with any other tool.

Each

No. 71—With one cutter each, 1/4 and 1/2 inch; length 7 1/2 inches $8 67

One in a cardboard box; weight each 2 3/4 lbs.

STANLEY, Patent, Universal.



Consists of a main stock with two sets of transverse sliding arms, a depth gauge adjusted by a screw and a sliding arm, and a sliding cutter with stop. The bottom is adjustable both vertically and laterally.

Has one 1 1/4 inch sash tool, one 1 1/4 inch match tool, one slitting tool, one fillester, eleven plow and dado tools, 1/8 to 1/2 inch, nine beading tools, 1/8 to 3/4 inch, four fluting tools, 1/4 to 3/4 inch, four hollow cutters, 1/2 to 1 inch, four round cutters, 1/2 to 1 inch, two quarter hollow cutters, 1/2 and 3/4 inch, two quarter round cutters, 5/8 and 7/8 inch, three reverse ogee cutters, 1/2 to 1 inch, two Roman ogee cutters, 5/8 and 7/8 inch, three Grecian ogee cutters, 1/2 to 1 inch, two 3/4 round cutters with bead, 5/8 and 7/8 inch, three reeding tools, two beads, 1/8 to 1/4 inch.

Each

No. 55—Nickel plated, cast iron frame, rosewood handles, complete with 53 tool steel cutters tempered and polished, arranged in four separate cases $58 62

One in a cardboard box; weight complete, about 15 1/4 lbs.

PLANES

STANLEY

Adjustable Scraper.

Japanned cast iron frame, rosewood handle and knob. The blade is adjustable endwise and for angle and can be firmly locked in any position desired.

This tool is used for scraping and finishing veneers, cabinet work or hard wood in any form. Can be used equally well as a tooth plane and scraping off old paint and glue.

Each

No. 112—Length 9 inches; 3 inch cutter $9 15

One in a cardboard box; weight each 4 lbs.

Japanned cast iron frames and caps; polished bottoms; tool steel cutters, tempered and polished; stained hardwood handles and knobs.

Iron Bottom, Smooth. Plain Bottom. Not Adjustable.

No.	25S
Lgth., ins.	9
Size cutter, ins.	1 3/4
Wt. each, lbs	1 3/4
Each	$3 30

One in a cardboard box.

Iron Bottom, Jack. Plain Bottom. Not Adjustable.

No.	75J
Length, ins.	13 1/2
Size cutter, ins	2
Wt. each, lbs.	8
Each	$4 80

One in a cardboard box.

WOOD BENCH PLANES

Selected seasoned beechwood, plain finish; extra quality cast steel cutters, tempered, polished starts.

Smooth.

Length 8 inches; width of cut 1 7/8 to 2 inches.

Each

No. 03—Double iron $3 90

Thirty in a case; weight each about 2 lbs.

Jack.

Length 16 ins.; width of cut 2 1/8 to 2 1/4 inches.

Each

No. 015—Double iron $4 50

Thirty in a case; weight each about 5 lbs.

Fore.

Each

No. 021—Double iron; length 22 inches; width of cut 2 3/8 to 2 1/2 inches $7 35

Thirty in a case; weight each about 6 lbs.

PLANE IRONS

All orders for Plane Irons should specify the number of plane for which they are intended.

—BLUE GRASS—

Highest quality tool steel, oil tempered, ground and sharpened.

The improved form of these irons renders it unnecessary to detach the cap iron at any time, as the connecting screw will slide back to the extreme end of the plane iron without danger of falling out. The screw may then be tightened by a turn with thumb and finger, and the cap iron will serve as a convenient handle or rest in whetting or sharpening the cutting edge of plane iron.

—BLUE GRASS—Single.

For iron and wood bottom bench planes.

THE BLUE GRASS TRADE MARK IS YOUR PROTECTION AGAINST INFERIOR MERCHANDISE.

PLANE GAUGES

Gray cast iron, black japanned top frame; nickel plated fence connecting rod, thumb screw and nuts. For attaching to plane as shown in illustration and guiding it in planing bevels of any required angle, or in planing square joints entirely without the use of a try square or bevel.

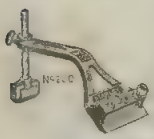
Per Dozen

No. 6—Weight per dozen 18 lbs..... $51 00

One in a cardboard box.

CHISEL AND PLANE BIT GRINDERS

STANLEY



Made entirely of metal, nickel plated.

A device for holding plane irons, chisels and other similar cutting tools that they may be ground or honed to any desired angle or bevel.

Will take any size bit up to 2⅝ inches wide.

Each

No. 200 Lgth. over all 8½ ins..$3 09

One in a cardboard box; weight each about 1½ lbs.

CABINET SCRAPERS

Warranted best cast steel.

Nos.	3-2	3-2½	3-3	3-4
Size, inches	2x4	2½x6	3x5	4x6
Weight per doz., lbs	1	2	3	4
Per Dozen	$2 16	2 52	3 00	3 90

One dozen in a package.

STANLEY
Iron Face.

Per Dozen

No. 80—Japanned cast iron, raised handles, tempered tool steel blade 2¾ inches; may be sprung to a slight curve by means of thumb screw in center of frame; length over all 11 ins..... $36 72

One in a cardboard box; weight per dozen 20 lbs.

Per Dozen

No. 80B—**Extra Irons** for No 80 planes 2¾ in. blade. $6 90

Half dozen in a box; weight per dozen 1 lb.

STANLEY, Wood Face.

Designed to do fine work, such as veneers, etc. The rosewood face reduces friction and also prevents the marring of the surface being worked upon. Face is detachable and can be removed, and either convex or irregular shaped blocks attached.

Per Dozen

No. 81—Nickel plated; best English steel cutter, 2½ ins.; lgth. over all 10 ins..... $59 76

One in a cardboard box; weight per dozen 30 lbs.

No. 81B—**Extra Irons** for No. 81 planes; 2 ins blade 6 90

Half dozen in a box; weight per dozen 1 lb.

CABINET SCRAPERS

STANLEY, Adjustable.

Japanned cast iron frame, polished maple wood handle, improved; adjustable to any desired pitch, works towards or from user; roller acts as a support to relieve the strain on the wrists; handles can be detached for working into corners.

Per Dozen

No. 83—3¾ in. tempered tool steel blade; lgth. over all 9½ inches..... $43 56

One in a cardboard box; weight per dozen 18 lbs.

FLOOR OR CABINET SCRAPERS

—BLUE GRASS—

Best quality crucible steel blade, honed and burnished, ready for use. Front cap heavily nickel plated and polished, under cap blue enameled finish; handle made of birch, mahogany finish.

Handle works on ball and socket, and is adjustable to any angle, up and down right and left.

Per Dozen

No. 472 Length over all 9½ in., width blade, 3 in.; height of head 3½ in..... $51 00

Sixth dozen in a cardboard box; weight per dozen 20 lbs.

Per Dozen

No. 472B—**Extra Blades** for No. 472 plane; width 3 ins..... $15 00

One dozen in a cardboard box; weight per dozen about 2 lb.

STANLEY

The tilting device permits the cutter to be easily and quickly adjusted to any angle required. The cutter stop screws can be adjusted to hold narrow cutters, and prevent their slipping back while working.

Per Dozen

No. 82—Japanned cast iron frame and handle shank, polished maplewood handle and knob; length over all 14½ inches, 3 inch tool steel cutter..... $45 72

One in a cardboard box; weight per dozen 20 lbs.

BISHOP

Per Dozen

No. 2—Plain beechwood handle, 12 inches long, tempered and polished, tool steel blade 3x3 inches, malleable iron clamp and screw..... $21 75

Half dozen in a cardboard box; weight per dozen 9 lbs.

ATKINS

Malleable iron frame and polished nickel plated cross-bar. 3 inch silver steel blade, length over all 11¾ in.

Per Dozen

No. 86—**Perfection**..... $22 50

Half dozen in a cardboard box; weight per dozen 11½ lbs.

Four-Bow Tops for Ford Cars

Complete four-bow extension top with sockets, bows, side curtains and front and rear straps for Ford touring cars.

Everything is ready for setting on the body of the car. Every top is built on the regular Ford body assuring a perfect fit.

Top is made of best grade auto rubber or mohair. Front and rear straps are leather instead of webbing. Rear curtain is furnished with two 5 x 8 in. oval shape, nickel frame bevel glass lights in place of celluloid.

This is a better top than is furnished on Ford cars when new. Will add to the appearance of the car and will give long service.

No. 507 Touring car top complete with side curtains made of auto rubber with two bevel glass lights in rear curtains.....each, **$53.00**

No. 507M Touring car top complete with side curtains made of mohair with two bevel glass lights in rear curtain.....each, **57.00**

Three-Bow Tops for Ford Runabouts

Complete three-bow top with sockets, bows, side curtains and front and rear straps for Ford runabouts.

Everything ready for setting on the body of the car. Every top built on the regular Ford body assuring a perfect fit.

Top is made of the best grade auto rubber or mohair. Straps are leather instead of webbing.

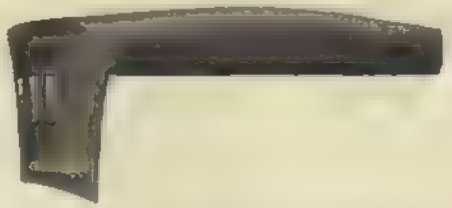
Rear curtain is furnished with two 5 x 8 in. oval shape, nickel frame bevel glass lights in place of celluloid.

This top is better than the top furnished with the Ford car when new and will add to the appearance of the car as well as give long service.

No. 508 Runabout top complete with side curtains made of auto rubber with two bevel glass lights in rear curtain.....each, **$40.00**

No. 508M Runabout top complete with side curtains made of mohair with two bevel glass lights in rear curtain .....each, **42.00**

Top Re-Covers for Ford Cars



Complete outfit consists of roof and quarters sewed together and rear curtain; also tacks, fasteners and binding. Rear curtain made with three windows like late models.

Made of rubber drill, same as on car when new, or cotton mohair. Both guaranteed waterproof. Made for any model Ford touring or runabout. Specify which when ordering.

For Touring Cars

No. 36 32 oz. rubber for Ford touring **$17.75**

No. 40 Mohair for Ford touring.. **19.00**

For Runabouts

No. 38 32 oz. rubber for Ford runabout **$13.75**

No. 42 Mohair for Ford runabout **16.00**

Packed One to a Box

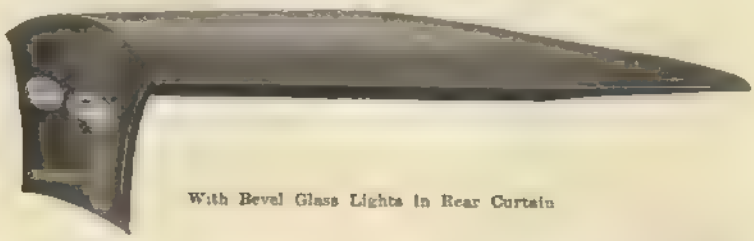
Rear Curtains for Ford Cars

Will fit any Ford car from 1914 to 1920. Made of heavy rubber drill.

No. 500 32 oz. rubber drill...each, **$6.00**

One in a Package

Top Recovers for Ford Cars



With Bevel Glass Lights in Rear Curtain

These recovers are furnished with two 5 x 8 bevel glass lights in the rear curtains. These glass lights are light in weight and very attractive, easy to see through and much longer lasting than celluloid. Frames are nickel plated on steel. Glass is beveled and about ⅛ in. thick.

These top recovers are complete, consisting of roof and quarters, binding and tacks, ready to put on. Made of rubber or mohair. Easy to put on. Just rip off the old cover and tack on the new.

Weight, mohair 10 lbs. Rubber 8 lbs.

For Touring Cars

No. 54 Auto Rubber Touring Re-Cover, nickel frames, glass lights.....**$21.00**

No. 62 Mohair Touring Re-Cover, nickel frames, glass lights..... **23.00**

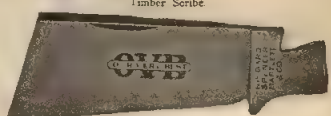
Screw Driver.

Spatula.

Timber Scribe.



Cotton Sampler.

We do not carry pocket knife blades in stock. The illustrations shown on this page being reproductions of the different styles used in [illegible] pocket knives. Slight variations are made to adapt them to the different knives of which they form a part. All are made from Wardlow's Celebrated English crucible steel. Each blade is forged in the most approved manner by expert workmen. Great care is taken to avoid overheating the metal, the forging being done at a very low heat, thereby condensing the metal and making it extremely tough. The tempering is done by a new method which insures a uniform and lasting edge. All blades bearing the [illegible] trademark are carefully ground and finished. The shank is carefully shaped and finished. Every blade is inspected, whetted to a fine cutting edge and warranted to be free from flaws and neither too hard or too soft.

In material, workmanship and design, the [illegible] pocket knife blades are equal, if not superior to any made in this or any other country. They are and always have been the product of an American factory which has in its employ cutlers who have served thirty, forty and fifty years in their service.

ETCHING CUTLERY

Etching Department.

STYLES OF ETCHING

The very best way of increasing trade in pocket cutlery is through the dealer's advertisement on the large blade of his best knives. If this is done wisely, it establishes a reputation for all knives bearing the dealer's name, adding his reputation to that of the maker, and thus is a convincing argument to the quality of the article. The consumer is sure of a double guaranty, and if the brand is unknown, he at least knows that the dealer would not have his name on inferior goods. It is also a strong safeguard against theft. Several times every year we hear of stolen goods recovered which had been etched by us, the name on the blade identifying the knives and establishing evidence to convict the thieves. Numbers of our customers have informed us that they have been robbed, the thieves leaving the etched knives untouched.

Our etching department, beginning in 1896 in a very modest way, has grown to an important adjunct to our cutlery business. Our etchers have become artists in their work, having every appliance necessary or desirable to produce fine results.

Etching has become popular, and the public is quick to notice the enterprise of a dealer who has something new to offer.

We make no charge whatever for this work, feeling that we are amply repaid by the increased business the dealer is sure to give us in consequence of adding to the selling quality of his knives. Our only requirements are that a sufficient—not a large—quantity is ordered each time to warrant it, and that the goods are such that we as a firm would care to affix our guaranty.

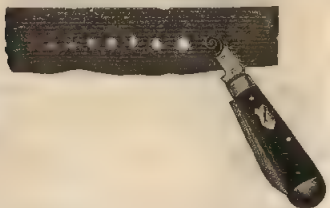
We shall be glad to explain more fully through our representatives or by letter our position in this matter and show samples of the work.

H.S.B.&Co. POCKET KNIVES

FULLY GUARANTEED TO GIVE PERFECT SATISFACTION

Made by American workmen. Blades are finest quality Crucible Steel, TEMPERED BY A NEW METHOD WHICH INSURES A UNIFORM AND LASTING EDGE. Sharpened ready for use. In whetting, hold at an angle of 18 degrees on an OIL STONE, not a grindstone.

WE ETCH YOUR NAME, FREE OF CHARGE, ON THESE KNIVES WHEN REQUESTED



Showing work done by Harrison Patent Punch Blade.

All the pocket knives on this page are supplied with a **Harrison patent punch blade** as illustrated above. **It is the only knife ever made that will cut perfectly round and smooth holes** in leather. Will cut holes of any size up to ⅜ inch in diameter, and can be used to enlarge holes already made. Much more convenient to use than a punch, being always at hand, and making just the right size hole wanted every time.

Invaluable for Belting, etc. An invaluable tool for repairing belting, for mending harness or making buckle holes. The curling upper face of the punch extending slightly over the end of the knife making it easy to open, even if the user has on gloves. **It is very strong and will hold its sharp-cutting edge a long time** without re-sharpening. **This is the only punch blade** manufactured **that will cut a perfectly round, smooth hole of any desired size without damaging the leather.**

The Very Best Quality. Both the patented punch blade, and the other blades are hand **forged from the finest grade of crucible steel, highly tempered and warranted free from flaws. These knives are positively without equal for practicability.**

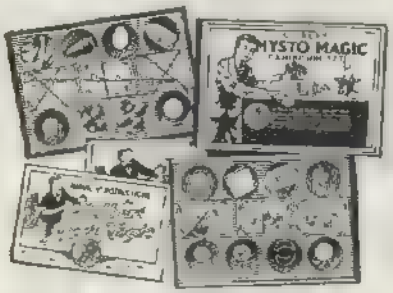
MYSTO MAGIC OUTFITS

Because of the fascination which every wide-awake boy has for magical stunts, Mysto Magic has proved to be an unusually popular toy. Each and every trick has been selected from the viewpoint of the boy so that the various sets include only the most interesting and fascinating tricks. The very same tricks that the boy has seen done on the stage can be repeated with Mysto Magic. The illustrated manual of instructions explaining all details is a part of each outfit.

TRICK OUTFITS

No. 2001—Contains show poster, magic wand and illustrated manual describing each trick, some of which are as follows: marble vase, disappearing handkerchief, mysterious discs, multiplying billiard balls, disappearing coins, etc. Packed in an attractive sealed box, size 8¾×12¼×1¼ in., w't 1 lb. .....each *$1.50*



No. 2003—Set includes magician's wand, show poster and illustrated manual describing each and every trick, some of which are the following: Passe-Passe, Coin Trick, Chinese Linking Rings, Multiplying Billiard Balls, Cigarette Vanisher, Disappearing Egg, etc.; packed in an attractive sealed box, size 8¾×12¼×2¼ in., w't 2 lbs. 3 ozs., each *$2.50*

Our Very Best is the Very Best.

CARD TRICKS

Card Trick Outfit contains an assortment of some of our best card tricks.

Among these are the Magician Pack of Cards, with which can be performed a great number of tricks and also eight separate card tricks as used by some of the foremost magicians — Knock Out, Papel Blanco, Mysto Jacks, Startling Card Trick, Sphinx, Pick-it-Out, Phantom and Spotter Card Trick. With each outfit comes complete Manual of Instructions.

No. 2007—Size of carton 12¼×8¾×1¼ in. .....each *$2.50*

KNOTS AND SPLICES

What boy is there who isn't interested in knowing how to tie a running hawser knot—a bowline, etc.? The boy doesn't live who hasn't tried knot tying in all its forms by the time he's twelve. Here's an outfit that gives it to him in clear, simple and practical terms. In addition, the profusely illustrated book shows him some of the tricks he has aways admired in Houdini.

No. 2021—In a sealed carton, 12¼×8¾×1¼ in., w't 1 lb., each *$3.00*

A C SPARK PLUGS

AC Spark Plugs are made of high grade materials, skillfully manufactured. They are selected by leading engineers for regular equipment on many of the standard makes of automobiles and trucks.

No. 12 CPT

No. 12 I/T

No. 78 RT

No. 78 I/T

No. 78 LBT

For Fords, Overland and Studebaker cars, or any motor using ⅝-inch regular plugs

NO.	Size	Wt. Each	EACH
12CPT	⅝ in.	5 oz.	$1.00

Regular equipment on Reo cars and trucks. Recommended for Overland up to 1914 and Winton up to 1915.

NO.	Size	Wt. Each	EACH
12I/T	⅝ in. long	5 oz.	$1.00

Regular equipment on Cadillac, Chalmers, Cole, Dort, Hudson, Hupmobile, Jordan, Kissel Kar, Liberty, National, Oldsmobile, 8 cylinder Packard, Paige-Detroit, Peerless, Pierce-Arrow and 109 other well-known makes of passenger cars, trucks and tractors.

NO.	Size	Wt. Each	EACH
78RT	⅞-18 long	5 oz.	$1.00

Regular equipment on Buick, Chevrolet, McLaughlin-Buick, Canada, Scripps-Booth, 4 cylinder, SSE Co. Knox, Samson and Wolverine tractors.

NO.	Size	Wt. Each	EACH
78LT	⅞-18 long	5 oz.	$1.00

Regular equipment on Chandler, Crane-Simplex, and White. Also Bessemer, Hahn, Moreland, Noble and Robinson Fire trucks.

NO.	Size	Wt. Each	EACH
78LBT	⅞-18 long body	5 oz.	$1.00

No. SAET

No. SAE. LT

No. SAENT

No. 18 MT

Regular equipment on Apperson, Commonwealth, Daniels, Haynes, Locomobile, Marmon, Mitchell, Saxon, Singer, Stearns-Knight, Gabriel trucks, Wallis tractors and Delco-Light.

No. SAET or Locomobile Special Titan. Slightly shorter than SAE Regular. Regular equipment on 1920 Locomobile.

No.	Size	Wt. Each	EACH
SAET	⅞-18	5 oz.	$1.00

Regular equipment on Oakland 34-B, Oldsmobile 6 cylinder, Premier, Seneca, all Nash cars up to 1919.

NO.	Size	Wt. Each	EACH
SAELT	⅞-18 long	5 oz.	$1.00

Regular equipment on 1919-20 Nash cars.

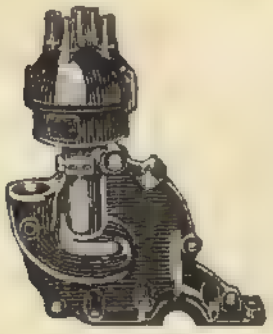
NO.	Size	Wt. Each	EACH
SAENT	⅞-18 extra long	6 oz.	$1.00

Regular equipment on Essex, B. & S. Motor Wheel. Recommended for Pierce-Arrow, 1915; all cars using Metric Plugs.

NO.	Size	Wt. Each	EACH
18MT	Metric	5 oz.	$1.00

Nuts for special type Terminals furnished on request

ATWATER KENT SCIENTIFIC IGNITION



Type "K-2" Ford Outfit

For the Ford

Type "H" Ford Outfit

Atwater Kent Scientific Ignition on the Ford will add an unbelievable amount of increased motor efficiency to the already efficient Ford.

It eliminates fussy vibrating coils from dash, making it possible to use the Ford magneto for lighting alone; reduces car vibration; increases motor power; and permits you to throttle down to 3 or 4 miles per hour and jump up to 40 with the smoothest possible acceleration.

THE REASON—Greater Spark Efficiency at All Speeds

The automatic spark advance, which is only one feature of the Atwater Kent System, makes the motor self-regulating. Spark is always safely retarded for starting, automatically advanced for high speeds and automatically retarded for low speeds and hill climbing. The driver can forget the spark lever and control the car by means of the throttle alone, leaving both mind and hands free. No danger of stalling the motor due to advanced spark.

Type "K-2" Unisparker on Ford Motor

By means of this system a better motor performance is obtained than with a high-tension magneto—gear shifting is reduced and absolutely synchronous ignition is obtained.

Atwater Kent Ignition is the only ignition system which consumes so little current that a storage battery is unnecessary. Ordinary dry cells may be utilized, a single set of which will give upwards of two thousand miles of efficient service. Uses less than one-tenth the current consumed by other ignition systems.

The Atwater Kent Ignition System for Ford cars is made in two forms: Type "K-2" with Automatic Spark Control and Type "H" for use in connection with the regular spark lever.

The Atwater Kent Coil is furnished with either a substantial Kick Switch, which may be foot-operated, or with a Plate Switch Coil, somewhat cheaper and simpler in construction, if desired. There are no moving parts in the coil, and the absence of the noisy vibrating coils with their fussy and delicate adjustments is an especially noticeable feature of this system.

Type "H" Unisparker on Ford Motor

Kick Switch Coil, to be used with either Type "K-2" or "H"

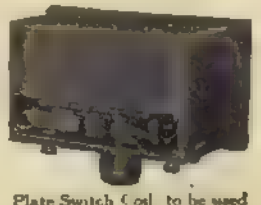


Plate Switch Coil, to be used with either Type "K-2" or "H"

Type "K-2" System for Ford Cars

With Automatic Spark Advance, including
Kick Switch Coil..... **$37.00**
Including Plate Switch Coil..... **35.00**

Type "H" System for Ford Cars

Without Automatic Spark Advance, including
Kick Switch Coil **$30.00**
Including Plate Switch Coil..... **28.00**

ATWATER KENT IGNITION FOR FORDS

Known as Type CA and is used on Ford cars of 1919 and later when equipped with electric starting and lighting system. It is identical with Type CA Atwater Kent Ignition used as standard factory equipment on many of the foremost [redacted].

Type CA is a closed circuit system with an automatic spark advance and an auxiliary spark lever. It can be used economically only in connection with the starting and lighting system, but in an emergency a set of six dry cells will give 150 miles of service. **The system has the following advantages:**

Simple, contactless distributor. No rubbing surfaces. No brushes. No troubles.

The same hot spark at all speeds from cranking to maximum speed. Not dependent on motor speed like a magneto.

This hot spark at low speeds permits throttling down to three or four miles per hour.

Makes starting easy in all weather by furnishing a hot, fat spark as soon as contact is broken, regardless of motor speed.

This easy starting prolongs the life of the storage battery.

Automatic spark advance reduces gear shifting to a minimum, increases mileage per gallon and adds to ease of driving.

Auxiliary spark lever permits of manual spark advance.

Coil. No moving parts, no contacts, no vibrators, no [redacted].

Fool-proof in construction—one adjustment only and that made with an ordinary screwdriver.

There are no complicated parts and no magnets. It is simply a high-grade device that does its work in hot or cold weather, rain or shine, and will outlast the car.

Type CA is complete in every respect. Following is a list of the items which comprise the outfit:

Simple, accessible contact maker. Few moving parts. Factory adjustment good for thousands of miles.

A Type CA on special gear cover to fit 1919 and later Fords.

B Spiral drive gear.

C Coil.

D Wiring complete with terminals attached.

E Spark advance lever and rod.

F Cotter pins (2).

G Screws (4) for attaching coil.

H Switch connections.

I Wiring brackets.

J Special socket wrench.

L Dash cover plate.

* Instructions for installation.

Atwater Kent Ignition, Type CA, complete..... .....each, $24.00

VIBRATORS

STAR VALVE

1H8803 — "Polar Cub," Model 1827. 7 in. long, master vibrator, black enamel finished steel frame, black ebony finished handle, 3 applicators, 5 ft. of cord. Retails at $3.00. 1 in box, 5 lbs.
Each, **$3.65**
Lots of 12, " **3.50**

Each, **$5.67**
Lots of 3, " **5.36**

VACUUM CLEANERS

Three famous brands — favorably known from one end of America to the other

"ALADDIN"

The Wonder Cleaner

The "Aladdin" is a quality product in every particular. Made by the largest manufacturer of Electric Vacuum Cleaners in the world. There is no better cleaner on the market in construction and performance than the "Aladdin." Combines excellence in construction and operation with moderate price. Following are a few of its distinctive features:

(1) **Revolving Spiral Bristle Brush**—Loosens the imbedded dirt and sweeps up all lint, ravelings and surface litter.

(2) **G. E. Type Motor**—Air cooled, no belts or cogs. fan forces air through motor and cools it during actual operation. This is a great point of superiority in the "Aladdin" Motor.

(3) **Twill Bag**—Handsome blue bag of finest twill, air and dust tight. Slide on clamp—simply pull the clamp off the end of bag, empty it, and slide the clamp on. A quarter turn fastens the bag onto cleaner by a bayonet lock, a quarter turn back and it is released for emptying.

(4) **Nozzle Adjustment**—Cleaning nozzle can be raised and lowered by turning adjusting screw over the rear caster.

(5) **All Aluminum Body**—All castings of highly polished aluminum.

(6) **Pistol Grip Handle**—Equipped with switch for instant starting and stopping.

(7) **Flexible Covered Cord**—30 ft. long, with plug. When cleaner is not in use cord can be folded onto metal guides on handle.

(8) **Non-Marring Rubber Casters.**

(9) **Extra Wide Nozzle**—13½ in. long, 1¾ in. wide, tapered so that it goes into the corners of rooms and stairs. It is unnecessary with the "Aladdin" to make a separate job of cleaning out of the way places.

1H6800—For 110 volts, single phase motor, alternating or direct current. 1 in case, 12 lbs.
Each, **$26.50**
Lots of 3, " **25.75**

Complete set of instructions for assembling and operating the "Aladdin" included with each cleaner.

Attachment Set

Suction coupling.
Blower coupling.
6 ft. of corrugated hose.
Long extension handle.
Short extension handle.
Furniture nozzle.
Nozzle brush
Flexible rubber nozzle
Floor plate.

1H6805—1 set in box, 4 lbs.
SET (9 pcs.) **$6.50**

"REGINA"

This cleaner is compact, practical and durable, sturdily constructed with the very best material procurable. Made by the manufacturer of the first vacuum cleaner ever put on the market.

SIMPLY CONSTRUCTED—Built on a principle that practically eliminates possibility of it getting out of order.
MOTOR—Horizontal Gearless, Electric, air cooled.
EXTENDED NOZZLE—13 in. long, 4 in. wide can be adjusted for any surface from hardwood floors to rugs of deepest naps. Equipped with straight brush for agitating surface of rug. Can be used under low furniture. 4 solid rubber wheels.
TILTING DEVICE—Raises nozzle off floor—regulated by foot release.
MATERIAL AND FINISH—Polished aluminum, motor housing and nozzle black enameled steel handle, nickel plated grip and trigger switch.
BAG—Finest khaki material, black japanned upper and lower clamps.

1H0653—For 110 volts, alternating or direct current, 23 ft. of black cord. Fully guaranteed. 1 in carton, 13 lbs.
Lots of 3,
Each, **$26.50** Each, **$27.50**

Attachment Set

8 ft. fabric covered rubber hose, reinforced
Suction connection.
Blower connection.
Elbow.
Extension tube.
Tool for cleaning draperies, curtains, upholstery, pillows, mattresses, etc.
Brush for walls, moldings, books, clothing, etc.
Tool for blowing or suction purposes.

Hotpoint Vacuum Cleaner

MODEL V2

Made by the nationally known Edison Electric Appliance Company. Extensive advertising has created a demand for this cleaner which you can supply.

ADJUSTABLE NOZZLE—13½ in. wide, tapered at ends. Cleans in corners and hard-to-get-at-places, can be raised and lowered.
AGITATING NOZZLE BRUSH—Loosens the stubborn surface litter on rug or carpet.
HORIZONTAL MOTOR—Air-cooled. Universal type, 0 to 60 cycles, has tremendous suction capacity.
PRESSED STEEL FAN—Blades electrically welded to flanged steel baffle plate, accurately balanced and self-cleaning.
DUST BAG—Highest grade twill cotton, dust trap prevents dirt from falling back into motor and from spilling on floor when being detached.
HAND GRIP HANDLE—Switch encased in aluminum grip with pneumatic rubber switch control.

1H7986 Mfrs. 112V2). For 110 volts, alternating or direct current. Universal motor. 1 in case, 11 lbs.
Lots of 3,
Each, **$29.25** Each, **$31.50**
Can be furnished in odd voltages at no additional charge.

Attachment Set

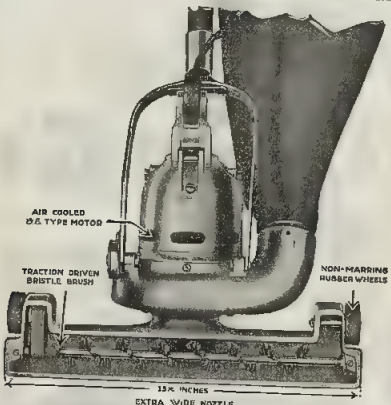
Upholstery nozzle.
Special high grade clothes cleaning brush.

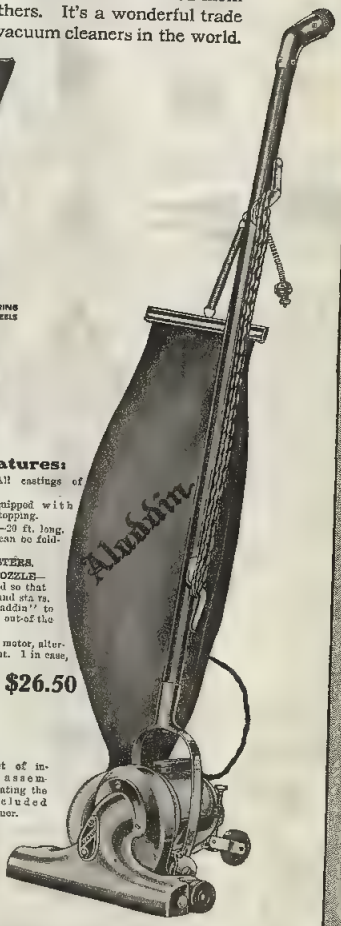
1H7987—(Mfrs. 112V2A.) 1 set in box, 6 lbs.
SET (8 pcs.) **$6.50**

Aladdin VACUUM CLEANER

The Wonder Cleaner

The greatest electric vacuum cleaner value in America—and we have examined them all. A high grade cleaner at a price that beats all others. It's a wonderful trade winner. Made by the largest manufacturer of electric vacuum cleaners in the world.





Following Are a Few of Its Distinctive Features:

(1) **REVOLVING SPIRAL BRISTLE BRUSH**—Loosens the embedded dirt and sweeps up all lint, ravelings and surface litter.

(2) **G. E TYPE MOTOR**—Air-cooled, no belts or cogs, fan forces air through motor and cools it during actual operation. This is a great point of superiority in the "Aladdin" motor.

(3) **TWILL BAG**—Handsome blue bag of finest twill, air and dust tight. Slide on clamp simply pull the clamp off the end of bag, empty it and slide the clamp on. A quarter turn fastens the bag onto cleaner by a bayonet lock—a quarter turn back and it is released for emptying.

(4) **NOZZLE ADJUSTMENT**—Cleaning nozzle can be raised and lowered by turning adjusting screw over the rear caster

(5) **ALL ALUMINUM BODY**—All castings of highly polished aluminum.

(6) **PISTOL GRIP HANDLE**—Equipped with switch for instant starting and stopping.

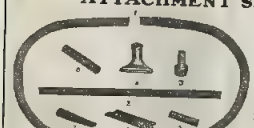
(7) **FLEXIBLE COVERED CORD**—20 ft. long. When cleaner is not in use cord can be folded onto metal guides on handle.

(8) **NON-MARRING RUBBER CASTERS.**

(9) **EXTRA WIDE TAPERED NOZZLE**—15¾ in. long, 1¾ in. wide, tapered so that it gets into the corners of rooms and stairs. It is unnecessary with the "Aladdin" to make a separate job of cleaning out-of the way places.

1H6900—110 volts, single phase motor, alternating or direct current. 1 in case, 12 lbs.
Lots of 5, Each, **$25.75** Each, **$26.50**

ATTACHMENT SET



Suction coupling
Blower coupling
5 ft. of corrugated hose.
Long extension handle.
Short extension handle.
Nozzle brush
Furniture nozzle.
Flexible rubber nozzle
Floor plate.

1H6855—1 set in box, 4 lbs. ....SET (9 pcs.) **$6.50**

Complete set of instructions for assembling and operating the "Aladdin" included with each cleaner.

SCROLL SAWS

NEW ROGERS, japanned iron frame, striped in red and gold, japanned tilting-table, selected ash arms and Pitman, steel arbors, carefully fitted to bearings, 4½ in. iron balance wheel, with drilling attachment, improved saw clamps, height of table 32 in. LATHES

Cut showing portion of No. o Screw Cutting Engine Lathe.

Barnes all iron and steel, velocipede foot power.

Swings 11 in. on the face plate, 6½ in. over the tool carriage, and is 34 in. between centers. Back-gearing and cone pulleys give great range of speed. Head stock has a steel spindle with 1 5/32 in. hole through its entire length. Tail stock can be readily set at any desired point, and can be taken off altogether, leaving it free for face plate or chuck work. It can also be set over for turning tapers. Spindles of both head and tail stocks are of steel, with positively true taper holes for the reception of the centers. Tail stock center is self-discharging. Tool carriage is gibbed to the bed. The tool can be set to the work at any position or angle desired; also to bore a taper hole. All the works are securely protected from chips and dirt. As a right or left screw cutting lathe it is simply perfect. All the gearing is cut from solid metal in the best machinery known for gear cutting, and is as true and noiseless as it is possible for metal gearing to be. Weight 385 lbs., boxed ready for shipment, 500 lbs.

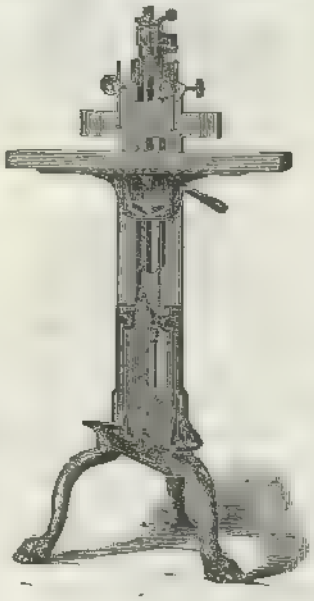
No. F5—Lathe, complete, each★ $362.00

ONE IN A CRATE

H.S.B.&CO. REV-O-NOC

We Stand Behind the Brand.

FOOT POWER MORTISERS



Has great range for work, power on the chisel, accuracy in its action, and has all the required adjustments, which are easily and quickly made. Has abundant strength, is durable, and occupies but little space. Except for the supplementary table and treadle, the machine is made entirely of iron and steel.

Where's the crank?

Hot times are coming !Get in a stock from your jobber.

There isn't any!

If you've ever labored with an old-fashioned ice-cream freezer, you'll realize how salable the Auto Vacuum Freezer is!

The name means what it says. "Auto" is short for Automatic. "Vacuum" means a sealed insulation space which surrounds the ice compartment, retaining all the freezing effect.

In 45 minutes delightfully smooth ice cream is made—*without cranking!*

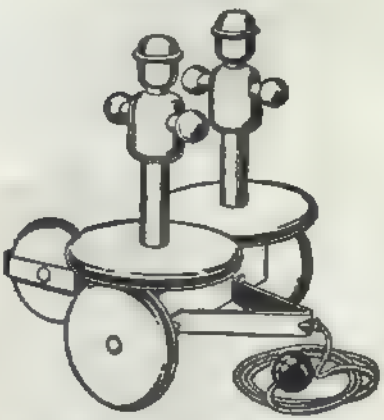
MISS TILLIE TINKER

Miss Tilly Tinker is destined to become one of the world's favorites in public life. No lady made of wood has ever been able to perform the wonderful feats accomplished by this fascinating beauty. She dances untiringly upon her toe at the top of a slender pole. She whirls and bows, forward, sideways and backward, cuts figure eights, and leans over so far, that at times it seems as if she would surely fall, but always rights herself with perfect safety. Miss Tilly's beauty, color and motion will win her way into the hearts and homes of every family in the land, and bring delight to childhood.

No. 27—Height 17½ in., w't per doz. 15 lbs., per dozen *$9.00*

ONE IN A BOX; ONE DOZEN IN A CASE

WHIRLEY TINKER

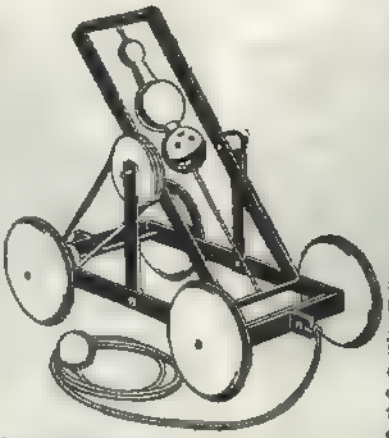


Color and action never fail to hold the child interest. The simple act of pulling this toy by the string sets two little men dancing merrily like tireless dervishes, round and round, fast or slow in never ending spins to the astonishment of all juvenile onlookers and the great delight of the operator. Whirly Tinker naturally compels attention. Made of hard wood, highly colored and polished, with rust-proof metal trimmings.

No. 33—W't per doz. 16 lbs. .....per dozen *$15.00*

ONE IN A BOX; ONE DOZEN IN A CARTON

TUMBLE TINKER



This little acrobat does a feature diving act in a revolving trapeze. He works fast, is very amusing and will continue as long as the carriage is drawn, unless of course, one wishes to let him rest, in which event the belt on the pulley is slipped aside, when he simply rides along, quietly awaiting his call for the next performance. Made of metal and hardwood, highly colored and polished. A decidedly attractive plaything for both boys and girls.

No. 34—W't per doz. 16 lbs. .....per dozen *$15.00*

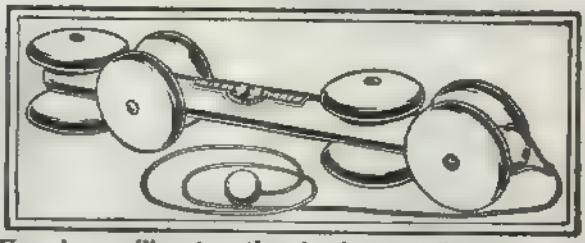
ONE IN A BOX; ONE DOZEN IN A CARTON

TURTLE TINKER

The best balanced and easiest rolling pull toy ever invented. Rides on either side and turns turtle when taking corners. Cannot drag, it always rides right side up. Solid wood body ball, head and wheels, frame of metal, all nicely finished.

No. 39—Size 8 in., w't per doz. 11 lbs. ..per dozen *$12.00*

FOLLO-ME TINKER



Here is a rolling toy, that is always rolling; in fact, it can't possibly do anything else, for all sides are on wheels and no matter how roughly treated or thrown about it is sure to land right side up. Follo-Me-Tinker provides rest and comfort for nurse and mother, as well as continuous amusement and entertainment for the child. Made of hardwood, beautifully finished in attractive colors; cord and ball included.

No. 32—Size 3x3x15 in., w't per doz. 13 lbs., per dozen *$12.00*

ONE DOZEN IN A CARTON

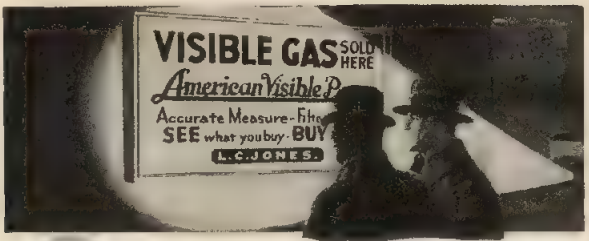
The Very Best



Increased Our Business Fully 30 per cent

ROBERT R. DEAN, a hardware dealer at Alden, Penn., writes, "We are immensely pleased with our American Visible Pump and find it has increased our business fully 30%." Another dealer says, "It is a great producer of business and satisfied customers."

There are two outstanding reasons why the hardware dealer's business is increased by installing the

PUMP 204-V
Inspected and passed by Underwriter's Laboratories and bears the Underwriter's Label

American Visible Curb Pump

It brings motorists to your door for gasoline and gives you the best possible opportunity to sell them other goods.

And the American Visible is the ONE pump motorists PREFER to buy gas from, because it SHOWS QUANTITY and QUALITY of purchase before delivery.

One dealer who operates an American Visible and a "blind" pump, writes, "Your pump sells 75 per cent of the business."

The protected glass container at top of pump shows purchaser EXACT amount of his purchase. He is assured FULL MEASURE and a SQUARE DEAL.

Thousands of American Visibles are in use all over the country. They are INCREASING THE SALES of their users. The American Visible will BRING the trade of motorists TO YOUR DOOR.

Write us for full information, prices and proofs of our claims.

AMERICAN VISIBLE CONTAINER
For other makes of pumps furnished complete.

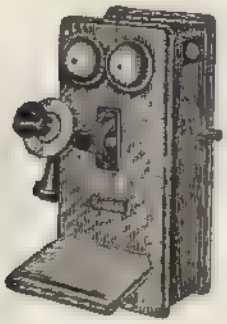
TELEPHONES

REVONOC COMPACT MAGNETO TYPE



No. F7308E REVONOC—Bridging, 3-bar generator, 500 ohm ringer, each★ $30.00

No. F7516E REVONOC—Bridging, 5-bar generator, 1600 ohm ringer, each★ $32.00

No. F7520E REVONOC—Bridging, 5-bar generator, 2500 ohm ringer, each★ $32.50

PACKED ONE IN A BOX. SHIPPING WEIGHT ABOUT 35 LBS.

This wall telephone is made with enclosed gongs, a new arrangement of parts permitting a smaller and neater cabinet. 3 in. gongs are mounted inside of the cabinet. Slotted plates on each side of the cabinet permit the ringing of the bells being distinctly audible.

Series telephones are no longer recommended. When it is only a short distance, or for town service, not over five telephones to the line we recommend the No. 7308E.

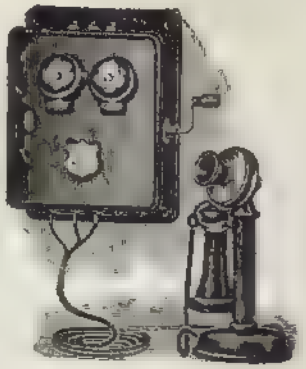
Five bar bridging telephones are for use on country lines, with over five telephones on the same circuit. In ordering instruments for a system of this kind the capacity of generator and ringer should be the same as the other telephones on the same circuit.

Cabinets of REVONOC Telephones are made of quarter-sawed oak, highly polished and finished, and each instrument is equipped with powerful generator, adjustable ringer movement, bi-polar receiver, lightning arrester, long distance transmitter mounted on adjustable arm.

Batteries are not included, but space is left in the bottom of cabinet.

Telephones equipped with condensers 75c extra net.

REVONOC MAGNETO DESK SETS



No. F113E REVONOC—Bridging 3-bar generator, 500 ohm ringer, each★ $34.50

No. F114E REVONOC—Bridging, 4-bar generator, 1600 ohm ringer, each★ $36.00

No. F115 REVONOC—Bridging, 5-bar generator, 1600 ohm ringer, each★ $34.70

PACKED ONE IN A BOX. SHIPPING WEIGHT ABOUT 20 LBS.

Telephone is metal, black enameled, very strong and serviceable. In these two piece telephones the generator, ringer movement and terminal block are mounted in one cabinet 6¾ in. wide, 9¾ in. high, 7 in. thick, quarter-sawed oak highly polished and finished. The induction coil is mounted in base of telephone.

Batteries and lightning arrester are not included.

H.S.B & CO. REV-O-NOC

We Stand Behind Our Brand.

PORTABLE TELEPHONES

Also used as a testing set in locating trouble.

No. F423E—4-bar generator, 1600 ohm ringer, watch case receiver, in oak case with steel front and back plates 8x10½x7½ in. collapsible handle, batteries not included but space provided for them, w't 12 lbs., each .....$.....

MINE TELEPHONES

These instruments are for mines, mills, police and railway systems, and any exposed use, and are enclosed in cast iron box 15⅜ in. high, 12⅜ in. wide, 10⅜ in. deep. Working parts protected by iron shield. Door has rubber gasket. Box can be locked with padlock when not in use.

Telephones are equipped with transmitter, rubber shell receiver. Space is provided for two dry batteries. Batteries and arrester are not included.

Telephones of different capacity ringer and generator can be supplied. Prices on application.

No. F995E—5-bar generator, 1600 ohm ringer★ .....each $.....

PACKED ONE IN A BOX. SHIPPING WEIGHT ABOUT 70 LBS.

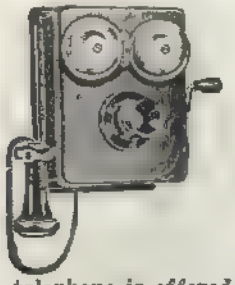
Prices on Application

RESIDENCE TYPE LOCAL BATTERY TELEPHONES



No. 21 telephone is offered to meet the demand for a small, neat telephone for residence use where the batteries can be placed in some out of the way place, equipped with standard parts as furnished with larger telephones, each of highest efficiency and dependable in every respect. Oak Cabinet is of neat design and attractive finish. This instrument will operate in conjunction with other standard telephones and can be furnished in any combination of generator and ringer.

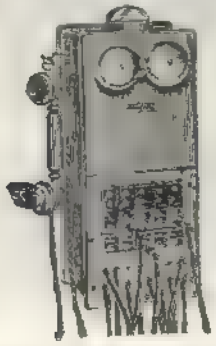
No. F214E—Bridging, 3-bar generator, 500 ohm ringer★ ..each $30.00

No. F219E—Bridging, 5-bar generator, 1600 ohm ringer, each★ $32.25

No. F2110E—Bridging, 5-bar generator, 2500 ohm ringer, each★ $33 00

SHIPPING WEIGHT PACKED, ABOUT 22 LBS.

COMBINATION TELEPHONE AND SWITCH BOARD



Cabinet is of similar design and size to the [illegible] compact style Telephone, but the battery space is equipped with drops and jacks of the express type, and a hand microphone for operator's set. This combination instrument makes an exceptionally practical and economical outfit for handling a number of lines for rural districts.

Can be made with any number of drops up to fifteen.

Shipping w't approximately 60 lbs.

No. F85E—5 line, combination telephone and switchboard, each★ .....$.....

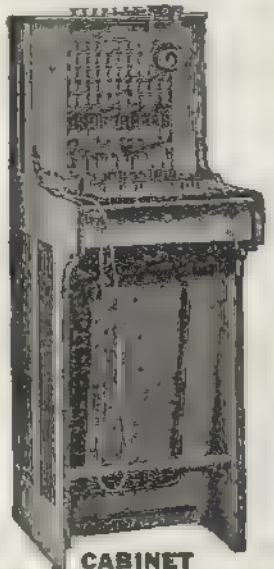
SWITCHBOARDS EQUIPMENT

The drops are of the unit or individual type, which permits any number being installed up to the full capacity of the board, thus no unnecessary amount of money need be tied up in equipment to take care of future requirements. Additional drops can be easily installed, one or more at a time. The construction of this type is very simple, there being few parts with each of ample size and strength to assure long life and freedom from break downs or trouble. They are arranged for use with both grounded and metallic lines.

The regular equipment of these boards consists of complete operator's, set either with a breast-plate transmitter or suspended type with supporting arm, operator's watch-case receiver with head-band, connecting cord, operator's plug, cord and jack, induction coil, a powerful hand generator, hand and power generator switching key, a buzzer in the generator circuit, and complete night bell circuit with switching key.

Boards are furnished with cable, also with necessary batteries for operator's equipment and night bell circuit if so specified on order.

Cabinets are made of quarter-sawed oak, substantially built and attractively finished—furnished for one or more operator's positions.



CABINET

Express switchboards are made up in various styles and sizes of cabinets.

We recommend the purchase of boards with sufficient capacity to cover possible future growth.

No. F11E—Fifty line unit, with the unit type of drop and jack. also individual cord circuits, it is possible to install in one of these cabnets any equipment to suit individual needs, w't 275 lbs.★ .....each $.....

SWITCHBOARDS

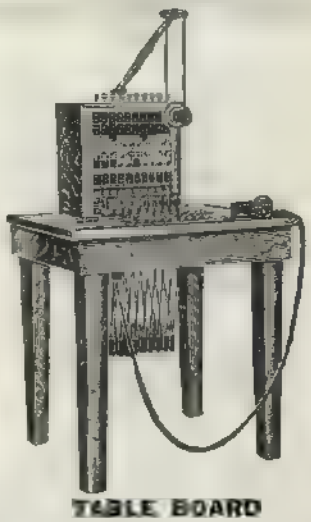


TABLE BOARD

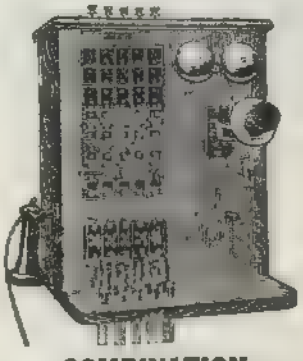
Exceedingly popular for private exchange work, such as for hotels, hospitals, public buildings, etc. They are also adaptable for toll line work. The same type of apparatus are used in these as in the larger floor type switchboards, together with the convenience of a desk. These cabinets can be furnished with any special wiring required, or with any apparatus needed to meet particular local conditions.

No. F70E—W't 125 lbs.★ ..each $....



COMBINATION

No. F77E—In a wall type switchboard with a capacity for 30 lines the No. 77 cabinet is built along practical lines—this is equipped with same style drops and jacks as the floor type boards, although single lever keys are used in the cord circuits, simplifying the equipment. Standard telephone apparatus installed in the same cabinet furnishes the operator's equipment. This board is provided with clear-out drops, night bell circuit and is in every way well adapted for the handling of a small exchange where the number of lines will not eventually exceed thirty★ .....each $.....

★ Items Marked Thus ★ Are Shipped From Factory Only.

REVONOC ANVILS

Made from American ingot or wrought iron, welded at the waist, thus making a solid forging to which is welded a high grade crucible cast steel face—the best obtainable—which in turn is ground, tempered and polished, forming a perfect working surface, body coated with pure asphaltum paint. The wrought iron being fibrous is very tough, and will withstand more hard usage than any other metal used in the manufacture of anvils, while nothing but the very best grade of tool steel will form a working surface that is satisfactory to the smith desiring a high grade article.

Fully Warranted.

REVONOC anvils have a greater surface area for their weight than any other on the market, owing to the correct distribution of the metal. For illustration: a REVONOC anvil 3¾ inch by 14 inch surface weighs 100 pounds, and frequently less; in order to obtain this same surface in an anvil of other makes, the user is often compelled to buy 115 pounds or more of metal.

Width of base is always equal to height, so they will not tip nor break loose from fastenings by side blows.

The long horn is round throughout its full length, a perfect ring can be forged and welded at any point.

The long tail admits of bending small perfect U shapes, and leaves a large surface for welding.

TARGET TRAPS

DU PONT HAND TRAP

FIG. 1. First movement in the setting of the hand trap.

FIG. 2. A quick strong pressure against throwing arm overcomes the resistance of spring.

FIG. 3. The hand trap is now set and ready for loading.

A simple, practical and efficient apparatus for throwing all standard makes of clay targets. It is strongly constructed, and with proper care will give excellent service for an indefinite period.

Nothing yet devised approaches the hand trap for practice for hunting and trap shooting, as an endless variety of flights and angles can be thrown with it. Novice and veteran trap shooters find it just the thing with which to keep in practice and their scores show improvement after using it.

Constructed of high grade malleable iron, japanned; steel spring.

Each

No. DHT—Length extended 34 in.; length closed 23 in.; weight each 6¼ lbs $10 80

One in a cardboard box.

EXPERT

For individual or private use, the Expert is a great favorite; any angle can be obtained by swinging the lever; one trap will afford efficient means for throwing Blue Rocks where it is not advisable to use a Mingaugtrap. The throwing mechanism is simple and durable; may be operated by rope or electric pull.

Each

No. 2ET—Black japanned, cast iron frame; steel springs; length of arm 15 inches; spread of feet 11 inches; wt. each 30 lbs $27 00

One in a wood box.

EXTENSION SPRING

The extension spring trap is well made, and is a trap that all sportsmen will admire; any angle desired may be readily obtained by the loosening and setting of hand screw.

Each

No. 1EST—Black japanned, cast iron frame, steel springs; length of arm 15 inches; spread of feet 8½ inches; weight each 15 lbs $21 00

One in a wood box.

ANTI-RATTLERS STEERING COLUMN BRACES, OIL GAUGES

ANTI-RATTLING BALL SOCKETS
For Radius Rod

Designed for adjusting end of radius rods which terminate in a ball socket at front of transmission case; takes up lost motion at this joint; screw adjustment to take up wear; baked black enamel finish.

No. 27 Anti-Rattling Ball Socket ..... Pair $0 40

ANTI-RATTLING BALL SOCKETS
For Steering Rod

Designed to take up wear on ends of steering gear connecting rod. Has screw adjustment to take up wear; one required on each end; baked black enamel finish.

No. 51—Anti-Rattling Ball Socket..... Pair $0 40

BRAKE ROD SUPPORTS

Automatic adjustment; brake rod slides between two steel balls; permits brakes to be operated with minimum effort, applied in two minutes; housing of malleable casting, japanned black enamel finish

Brake Rod Supports. .. .. Pair $0 50

LITTLE GIANT ANTI-RATTLERS
For Fords

Entirely stops the annoying rattle of steering rods; adds two-thirds to life of steering rod bearings by removing vibration. A counter display card with an extra pair of Little Giants showing installation furnished free with each order for 1 dozen pairs of Little Giants. Made of tempered spring steel wire.

Little Giant Anti-Rattlers . ..Pair $0 75

BABY GIANT ANTI-RATTLERS
For All Cars

Identical with Little Giants only smaller, designed for brake rod joints; eliminates wear on clevises and pins. Ford cars require 4 to set; all other cars require 8.

Baby Giant Anti-Rattlers .... set of 4 $0 50

FAN BELT GUIDE
For Fords

This device prevents coming off pulley. Belt is held in position by two fingers. Guide is attached to an engine bolt.

Fan Belt Guide. .... Each $0 25

STEERING COLUMN BRACES
For Fords

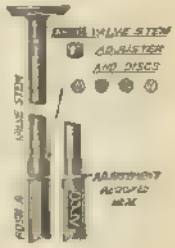
Eliminates all vibration, at the same time makes the steering gear as solid as a rock; finished in black enamel and [illegible] complete with screws, will [illegible] 1915 to 1922, inclusive.

Steering Column Brace ..... Each $1 00

VALVE STEM ADJUSTERS

Consist of hardened caps and a quantity of very thin hardened steel discs. To apply adjusters all that is necessary is to raise valve slightly, slip an adjuster on the end and if this is not sufficient put enough discs in cap to reduce the play to the thickness of a piece of newspaper. Set consists of eight adjusters and a quantity of discs.

Apco Valve Stem Adjusters ..... Per set $0 20



METAL OIL GAUGE
For Fords

A very well made, all metal oil gauge. Stones thrown about by the wheels will not break it.

Cork float inside carries a rod topped with a white ball, which always indicates the level of the oil in crank case

Grease and dust have no effect on this gauge. The ball can readily be seen any time, even at night.

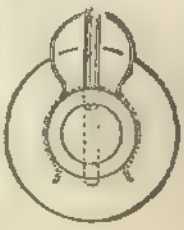
Metal Oil Gauge ...Each $0 75

NON-BREAKABLE OIL GAUGE

This Oil Gauge has a natural downward [illegible] of large diameter, which positively eliminates clogging, and being of solid construction, it cannot come apart from vibration. This type of gauge is becoming standard, and is rapidly replacing the old style cheap gauges

Non-Breakable Oil Gauge ... Each $1 00

JIFFY CRANK RATCHET PIN
For Fords



When a crank ratchet pin requires replacement it takes two men about one-half hour to put in a new one and rivet it in place. The Jiffy Ratchet Pin slips into place and a steel spring which comes already riveted to the pin clamps around the shaft and holds it. The pin slips in as easily as you would stick a pin through a piece of paper. Will not work loose

Jiffy Crank Ratchet Pin Each $0 25

C. & M. OIL RETAINERS

Applying Tool

Oil Retainers

Manufactured with one intention—to stop and continually prevent the oil leak from the rear end or differential of all Ford Cars.

In the manufacture leather is used almost exclusively; this feature alone assures you that it cannot become supersaturated, spongy and limp, as felt packing does.

Another feature we wish to call your attention to is our means of holding oil on the outside diameter; this is done by means of **cold soldering,** or, as we might say, **lead expansion,** which is performed by means of the application tool as shown below; this expansion of the lead fills in all the pores of the iron housing, keeps the retainer from revolving with the axle, and performs what is known as a lead joint, making the retainer on the outside diameter absolutely leak proof.

The pressure exerted around the axle due to the two coil springs on the boot of the oil retainer; these springs **keep a constant tension on the shaft, just enough to hold back any oil that tries to get by.**

Full instructions packed with each set

Oil Retainers, regular ..... Set $1.00
Applying Tool, regular ..... Each 2.00
Oil Retainers, truck size ..... Set 1.50
Applying Tool, truck size ..... Each 2.50

EMCO GREASE RETAINERS

Emco Grease Retainers in position on rear axles. Arrows show how grease is kept moving constantly toward differential.

Two centrifugal coiled springs that cure a great evil They keep oil and grease from dripping out of axle ends thus keeping brakes free from oil and preventing tire damage

They save money and trouble and cure unsightly waste of lubricant.

They insure longer life to the differential gears.

Easily applied and require no attention or upkeep.

Emco Grease Retainers. ..... Pair $0 50

EXHAUST DEFLECTOR

It is especially desirable for deflecting oil, heat or smoke from spare tires when carried in rear

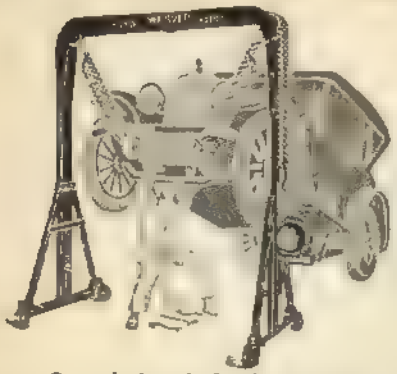
It can be adjusted in one minute to one, two or three thicknesses as may be required to stop the squeaking of the rim and keep the wheel true. Will conform to all kinds and sizes of rim lugs. Goes on the bolt with lug and cannot loosen off.

Rim Wedge Shims.. . . . . Per dozen $1 50

Weaver Auto Hoists



Single or Double Suspension, Safety, Worm Hoist, Ball and Roller Bearing Casters

The frame of the Weaver Auto Hoist is designed so as to permit the height of the arch to to be increased approximately 12 inches, allowing the uprights to be raised to the desired height in the braces on either side by means of the chain hoist. This increased height enables the hoist to raise the rear end of the limousine or a touring car with the top up, for removing the rear system.

One chain of the hoist may be carried over the pulley in the center of the frame for performing work which can be handled to better advantage by a single suspension than by a double suspension from each corner of the frame, as shown in preceding illustration.

The hoisting mechanism is operated by worm drive which is absolutely safe and positive. There are no gears nor ratchets to slip or break and allow the load to fall.

Weaver Auto Hoist is carried upon four ball and roller bearing casters 5 in. in diameter which permit it to be transported with perfect ease. The construction throughout is of steel, giving the greatest possible strength in comparison with its weight. Height 8 ft. to 9 ft. Shipping weight 500 lbs.

Complete . . . . . each, $135.00

Continental Piston Aligning Devices

The Continental Aligning Device overcomes all the difficulties encountered in attempting to align pistons.

In actual operation the lower connecting rod bearing is clamped around the correct size bushing, as it is fitted to the crankshaft, and this bushing is placed on the standard sized arbor of the machine. The movable disc is then moved out against the side of the piston and firmly clamped in position by use of the locking screw just back of the disc. The test is then made by ascertaining if the piston lines up exactly with the plate.

There is no danger of scoring the lower bearing in this operation as the bushing turns on the arbor instead of the bearing itself turning.

The machine is well built, all parts are high grade and accurate.

Every outfit is equipped with an arbor and one bushing. A two inch bushing will be furnished unless otherwise stated.

No. 32 Piston Device.....each, $75.00

Canedy-Otto Portable Floor Cranes

With this crane auto repair and machine shops can do away with an overhead travelling crane or chain blocks.

It is suitable for all kinds of heavy lifting.

Combines strength and capacity, will wear a long time, easy to pull and does the work of a half dozen men.

Built of high grade materials throughout and will soon pay for themselves in labor saved.

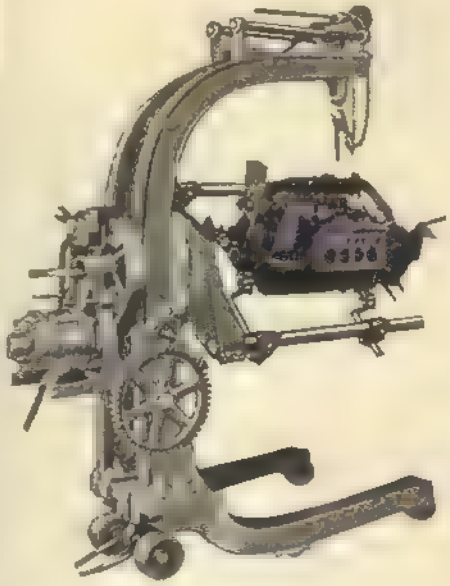
Eco Universal Motor Handling Machines



This machine is especially constructed to handle any motor without the use of special bolts or blocking as the patented universal clamping heads adjust themselves to any position or shape.

With this machine one man can remove from the chassis of any car, truck or tractor, any engine regardless of make or size, clamp it in the engine stand complete with transmission and carburetor on and start up and run the engine in the stand.

The engine can be revolved completely in either direction permitting the workman to get at the engine from every angle.

The motor can be held in any desired position and there is nothing in the way to impede the progress of the work.

With the use of two hooks which are part of the standard equipment this machine will also handle the rear axle of a car for all repair work.

Crane is made of semi-steel strongly reinforced in every point and capable of lifting 2500 lbs. with perfect safety. Load is lifted by a crank on gear shaft and can be locked at any point. Has travel of 24 inches.

Burning-in attachment which is part of the standard equipment is detachable for use for portable floor jobs.

No. U100 Machine complete with 3 phase A. C. motor.....$750.00
No. U101 Machine complete without burning-in attachment 475.00
No. U102 Machine complete without crane 600.00
No. U104 Burning-in attachment only 275.00
No. U105 Stand only 325.00
Single phase motor.....extra, 75.00
D. C. motor .....extra, 65.00

Continental Engine Stands for Fords

Every stand is provided with strong double-wheel casters and can be readily turned to any position to get the best light on such parts as need attention. The stand, together with the motor, may be moved from place to place with ease.

This is the only stand on the market in which you can fasten a complete Ford unit power plant direct to the stand and tear down or rebuild the unit power plant without changing the stand.

This Ford attachment securely clamps the cylinder block to the arm brackets of the motor stand.

Stand is adjustable in height from 32 to 37 in., adjustable in width from nothing to 35 in.

Ford Stand $34.00

Continental Engine Stands

A very necessary equipment for any garage or repair shop that desires to keep operating costs at a minimum. It will hold in a rigid position all kinds of motors, from the Ford to the very largest.

Canedy-Otto Universal Motor Stands

Designed to meet all conditions. Meets every requirement of motor building and assembling. Handles all kinds of motors.

Stand is well braced, supported and portable. Motor can be adjusted to and fastened in any desired position.

Is adjustable to 36 in. in width. Cross bars do not have to be lifted while placing motor on stand. Frame will accommodate both high and low base portable floor crane.

The Ford attachment clamps to cylinder block with brackets giving the mechanic free working space to remove all parts. Can be adjusted to any position required by nature of the work to be done.

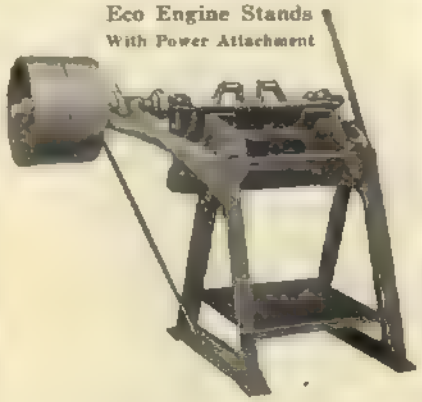
Length of side rails, 48 in. Extreme height of stand, 39 in. Weight of stand, 220 lbs. With Ford attachment, 240 lbs.

Universal Motor Stand, complete with Ford attachment.....each, $53.60

Universal Motor Stand, without Ford attachment.....each, 51.00

Eco Engine Stands

With Power Attachment



A sturdy convenient stand to hold the Ford engine block while repairing. Made of cast iron with adjustable table so work may be turned to desired position.

Power attachment may be attached which with the stand makes a complete outfit for burning-in crank shaft bearings, running-in of pistons, etc. Stand is bolted to floor and may be used independently of power attachment.

Stand and attachment, single pulley	$62.50
With shifting lever	45.00
With tight and loose pulleys	46.50
With tight and loose pulley and shifting lever	49.00

Canedy-Otto Jr. Motor Stands

Designed especially for Ford and Chevrolet motors. This stand permits the entire power plant, after being removed from the chassis, to be securely fastened by means of a yoke and spindle in less than thirty seconds.

Is so constructed that all valves are easily accessible to the mechanic a feature not found in other motor stands of its type.

The motor may be completely revolved and can be held in any desired position by means of a friction stop, located on top in easy reach of the operator.

Motor is held on stand by a special yoke and spindle fastened securely by nut and washer. Base of stationary stand is drilled for bolting to floor.

Canedy-Otto Bench Motor Supports

Designed for attachment to the shop bench where there is insufficient room for a complete motor stand.

Will accommodate complete power plant of Ford and Chevrolet motors.

Motor securely fastened in a few seconds after removing from chassis and can be completely revolved, allowing access to any part. Friction stop located on top of support holds motor in any desired position.

This is a very practical and efficient substitute for the complete motor stand where space does not permit use of the stand.

Each $10.00

A. C. SPECIAL FOR FORDS

The AC 5159 No. 1075 spark plug for Ford cars is an AC product backed up by the AC trademark and therefore of AC quality throughout.

Spring terminal clip permits wire to be instantly detached and re-connected while motor is running. Facilitates testing spark plug and coil. No nut to be unscrewed or lost.

By unscrewing the bushing, plug may be completely disassembled. Only one gasket is used. Extra large body porcelain to withstand hard service.

Patented CARBON PROOF porcelain. Saw tooth edges attain sufficient heat to burn oil deposits, thus offering effective resistance to carbon.

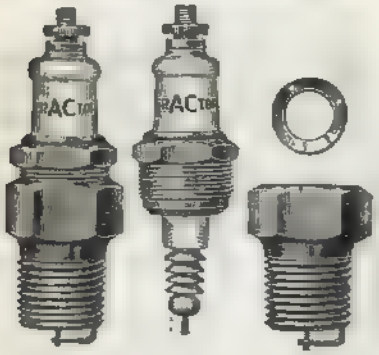
Large electrode will last indefinitely. Special shape forms natural drain preventing oil lodging in the in the spark gap.

No. 5159—1075—W't per box 3½ lbs., per box of 10 .....$8.80

No. 5160—Porcelain for above, w't per box 1 lb., per box of 10 .....$4.40

APPROX. W'T PER DOZEN 3½ LBS. ONE IN A BOX. TEN IN A CARTON

A-C "CICO" SPARK PLUGS
TWO PIECE CONSTRUCTION



⅞ in. Reg. AC Tractor—This new construction combines the advantages of the Titan Carbon-Proof one-piece design with the ready demountability of the Standard AC. It can be taken apart and reassembled any number of times without risk of spoiling the packing. Particularly recommended for kerosene burning motors.

No. 5187—½ in., Regular AC Tractor, w't per doz. 6 lbs.,
per box of 10 .....$13.20

A-C SPARK PLUG CORES
FOR A-C STANDARD PLUGS

No. 5183—Fits carbon proof type AC Plugs, w't per doz. ¾ lb.,
per box of 10 .....$6.70

SPECIAL TERMINALS FOR A-C PLUGS

With 9 in. Solid Back; 1½x26 in. Spring	
+No. F308K-430—Two-Leaf; Weight 35 Lbs	9.00
+No. F308L-440—Three-Leaf; Weight 40 Lbs	10.30

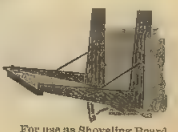
"GRAIN KING" END GATES OR SHOVELING BOARD

Closed tight

Make a Tight Job; Add from 2 to 3 Bushels to capacity of Box; Can be removed or put on, in a very few minutes

For Dumping Grain

Painted with a high grade of Green color Varnish; Most attractive in appearance



For use as Shoveling Board

Consists of Extension which fits into rear end of any Standard Wagon Box, and Endgate proper, which is clamped onto Extension by means of Levers on sides of Extension; Extension Frame fits tight inside of Box End. Cleats on Frame Sides fit into regular Box Endgate Grooves. Frame Sill rests on Box Bottom, and is beveled to make gradual slope to Bottom. Bolts passing through regular Box Cross Rod Holes and Frame Sides fasten Extension firmly to Box

Endgate proper, or Back Board with its Wings, fits tight against Extension when closed. Wings fit outside of Extension Frame Sides

In addition to making tight job, this stiffens Box Sides and prevent their spreading

When used as Shoveling Board, Endgate proper is opened from top, and hangs in place on Steel Side Levers. Steel Plates built into bottom back Cross Cleat fit under Extension Sill and prevent Board from springing up when weight is put on extreme back end of Endgate.

When dumping Grain at Elevator, Endgate will swing freely from bottom, by lifting Endgate proper with Levers, and hooking it at top of Extension Sides.

	Each
+No. F308R-350—For 38 in. Box; 36 in. High; Weight 50 Lbs	$8 90
+No. F308T-360—For 42 in. Box; 36 in. High; Weight 50 Lbs..	8.20

DUPLEX FILLETSTER AND RABBET PLANES

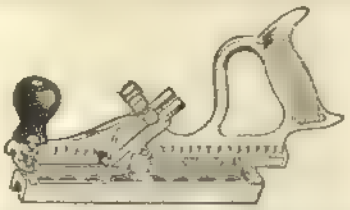
Japanned iron stock, polished surfaces

Has two seats for the cutter, one for regular work and the other where a bullnose is required. It has a spur and a removable depth gauge. The adjustable fence can be used on either side and slides under the bottom, regulating the width of the cut.

No. 78. Length 8½ in., cutter 1½ in., weight 3 lbs..each, **$7.90**

One in a box

STANLEY IRON PLANES



SWINGING FENCE MATCH PLANES

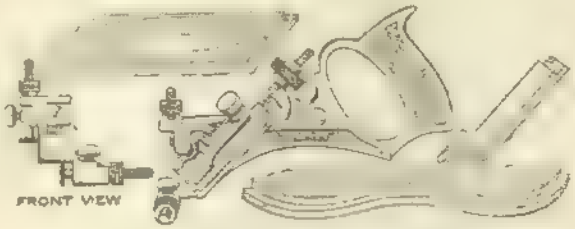
Nickel plated iron stock, rosewood knob

This plane has two plow cutters of the same width, and one extra wide cutter. The fence in one setting exposes two cutters for cutting the tongue, and, when reversed, leaves only one exposed for cutting the groove. On thicker boards than the plane works on center, the extra wide cutter is substituted for groove cutter when cutting tongue.

No. 48. Cuts ⅛ in. groove on boards ¾ to 1¼ in., centers on ⅞ in., weight 3¾ lb.....each, **$12.60**

No. 49. Cuts ⅛ in. groove on boards ½ to ¾ in., centers on ½ in., weight 2⅜ lb.....each, **12.60**

One in a box



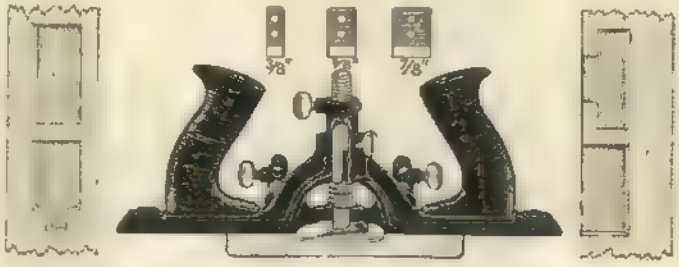
CURVE RABBET PLANES

Nickel plated iron stock

Will cut rabbets on circular or other curved and irregular edges; works whether the rabbet is to be cut on the outside edges of work or on edges of openings cut out of the surface of the work; provided with two cutters fastened together by a screw in such relation, one to the other, as the work in hand requires. The upper cutter acts as a spur for the lower and also cuts the side of the rabbet. The lower cutter is a skew cutter which follows spur and cleanly cuts bottom of the rabbet; stock and handle are cast in one piece; plane is fitted with an adjustable depth gauge; fence is adjustable and has a curved face.

No. 196. Length 9 in., with two cutters, weight 3 lb.....each, **$16.00**

One in a box



DOOR TRIM AND ROUTER PLANES

Japanned iron stock, rosewood handles

Will make mortises for butts, face plates, strike plates, escutcheons up to a depth of ⅞ in. and a width of 3 in. A fence regulates the position of the cut and insures the sides being parallel; depth of cut is governed by a positive stop. Can be changed into a router plane. An extra wooden bottom of any size desired can be screwed on, enabling the user to router on large openings.

No. 171. With three forged steel cutters, ⅜, ⅝ and ⅞ in. wide, length 11 in, weight 3 lb.....each, **$14.10**

THIS TEST SHOWS

Just as a window pane lets in warmth of sunlight, so ALL the heat penetrates "Pyrex."

If a metal pan and a "Pyrex" dish both filled with water are put in oven, the water in the "Pyrex" dish boils in 10 minutes, but the water in the metal pan will not boil in over 2 hours. Metal throws off more than half the oven heat. Try this test.

Square Cake Dish—1 in carton.

ONE IN A SUBSTANTIAL WOOD BOX

BICYCLE AND JUVENILE AUTO HORNS

This horn makes a lot of noise for its size. Operated with a small wire crank. Children use their toy wagons, Kiddie Kars and Velocipedes because it looks and sounds like an auto horn. Each Root-Out is furnished with an adjustable clamp for attaching, any convenient place on the bicycle, or juvenile vehicle. Finished in black enamel baked.

No. 1677—Root-O-u-t, w't per doz. 2½ lbs. .....per dozen $3.60

HALF DOZEN IN A BOX

Clears the way with a turn of the crank. The sound is produced by a toothed wheel coming in contact with a roller point on the diaphragm producing a loud and far reaching signal. Toothted wheel and roller contact are tempered. Finished in black enamel baked. Furnished with adjustable nickled bracket for attaching to the bicycle or juvenile vehicle.

No. 1678—Clear-O-u-t, w't per doz. 4 lbs. .....per dozen $9.60

HALF DOZEN IN A BOX

No. F2.

No. F10.

"HALF-INCH" is specially selected and specially sized for use in automobile generators, bicycle lamps, motorcycle generators, hunters' lamps, fishing lamps, camping lamps, watchmen's dark lanterns' steam boiler inspection lamps, hand lanterns and numerous other small pieces of portable Acetylene apparatus designed for the use of Carbide of this size.

Because of its high gas yield, special selection, uniform size, freedom from dust, and its uniform quality, is most economical and satisfactory for use in apparatus for which this size of Carbide is adapted.

Each can is equipped with a compression top which can easily be replaced in position, so that the Carbide remaining in the can will be thoroughly protected from air and moisture.

Will keep indefinitely if protected from air and moisture.

No. F2—In 2 pound cans★ .....per case $.....

No. F10—In 10 pound cans★ .....per case .....

24 TWO-POUND CANS; 6 TEN POUND CANS IN A CASE. WE DO NOT BREAK CASES OF TEN POUND CANS

No. F25.

No. F100.

"MINERS' LAMP" is specially selected and perfectly adapted for use in miners' lamps.

Because of its high gas yield, special selection, uniform size, freedom from dust, and its uniform quality, is the most economical and satisfactory Carbide for use in miners' lamps.

Packed in substantial sheet steel drums.

This very convenient 25-pound drum enables the dealer to get Carbide into the hands of the miner in an unbroken package, with no labor—no scooping, weighing or wrapping—and with no loss of Carbide from spilling or exposure.

No. F25—In 25 pound drums★ .....per 100 lbs. $.....

No. F100—In 100 pound drums★ .....per 100 lbs. .....

BICYCLE LAMPS

SEARCH-LIGHT GAS

The improved "Search-Light" is constructed upon the drip idea. The carbide is in a telescope compartment in the lower part of the lantern and the water tube passes through the center of the compartment so as to feed the water supply at the bottom of the carbide. The flow of the water is regulated by a small lever at the top.

Absolutely automatic in its action the gas is generated only as it is used.

Made of brass, highly polished and nickel plated.

Large jeweled imported side lights. Ground double convex lens.

Has universal bracket. Burns from four to six hours with one filling.

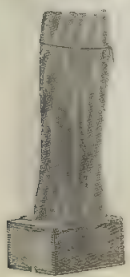
No. 171—Length over all 36 in.; weight with handle 4½ lbs	$63 00

One dozen in a wood box, heads enclosed, handles projecting, well burlapped.

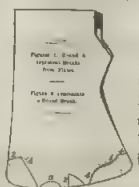
OUR AXE HANDLING DEPARTMENT



Our Axe Handling Department, by years of experience, has reduced the handling of Axes to a science. Not only is each handle correctly gauged but it is driven and wedged with such accuracy as to insure a correct setting of the axe and to prevent its becoming loose on the handle.

All our handled axes are packed one dozen assorted weights in a crate. The heads are enclosed in a strong wood box and are held firmly and securely in place in such a manner as to prevent rubbing and scratching the finish. The handles are entirely covered with a strong cotton sack made especially for this purpose and tied securely, protecting them from dust, dirt and damage in shipping and storage. (See illustration.)

DEFECTIVE AXES

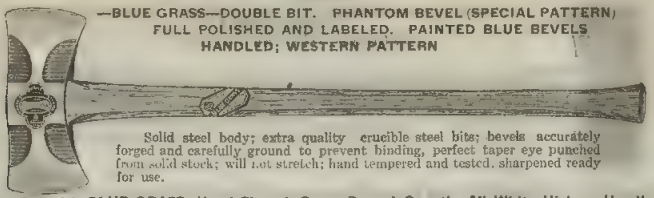


Necessarily the cutting edge of an axe must be high carbon and high temper, and for this reason a good axe is more likely to break than a poor one, as soft steel or steel in which the temper has been drawn by heating on a stone will bend before it will break.

Breaks from Flaws are known by being angular in form.
Sound Breaks, which show no fault in manufacture, are always circular in form.

Axes (except **Mohawk and Cyclone**) are guaranteed against breaks from flaws shown in Figures 1, 2 and 4, but not against sound breaks shown in Figure 3.

AXES



—BLUE GRASS—DOUBLE BIT. PHANTOM BEVEL (SPECIAL PATTERN) FULL POLISHED AND LABELED. PAINTED BLUE BEVELS HANDLED; WESTERN PATTERN

BOYS' WAGONS

—BLUE GRASS—

Cotter pins with nickel caps are used on all Blue Grass Wagons, eliminating lost nuts and wheels from coming off. The wood bottoms are thicker than others and are double tongued and grooved, and glued together.

Reinforced Steel Hub.

This especially constructed hub is used on our Blue Grass Wagons Nos. 1 to 4 inclusive, also on our "Blue Grass Special". It is made with a large barrel around a small or inner barrel in which the axle works. Spokes are extra heavy making a strong, substantial wheel. The hub flange is bent down over each wire, forming a solid recess for the spokes to pull up against; spokes are then riveted to tire, which forms the strongest possible construction and makes hub and wheel absolutely rigid.

Strong Fifth Wheel.

The pull is evenly divided between axle and body; this with the additional advantage of a simple and rigid fifth wheel, allows no strain on axle to pull bolster out of shape. The fifth wheel has an extra plate which gives additional wear and strength.

Entire gear, bolsters and fifth wheel made of pressed steel; open hearth steel axles. Nos. 04 to 1 with $\frac{3}{8}$ in. axles and Nos. 2 to 4 with $\frac{7}{16}$ in. axles; body of 27 gauge sheet steel flanged over $\frac{1}{4}$ inch round steel rod; have two beads of corrugations near top edge and single bead near the bottom. Nos. 0 to 4 fitted with double plate 5th wheel, and three braces on rear axle and two hardwood cleats on bottom boxes. Workmanship and material the very best; wooden tongue with metal grip and steel attachment; outside with two coats of red and neatly striped and stenciled; inside and bottom painted green; gear and wheels enameled black.

Sold in full carton lots only.

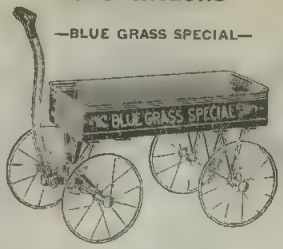
No. 04 one-third dozen, balance one-sixth dozen in a carton, K. D.

BOYS' WAGONS

—BLUE GRASS SPECIAL—



Heavy High Grade.

The wheels on this wagon are the same construction as on the Blue Grass. The fifth wheels are very similar to the regular Blue Grass, being equal to them in every way. They have double brace in the center of the rear axle. The tires are wider than the corresponding wagons of other makes. The wood bottoms are thicker than others and are double tongued and grooved and glued together, whereas, other makes are not tongued and grooved but simply stuck together with glue. The steel in the body is extra heavy and an extra heavy wire is placed around the top; an extra heavy shaped loop is used on the handle; all handles are packed inside the body thus avoiding any loss of parts in shipment.

Reinforced Steel Hub.

Same as on Blue Grass; spokes made of No. 10 wire.

Strong Fifth Wheel.

The front piece goes over the axle and bends down, the axle pressing through it. This piece is made of No. 10 gauge steel and is $\frac{5}{8}$ inch wide. The axles are $\frac{7}{16}$ inch in diameter.

This construction makes the Blue Grass the ideal wagon to withstand the rough usage of boys.

The construction of these wagons is the best— the materials used are of the highest standard the workmanship and finish cannot be excelled. These combinations of high quality make the best boys' wagon that has ever been placed on the market.

Highest grade enamel is used in finishing, with two coats of varnish; letters in gilt; packed two in a carton, assorted finish as follows: 1 with red body, black gears and wheels; 1 with green body, black gears and wheels; red body finished green inside, green body finished red inside.

Sold in full carton lots only.

Nos.	Body Inches	Wheels Inches	Width Tire, in.	Weight Doz., lbs.	Per Dozen

One-sixth dozen in a carton, K. D.

You will find our CRUSADER Paints to be equal to the highest quality paints made. Selling Crusader Paints is a sure way to help make satisfied customers.

BOYS' WAGONS

—BLUE RIBBON—

Sheet steel body, top edge flanged over heavy ¼ inch steel rod. Kiln dried bottoms. Inside finished in green, outside in red, with a fine luster.

Wheels and Gears—Black japanned finish; the the hubs are made of cold rolled sheet steel. The spoke is of high tensile strength, one wire making two spokes. The best sharp oval is used in making the tires.

The tripod is strongly riveted to steel plate resting upon the fifth wheel connecting all parts with an eye bolt, through the lower end of which passes the axle, producing a perfectly rigid gear, preventing the axle from springing out of shape, and affording an easy revolving motion without loosening the eye bolt nut, as it is firmly screwed down to the collar of the fifth wheel. Sold in full carton lots only.

MACHINISTS' VISES

BONNEY STANDARD VISE ASSORTMENT

Jaws are of best grade gray iron and the main and thumb screws are cast semi-steel with cut threads. The head and collar is of a single piece with the main screw and will not wear out or pull off. Finished in black enamel baked on, with polished screws, jaws and anvils.

The stand is of cast iron, japanned, with hardwood shelves.

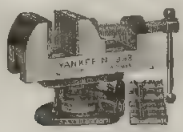
The following are Nos. and dimensions of vises contained in this assortment:

Vise Nos.	00	01	02	02½
Size jaws, in	1	1¼	2	2½
Wt. each, lbs	1	1½	2¼	4

Per Assortment

No. 10BA—Consists of 17 vises: 6 No. 00, 6 No. 01, 3 No. 02 and 2 No. 02½; complete with display stand. $48 00

One assortment in a case; weight per assortment 40 lbs.



YANKEE, cast iron body and jaw, bright finish; dull black finish base. The adjusting screw is of steel, ½ inch diameter with ¾ inch head to receive sliding bar. A removable swivel jaw is furnished to hold taper work, and is made of steel, case hardened. So constructed as when adjusting vise, the body slides instead of the rear jaw.

Has swivel base. Fitted with a lever, which by one turn, rigidly fastens the vise, and by another turn, again releases it. Countersunk holes are provided for screwing vise to bench.

Patent Swivel Base.

Nos.	1991	1992	1993

BOYCE MOTOMETERS

Standard Model

List $10 00

A perfect heat recording instrument of the highest type, with extremely broad ribbon-bore thermometer tube. Because of its perfection of workmanship, the Standard Model has been selected as regular equipment on America's leading cars. Size, 3¼ x 5½ inches. Weight (packed in carton) 16 ounces.

Universal Model

List $7.50

Slightly smaller than the Standard Model finished in all nickel. A very beautiful instrument. Beveled crystals add to its appearance. Its handsome open face is more easily read than a clock. Size, 3 x 5 inches. Weight (packed in carton) 12 ounces.

Overland Model

Designed especially for Overland cars having an *oval*, radiator cap, such as on the Overland "4."

Standard	$10 00
Universal	7 50
Junior	5.00
Midget	2.50

NOTE When ordering specify "Overland Model."

De Luxe Model

List $15.00

This model is all that the name implies, having been designed for the highest grade passenger cars. The case is silver plated and the finish of the entire instrument is of the highest quality of workmanship. It is in truth a "De Luxe" instrument. Size, 3¼ x 5¾ inches. Weight (packed in carton) 20 ounces.

Midget

List $2.50

Special Model for the Ford

List $3.50

Midget Model

A genuine Boyce Moto-Meter especially designed to meet the demand of the small or light car owner. It combines accuracy with a sturdiness of construction. Size, 2½ x 3⅛ inches. Weight (packed in carton) 5 oz.

Special Model for the Ford

The beauty of this instrument on the radiator cap of a Ford, together with its utility, is an investment that every Ford owner should make. Complete with handsome radiator cap. Size, 2¼ x 3⅞ inches. Weight (packed in carton, 7 ounces.

Truck and Tractor Model

List $10.00

This model has been designed especially for severe conditions so often met with in truck and tractor service. The casing is nickel plated. The diameter of the thermometer tube is one half inch which makes breakage impossible. The frame of the instrument is very substantial, and the thermometer tube thoroughly protected. Size, 2½ x 4¾ inches. Weight (packed in carton) 16 ounces.

Junior Model

List $5.00

This model appeals strongly to owners of cars of medium size. The frame of this instrument is heavily nickel plated, and it has the same range of temperature as the Standard and Universal Models. Size, 3 x 4¾ inches. Weight (packed in carton) 8 ounces.

Distance Type Model "A"

List $18.00

Especially designed for installation where the radiator type instrument cannot be installed on a line with the operator's vision, as on aeroplanes, motor boats, stationary engines, tractors, automobiles and for laboratory testing purposes. Finished with black enamel case (3 and 4 inches in diameter), nickel plated rings, beveled crystal, and red and white pointer. The temperature ranges from 32° to 212° F. Complete with 5 feet of tubing, and hose couplings.

To install it is only necessary to cut away one inch section of the hose leading to the upper part of the motor from the radiator.

In ordering be sure to state the exact size of the inside hose dimensions.

For other models of Distance Type instruments with longer tubing lengths, greater temperature ranges, special fittings, etc., write for special literature.

AC TITAN

$1.00 EACH

No. 78 LT

⅞" LONG AC Titan

Slightly longer than ⅞" regular. Made especially for Dodge Brothers.

AC

Spark Plugs

The Standard Quality Plugs of the World

CARBON PROOF TYPE FOR FORD

NO. 12 CPT

⅞" REG. AC TITAN CARBON PROOF

This plug is especially designed for use on Ford cars and is remarkably efficient under all conditions. The special ribbed porcelain with saw-tooth edges reduces carbon troubles to a minimum. The reason being that the saw tooth edges of the carbon proof porcelain become so hot as to burn away the carbon as fast as it forms, thereby keeping the porcelain clean and breaking up short circuits.

SPECIAL TERMINALS FURNISHED GRATIS

AC TITAN

$1.00 EACH

No. 78 LBT

Each

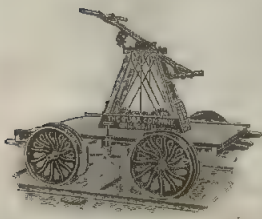
No. 2—Length 57½ in. [illegible]..... $7 50

Packed loose; weight each 20 lbs.

BUDA HAND CARS

BUDA FOUNDRY AND MFG. CO.



Helical Gears.

Unless otherwise specified all Buda hand cars will be furnished with helical gears as they present many advantages over the ordinary spur gears. There is no lost motion. The teeth are cut in a diagonal manner creating a continuous rolling contact, thus before one tooth disengages the one ahead has begun to mesh. This gives a steady motion to the car and the operators are enabled to obtain greater power with less effort. The teeth also are stronger than on a straight tooth gear, because, being cut diagonally, they are somewhat wider.

Taper Wheel and Pinion Fit—All Buda hand cars will be furnished with the improved taper fit on wheels and pinions, unless otherwise desired. If straight fit is preferred, this fact should be specified when ordering.

Framework—The framework of all Buda hand cars is of specially selected maple, thoroughly seasoned. Platforms or decking is of long leaf pine dressed on both sides to uniform thickness.

Each

No. 1—Buda standard hand cars, standard gauge, platform 6 feet long by 4 feet 5 inches wide, axles 1½ inches in diameter, wheels 20 inches in diameter, weight 525 lbs.....+$285 00

+F. O. B. Illinois Factory Only.

HARVEY PUSH CARS

BUDA FOUNDRY AND MFG. CO.

Harvey push cars are made in the same thorough manner as the Buda hand cars described above, using the same pressed steel wheels taper fitted to axles, unless straight fit is specified on order.

These cars can also be furnished with insulated axles for use on roads using block systems with track circuits. These are always extra and cars so desired should be specified on order, otherwise they will be shipped without insulation.

The framework is of specially selected maple, thoroughly seasoned. Platform or decking is of long leaf pine, dressed on both sides to uniform thickness and has hardwood end rail at each end, bound with a substantial iron strap.

Each

No. 4—Harvey push car, standard gauge, platform 7 feet long by 5 feet 6½ inches wide, axles 1½ inches in diameter, wheels 20 inches in diameter, weight 850 lbs.+$252 00

JACK SCREWS

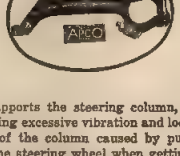
STEERING WHEELS

Here is a big, handsome, strong steering wheel that adds to the appearance of a Ford and makes driving easier and safer.

Constructed of stout, tough, hardwood finished in walnut with corrugated rim. Spider is of die cast polished aluminum.

No. 7136—Non-tilting, 17 in. wheel, w't 5 lbs. .....each $7.00

STEERING COLUMN BRACE



Supports the steering column, preventing excessive vibration and loosening of the column caused by pulling on the steering wheel when getting in and out of the car. Consists of a black enameled malleable iron bracket, bolts and screws, ready to attach. Can be put on in a very few minutes.

No. 7122—W't per doz. 10 lbs., per dozen $16.00

ONE IN A BOX

GOLF GOODS

GOLF BALLS

Burke—Grand Prize

Recessed Dimple markings; 30 pwt. The most serviceable ball possible to produce.

Conforms to latest U. S. G. R. A. rules.

NO	DOZEN
30	$13 20

Eagle

An exceptionally high powered ball. The perfect medium for expert golf. Wonderful distance both in the air and on the ground. Perfect controllability off the club. Dimple marking. Sinks in water. Small size 1.630 inches. Weight 1.62 ounces, equivalent to 29½ pwts.

NO.	DOZEN
New Eagle 1	$12.00

Paramount A

A long distance ball with easy flight and remarkably true action. A strictly high-grade ball at a moderate price. Alternating triangle marking. Sinks in water. Small size 1.665 inches. Weight 1.62 ounces, equivalent to 29½ pwts.

NO.	EACH
Paramount A	$9.00

Paramount F

The light weight construction of this ball produces long driving qualities and makes it good for soft turf conditions. Square mesh marking. Large size 1.710 inches. Weight 1.47 ounces, equivalent to 27½ pwts.

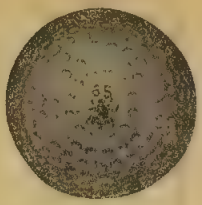
NO	EACH
Paramount F	$9.00

Scottie

A substantially made ball which will give good service under all conditions. Good for practice and for beginners. Weight averages about 30 pwts. Dimple marking. Uniformity of size not guaranteed.

NO	EACH
99	$6 00

GOLF BALLS



Burke

Standard size; recess marking only. The best low priced ball on the market

THE FORD SECTION

Efficient Organization of Greatest Importance

Successful Ford Dealer Says Fine Buildings and Equipment a Great Help, But Trained Men Even More Necessary

Believes in Twenty-Four Hour Service in Rural Community

Finds It Brings Business From Farmers, Traveling Salesmen and Tourists

By JAMES W. COTTRELL

FOUR sales in November, 1920, with closed territory; thirty-six sales the next month with open territory. Almost all of the 36 sales made in what had been other dealers' territory. Any organization which can make such a record in selling Ford products must be very much on the job. But this is only one of the accomplishments of W. A. Jones, Ford dealer, of Mount Holly, Burlington County, N. J.

Mr. Jones has had the Ford contract in Mount Holly for eight years. His business has been in its present location for seven years.

The New Building Just as It Was Being Completed

Personnel Most Important

No amount of buildings or equipment can make a successful business. Proper facili-

ties are necessary, but without the right management and employes they cannot accomplish anything worth while.

In the Jones establishment the policy is to hire only good men and to pay them good wages and make it worth while for them to do good work and keep on doing it.

There are from 26 to 30 employes and Mr. Jones reports that he has no labor troubles. One way of keeping interest in the establishment is a bonus or Christmas present. This bonus is paid to each employe two weeks before Christmas. And it is based on the length of time the employe has been employed. An employe who has been there six months gets $12, one with a year's service $25, fifteen months $30, two years, $50, with an increase of 10 per cent per year after two years. This payment is not a part of the salary paid the employes but is an extra payment for continuous service.

Part of the Storage Space for New Cars, Tractors and Implements. Note the Heavy Ceiling Beams to Support a Second Floor Later

It has been found that the money given in this way is well spent as it brings about a better spirit among the employes and maintains their interest in the welfare of the business.

In an addition, recently made to the building, there is a room for the use of employes This room is equipped with individual steel lockers, shower baths, and other conveniences. There may seem to be no direct return from the cost of these things, but the better work done by the men because of the interest taken in their welfare amply justifies the cost of the improvements

Departmental Organization of Business

The business has been divided into five departments by Mr. Jones. The five are Sales, Financial, Purchasing, Battery, Repair. Each department is headed by and in charge of one person who is looked to by Mr. Jones for the proper conduct of that department. And the authority and responsibility of the head of the department is recognized in all ways. If Mr. Jones, in going through the shop, sees a mechanic doing something wrong he does not tell the man but tells the shop superintendent. And the same thing applies to other departments.

Four salesmen are employed, in charge of a sales manager. The person in charge of the Financial Department takes care of the bookkeeping, correspondence, bills and collections and the notes given by customers for machines bought on time.

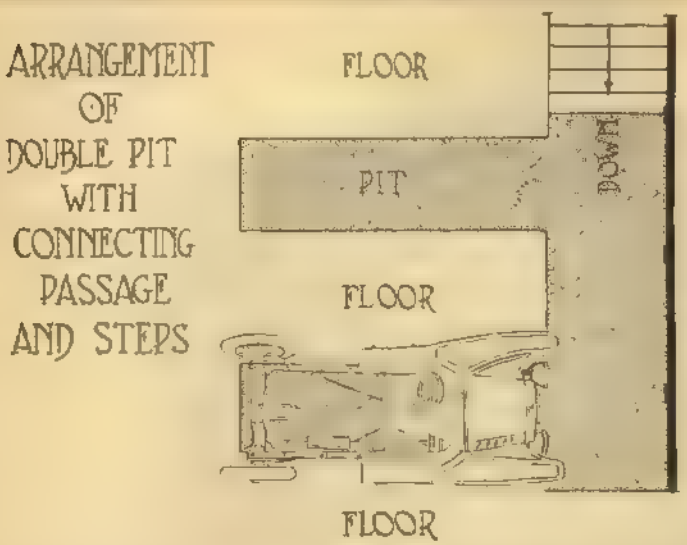
Features 24-Hour Service

Continuous service is given by this establishment in Mount Holly. The place is open for business 24 hours a day, seven days in the week. There can be no question about such a policy being profitable, because it has been in force for several years, in fact almost all of the time since the business was started.

No extra charge is made for work done at night. The 24-hour service is of particular value to tourists, traveling salesmen and others similarly situated, as work can be done during the night, and the car will be ready for the journey when the people get up the next morning. The fact that parts can be had at any time of the day or night is also a great convenience to many customers. During the busy season farmers work from early in the morning until late at night. In case of a breakdown they need parts or service right away. They can get either in Mount Holly.

Mr. Jones believes that service of the right kind is the only foundation for successful sales effort. And the 24-hour policy he considers an important factor in making sales. With open territory purchasers can buy where they please, but they are likely

FORD SECTION



Pits With a Convenient Stairway Are a Feature of the Jones Service Station.

to buy where they can get or have gotten good service.

Besides the equipment in the service station Mr. Jones has a crane on a truck for outside jobs and a Model T chassis with a panel body. This smaller car is an effective advertisement. It is painted maroon with gold letters and striping. It is used to call on farmers, give them service if it can be done on the spot, and to carry spare parts, and it also is used for calling for and delivering batteries.

If the farmer wishes a man sent out to do service work right on the farm one is sent to him. If the job is too big to do to advantage on the farm the tractor is loaded on a truck and taken into the shop.

Attractive, Well-Planned Building

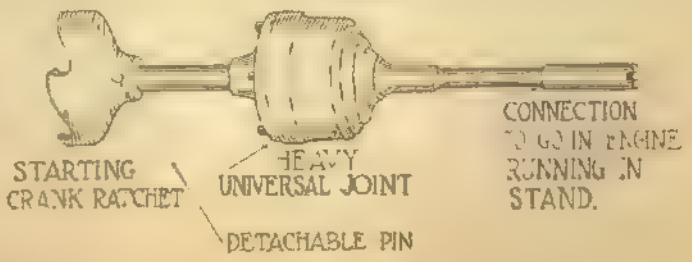
The present building measures 130 ft. front by the common depth of 106 ft. It presents a truly imposing appearance, with brick front with large plate glass windows and with steel factory sash in the side and rear. The floor is concrete and the roof, supported on concrete pillars, is of reinforced concrete. The roof looks unusually heavy, viewed from the floor, and it is. The roof is designed to serve as floor for a second story when it is necessary to add one. By making the roof now heavy enough for the floor when needed, quite a bit of money will be saved when the second floor is added.

The new building was started on October 28th last year, and work was carried on right through the winter and the actual construction work completed in 72 working days. One section of the roof was poured with the temperature at 6 deg. above zero. The sand and pebbles were heated before mixing and after pouring the section of roof was covered with salt, hay and canvas and the section below the roof, just poured, was partitioned off with canvas and heat put in the space thus marked off. By such precautions it was possible to keep work going during the cold weather and examination has shown no evidence of freezing in the concrete.

There is a show room, 40 ft. x 40 ft.; a stock room, 65 ft. x 40 ft.; the shop, 65 ft. x 60 ft.; a battery service room, 20 ft. x 28 ft.; main storage space, 100 ft. x 100 ft., and offices, a rest room, wash room for employes and other small rooms.

Shop Thoroughly Equipped

The shop is clean, well lighted and ventilated. And it is large enough to handle the business being done without crowding. A Louden overhead track and chain hoist is provided to move units about the shop. Track serves almost entire floor area of shop.



Device for Cranking Stiff Tractors From the Running-in Stand.

FORD SECTION

Although many Ford service stations do not have pits there are two in the Jones place. They are connected by a passage way close to the wall and there are steps in the end of the passage for the mechanics to use going up and down. Two pits laid out in this way take up some little room, but the convenience of working in them and being able to get in and out of them so easily makes them valuable in a shop not too crowded for space.

The equipment in the shop consists of a lathe, drill press, cylinder reboring tool, power grinder, engine burning-in and running-in stand, two engine stands, rear axle stand, crankshaft testing and straightening press, connecting rod jig, magneto and coil tester, 20-ton press, and a quite ample supply of smaller and hand tools. The 20-ton press is bolted to the concrete floor and there is a square hole in the floor directly beneath the press screw, so that long shafts can be put in the press, shafts longer than the height of the press.

Easy Way to Start Stiff Tractors

Starting new, stiff tractors is some job. Mechanics hate this job, probably, more than any other one about a Ford service station. Home-made extensions for the cranks, long bars on the cranks and many other schemes have been tried. But no such device is altogether satisfactory, and limbering up a new tractor is still, in most places, a job to be dreaded.

In the Jones shop a special attachment has been made to start tractors and limber them up. The attachment goes on the engine running-in stand. It consists of a universal joint, an extension shaft and a detachable starting crank ratchet. (See illustration on page 247.)

When a new tractor is to be limbered up it is hauled into the shop and placed in front of the engine running-in stand. The spark plugs are removed and the crank is taken out. Then the attachment is hooked on the tractor and the stand, some light oil such as 3-in-1 is poured on top of each of the pistons and the electric motor of the stand is started. The tractor engine is turned over in this way for about three hours, at the end of which time it is started by cranking it in the engine stand. After running in it can be started by hand.

Mr. Jones says that this method of limbering up tractors and starting them not only saves a lot of hard work but it gives much better results than the old way of starting them somehow and running them in. When stiff tractors are run in under their own power, Mr. Jones states, the excessive heat has a bad effect on all of the working parts, particularly on the piston rings.

The same method of limbering up and running in is used on cars which are in the shop to have bearings tightened without taking the engine out of the car. It saves the time taken to tow the car on the road to start it and the running in cold for a time gives a better job than starting up and running in under its own power. As long as the engine running-in stand and its electric motor are available there seems to be a decided advantage in using them for these other jobs.

Battery Department

The battery department is in a separate room, 20 ft. x 28 ft. It is almost in the rear of the building and is marked by brick partitions with sliding doors. Light and ventilation are provided by a very large sloping skylight. The inclined roof and skylight give the room an exceptionally high ceiling, which helps to diffuse the fumes from the batteries. The floor of the battery room slopes from all directions to a center drain in the floor. There is a spigot and garden hose provided to wash down the floor at intervals. The clean appearance of the battery room, the bright light from the overhead windows, and the fresh air, so different from the usual stuffy, acid atmosphere of battery rooms, are features of this unusual battery room. There can be no doubt that operators do more and better work in such a room than in so many others frequently seen. The equipment in the battery room consists of a current rectifier, plate press, one work bench, two charging racks, and a large stock and storage rack. Just outside the battery room there is a Vim magnet recharger, mounted on the wall.

The large storage space in the addition, 100 ft. x 100 ft., is used for stock of tractors, implements, and new cars. It is also used for quick repair jobs. This section has a separate entrance and exit and cars coming in for the little jobs are run to one side of the passageway and the repairs made without taking the car into the shop.

Breaking Tractor Sales Records

When Fordson tractors were sold by Henry Ford & Son on separate contracts Messrs. Gash, Stull & Co. were appointed Philadelphia distributors. The first tractor agent they appointed was W. A. Jones, of Mount Holly, and throughout the time that they held the distributor's contract Mr. Jones was their leading dealer in point of sales.

"There was no such thing as a tractor prospect then," said Mr. Jones. "We did

FORD SECTION

not try to sell tractors to the farmers. We went to them with a proposition to help them make money. The word tractor does not mean anything; call this a flying machine, or a wheelbarrow, or anything you want. We are selling you a way to make more money." That sort of argument and demonstration used in starting the tractor business had the above stated result.

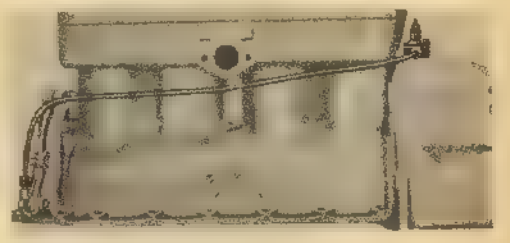
When the last reduction was made in the price of Fordson tractors telegrams were sent to all dealers giving them the new figure. Many dealers with a stock of tractors bewailed their sad fate and figured their loss on the tractors on hand.

We quote Mr. Jones that: "Before I put the telegram down on the desk I ordered three car loads of tractors by telegram. I realized the loss on the tractors I had but also how much the reduction would help sales." The three carloads came in, also plows, disk harrows and other implements to go with them. **And the tractors were sold.**

A stock of tractor parts of about $2500 is carried in the stock room. A copy of the order for these parts was used very effectively in convincing farmers that there was some service to back up their tractors. It was something definite to look at and count on. Sales resistance was easily overcome.

At the time a farmer orders a tractor he is interested, if possible, in a plow and harrow and any other tractor implements which he may need to make the best use of the tractor. He is also told of the importance of using the right kind and quality of oil. In most cases a drum of oil and a 5-gal. can of transmission oil are sold with the tractor. While I was in the building a tractor was loaded on a truck for delivery. In a few minutes another truck was loaded with a plow and a disk harrow, a drum of oil and a can of transmission oil. The entire outfit went to one farmer who had come in and ordered it that day.

The foresight of Mr. Jones in ordering tractors and implements in advance resulted in several sales which otherwise might have been lost. He had tractors and implements right in stock when the farmers decided to buy; he promised and gave immediate delivery when such haste was necessary. Other nearby dealers were caught "out" of various implements and tried to borrow them from Mr. Jones, but even he had few or none to spare. According to all indications at the time he was "taking a chance" in ordering the three carloads of tractors and the implements to go with them. But he was right, as later events amply demonstrated.

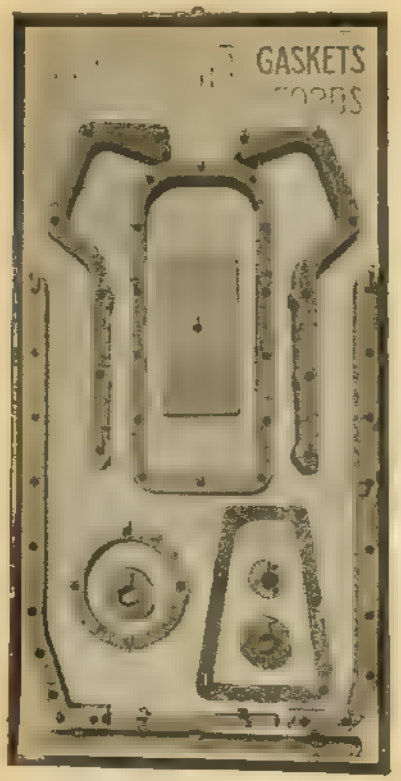


Yale Oiling System and Low Oil Indicator

The Yale Corporation, Los Angeles, California

is marketing these three devices for Ford passenger cars and trucks, viz. The Yale Force Feed Oiler the Yale Transmission Band Oiler, and the Yale Low Oil Indicator The Force Feed Oiler consists of an accumulator mounted between the magneto post and the transmission case, the lower portion of which is in the form of a spoon or lip, directly in the path of the oil thrown up by the magneto. A certain pressure is generated by the force with which the oil is thrown against this lip, from where it is forced to the front of the engine through a copper tube. At this end a hollow cap screw replaces the short cap screw and through it the oil flows into the timing gear casing, thence into the crank case, where it is available for the splash of the connecting rods. To install it requires no skill, as no drilling is necessary nor are any special tools required. The Transmission or Band Oiler is a metal pan which is inserted under the cover of the transmission case and is held in place by four of the screws now used The bottom of the pan has a lip projecting into the path of oil thrown up by the fly wheel and magneto but not far enough to interfere with the accumulator of the other unit and, because its bottom is perforated, oil is poured in a constant stream on all the bands and clutch throwout bearing. This unit is claimed to preserve the life of the bands, remove the cause of chatter and 'grabbing' and prevent the necessity of frequent adjustment The Low Oil Indicator consists of a simple float chamber which replaces the lower petcock The petcock is screwed into the bottom of the float chamber where it is used as a drain. At the top end of the rod, fastened to the float, is a metal cone which, as it is lowered with the float to the predetermined safe limit or danger level, makes a contact with two metal contacts or points. Mounted on the dashboard is a handsome nickel plated instrument, harmonizing with the usual dashboard equipment, in which is a standard light bulb. From the instrument run two wires, one of which connects to the insulated joint on the float chamber the other wire runs to the ammeter or magneto post. As the connection is established by the float rod—by reason of a dangerously low oil level—the lamp in the instrument lights It will continue to burn until the oil supply is replenished.

FORD SECTION



Wisoid Gaskets for Fords

Consolidated Packing & Supply Co.
21 Barclay St., New York City.

The Wisoid Gasket is a tough vegetable fibre which possesses unusual longevity because of its high tensile and shearing strength, and the fact that it is chemically treated to resist deterioration under all liquid conditions. Each set is packed in a box which is an ideal merchandising package, for besides keeping the gaskets dustproof and clean, it insures their proper use, i. e., the avoidance of the use of two or more gaskets of different material on one housing or joint. The above effective sheet steel wall display holder is also supplied as a sales stimulant. Price per box, one complete set $1.25. Packed 50 boxes in a corrugated case. The holder with a total of 325 Wisoid gaskets, 25 each size, including an additional 25 of Nos 2510-B and 3377-B, $32.

The Prehn Cantilever Brace and Center Chassis Cross Member

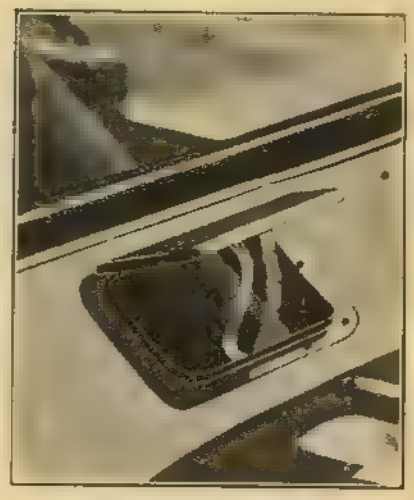
Newark Auto Parts Mfg. Co.
722 Hunterdon St., Newark N. J.

Used as a center cross member this device stiffens and strengthens the chassis, and stops vibration, with its consequential loosening of rivets, crankcase arms, etc. It also keeps the running boards and fenders from sagging, squeaking or breaking. The extreme end of the brace has an upward action, giving a cantilever movement. It is made of 1¼ x 2-in. double channel steel and heavy steel hangers. May be installed quickly, there being no need to drill holes. Also made for sedan and one ton truck. Price $5.

Maxo Re-Gasifier

Maxo Products Co.
82 Wall St.
New York City

Simplicity of design and operation is the keynote of the Maxo Re-Gasifier. As the gas is drawn into the intake manifold from the carburetor it is forced to pass through the device. As disclosed in the accompanying illustration, the teeth are slightly curved from the base to the point and are conformed inward. The incoming gas has a tendency to follow the conformation of the teeth. Thus, any gas that is laden with non-volatile matter or that has a tendency to recondense on the side walls of the intake manifold, is again broken up into infinitesimal particles which enter the combustion chamber of the cylinder in this more volatile state. This device is applied without alteration to the engine or carburetor, by simply lowering the carburetor, inserting the device in the end of the intake manifold, putting the gasket in place and re-attaching the carburetor. A new gasket is supplied with each Maxo Re-Gasifier to insure an airtight connection.



The M & P Vent a Ford

Messenger & Parks Mfg. Co., Aurora, Ill.

Easy installation and operation and freedom from rattle are the features of this device. The base and flange is stamped from one piece and is provided with a gasket where it attaches to the car to prevent leakage over the spark coils. The cover is also stamped with rounded corners, and is hinged to the base. The ratchet of nickel plated strip steel is attached to the cover with two bolts. This ratchet contacts with a brass spring riveted to the base thereby keeping it always taut and preventing rattle. All bolts are Parkerized to prevent rust. A pattern for cutting the hole and full instructions for installing accompanies each Vent a Ford. The finish is baked on enamel. It can be installed on all models and types of Ford cars.

FORD SECTION

Lowell Make and Break Timer with Self-Cleaning Contacts

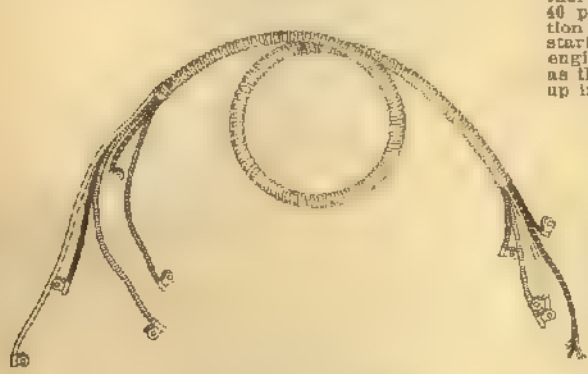
Lowell Equipment Mfg. Co., Lowell, Mass.

This Make and Break Timer is a recent addition to the line of Lowell Tire Repair Equipment. It is so designed that the contact points are automatically rubbed clean each time before the contact is broken, making possible its operation either dry or in oil and dirt, yet with high motor efficiency even under such adverse conditions, according to the manufacturer. A die cast timing case of conventional form is utilized, with the exception that the contact plates of special shape are independently insulated, the space between being left open. A pin fitted in a disk driven by the timing shaft carries a rocking lever. A contact pin works in the leading arm of the lever and an insulated cam wiper is fitted in the following arm of the lever. Contact is broken when the contact pin is snapped away from the contact plate at the moment the cam wiper is forced off its contact plate by a spring. The illustration shows the cam wiper about to slip off the contact plate, the direction of movement being indicated by the white arrow. The self-cleaning of the contact points takes place immediately preceding the breaking of the contact and is accomplished when the contact pin, then rubbing against the contact plate, is carried around by the lever. List price, $3.95.

The Butler Vaporizer for Fords

Butler Vaporizer Corporation
7 East 42nd St., New York City

To convert low test gasoline into a highly volatile dry gas is the function of the Butler Vaporizer recently placed on the market. This superheating device, which is installed between the carburetor and the intake manifold, consists of seven copper tubes, through which the fuel mixture passes, enclosed in a cast iron heating jacket. The hot gases from the exhaust pipe are bypassed around these tubes, and led out by another pipe terminating beneath the motor pan. The seven small tubes bring all the liquid fuel into contact with heated surfaces, flashing all the mixture into a dry, highly volatile gas. It is also stated to eliminate carbon deposits and crankcase oil dilution, and to reduce fuel consumption 20 to 40 per cent. In addition it facilitates starting with a cold engine in cold weather, as the Vaporizer heats up in 30 sec.



Armored Ford Harness

Forney-Smith & Co
Hamilton St. & N. J. R. R. Ave., Newark, N. J.

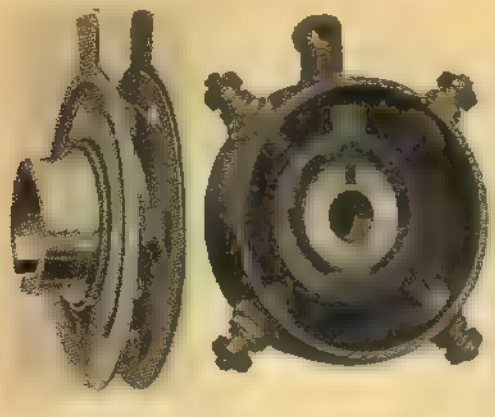
Armored Ford wiring harnesses are made in both five and six wire sets exclusively for Fords. They are 1-64th rubber covered, have colored cover (same colors as the regular Ford set), and are encased in a light, flexible tubing which protects them from the dust and dirt, oil, etc., and prevents short-circuits.

Acme Oil Gage

Acme Belting Co
107 W. Canton St.
Boston, Mass.

Outlined in the accompanying view are the salient construction details of the Acme Oil Gage. It is made of brass and copper, and it extends up along the side of the engine where it may be conveniently read by simply opening the hood. Price, $3.85.

FORD SECTION



The Tisch Rotary Double Wipe-Contact Timer for Fords and Fordsons

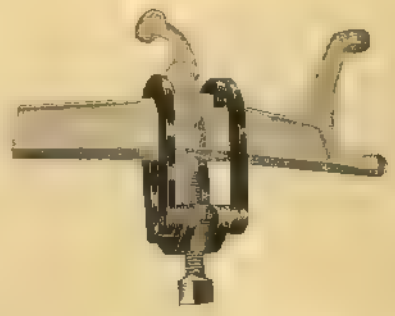
Tisch Auto Supply Co.
215 Division Ave., S.
Grand Rapids, Mich.

In principle, the Tisch timer is simply a double blade wiping switch caused to revolve and contact, one at a time, with four contact posts. This double blade switch passes on opposite sides of each contact post, making a doubly certain positive contact and an equally positive break and wiping the posts clean, the latter assuring a path for the electrical current. While the twin contacts are between the posts they are traveling through air, where, it is stated, the current cannot be short circuited. The green shell of tough drawn steel is accurately machined, and the contact posts of cold rolled steel are hardened so as to be impervious to wear. The blade spacers and blades of the rotating wiping switch are made of a fine grade of high carbon spring steel, tempered to assure long life, efficient service. These with the Tisch hub, comprise the parts of this easy-to-install timer, which does not require lubrication. Price, $2.

Grant Extension Pedal Pads

Grant Auto Appliance Co
315 South Clinton St., Chicago, Ill.

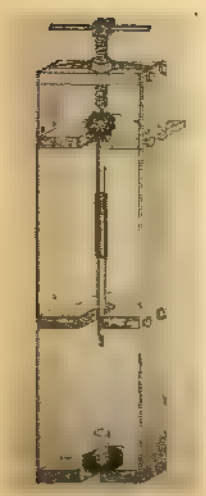
Grant Extension Pedal Pads widen the Ford pedal and provide a rubber pad in one unit. Heavy gage steel with a black baked enamel finish is combined with white gum rubber in its manufacture. When clamped on over the small Ford pedal they give the driver a wide, comfortable and more secure foothold. Price $1 per set, which includes two extension pedals and one small pad for reverse.



Two New Apco Tools for Ford Service Work; a Rear Wheel Puller and Front Perch Pusher

Apco Mfg. Co., Providence, R. I.

is offering these two tools to enable the repairman to execute with facility and alacrity the work of pulling Ford wheels and driving out the front perch. Instead of screwing on the hub the Apco wheel puller hooks over the spokes, an arrangement which is intended to save time not only in pulling the wheel but also in attaching the tool to do it. It is well made of high grade materials to withstand hard service. Dealers' price, $3.75. The Front Perch Pusher is also a time and patience saving device, as the accompanying illustration bespeaks. High grade materials and workmanship are also used in its manufacture. Dealers' price, $3 75.



Duble-Duty Axle Gear and Drive Shaft Sleeve Press

Benner Mfg. Co.
Webb City, Mo

A tool designed to minimize the effort and time required in removing the axle shaft gears on the Ford, Chevrolet 490, Maxwell or any other light or heavy car that requires the axle gears to be pressed off and on is shown herewith. It can also be used for cam shaft, transmission or differential gears of all kinds. Ford drive shaft sleeves, universal joints and shaft couplings of all types. It is capable of exerting 20 to 25 tons pressure, and will handle shafts up to 60 in. long. May be bolted to a bench or any support. List price, $18. Shipping weight about 80 lb.

FORD SECTION

Venath Grease Retainer for Ford Rear Axles

Venath Manufacturing Co
500 Woodbridge St., East, Detroit, Mich.

The Venath Grease Retainer for Ford rear axles is installed at the end of the axle housing, the steel cap replacing the present Ford bearing cap, thereby requiring no alterations or the removal of wheel bearings. By stopping the oil or grease at the end of the axle housing instead of back of the bearing the oil from the differential housing can lubricate the wheel bearing. A particular feature of this retainer is that the packing is placed between the flat recessed face of the steel cap (which remains stationary with the axle housing) and the flat face of the cork washer that is secured to the shaft and rotates with it. The cork washer is made to rotate with the shaft by being inserted into a spring cup which has a lug or key projecting out into the keyway of the wheel hub. The spring cup not only holds the cork packing washer so that it rotates with the shaft but also presses its packing face against the recessed face of the steel cap, due to the three small springs becoming compressed when the wheel is drawn on to place. These springs, being compressed 3-16 in., automatically take care of any end play in the shaft, also take up wear that may occur at the packing faces. The manufacturer states that by this method the packing washer floats with the shaft and thereby enables it to retain the grease in any Ford axle, regardless of how badly the axle shaft is running out of true due to the shaft or bearings being worn. No special tools or experience are required to install it.

Hardin Self-Adjusting Brake for Ford and Chevrolet

Hardin Brake Co.
Portland, Ore.

A positive vise-like gripping action on the entire circumference of the drum and a self-adjusting feature, which entirely eliminates the use of springs are the points upon which the manufacturer lays particular stress in outlining the construction details of this brake. The drop forgings used in its manufacture are of a high grade, while the lining is the Thermoid wire-inserted brand. A time-saving factor is that it can be relined without removing the wheel or dismantling any part of the car. It is also made for the Ford one-ton truck. Price, $16.50.

The Kelm Twin Tire Carrier for Ford Ton Truck

Kelm & Burbach Milwaukee, Wis.

This carrier provides in one unit, a safe carrying receptacle for two extra tires, and a removable tool box, all safely locked against theft by means of a heavy steel bar. The framework of the carrier is made from ⅞ x ⅛ in. fabricated rolled steel, and component parts riveted together with ¼ in. rivets and finished in black enamel to match the standard Ford finish, or if desired it can be furnished in special finishes at a small additional charge. Ten features emphasized by the manufacturer: Fastens to the left running board and is braced against the truck frame; carries one 32 x 4½ and one 30 x 3½ tire, fits any Ford truck chassis, either cab or roadster body; has an all-metal tool box with double cover; one bar locks both tires and tool box, tool box removable for taking out tires; tool box is in handy place, can be opened without removing tires, and can be lifted out and carried where tools are wanted; thumb screw adjustment prevents tires from rubbing and rattling; guaranteed for five years against defective parts. Price complete with padlock, $15 00 f o b. Milwaukee

Common Sense Radius Rod

The Silver Mfg. Co., Salem, Ohio

This new rod adds strength, safety and driving comfort to the Ford. It is fastened securely to the frame on each side of the car and anchored firmly to the front axle above and below. The strong construction takes all strain off the crankcase. Through the adjustment feature perfect alignment of front wheels is said to be always assured. The proper rigidity to withstand severe thrusts, and at the same time give flexibility and resilience, is attained by strong springs held in place by adjustable nuts. Retail price, $10 00 per set, f.o b. Salem.

FORD SECTION

Aluminum Tread Plate and Extension Throttle Finger Control Lever

National Aluminum Co.
Racine, Wis.

is offering these two products for the Ford. The tread plate, No. R 2, combines good appearance with serviceability. It has a foot scraper and three slotted openings which extend over the edge of the running board the full length of the plate. In addition the ribbed cross grading removes dirt and mud from the shoes. Size 8 x 9¼ in. List price, each, $2. The No. P 3 flat tread plate (not illustrated) is adapted to either the running board or floor board. When used on the floor it prevents wear, and it may also be utilized as a patch where the floor covering is already worn. Size, 7¼ x 10¾ in. List price, each, $1.50. The Extension Throttle Finger Control Lever is slipped over the regular gas or spark lever and then securely fastened by giving the lips a squeeze with a pair of pliers. It provides better and more convenient control of these levers, as the driver does not have to remove his hand from the wheel to operate it. Made of aluminum, highly polished. List price, $0.25 each.

E-Z Door Latch Operator

E-Z Door Latch Operator Co., Kipton, Ohio

The E-Z Door Latch Operator increases the leverage of the Ford door latch, making it easier to operate. It is an attractive, solid brass, highly nickeled handle that fits outside the door, permitting the door to be opened conveniently from the outside. Its particular features are its ease of installation and freedom from rattle. Made in two styles: Style A for 1916-20 models inclusive; style B for 1921-22 models. Price, each, $1.

Steering Column Support for Ford Cars

Holtum Mfg. Co.
Freeport, Ill.

By eliminating vibration from the steering column this support gives the driver better control of the car. Each steering column support comes complete with bolts ready to attach, and can be put on a car in 15 minutes.

"Ford-Type" Battery Charging Panel

Ward Leonard Electric Co.
Mount Vernon, N. Y.

This panel will control from one to fifteen batteries (three-cell lead type) from a 120-volt d. c. line at any charging rate from two to ten amperes. It is provided with a line switch, ammeter and overload and reverse current circuit breaker. The rheostat on the back of the panel has a hand wheel adjustment and a control lever which may be positioned so as to allow more than ten amperes to pass. To prevent possible injury to the batteries and rheostat from this increased amperage, it is equipped with an overload circuit breaker with a single setting of eleven amperes, which is so designed as a protective device that it is impossible for it to be held closed while the overload exists. This overload arm has no handle. A reverse current cutout with operating handle is provided to open the battery circuit, if so desired, when line voltage reduces below the battery voltage.

Easy Profits

Every Ford Truck Owner a Prospect

Install RYD-E-Z Springs on your customers' one-ton Ford trucks—for easy profits.

Identical in strength and cushioning qualities with the platform springs used on costly motor cars, RYD-E-Z Springs take the bounce and rattle out of the Ford truck.

Their three, long, durable springs impart a flexibility that minimizes vibration and add years to the life of the truck.

Guaranteed to increase tire mileage; reduce all repairs; carry all farm products and fragile merchandise *without damage;* give driver greater comfort; improve appearance of truck; save your customer money.

Sold on a money-back basis. Unless your customer is satisfied with the performance of these money-saving springs, he gets his money back.

GARAGEMEN, REPAIRMEN, DEALERS: Write for complete details of this big profit-earning opportunity.

A NEW *Stewart* BUMPER
FOR FORDS

Double Rails—
Improved All-Steel
Installation

Model 198 $12.00

THE double rails of the model 198, extending the full width of the car, guarantee a driver 100% protection. A bumper on another car cannot slip above or beneath to damage fenders, headlights, etc. the double rails prevent that.

The all-steel installation is a feature of this model an improved attachment that guarantees a firm, rattle-proof anchorage to the car frame. Easily installed.

The slot in the bracket allows for the installation of Gabriel Snubbers.

The price is attractive. With black enameled guard rails, $12.00. With nickel-plated guard rails, $17.00.

The Car Buyer Wants Hasslers

IF the Ford dealer does not sell Hasslers, he finds that many of his customers go somewhere else to get them.

Someone else makes their acquaintance, begins to sell them tires, accessories, and possibly gets their service work.

Car owners like Hasslers. Have you ever heard of a single dissatisfied Hassler user? Hassler users are with Hasslers from start to finish.

The dealer who sells Hasslers makes an excellent profit on them—often enough to pay the rent or the overhead. He pleases his customers, and actually increases the market and appeal for the Ford car in his locality. He never has any comebacks or trouble from his Hassler sales, and he finds the Hassler factory always standing behind him.

No single-acting device whether it absorbs shocks or checks rebound—can ever take the place of Hasslers with their famous double action.

Don't fail to get the Hassler profits that are legitimately yours!

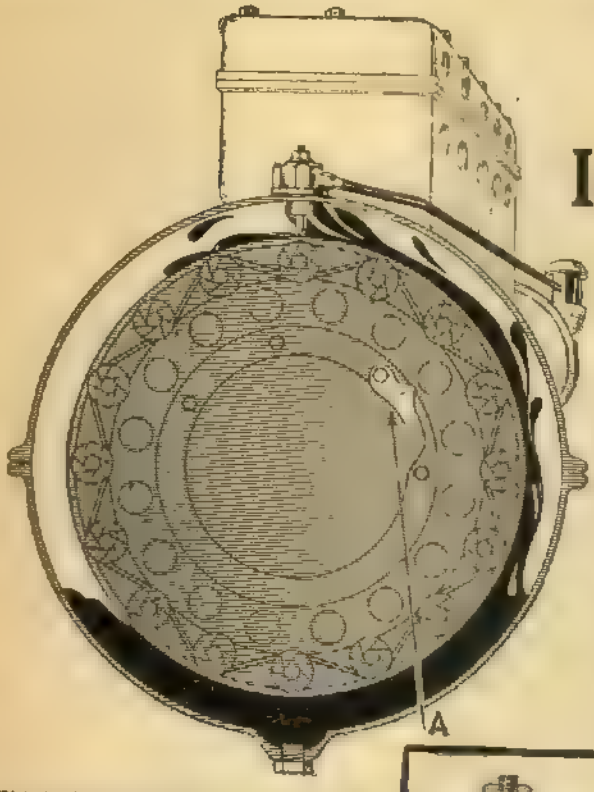
At $2.50 You Can Sell This Wonderful Oiling Improvement to Every Ford Owner!



Because it forces adequate oil to all parts of the motor.

Because it does this regardless of grade and engine speeds.

Because it operates automatically—the faster the engine goes—the faster the oil flows.

Because no alterations are necessary to install it and it can be put on by anyone in ten minutes.

Because the oil flow can be watched more closely and the pipe can be removed and cleaned in a few minutes.

Because it means a better-running Ford and absolutely removes the danger of burnt-out bearings.

This is the way it works. Instead of depending on the fall back of the oil into the regular Ford funnel (see "A" above), which delivers too little at high speeds and on the hills—the Toquet takes the oil direct from the revolving flywheel with the full centrifugal force behind it and the flow varies directly with the flywheel speed and is unaffected by the grade. In operation the oil is shunted through our special magneto plug (replacing old one) and flows through the brass tube into the Breather Pipe for which an extension is provided.

It then flows down over the timing mechanism and back through the crankcase.

You can sell it because every Ford owner will see its value. The price $2.50 allows a mighty liberal discount, too. Write for details today.

Easy Sales for You

Here's an opportunity for you to make easy sales of the Colonial 4-Door Sedan Body for the Ford Chassis—*even if you have never sold bodies before.*

And here's why: With the cool Fall season not far away, many Ford owners would like to change their touring model for an all-season Sedan. A trade-in for a Ford Sedan would cost them $500.

For only $300, plus war tax, installation and transportation, you can offer them the Colonial. A finer Sedan Body than they ever thought could be had for so little money.

Glance at the illustration. Note that the Colonial has *four doors.* The coach work is identical in beauty and workmanship with that of the costliest cars. Upholstery is attractive and long-wearing. Driver's seat is adjustable. There are many other exclusive features—in fact, *twenty.*

Here's a proposition on which you can make unusually good profits—with little sales effort.

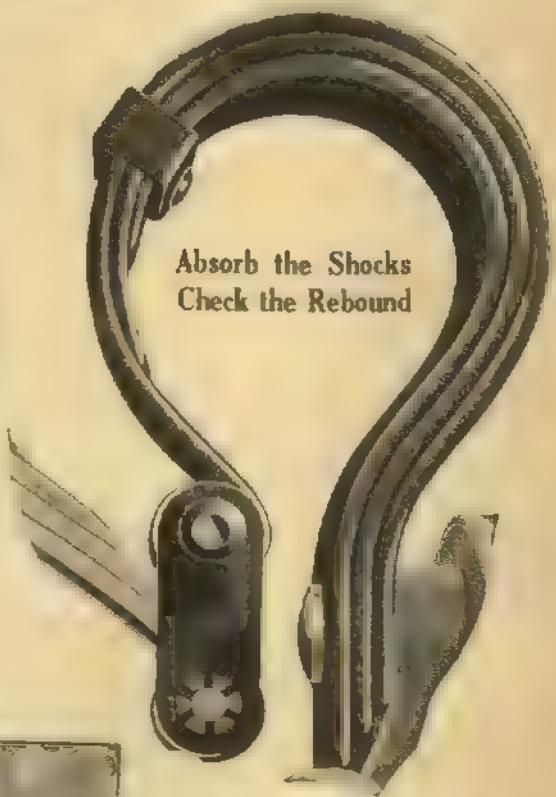
Only $10 Complete Set of 4

A Better Absorber at a Price Ford Owners Want to Pay

West of the Rockies, $12
In Canada and Mexico, $15

FORD owners like the looks of Grey Goose Absorbers. They like the simple, leaf spring construction. It appeals to their common sense. The low price of only $10 for complete set of four appeals to their pocketbooks. Grey Goose Absorbers are made of chrome vanadium leaf spring steel. They never lose their springiness. They absorb the roughest road jolts easily. The overhanging goose-neck shape checks all rebounds instantly. They give the car the riding effect of a much longer wheelbase. They are quickly and easily put on any Ford. They add no dead weight. Every ounce works. They relieve the tension on the springs. They improve the riding comfort of the car immeasurably. They save both car and tires. Every set sold sells another set.



Dealers find exceptional profit in putting just a little special effort behind this popular low-price seller. If you have a market for any absorber, get the liberal Grey Goose proposition at once.

Transmission Cover With One-Piece Steel K-C Oiler in Place.

**No Adjustments
No Rivets
Nothing to Come Loose.**

A Steady Stream of Oil

Keeps Transmission Bands Properly Lubricated

The transmission bands in your customers' Fords often do not wear out. *They burn out*—because they are not properly oiled.

That's why you can do Ford owners no greater favor than to install the K-C Oiler on their cars.

Look at the picture at the top of the page. Note how the K-C Oiler, ceaselessly picking up oil from the flywheel, delivers it in continuous streams to the transmission bands and steel drums.

This constant lubrication prevents the bands from getting hard glazed and slick; keeps them soft, pliable, oil-soaked, makes them wear more than twice as long *and eliminates chatter.*

The K-C Oiler sells for only $1.00—$1.50 installed.

Your State distributor can supply you—otherwise write direct to us.

New Coupes in Oakland and Chevrolet Lines

Left: Chevrolet "Superior" Coupe

This new four-seater of the Chevrolet line has fixed seats for three and a folding seat for the fourth passenger. There is a luggage compartment in the rear. The price is $850.

Right: New Oakland Coupe Which Sells at $1285. It is Built on the Standard Oakland Chassis and Seats Two

Oakland Announces Low Priced Closed Car

A new model mounted on the Oakland six-cylinder chassis and known as the two-passenger coupe has been added to the line of the Oakland Motor Car Co., Pontiac, Mich. This car is of standard closed car construction and sells for $1285 f.o.b. the factory. The body is an exclusive Oakland design. The upholstery is genuine leather and the car has broad plate glass windows to afford a clear view.

The doors are wide and allow easy entrance and exit. Windows are lever-operated, facilitating their regulation. The driver and passenger sit side by side and there is a large compartment under the rear deck for heavy luggage, also a covered compartment back of the driver's seat for smaller parcels. The lower portion of the windshield is built stationary to make it absolutely weather proof. The upper half is adjustable.

The instrument board is walnut with silver trim instruments, the steering wheel is corrugated walnut, and the steering column is nickel plated. Standard equipment includes snubbers, windshield visor, windshield wiper, rear view mirror and non-skid cord tires.

Chevrolet Adds Four-Passenger Coupe

The new "Superior" Chevrolet four-passenger coupe has a Fisher-built body of the same high quality and with the same refinements as the "Superior" sedan. It is mounted on the new Chevrolet improved chassis which was described in the November, 1921, issue, page 58. The sedan on this 4-90 chassis was described in the January, 1922, issue, page 36.

This new model has attractive lines and is well finished with high grade upholstery and appointments which add to the attractiveness and comfort. The plate glass windows can be adjusted to any height and the windshield is a two-piece adjustable type. There is an auxiliary seat for the fourth passenger, and luggage compartment in rear.

This coupe sells at $850. The features of the equipment are the straight side cord tires mounted on split rims, the metal visor with rim gutter, and the polished nickel hardware. Refinements include top material in one piece with drip moulding, deep upholstery, window regulators and carpeted floors. Specifications of this car can be found in the Passenger Car Specification Tables published in every issue.

The Dodge Business Coupe

DODGE BROTHERS, of Detroit, has announced a new body type in the form of a closed car for business men. This coupe is stated to be the first of steel closed cars. This construction has eliminated the problems of limited production due to the tedious and costly individual workmanship necessary on many wood bodies. Even the frame work is of steel, which the maker states results in a lighter, quieter and more durable car. The possibility of squeaks and rattles is also reduced.

This coupe is upholstered in genuine leather and has a wide, comfortable straight seat. Included in the equipment are cord tires, heater, dome light in the center of the top, windshield cleaner and adjustments for raising and lowering the windows. The doors are equipped with easy closing Yale locks. The body is roomy and there are compartments for luggage.

All-Steel Body on New Dodge Coupe

This illustration shows the new Dodge Coupe which features an all-steel body, eliminating the large amount of individual workmanship necessary on wood bodies, thereby allowing quantity production.

Improvements in Stanley Steamers

A SERIES of improvements has been made in Stanley steam cars produced by the Stanley Motor Carriage Co., of Newton, Mass. These improvements are not so radical as to require changes in design but they are believed to be justified because of their fundamental value. The improved Stanley car will be known as model 740.

The principal improvements of model 740 comprise a lower mounting of the entire car a larger boiler, a larger condenser, better brakes, improved lubrication, a larger fuel pressure tank and an improved and stronger axle. There are other minor improvements.

The improvements in the body comprise more graceful lines, a lower top, which is lined, and has a permanent firm member from the windshield to the rear bow, and an improved instrument board with more compact location of instruments. Barrel head lamps are now used and are more rigidly

New Stanley Brougham

The outstanding features of the new 740 models are the lower-built chassis and body, the larger boiler and condenser, improved brakes and rear axle, improved lubrication, and the larger fuel tank.

The FOX Car

heralds the new era in motordom

Who will be the first to profit by it ?

After years of experimental and development work, costing nearly half a million dollars, the FOX Air-Cooled Car is now in production. This means a tremendous change in the automobile business.

It means that, for the first time in the history of the automobile, an AIR-cooled car exists on absolute equality with the best water-cooled cars, in ability, appearance and other essentials.

That assertion is broad and unequivocal; it is meant to be sweeping. For the FOX Car will prove to anybody that it equals—if not excels—the finest water-cooled automobile known. Equals it in power, in flexibility, in control, and in all that goes to make Performance.

Equals it, fully, in grace of lines, beauty, finish and all that makes Appearance.

First the dealer, and presently the whole of motordom, will have this proved about the FOX Car. The demonstration is ready for the trade now.

When you have seen the FOX, then proved the FOX, it will be well to consider carefully what the FOX must mean to motordom in general, and to you as a dealer in automobiles. *It means a revolution in buying preferences.*

What sane-minded man, with even rudimentary mechanical sense, would buy a water-cooled car when he can get an AIR-cooled car that is powerful, beautiful, and free from all water-system troubles.

During the first year, in view of the advance orders taken for the FOX before it appears on the open market, only a few dealers can be included in the FOX connection. But those few will surely profit!

The widespread and eager interest in the FOX, attested by a flood of inquiries from motorists all over the United States, assures immediate sale of every car it will be possible to put on the showroom floors.

That, too, we can demonstrate to anyone entitled to it.

So the thing for you to consider is this:

If you are in one of the sections still open for the right kind of dealers, and if you have the vision, the experience and the ability the FOX Car deserves in its selling connection, wisdom suggests your discussing arrangements with us immediately.

FOX MOTOR CAR COMPANY
OF PHILADELPHIA

ANSLEY H. FOX, President

I want to personally state for the benefit of those who know of the world-wide reputation I earned as a maker of guns of absolute precision and unvarying quality, that the FOX Car is built to the same standards of business honor and excellent quality as was the famous FOX Gun.

Ansley H. Fox

New Cars and Models

Touring Sedans Added to 1923 Buick Models

FOR 1923 the Buick line will comprise fourteen models, including new touring sedans for the four- and six-cylinder chassis. This announcement received from the Buick Motor Co, of Flint, Mich., tells also of body and mechanical changes. The new features of the Buick line should really be classed as refinements, since changes have not been radical but have been made to add to the riding comfort and improve the appearance and operation. The spring suspension is one of the most noticeable features to show improvements. The rear spring hanger positions have been altered, which is stated to do away with the rebound and sidesway and make the use of rear snubbers unnecessary. The main leaf in the front spring is of vanadium steel

The six-cylinder line will comprise a five- and seven-passenger touring car, a two passenger roadster, a three-passenger sport roadster, a four-passenger touring, a four-passenger coupe, the improved five-passenger sedan, the seven-passenger sedan, and the new five-passenger touring sedan. The four-cylinder line comprises five models; a two passenger roadster, a five passenger touring car, a three-passenger coupe, a five-passenger sedan, and the new five-passenger touring sedan.

The new six-cylinder closed models have a lower body suspension and a new top designed to eliminate noise. The bodies of the cars are one-piece panels. The window frames have a rounded edge and the windows have anti-rattler catches. The closed models are also equipped with a clock and a metal covered sun shade, together with a rear vision mirror and a cowl ventilator operated from the dash. The seats are lower The six-cylinder touring sedan standard equipment includes a rigid trunk rack and trunk, with guard rails on the rear of the body. The hood line has been raised and crowned fenders are used together with drum headlights and drum parking lights on the cowl. The top is lower.

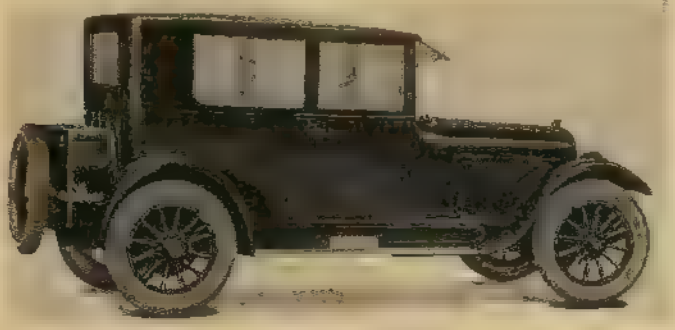
Other refinements in these new models include a longer gearshift lever, a windshield wiper, a transmission lock which will reduce theft insurance rate 20 per cent, and changes which give this new car a Class A rating by the National Underwriters' Association.

The Seven Passenger, Six-Cylinder Buick Touring Model 23-6-49

The Four-Cylinder Buick Touring Sedan

Briefly, the mechanical changes include a higher cylinder block of semi-steel, chilled when cast, and a new method of boring the cylinders. Longer connecting rods, longer pistons and a new and larger crankshaft are used together with connecting rod and main bearings of hard babbitt.

NEW CARS AND MODELS



Touring Sedan Model of Six-Cylinder Line

Another improvement is the installation of oil pressure feed to the main bearings and a new method of covered troughs to insure the proper lubrication of pistons and cylinders The fan bracket bearing and pulley drive are improved, as are the water pump shaft and pump packing. Improvements in the construction of the bodies are found in the front of the heavy pillar brace irons and cross bars and a new method of attaching body brackets with bolts. The frame is stronger and heavier and there is also a new steering gear housing, improved steering knuckles, new steering arm bushings and larger strut and truss rods.

The six-cylinder chassis comes in wheelbase lengths of 118 and 124 in. On the 118 in. wheelbase chassis are mounted the five-passenger touring sedan, the three-passenger roadster, the five passenger touring, and the five passenger sedan. On the 124 in. chassis are mounted the other five models including the two sport models.

Additional improvements common to all six-cylinder models are the 3 in. lower construction, the use of 14 in. brakes, heavy one-piece crowned fenders, and an extra grade of carpet.

Many of the improvements mentioned herewith are also found in the four-cylinder model. The model 34 roadster has a larger body and the frame for the four-cylinder models is of the kick-up type, giving a lower appearance to the car. The closed models in the four-cylinder line have practically the same improvements as the six-cylinder models and are finished with the latest fixtures and upholstery.

The four-cylinder touring car is 5 in. lower than the old model. The radiator is higher, hood line higher and the cowl longer.

The touring sedan is neatly arranged, the lower part of the body is maroon with a black top. Wheels are maroon, several shades lighter than the body. The sedan is Japanese blue, the body is longer and the roof is lower, as are also the seats.

The Chandler Royal Despatch

This illustration is of the Royal Despatch, quite similar to the Despatch model, but equipped with wire wheels and trunk rack. The price f.o.b. the Chandler Motor Car Company factory at Cleveland is $1795. The wire wheel equipment includes six wheels with four cord tires, the extras being mounted at either side. Spare tires with covers are extra. The lines are low and sweeping and the individual fenders and aluminum steps with the wire wheels mounted at the sides give this model the appearance of a custom-built car.

The finish is gray or maroon. The nickeled radiator shell, barrel-type head lights, the parking lamps, and the beveled windshield wings add to the attractive lines. The rear of the body is fitted with aluminum bars to protect it when a trunk is mounted in place. This new body is mounted on the Chandler improved chassis described in the February issue, page 35.

The Chandler Royal Despatch

Built to Serve— Priced to Sell

AT last!—the kind of a horn you have always wanted. A horn with all the high-priced characteristics, yet priced to meet the buying power of *every* car owner. Just show it—name the price—and the sale is made.

The **Basco** is a powerful electrical, motor-driven horn that *gets action* at every touch of the button. Its commanding r-r-r-x-x! never fails to clear the way, even in densest traffic.

Basco mechanism is simple, compact, sturdy. Needs no oil, no lubrication whatever—no attention. Tone adjustable at the turn of a screw. Can be installed on motor or dash. A sturdy, long-lived, trouble-free horn that gives the buyer biggest value for his money.

Have **Basco** Horns ready for immediate sales. Get our proposition and a **Basco** Horn for tryout before you settle on your standard motor horn.

-send for this catalog today

Learn how to make a handsome, sporty roadster or racing car with a Ford or Chevrolet chassis.

The unusually low prices on A B C bodies make the total cost very moderate and the fact that A B C bodies are equal both in construction and appearance to custom-built bodies costing twice as much assures you of an attractive job that will last for years.

Read the following specifications. Note the many unusual features not found on other bodies: Frames made of well seasoned hardwood; joints bolted and screwed; one-piece ash sills full length; body panels, hoods, and radiator shell, 20 gauge, 3 pass automobile stock, which is heavier and of finer finish than generally used by body manufacturers.

The present low prices asked for Ford, Chevrolet and other used chassis, plus the moderate cost of an A B C body, make it possible for you to own a sporty car for very little money.

Write today giving us the name of the dealer through whom you prefer to order, and we will mail the catalog without delay.

Quality Counts

Nothing counts more in starter gears. When a dealer makes an installation of a gear to take the place of the stripped teeth on a cast-iron fly-wheel he knows that his reputation and the cost of the labor is at stake if the gear proves faulty. That is why progressive dealers install Huetter's Gears.

You, yourself, can readily compare the cost of a second installation with the so-called "saving" made by putting in an inferior gear. Quality counts not only in time and money. It shows itself in service, too. Knowing the quality of our product, we *guarantee* the dealer's satisfaction on Huetter's Fly-Wheel Gear Bands.

The EARL Cabriole at $1395

Unites dignity and charm with remarkable economy and comfort in a fine 4-passenger closed car

ALL the beauty, the friendly convenience and practical utility your prospects are looking for in an enclosed motor car, you can show them and sell them now in the new Earl Cabriole.

At $1395, its tangible value is so great that it is bound to outsell every other closed car in its price range. It has been shown only at the factory, but already its success, measured by orders for immediate delivery, has been sensational.

Generous body dimensions, with a very low center of gravity and perfect balance, make for unusual riding qualities in the Earl Cabriole. The distinction of its sweeping lines, the rich harmony of gray Spanish leather within and Earl blue and black without, must be seen to be appreciated.

The Cabriole is the right size —the right price—the right combination of good looks, economy, and ability to go anywhere a motor car can be driven. And it carries the right discount.

A great selling season for closed cars is just opening. And the Cabriole is the most astonishing closed car value ever offered. Write or wire for full information about this sensational new car, our contract terms and the facts about the remarkable Earl line. Some profitable dealer territories are still unassigned.

ONLY those who have *not* looked into the Fry Guarantee Visible Pump cannot understand its many exclusive and patented profit-producing features.

The most casual examination will convince anyone of its unusual business-getting qualities.

The *Fry* Overflow Principle

—is the only way we know of that insures correct and full measure under all circumstances.

Look at the Fry measuring mechanism. You see how simple and positive it is. It overflows at every gallon.

Excessive lift or light fuel have no effect upon the accuracy of this pump.

In operation it is very fast. Just a few seconds are required to fill and discharge the container.

This is the pump that is developing new business and increasing the gasoline sales from old customers at thousands of service stations throughout the country.

Better let us give you more facts.

NEW CARS AND MODELS

New Stearns-Knight Six-Cylinder

A RECENT announcement from the F. B. Stearns Co., of Cleveland, discloses the new Stearns-Knight six-cylinder car equipped with an engine 4⅛ x 5 in., mounted on a chassis of 130 in. wheelbase. List of models include a roadster and four- and five-passenger touring at $2700, a seven-passenger touring at $2850, a coupe at $3750, a coupe brougham at $3750, and a sedan at $3700.

The electrical equipment includes a two-unit, twelve-volt starting and lighting system and the 12-volt battery ignition system. The clutch is a multiple dry disk and the gearset has three speeds forward. The front axle is an "I"-beam section steel forging. Ball thrust bearings are used in the steering knuckles and tapered roller bearings in the hubs. The rear axle has a pressed steel housing with hubs keyed direct to the axle shafts. Wheels are wood, artillery type, with Firestone S. S. rims with 34 x 4½ cord tires. The front springs are semi-elliptic 45 x 2 in., and the rear are cantilever, 50 x 2½ in.

The top is supplied with door-opening curtains and a plate glass window in the rear curtain. The open models have two-piece plate glass ventilating windshields. The coupe brougham and the sedan are equipped with sun shade.

New Six-Cylinder Stearns-Knight Brougham

Jewett Coupe in Production

A NEW closed model, a coupe to accommodate four passengers comfortably, is now in production by Jewett Motors, Inc., of Detroit. It is of standard closed car construction, using all metal panels over a wood frame.

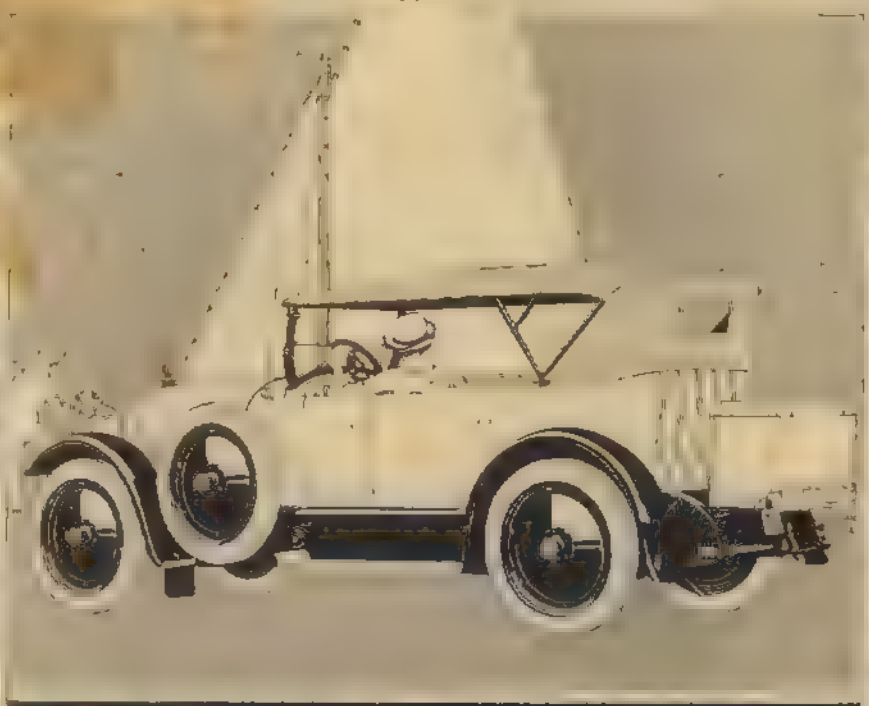
This new model is featured by its spacious body, the length being 77 in. and the width 57 in. An auxiliary seat for the fourth passenger faces forward and is equipped with back and arm rests.

The fittings of this new model are those that are used with a high grade four passenger coupe. The window lifts are operated by levers, the doors have locks, and there is a cowl ventilator, sun visor and a dome light. This body is mounted on the Jewett six cylinder chassis described in the February issue, page 31. The price of this new model is $1395 f.o.b. the Paige-Detroit factory. The roadster of this line was illustrated on page 73 of the July issue.

Jewett Coupe

This is a four passenger job with metal panels over a wood frame. There is an auxiliary seat for a fourth passenger facing forward

BEAUTY · STRENGTH · POWER · COMFORT



THE NEW IMPROVED FOUR PASSENGER HAYNES 75 TOURISTER

For those who desire a car for tour ing which is dependable in power and impressively proportioned, and yet wish the seating to be conversationally convenient, Haynes engineers and designers have evolved the new, improved, four-door, four passenger Haynes 75 Tourister.

The whole car is correctly eloquent of smartness, from its new design, searchlight type head lamps to the serviceable trunk carrier at the rear. The slope of the windshield, the three-quarter length running boards, the spare wheels riding beside the commanding hood, the trim, ebonized handles of the four convenient doors, the stylishly French pleated leather upholstery over deep, resilient cushions, every detail appeals to those who appreciate discriminative completeness.

Like all Haynes 75 models, the Tourister has the pick-up, the get-away, the steady, trustworthy, quiet power, which are the gifts of Haynes manufacturing experience, in the famous, Haynes-built six cylinder 75 motor. No wonder Haynes dealers are having such a great volume of requests for this Tourister. Valuable territories are still open to well qualified dealers. Communications are held in confidence. In writing or wiring, address Dept. 850.

$2395 f. o. b. factory

Wire wheels (two tire wheels are standard equipment on the six cylinder Haynes 75 models. The Haynes Light Six and Sixty-one models are also standard equipment. **Disc wheels are optional at no extra charge.** *All models except the Special are equipped with six wire wheels, prices on which on application.*

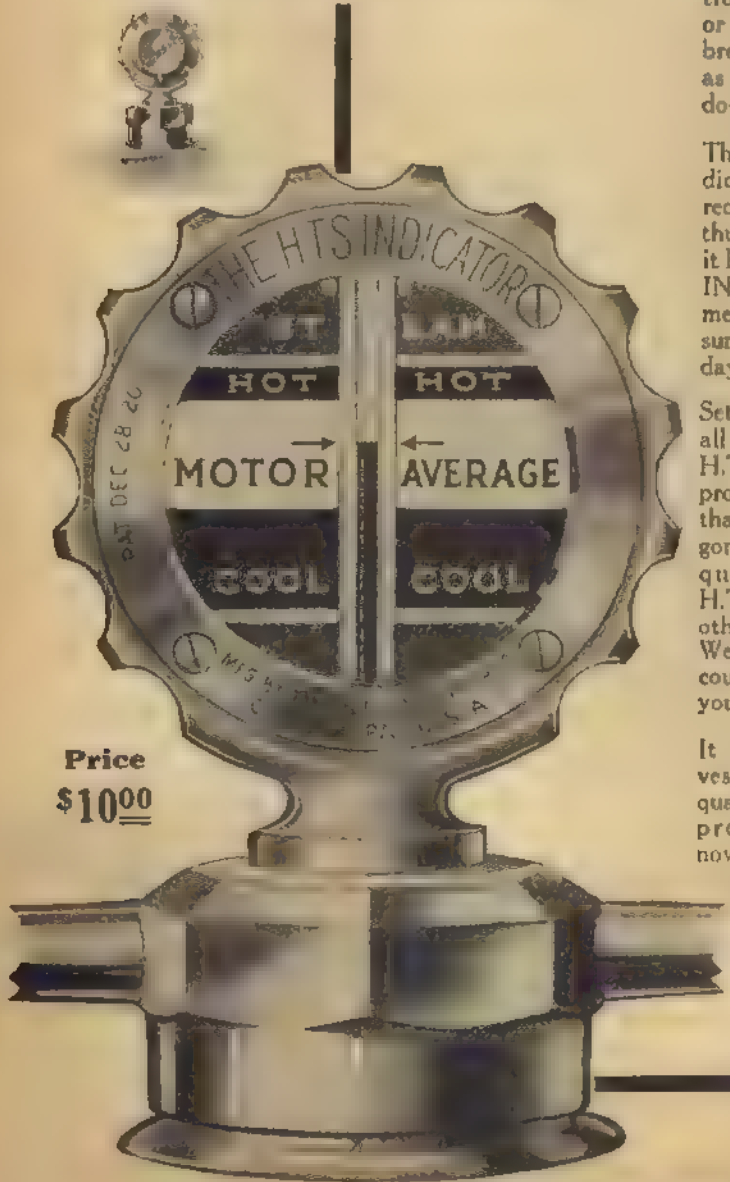
A REAL MOTOR HEAT METER



Price
$10.00

The new H.T.S. Heat Indicator and Parking Lamp offers you the most efficient and fast-selling article on the market today.

A gasoline motor never picks its hours for developing trouble. Water can give out or oil leak away or fan belts break just as readily at night as at day. And when they do—the motor heats up.

That is why the H.T.S. Indicator—the illuminated heat recorder—has received so enthusiastic a reception wherever it has appeared. IT SHINES IN THE DARK. It doesn't melt out of view when the sun disappears—its work day is 24 hours long.

Set side by side with any or all other heat recorders, the H.T.S. Indicator so clearly proves its own advantages that its choice becomes a foregone conclusion. It's only a question of showing the H.T.S. side by side with others, and the sale is made. We are liberal with our discounts, and every sale gives you a worth-while profit.

It will pay you well to investigate this line and acquaint yourself with our proposition. Write for it now.

MERCER MOTOR CARS

The Mercer Plan Will Interest Every Progressive Dealer

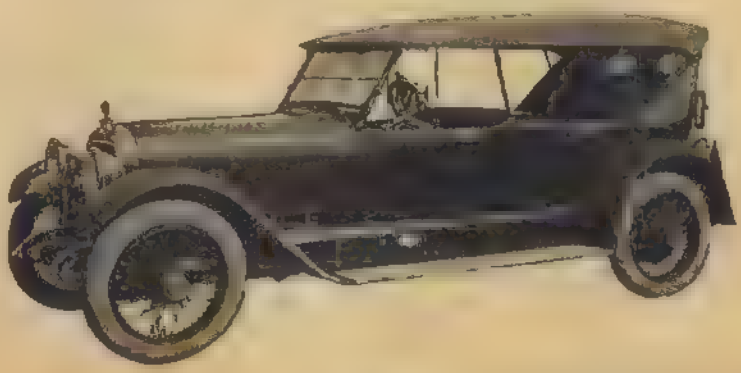
You have often desired to broaden your sales efforts by selling a really fine car in connection with your present line.

The Mercer Plan will enable you to do this. If the car you represent now does not compete with the Mercer, and if you are the type of dealer that we wish to add to the Mercer organization, you can secure the valuable Mercer Franchise for your locality.

Consider what this means to you in larger profits, additional prestige and increased sales possibilities. You can then approach many possible buyers who are not your prospects at present. These motorists are ready to buy a car like the Mercer. It does not require many Mercer sales to net you a comfortable income.

Seldom is there offered such an opportunity by the manufacturer of a world famous quality car. As the response to our first invitation was most gratifying, and the number of fortunate dealers to be accepted has been limited, we advise you to act quickly. Communicate at once with

Mercer Motors Company, Trenton, N. J.



Olds Five-Passenger on Light Eight Chassis

THE Olds Motor Works of Lansing, Mich., has started production on a five-passenger eight-cylinder model, using a roomy body and the standard light eight chassis. The new model retains the trim contour of the light eight four-passenger model, but is built to comfortably accommodate five. The wheelbase is 115 in. The back seat is 45 in., the front seat 41 in., and the doorways are 21¾ in. wide.

This model, which lists at $1595 f.o.b. the factory, comes with a rich wine color, known as Oriford Lake, and has side rails of Circassian walnut. The instrument board, horn button, steering wheel and spokes, and gear-shift lever ball are also walnut. The upholstery is leather, which harmonizes with the body finish, and heavy texture tan rugs cover the floors of both compartments. The top is of a type that gives a clear view for all passengers and ample headroom, but still retains low sweeping lines which blend well with those of the body. A new style, nickel-plated, flaring-type radiator shell is used and also a cowl ventilator finished in black. A two-piece windshield with weather-strip and adjustable from the inside is now used. Other equipment includes a windshield wiper, rear-vision mirror, tubular robe rail and snubbers on the rear. Cord tires are standard equipment with a single carrier and rim mounted at the rear. Running boards are covered with linoleum.

The Olds Eight-Cylinder, Five-Passenger Touring Model

Lincoln DeLuxe Touring Model

THE new Lincoln seven-passenger touring model on the 136 in. wheelbase chassis is known as the Lincoln De Luxe touring car. The Lincoln Motor Co., of Detroit, the maker, is also producing cars of two- and four-passenger capacity on this same chassis. The body panels of this model are aluminum to give minimum weight with strength. Finish is in any of three standard colors, rich blue, deep maroon or brewster green.

The upholstery is long grain black leather with curled hair and deep coil springs. The rear compartment has two cabinets in the back of the front seat for smaller articles. The side curtains are also carried in the back of the front seat, and are very close fitting. The extra seats fold flush into the back of the front seat. This long wheelbase model is stated to be exceptionally easy riding and there is ample space in both front and rear compartments for all passengers.

The Lincoln De Luxe Seven-Passenger Touring Car on 136 in. Wheelbase Chassis.

"*We have sold the Oldsmobile since 1916* and have found our dealings with the Olds Motor Works okey. Our sales have run ahead of last year. We are thoroughly convinced that the Oldsmobile is the best value for the money on the market today, and we would not give up the Oldsmobile contract for any other franchise."

FISHER & OCHAMPAUGH
(Leads N Y)
C. H. FISHER

The value of any manufacturer's selling franchise may safely be judged by the dealers the manufacturer *keeps.*

Square dealing, a better product than others can offer, a permanent dealer's contract, *an opportunity to make money and to grow* are some of the reasons why Oldsmobile dealers stick.

Fisher & Ochampaugh are only a fair example of the permanent sort of dealers representing Oldsmobile.

The opportunity to join this established, prosperous dealer organization may be yours today.

Logically, the better territories that are open will not remain so very long.

A prompt inquiry is almost necessary. Write, wire or telephone us for an appointment and complete information concerning your territory.

You Can Sell This Man a Snap-on Set Tomorrow

Another misfit wrench—another worthless "car equipment" tool a bruised hand and a ruined disposition.

—and another man ready to buy a Snap-on "owner" set that will easily reach, hang on and fit 99% of the nuts on his car!

Sure, there's bigger profit in selling Snap-ons. Sockets fit any nut; handles fit any socket. Car owners, mechanics and handy men get the idea in a minute. The interchangeable socket principle makes it possible for them—for the first time—to get the efficiency of 30 or 40 old-style wrenches with three or four Snap-on handles and a few sockets. You sell "sets" instead of single wrenches, and thus multiply a mighty good profit several times. Some customers want only half a set, of course—but what's the difference? Once they try the tools they come back for the full set.

Ask for literature, attractive discounts and full details of our advertising plan furnished responsible dealers. One of our 20 Branch Offices is near you —ready to give you personal attention.

The Finest Ratchet Made

Hand this Snap-on Ratchet to any mechanic. Say nothing. Just watch him snap the gears in and out of mesh. Then ask the price of a complete Snap-on "Master Set" which includes every [illegible] display board. Our sales records show that 1 out of 2 mechanics will buy the complete assortment.

Strongest, handiest reversible ratchet made—built on "gear" principle. Cannot break or slip [illegible] teeth [illegible] to form a solid block of steel. Patented, exclusive feature of Snap-on line

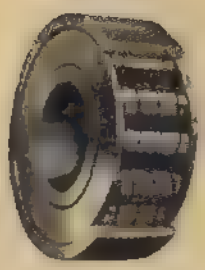
FINE precision in manufacture is traditional Stearns practice. This is one of the reasons why long length of service has been a characteristic of the Stearns-Knight car.

It is a marked tribute to the Hyatt Roller Bearing Company that this car is equipped with Hyatt Roller Bearings—five in the transmission and five in the rear axle. But a still greater testimonial to Hyatt quality lies in the fact that these bearings have been used constantly in the same location since 1914.



A Hyatt bearing with part of inner race removed to show the spiral rollers.

Hyatt Roller Bearings enable the manufacturer to build a simplified and more satisfactory transmission and to produce a more sturdy and dependable rear axle.

A Message of Great Importance To Motor Car Dealers Everywhere

THE New Stearns-Knight Six will be built in sufficient quantities to permit of national distribution.

Therefore, The F. B. Stearns Company for the first time in many years invites motor car dealers everywhere to write for full particulars concerning its Dealer Franchise.

From the day when The F. B. Stearns Company announced that it would be the first in America to adopt and build the Knight Sleeve-Valve type of motor the demand for Stearns-Knight Motor Cars has been greater than the supply.

The new 6-CYLINDER Stearns-Knight Engine is a marvelous power-producing mechanism. Its flexibility and acceleration—its silent smoothness and ease of control, are things that even experts wonder at. But greater than all else is the achievement of building what we believe to be the first gasoline engine to operate entirely free from periodic vibration.

Here then, is an unusual opportunity for dealers—an opportunity to obtain exclusive territorial selling-rights from one of the oldest and most successful motor car companies in the world. And, in addition, to obtain this profitable privilege at the time when the company announces the greatest achievement of its career.

Write for full particulars immediately. Your territory may still be open.

Stearns-Knight Six — *7 Passenger Touring*

Extract from a letter to the president of The F. B. Stearns Company from the inventor of the famous Knight Sleeve Valve Engine after a recent visit of inspection to the factory:

May 24, 1921

"I am with the king of motors, the Stearns-Knight six of yours. The original dimensions [illegible] carefully with the length of connecting rods, the position of the eccentric shaft, the shape of the cranks on the sleeves, and the fine workmanship which makes a motor with long life and smooth action. I like the proportions about the best of any engine I have ever seen. With kind regards,

(Signed) C. Y. Knight"

IMPORTANT SPECIFICATIONS OF THE NEW STEARNS-KNIGHT SIX

The New Stearns Sleeve-Valve engine has six cylinders cast enbloc. The bore is 3⅜". The stroke is 5". The lubricating system is a combination of force-feed and splash, with gear driven oil pump.

The new wheel-base is 130". The spring suspension is designed for super comfort. Front springs are 2½" x 45" semi-elliptic type, probably the longest front springs used on any passenger motor car. Rears are 2½" x 50" cantilever type.

Wheels are wood, artillery type. Tires are 33" x 4½".

Complete specifications gladly furnished on request.

Production of the 4-CYLINDER Stearns-Knight will be continued

The F. B. Stearns Company, Cleveland, Ohio

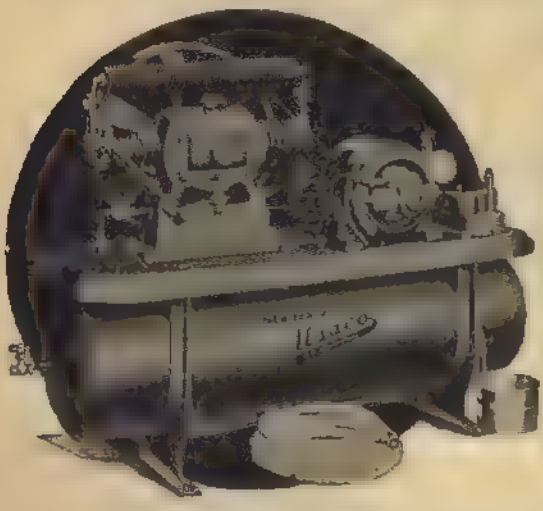
Your Overloading Problems Stop Here!

YOU wouldn't start your car in high. Neither do you start an air compressor on full load.

The Usaco Unloader makes this unnecessary, lengthening the life of the compressor through lessening strain and, at the same time, eliminating belt trouble and the blowing of fuses.

And, furthermore, the Usaco Unloader protects the motor against burning out as a result of low voltage. Being made integral with the motor, its operation is *direct* and *instantaneous*.



Here, briefly, is how it operates: When the desired tank pressure is attained, the compressor is automatically stopped and a valve opened, exhausting the air from the auxiliary starting tank in the compressor base. When the demands on the air in the tank lower the pressure to the minimum point, the motor starts, but runs on the brushes, pumping against no pressure until full operating speed is attained. The above valve is then automatically closed and the compressor pumps into the tank.

In the event of briefly sustained low voltage, lowering the speed of the motor, the Unloader operates as above described, thus protecting the motor against burning out.

You can obtain this full measure of Unloader protection on one air compressor only—the Usaco - as this device is amply protected by patents.

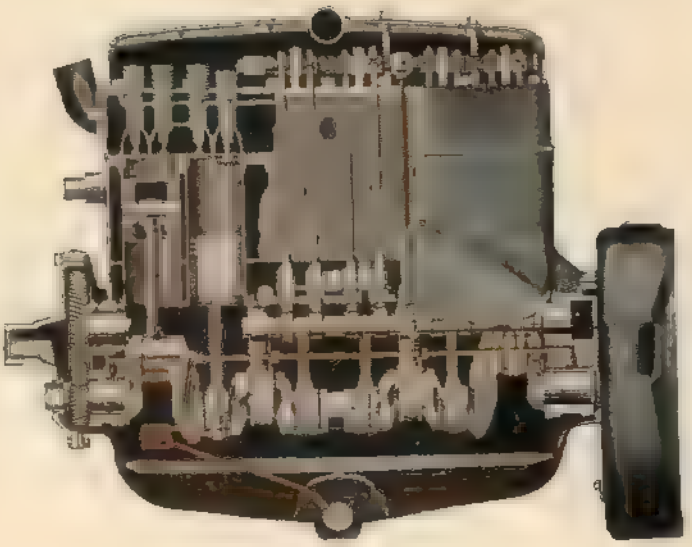
VELIE MOTORS CORPORATION · MOLINE, ILLINOIS

VELIE - BUILT MOTOR

The Automatically Lubricated **VELIE-BUILT MOTOR**



Red lines show how motor is automatically oiled. The most thorough lubricating system ever devised. Oil is circulated by means of a powerful gear pump to every moving part of the motor, in exactly the right amount at exactly the right time. Nothing is left to chance. When the motor turns over every part must receive its proper proportion of oil from the pump.

This means that the push rods, rocker arms, valve stems, front gears, cam shaft bearings, crank shaft bearings, connecting rod bearings, wrist pins, tappets, etc., are all lubricated by a stream of fresh oil directly from the pump. Naturally, this means long life and minimum repair and upkeep.

You Get an Exact Duplicate of this Marvelous Motor in the Velie Model 58

We want good business men as dealers. Our contract is liberal; our Finance Plan places cars on your floor and provides for Time Sales. We invite correspondence.

Owners Everywhere Approve

Let owners of Wayne Pumps from coast to coast and from Canada to Mexico and the Gulf tell you what they think of Wayne Pumps. Their opinions are unbiased. They say what they think. And what they think is worthy of your consideration.

Between New York and Albany

K. W. Grant, who operates a filling station on the main-traveled highway between New York and Albany, likes his Wayne Pump because it meets the first requirement of the busy East—speed in service.

Down in Dixie

Down in Dixie, where integrity is inbred, Wayne Pumps are accepted for their accuracy. R. C. Blanchard, of De Funiak Springs, Fla., writes: "The government inspector said the Wayne Pump was the best on the market. I have a Wayne and another pump. I notice that ninety-five per cent of the people stop at the Wayne."

The manager of a filling station in Chattanooga declares: "The gauge on my Wayne Pump is absolutely accurate and it stays so."

Up North

The Deadwood Motor Co., of Deadwood, S. D., reports: "We are surely pleased with our Wayne Pump. It has nearly doubled our gas trade.* * *"

"Our Wayne Pump has added several new customers to our list and is directly responsible for sales of other merchandise." is the statement of the Klausman Tire & Auto Co., Wadena, Minn.

And Out West

Martel Brothers, Burlingame, Cal., find that their Wayne Pump "never gets out of order and today is in as perfect condition as it was the day it was installed."

The proprietor of the Thousand Pines Garage, San Bernardino, Cal., does not think that "there is any better pump made, even at higher prices."

Wouldn't you like to know more about the pump which satisfies those who buy it as the Wayne does? Write and ask for Bulletin 276-AJ.

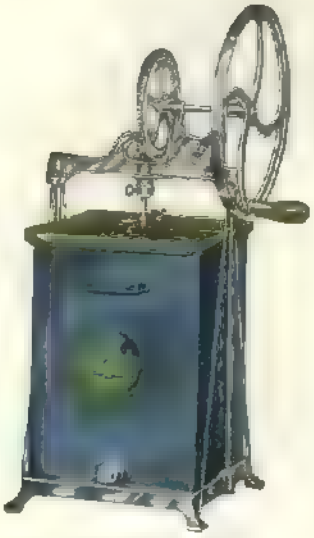
DAZEY CHURNS



Nos. N100-N200-N300.

Nos. N400-N600-N1000-F1600

THE DAZEY PRINCIPLE AND WHY IT IS BETTER

The principal butter-making property of cream is butter fat, which is an oil contained in a tiny delicate tissue and best compared to a soft-shell egg. The principle of ordinary churns is to break these tiny butter fat tissues, allowing the fat to gather in a mass at the top of the cream; but with the DAZEY, it is different and better.

As the cream is rolled along under the wings of the patented DAZEY Dasher, the whole fat globules are **rolled-up** in their natural condtion, in uniform sized grains.

Cream contains other valuable butter-making properties which are usually lost with ordinary churns, but by the DAZEY System are **rolled-up** with the fat globules. This is the reason the DAZEY produces more and better butter.

Just sufficient working to salt evenly is all that is necessary, because the rolling-up of the whole globules has squeezed out all milk from inside of grains. This means saving of labor.

The powerful dasher produces a scientific agitation that results in the production of butter in from five to twenty minutes.

The receptacles are non-absorbent; no cracks to harbor the cream and become rancid. The receptacle lifts out of frame and can be cleaned, as easily as an ordinary pail. There are no complicated parts in the DAZEY.

MATERIAL AND FINISH

Frame strong, and rigidly constructed of steel and iron, and finished with double coat of pure aluminum bronze; receptacle of triple-plated charcoal dairy plate, enameled outside covers and dasher of hard, white maple

MATERIAL AND FINISH

Heavy, clear glass jars with smooth finished neck; heavily plated screw cap top; hard, white maple dasher; cast frame and gears finished with double coat of aluminum bronze; perforated, removable strainer in cap.

DAZEY ELECTRIC CHURNS

The same principle of butter-making which has made DAZEY Hand Churns so universally popular, has been combined with every essential feature of a practical and efficient Electric Churn.

A clutch for starting and stopping Churn without shutting off motor is provided; the high base provides safe mounting for motor, and raises the receptacle so a vessel can be placed under faucet; the gears are fully enclosed ad protected; the extension cord is protected by carrying same thru hollow side rod. Years of faithful service is assured thru use of highest grade motors, best of materials and careful workmanship.

★ MOTORS—The following motors are furnished as standard equipment:
Single phase alternating current 60 cycle motors of 110 and 220 volts
32 110 and 220 volt, direct current, compound wound.
Motors of special cycles, phase etc., can be furnished at an extra charge.

★ IMPORTANT—When ordering Electric Churns it is necessary to specify voltage, cycle and phase on alternating current; specify voltage on direct current.

"MOTTO" Holiday Ribbonette

The new Christmas Tie that has taken the country by storm . . . . .

Retails 6 yds. for 10 cents

"Motto" Holiday Ribbonette is made of the highest grade mercerized yarns and imported French gilt threads. It is printed with appropriate sentiments that have an undeniably strong appeal, particularly to women.

"Motto" Holiday Ribbonette is strong enough for tying up even heavy packages, yet so dainty that women give it preference to silk ribbons retailing for 5c and 10c a yard.

You will easily double your sales on Christmas tying Material, for a great many shoppers will take a full selection of designs or "mottos" where they would ordinarily buy only one bolt of other material.

Three Attractive Designs — Three Assorted Mottos

"Motto" Holiday Ribbonette

Comes on regular 6 yard ribbon blocks that retail for 10c each, offering your customers an unusually attractive tying material at a very moderate price. A big turnover is assured you on this item with a very liberal margin of profit.

$8.75 Per Half Gross Box

Subject to regular Trade Discount

Place your order early

N-24744 "Motto" Holiday Ribbonette, packed in handsome display box containing ¼ gross 6 yard bolts. Per ½ gross box . . . $8.75.

THIS beautiful display carton makes "Motto" Holiday Ribbonette a self-selling proposition. It is the most attractive display that has ever been designed for an article of this kind.

CADILLAC

ELECTRIC VACUUM CLEANER

Four 1922 Models retailing as low as $39.50

Cadillac Nap Insurance

When you sell a Cadillac Electric Vacuum Cleaner, you automatically insure the rugs and carpets of your customers against wasteful destruction and removal of nap.

All vacuum cleaners clean, but the Cadillac—with oversize 1/5 H.P. Motor and friction driven brush—cleans without doing violence to the nap.

A Cadillac sale is, therefore, a form of service to your trade for the wise buyer can be impressed now as never before with the economical side of vacuum cleaning.

Cash in on this very important nap-saving feature of Cadillac operation. Your demonstrations to prove your claim to skeptical customers can be made very spectacular. We will show you how. Nap Insurance will be talked about more tomorrow than it is today and the Cadillac is leading the way.

Our sales co-operative plan is worth your inquiry.

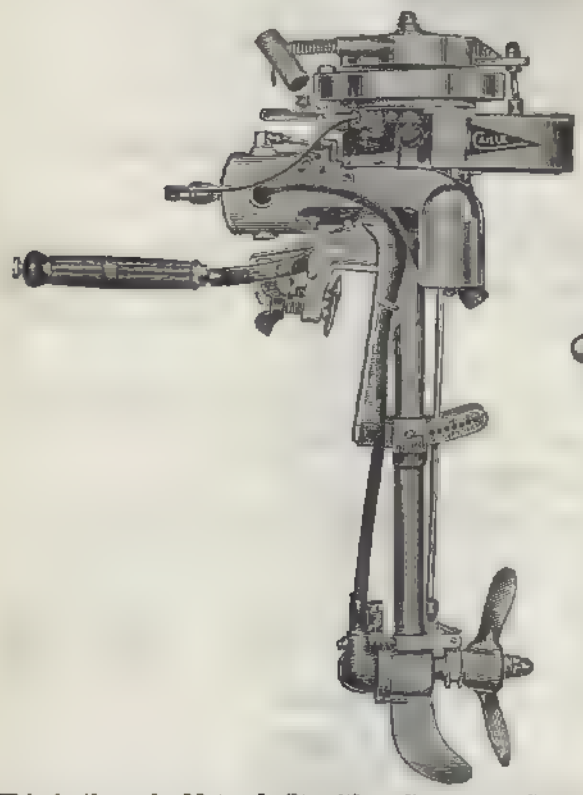
ROWBOAT MOTORS

CAILLE FIVE-SPEED



This is the only Motor built with a five speed Control; 2 speeds ahead; a trolling speed and a full speed at which the ordinary rowboat will be driven at about 8 miles per hour. A slow reverse is furnished together with full reverse. In neutral position, the motor runs idle while the boat lies still. This is the only motor equipped with neutral position. Can be reversed immediately without first going into a speed ahead. Equipped with mechanical starter. The starting device is furnished only with the 5 Speed Models. The extension shaft and adjustable horn permits adapting the motor to a high stern boat or to a boat with the stern cut at an acute angle.

Can be used in either fresh or salt water without any change in equipment. Parts are machined to measurements or limitations of thousandths of an inch according to S. A. E. Standard. A Cord is attached to each motor, requesting the ultimate purchaser to return the cord to the factory to register the motor so that they have on file the name and address of the owner of every motor, each motor being identified by the serial number. Each motor is fully guaranteed by the manufacturers.

SPECIFICATIONS

Bore 2⅛ in., Stroke 2½ in., 750 R. P. M., 2 H. P.

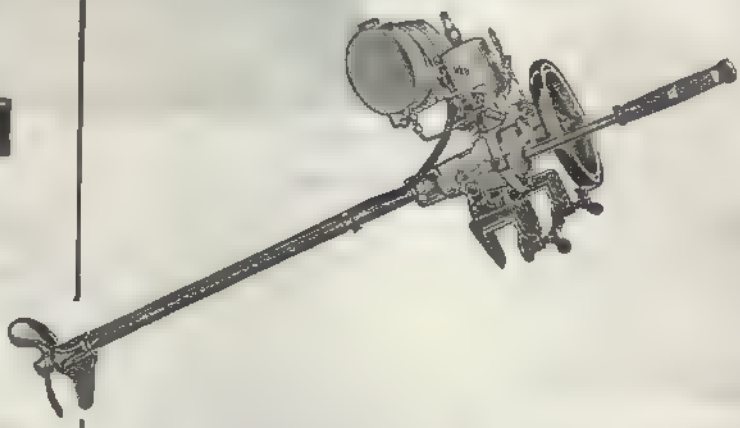
No. T7641—White starter Magneto Ignition only, each $234 00

ONE IN A CASE

CAILLE LIBERTY DRIVE



This is the only genuine tilting motor on the market. Will tilt automatically when passing over shoals, shallows or sunken obstructions. A strut or skeg protects the propeller from damage. The motor may be tilted by pressing down on the steering handle or tiller. Equipped with a weedless propeller. Weeds may wrap around propeller or shaft and can be quickly thrown off by tilting the motor and allow the propeller to revolve free of water for a few seconds. Equipped with knapsack form of fuel tank which is practically indestructible. Machined as carefully as the 5 Speed model. Not equipped with starting device. These motors will drive a boat faster than others due to direct drive from Crank shaft to propeller without passing power thru the medium of gears. Will give a speed of 2 to 9 miles per hour in a 16 ft. rowboat in quiet water. Furnished with battery or magneto ignition. Equipped with conventional type of Berling Magneto. This motor is fitted with bracket for square stern, adjustable bracket for pointed stern may be had on special order at an additional charge.

The Liberty Drive Motor develops about 2 H. P. The motor, complete, weighs 72 lbs. It can be taken apart and carried in two sections, if desired. It comes to you carefully crated and ready to run. It is fully guaranteed.

Weight each 75 lbs.
Weight Packed for shipment 105 lbs.

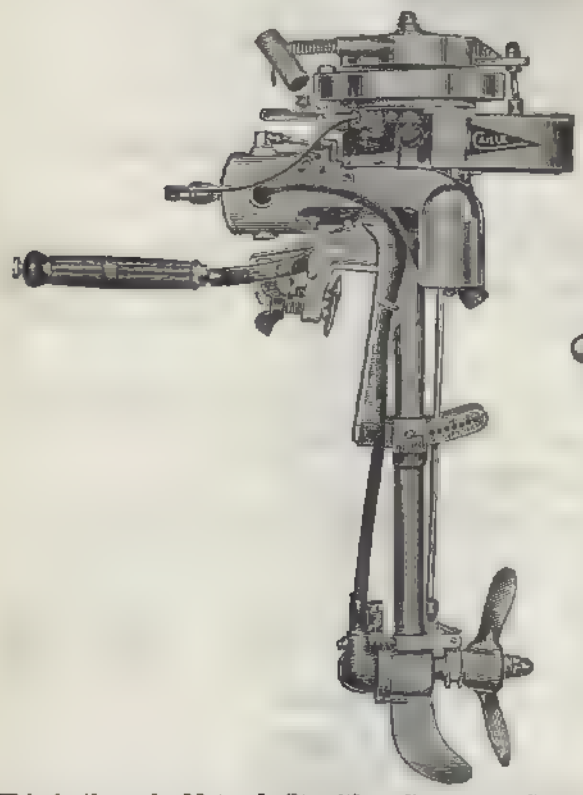
ROWBOAT MOTORS

CAILLE FIVE-SPEED



This is the only Motor built with a five speed Control; 2 speeds ahead; a trolling speed and a full speed at which the ordinary rowboat will be driven at about 8 miles per hour. A slow reverse is furnished together with full reverse. In neutral position, the motor runs idle while the boat lies still. This is the only motor equipped with neutral position. Can be reversed immediately without first going into a speed ahead. Equipped with mechanical starter. The starting device is furnished only with the 5 Speed Models. The extension shaft and adjustable horn permits adapting the motor to a high stern boat or to a boat with the stern cut at an acute angle.

Can be used in either fresh or salt water without any change in equipment. Parts are machined to measurements or limitations of thousandths of an inch according to S. A. E. Standard. A Cord is attached to each motor, requesting the ultimate purchaser to return the cord to the factory to register the motor so that they have on file the name and address of the owner of every motor, each motor being identified by the serial number. Each motor is fully guaranteed by the manufacturers.

SPECIFICATIONS

Bore 2⅛ in., Stroke 2½ in., 750 R. P. M., 2 H. P.
Propeller 9½ in. diamter, 12 in. pitch.
Built-in Flywheel Magneto.
Weight each 85 lbs.
Weight packed for shipment 105 lbs.

ROWBOAT MOTORS

CAILLE NEPTUNE

A substantially built rowboat motor of standard design to meet the ideas of the conservative buyer.

Heavy Frame with two thumb screws clamps motor to rowboat in a minute and is adjusted to most any height, thickness or pitch of stern.

Motor is Reversible and will run either forward or backward. A turn to right starts motor; to reverse, turn to left, with a little practice can be reversed on spark.

Motor Speeds—From 150 to 800 R. P. M. controlled by timer lever extending under fly wheel. Press button on timer instantly stops motor.

Solid Bronze Propeller of semi-weedless type protected by strut.

All Under Parts of Bronze. The Only Metal Which is Impervious to Salt Water Corrosion.

Plunger Pump equipped with strainer, located on gear housing keeps motor cool in hottest weather.

Water cooled aluminum muffler and exhaust manifold cast in one unit.

Gasoline Tank of heavy tern plate, reinforced, with seams well soldered. Shut-off cock between gas tank and carburetor.

All Bearings of Phosphor Bronze, same formula as specifed by government.

Chrome Nickel Steel Gears contained in water tight housing, packed with grease, shipping w't 100 lbs.

No. F7644—Battery ignition, with waterproof battery and coil box complete, each★ ..... each **$170.00**

No. F7645—Magneto built in fly wheel★ ..... each **190.00**

ONE IN A CRATE

LUGGAGE CARRIERS

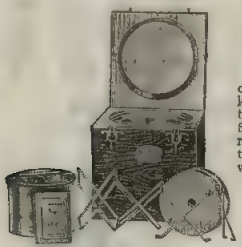
FIRELESS COOKERS

CALORIC

Oak, cabinet frame, lined with heavy 18 gauge seamless aluminum; will not discolor from the effects of steam; heavy steel cover equipped with self stopping hinges and patented wire locks which hold cover down so tightly that there are no cracks or crevices through which the steam can escape. Equipped with a ventilating valve which automatically lets out all of the excess steam, but retains the necessary heat. Compartments and utensils are made of heavy 18 gauge seamless aluminum. Extra quality soapstone radiators which possess superior heat retaining qualities. All vessels are fitted with wire cover clamps; handles riveted on covers with aluminum rivets. Insulation is absolutely fireproof and will retain the cooking heat, which it takes only a few minutes to generate.



Equipped with one 8 qt. seamless aluminum kettle; two large radiators; one 2 inch and one 5 inch baking rack; one radiator rack; one pair tongs. Height 15 in.; width 15 in.; length 15 in.

CONTRACTORS' FLARE LIGHTS

No. 3CFL

CARBIC

Designed for the use of contractors, railways, mines, street work, docks, foundries, dredges, stem shovels, ditching and threshing outfits, lumber camps, etc.

Constructed of heavy galvanized steel and brass. Equipped with special aluminum light reflectors. The different styles and sizes are substantially constructed throughout and designed to fulfill different practical requirements, varying with respect to capacity and size. All are built along the same general lines. Gives a clear white light of great range and radius and are equipped with storm, wind and weather proof burners, and the flame from these lights is smokeless, sootless, free from sparks and does not vitiate the atmosphere.

CARBOLITE

A Superior Quality of Calcium Carbide, in Orange Colored Drums and Packages

Carbolite is of an unvarying quality, an important point with consumers, for they can feel assured that in purchasing Carbolite they will always secure the highest Gas Yield Carbolite generates a pure, clean Gas of the very best illuminating power, which produces the White Light known as Acetylene

In appearance it is a grayish, rock-like substance which will not burn, cannot explode, is not affected by heat or cold, and in fact remains absolutely inactive until brought in contact with water.

Cans are Sealed with Air-Tight Metal Covers, preventing any deterioration by exposure to air. Each Size of Carbolite is best adapted for use in some particular kind of Generator, and, in ordering, the size required should be plainly stated, the consumer should request the Generator manufacturer to furnish him with information as to the proper size of carbolite to use; **The Miners Special Carbide** is now being extensively used by all the large Iron, Coal, Gold and Silver Mines.

✚**No. F2649P**—Height raised up 6 ft. 3 in., down 3 ft. 5 in.; 18-in. Aluminum lined Steel Reflectory Diameter at base 12¾ in.; Burns 6 Hours Continuously on a Charge of two No. F2649V Carbic Cakes $86.00

Shipping Weight, 60 Lbs. Each

✚**No. F2649R**—Height raised up 6 ft. 7 in. down 3 ft. 9 in.; Diameter at Base 14 in.; 18-in. Aluminum Lined Steel Reflector; Burns 12 Hours Continuously on a Charge of four No. F2649V Carbic Cakes..... 96.00

Shipping Weight, 73 Lbs Each

✚**No. F2649T—Two-Burner Model**; Has two independently adjustable Reflectors which may be swung in any direction without moving the Light itself; Height 6 ft. 7 in.; a Full Charge in eight No. F2649V Carbic Cakes, which will operate both Burners continuously for 12 hours, or one Burner for 24 hours.....120 00

Shipping Weight, 120 Lbs. Each

CARBIC CAKES

Made from the Highest Grade Gas Producing Material, pressed into Briquet Forms by a Special Process, and are the safest and most economical means of supplying Gas to Portable Lamps and Torches. The Gas is exceptionally pure, insuring a clear, white, smokeless flame of great power, eliminating the clogging of burner tips and scoting of reflectors.

	Per Drum
No. F2649V—Diam. 4 in., Weight 2½ Lbs. per Cake; for use in Nos. F2649P, F2649R, and F2649T Flare Lights; 40 to a drum.....	$14.50
Weight 108 Lbs. per Drum	
No. F2649W—Diam. 2 in., Weight ¾ Lbs., each for No. F2649X Cadet Flare Light and No. F2649Y Hand Lamp; 110 to a Drum.....	14.50
Weight 90 Lbs. Drum	

CADET

Originally designed for Fire Department and Salvage Work but on account of its adaptability it is now used extensively by railroads, water works departments, contractors, engineers and others requiring a Light, Reliable Outfit. Burns 5 hours on a Full Charge of four No. F2649W Carbic Cakes.

Each

✚**No. F2649X**—Height raised up 4 ft. 7 in., down 2 ft.; Weight Fully Charged, 32 lbs.; has an Aluminum Lined Steel Reflector, 10 in. in diam., adjustable to throw light in any direction....$86.00

Shipping Weight 39 Lbs.

CARBIC HAND LIGHT

This Small Light, embodying all the Excellent Features of the Larger Lights, is the Ideal Size for Night Watchmen, Janitors, Farmers, etc. The use of Carbic Cakes makes this Light very economical, a full charge (two No F2649W Cakes), giving a Powerful White Light continuously for eight hours

Each

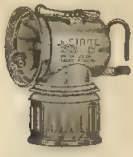
✚**No. F2649Y**—Height 15¾ in., diam. at base 8¼ in.; Aluminum Lined Steel Reflector, 8 in. in diam. can be elevated to any height.....$36.00

Weight 14 Lbs. Each

✚**Carbic Flare Lights and Cakes, for Factory Shipment, only; F. O. B. Chicago, Ill.**

JUSTRITE MINERS CARBIDE LAMPS

Made in two parts, Water Reservoir and Carbide can Container; Drawn from Seamless Brass, Attached parts Riveted and soldered inside; Reflector is part of Lamp; Equipped with Self-lighter Attachment



WIRE FEED

Round Hook; 16.7 Candle Power; Concaved Reflector; Polished Brass

Each

No. 2650-407—Lamp Only.....$1.54

No. 2650-85R—Lamp with Extra No. 2652-77 Carbide Can..... 1.71

WIRE FEED

Flat Hook; 16.7 Candle Power; 2¼ in. Concaved Reflector; Polished Brass Each

No. 2650-417—Lamp Only.....$1.54

No. 2650-414—Lamp with Extra No. 2652 77 Carbide Can..... 1.71

No. 2650-477—Lamp Only, with 3 in. Saucer Shape Reflector..... 1.67

WIRE FEED

Flat Hook; 16 7 Candle Power; 2⅝ in. Extra Deep Reflector and Flame Protector; Especially adapted for wet mines.

Each

No. 2650-697—Lamp Only.....$1.67

WIRE FEED

For Mine Superintendents, Sportsmen, Inspectors, etc.; Nickel Plated; With Hook and Folding Handle; Concaved Reflector; Uses Special Miners Carbide

Each

No. 2650-100C—16 Candle Power, burns 2½ hours; Height 3¾ in., Diam of Reflector 2⅝ in.; With No. 2652-76 Carbide Can.....$2.25

Each

No. 2650-95—Lamp Only; 18 Candle Power; Burns 4 hours; Height 5 in., Diam. of Reflector 3 in.....$3.00

Each

No. 2650-302—Lamp Only; 18 Candle Power; Burns 5 hours; Height 5¾ in., Diam. of Reflector 2¾ in.....$4.50

16.7 Candle Power; Solid Rim ⅛ in. Thick; With Reinforced Bottoms

POLYGON FEED

Round Hook; With 2¼ in. Concaved Reflector Each

No. 2650-707—Lamp Only; Polished Brass $1.54

No. 2650-709—Lamp Only, Nickel Plated 1.79

No. 2650-767—Lamp Only; Polished Brass, with 3 in. Saucer Shaped Reflector 1.67

POLYGON FEED

Flat Hook; With 2¼ in. Concaved Reflector

Each

No. 2650-717—Lamp Only; Polished Brass $1.54

No. 2650-719—Lamp Only; Nickel Plated 1.79

POLYGON FEED

Flat Hook; With 3 in. Saucer Shaped Reflector

Each

No. 2650-777—Lamp Only; Polished Brass $1.67

No. 2650-779—Lamp Only; Nickel Plated 1.88

16.7 Candle Power; Solid Rim ⅛ In. Thick; With Reinforced Bottoms; Charge 2 Ounces, ¼ In. Carbide.

POLYGON FEED

Flat Hook; With 2¼ in. Concaved Reflector; Polished Brass Each

No. 2650-917—Lamp Only.....$1.54

POLYGON FEED; NEW LIGHTER ATTACHMENT

Flat Hook; With 2⅝ in. Concaved Reflector; Polished Brass Each

No. 2650-937—Lamp Only.....$1.83

POLYGON FEED; NEW LIGHTER ATTACHMENT

Flat Hook; With 3 in. Saucer Shaped Reflector; Polished Brass Each

No. 2650-977—Lamp Only.....$1.88

All Above, Twelve in Carton; Approximate Weight 5 to 6 Lbs. Carton

AUTO CLOCKS

Keyless Auto Clocks are the most practical auto clocks made. This unique way of winding and setting by the rim, thus eliminating the use of a key or a projecting stem, has made them very popular with the trade. They run eight days with one winding, are fully guaranteed, and are, without doubt, the handsomest auto clock on the market. They are built especially for automobiles and will stand the hardest vibration, and keep time under the most trying conditions. Dust and moisture proof.

COWL BOARD TYPE
KEYLESS

For Cadillac, Hudson, White, Buick, Overland, Cole, Studebaker, Austin, etc.

No. 5944—2⅝ in. dial, cowl ring 3⅛ in., length of clock behind ring 1⅛ in., 8 day, rim wind and set, finish black enamel with nickel rim, w't each 2 lbs. .....each $16.60

ONE IN A BOX

LUMINOUS DIAL COWL BOARD TYPE
KEYLESS

No. 5947—2⅝ in. dial, 8 day movement, rim wind and set, black enamel finish with nickel rim, genuine radium dial on black of highest quality, can be read at a glance either day or night, w't each 2 lbs., each $19.20

ONE IN A BOX

COWL BOARD TYPE
KEYLESS

For Reo, Chandler, Paige, Hudson, Hupmobile, Overland, Buick, Dodge, Mercer, etc.

No. 5945—2½ in. dial, cowl ring 3⅜ in., length of clock behind ring 1⅛ in., 8 day movement, rim wind and set, finish black enamel with nickel rim, w't each 2 lbs., each $15.40

ONE IN A BOX

DENVER COWL BOARD TYPE
KEY WIND

Eight-day key wind, 2½ in. dial second hand, sets flush with dash, w't each 1 lb.

No. 5941—Black enamel, each $10.00

No. 5941A—Nickel plated, each $10.00

ONE IN A BOX COMPLETE WITH FITTINGS

OFFSET TYPE
KEYLESS

No. 5946—2½ in. dial, base 3⅛ in. length of clock 2⅞ in., rim wind and set, 8 day movement, thief proof, attached to dash from inside, black enamel finish with nickel rim, w't each 2 lbs. .....each $14.70

ONE IN A BOX

DASH OFFSET TYPE
KEY WIND

No. 5940—Black enamel, 8 day, key wind, 2½ in. dial, second hand, w't each 1 lb. .....each $10.00

No. 5949—Frisco, 1 day, offset, 2½ in. dial, stem wind and set, w't each ½ lb. .....each $7.00

No. 5948—Frisco, 1 day for cowl board Fords, complete with a handsome 2½ in., dial, concealed winding stem, w't each 1 lb, each $7.30

No. 5931—Duane, one day, case heavy brass with offset, 1½ in. dial, diam. 2½ in., w't each 12 oz., each $6.50

ONE IN A BOX

HEAT INDICATORS

BORG AND BECK

The Borg & Beck Heat Indicator accurately inricates on the dash motor temperature of the motor at all times.

Purely mechanical in operation—no electrical connections, nothing to break or get out of order.

Indicating hand on the dial is actuated through flexible, dental type shaft by a small but very efficient thermostat of novel design mounted against motor block by special clamping device. Each instrument is simply, quickly and permanently adjusted for running temperature of the individual motor at time of installation.

A precison instrument made of best possible materials, fully guaranteed by the manufactures and should be on the instrument board of every car.

Can be installed in one hour or less. One model for all cars.

It shows you how hot or how cold your motor is-not the temperature of your radiator.

You adjust this instrument to your motor. Whether the normal running point of the motor is low or high, you always know its exact condition.

By being attached to the motor it is not exposed to rain, snow or weather conditions.

The gauge is placed on the instrument board-and is easily read day or night. The large white pointer and novel dial makes it readable at a glance.

It is theft proof. Its location is such that it is not liable to breakage.

The design is simple and the best workmanship and materials available are used in its construction.

The universal clamp for attaching the unit to the motor makes the installation easy. Full instructions accompany each instrument.

No further attention is necessary after the instrument is once installed and adjusted.

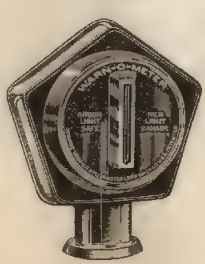
No. 5985—W't each 1 lb., each **$12.70**
ONE IN A BOX

STEWART WARN-O-METERS

The Stewart Warn-O-Meter prevents engine troubles resulting from overheating. It is an electrically operated instrument and may be installed on the radiator, fender, or on the hood of cars that are air cooled. It is wired to a thermostat installed on the engine. When the engine is cold, no light shows in the Warn-O-Meter. As soon as the engine reaches a normal and efficient operating heat, a green light appears. The red light, or danger signal, flashes on when the motor is becoming overheated, because the temperature is taken where the heat is generated, the motor cylinder.

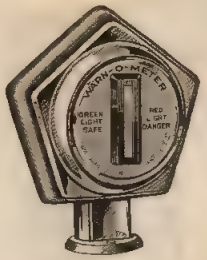
The Warn-O-Meter is not affected by the water or air of the radiator. It is electrically operated direct from the engine, assuring the driver of an accurate indication of the motor's heat.

The design in the Warn-O-Meter that faces oncoming cars is illuminated from within the instrument, and may be replaced by a car name-plate, lodge emblem, owner's initials, or some special design.

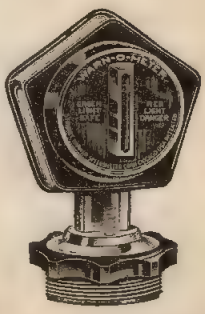


No. F5615—Standard Model 173A—Nickel plated finish, highly polished. Complete with all fittings, w't each 2½ lbs.★ .....each **$13.34**
ONE IN A BOX

STEWART WARN-O-METERS



No. F5616—DeLuxe Model 172A—nickel plated finish, highly polished, silver etched dial. Complete with all fittings, w't each 2½ lbs., each★ **$16.68**
ONE IN A BOX



No. F5617—173B for Ford Cars. Finished in black and nickel and complete with Stewart Radiator Cap. Operates the same as the DeLuxe and standard models. Complete with all fittings, w't each 2 lbs., each★ **$13.34**

JEFFERSON AUTOMOBILE IGNITION COILS

Interchangeable with Any of the Standard Battery Ignition Systems.

This line of Coils is 100% complete, consisting of only a few standard types sufficiently flexible to displace Coils used as standard Ignition equipment.

Under starting conditions, the battery is at lowest ebb and requires a Coil that will produce a hot, intense spark to overcome this drop in voltage. Jefferson Coils are designed to take care of this extreme condition.

Each Coil is furnished with a Wiring Diagram giving detailed instructions for installing.

Willys Knight	1918-21	88-4-88-6	C-500 Coil
Willys Six	1918-19	89	C-500 Coil

The above is a list of popular cars. We can supply coils for all Standard Battery Ignition and low tension Magneto Systems. Write us giving name, year and model of car.

★R-300, 2 Post Coil. *NOTE:—When voltage is not specified it is understood that 6-volt coils are required.*

AUTO CLOCKS

Keyless Auto Clocks are the most practical auto clocks made. This unique way of winding and setting by the rim, thus eliminating the use of a key or a projecting stem, has made them very popular with the trade. They run eight days with one winding, are fully guaranteed, and are, without doubt, the handsomest auto clock on the market. They are built especially for automobiles and will stand the hardest vibration, and keep time under the most trying conditions. Dust and moisture proof.

COWL BOARD TYPE

KEYLESS

For Cadillac, Hudson, White, Buick, Overland, Cole, Studebaker, Austin, etc.

each $6.50

ONE IN A BOX

HEAT INDICATORS

BORG AND BECK

The Borg & Beck Heat Indicator accurately inricates on the dash motor temperature of the motor at all times.

Purely mechanical in operation—no electrical connections, nothing to break or get out of order.

Indicating hand on the dial is actuated through flexible, dental type shaft by a small but very efficient thermostat of novel design mounted against motor block by special clamping device. Each instrument is simply, quickly and permanently adjusted for running temperature of the individual motor at time of installation.

A precison instrument made of best possible materials, fully guaranteed by the manufactures and should be on the instrument board of every car.

Can be installed in one hour or less. One model for all cars.

It shows you how hot or how cold your motor is-not the temperature of your radiator.

You adjust this instrument to your motor. Whether the normal running point of the motor is low or high, you always know its exact condition.

By being attached to the motor it is not exposed to rain, snow or weather conditions.

The gauge is placed on the instrument board-and is easily read day or night. The large white pointer and novel dial makes it readable at a glance.

It is theft proof. Its location is such that it is not liable to breakage.

The design is simple and the best workmanship and materials available are used in its construction.

The universal clamp for attaching the unit to the motor makes the installation easy. Full instructions accompany each instrument.

No further attention is necessary after the instrument is once installed and adjusted.

No. 5965—W't each 1 lb., each $12.70

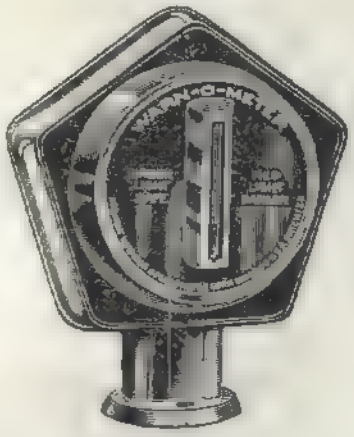
STEWART WARN-O-METERS

The Stewart Warn-O-Meter prevents engine troubles resulting from overheating. It is an electrically operated instrument and may be installed on the radiator, fender, or on the hood of cars that are air cooled. It is wired to a thermostat installed on the engine. When the engine is cold, no light shows in the Warn-O-Meter. As soon as the engine reaches a normal and efficient operating heat, a green light appears. The red light, or danger signal, flashes on when the motor is becoming overheated, because the temperature is taken where the heat is generated, the motor cylinder.

The Warn-O-Meter is not affected by the water or air of the radiator. It is electrically operated direct from the engine, assuring the driver of an accurate indication of the motor's heat.

The design in the Warn-O-Meter that faces oncoming cars is illuminated from within the instrument, and may be replaced by a car name-plate, lodge emblem, owner's initials, or some special design.



No. F5615—Standard Model 173A—Nickel plated finish, highly polished. Complete with all fittings, w't each 2½ lbs.★ .....each $13.34
ONE IN A BOX

STEWART WARN-O-METERS

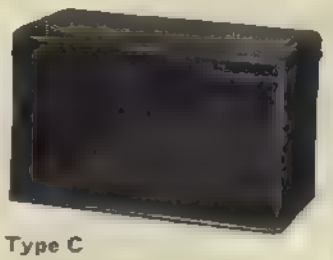
Let Us Help You Buy Your Toys

Save time and money in buying your Holiday lines by having our expert buyers make up an assortment of goods for you. Just state the amount ($100, $250, $500, $750, $1,000, etc.) you wish to invest and the general lines you wish to embrace. We will make up a well balanced assortment of goods that will move quickly and profitably for you.

BATTERY BOXES, TOOL BOXES, AND KITS

BATTERY BOXES

Of sturdy construction; finished in baked black enamel; Corners rounded on ⅜-in. radius, equipped with Yale lock



Type C

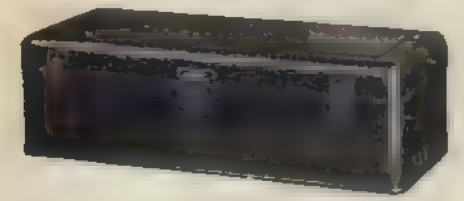
No. C-119—Length 11 7/16-in., Width 8⅝-in., Height 10¾-in. ..... Each $4 25
No. C-168—Length 16-in., Width 8⅝-in., Height 9⅞-in ..... Each 5 00

BATTERY BOXES

This box was designed to meet the demand for protection of the battery in Ford cars without changing location as originally installed. The present unprotected location of the battery permits water, mud and slush to be splashed on it continually thus corroding the lid and connections of the battery

For Fords
No. 811—Battery Box Each $2 75

TOOL BOXES



No. 2296

This tool box is designed for Ford cars. It measures 22 inches long, 9 inches wide and 6¼ inches high. Will accomodate all Ford tools, including the tire pump with Yale lock
No. 2296—Tool Box ..... Each $4 50

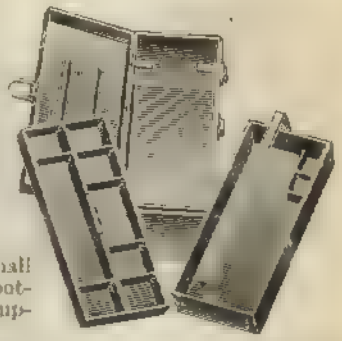
PEERLESS TOOL BOX

No. 30

A light weight, reasonable priced tool box, designed especially for Fords; Size 22x9x7 inches deep; furnished with two adjustable bolts and nuts. Box has reinforcing corrugations throughout, giving it the strength of boxes made of much heavier material
No. 30—Peerless Tool Box Each $3 00

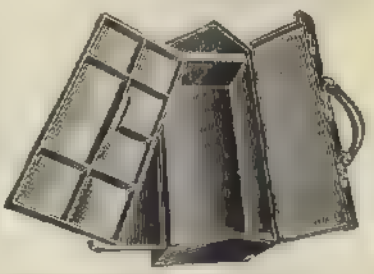
KENNEDY TOOL KIT

This Combination Case is designed for use both in the shop and for outside work. It is equipped with two trays. The upper tray is three inches deep and has a handle which turns down into tray so that the tray may be easily removed from the Case and carried. The lower tray is divided into compartments for bits, drills and small parts. Plenty of room in bottom of Case for other equipment.



No. 716—Size 16x7x9 inches ..... Each $6 50

KENNEDY TOOL KITS



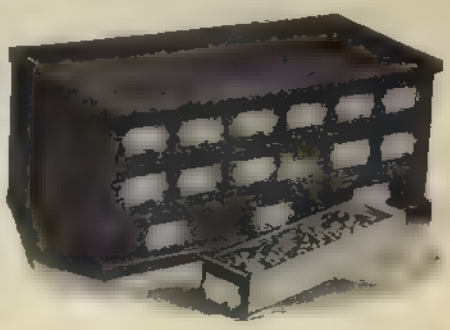
The Kennedy Kit, an all steel grip that will not wear out. For carrying tools, clothing or equipment. Looks like a traveling bag and is no heavier with tray divided into small partitions for carrying drills, bits, small parts, etc. Tray is made of light-weight steel 1¾ inches deep and rests on ledges at top of case. Contents cannot spill out if bag is loaded, as flat bottom will prevent overturning.
No. 116—16x9x11-inch high .. Each $5 50
No. 118—18x10x13-inch, high Each 5 75

KENNEDY MACHINISTS KIT

The material and construction of this case is such that it will not swell, warp, crack, split or go to pieces. Reinforced at all points of strain. Drawers run on separate tracking and are right and left so as to go easily into place. Front drops and slides under lower drawer when open. Fastens at bottom and secured locks to upper lid when closed. Electric welding and inner corrugation in lid. Will carry heaviest equipment
No. 518—Size 18x8x12½ inches Each $17 50

HANDY SERVICE CABINET

Built of well-finished fumed oak; 12 drawers, 3"x3"x12" 3 drawers 6"x 3"x 12" drawers sides and bottom, of galvanized sheet steel to prevent sticking. Each drawer is fitted with a combination pull and card holder



No. 3000—Handy Service Cabinet Each $16.00

RED SEAL DRY BATTERIES

Square.

Extended Carbon. Spring Binding. Flush Top.

Round.

In stock flush top batteries, supplied in either round or square cartons. Can furnish with extended carbons or spring binding post connectors by shipping direct from factory.

Have proven themselves to be the most serviceable battery for automobile, motorboat or any system of gas engine **ignition purposes;** are also a superior cell for telephone, telegraph, door bell, signal service or in fact any work requiring a high grade dry battery.

Fitted with 1⅛-inch carbon, which gives much more contact surface and the mixture is made from the purest quality black oxide of manganese. The zinc case is tested thoroughly for air holes before being filled, insuring them against loss of strength from leakage.

Red Seal batteries are extensively advertised and well known as a standard battery.

GUARANTEE: We agree to credit account, replace batteries, or refund amount paid for any Red Seal Batteries which do not prove satisfactory.

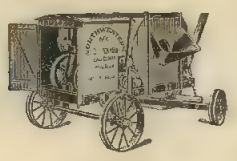
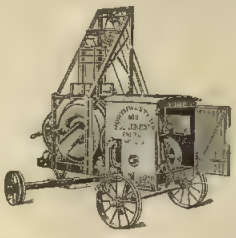
CONCRETE BATCH MIXING MACHINES

NORTHWESTERN

Designed to meet the demand for compact and reliable Concrete Batch Mixers of ample capacity for Contractors and Builders in mixing concrete or mortar. The Manufacturers Guarantee, as well as that of Marshall-Wells Company, goes with every Machine, which is guaranteed from defect in workmanship and material for a period of one year.



Outfit No. F450-4



Outfit No. F450-6

Combine well established principles in Quick Mixing and Rapid Discharging Drum Mixers; The Drum Shell is heavy 10 gauge Steel, fitted into Semi-Steel Drum Ends, equipped with Chilled Drum Tracks; The Mixing Drum is balanced on four Trunnion Rollers with Chilled Faces and fitted to Cold Rolled Steel Shafts which revolve in Babbitted Boxes; All parts fitted to the Drum are bolted and bolts protected with Lock Washers; The Drum Heads are held in place by six Steel Rods and the mixing is done with six Steel Blades and six Semi-Steel Buckets; The Drum will make 20 revolutions a minute which will give complete mixing in 60 seconds.

The Under-Frames of these Mixers are Steel throughout, of ample strength for hard and rough usage; Steel Wheels are set at standard Wagon Track Gauge which is a great advantage to contractors using Mixers in country districts.

Northwestern Engines supply adequate power and are the simplest Engines which the contractor can use, being equipped with water-cooled Hopper and frost-proof Cylinder; The Gears are enclosed in dustless Crank Cases and perfect carburetion is secured by Auxiliary Air Compensating Carburetor made only by the manufacturers of these Engines; Gasoline Tank holds sufficient fuel for a day's run and is fed by gravity through the Cylinder of the Engine so that there is no danger of explosion by gasoline leaking from a poor pump.

There is ample power in Northwestern Engines for these Mixers to be operated at any altitude and these models have been successfully used by contractors all over the United States.

MODEL 605

Capacity 6 Cubic Feet; 3½ H. P. Engine

	Each
+No. F450-4—On Steel Truck with Wheelbarrow Hopper, Gasoline Engine, Steel Housing and Team Pole	$945.00
Weight 2270 Lbs.	
+No. F450-6—On Steel Truck with Side Loader, Hoist and Frame, necessary Cable, Automatic Water Tank, Gasoline Engine, Steel Housing and Team Pole, no Wheelbarrow Hopper.	$1287.00
Weight 2940 Lbs.

MARSWELLS FEATHERWEIGHT

THE STANDARDIZED HIGHWAY BUILDERS SHOVEL

The Ideal Dirt Shovel for all general Contract and Farm Work.

Blade is Free Scouring, saving Hours per Day in Gumbo or Wet Clay,

Our Testing Laboratory, after years of research, after wearing out hundreds of Shovels by various violent Grinding and Smashing Tests, closely approximately every-day use, know the correct specifications and treatment necessary for the Finest Shovel Steel.

THE MARSWELLS FEATHERWEIGHT IS THE RESULT

The New Split Dee Handle gives the finishing touch of perfection; Reinforces the Grip, prevents splitting, and adds a Spring and Life that means More Work with Less Effort.

Century BICYCLES GUARANTEED ONE YEAR

The "Century" line has become firmly established as a sturdy attractive high class line of bicycles. All of our models are perfectly balanced and are finished in the most desirable colors. Please note that this line of bicycles is equipped with the newest accessories and mechanical improvements.

Each "Century" bicycle has the following desirable features and equipment:

FRAMES—20 gauge seamless tubing, flush reinforced fishtail joints.

FINISH—3 coats "Anti-rust" baked-on enamel

CHAIN—½ in. pitch roller, makes easier riding.

CONES—Turned from solid bar, full polished.

CRANK HANGER — 1 piece drop forged.

HUBS AND COASTER BRAKES—"New Departure."

SADDLES—"Troxel" easy riding

TIRES—U. S. chain tread single tube tires, fully guaranteed.

PEDALS—"Torrington," ball-bearing rubber tread, motorcycle type.

"NEW DEPARTURE" COASTER BRAKE

"CENTURY" ROADSTERS

For Boys and Girls

FRAME—Boys', drop bar; girls', standard loop

COLOR—Medium blue with white band

MUD GUARDS—Medium blue with white panel

RIMS—Aluminum finish wood.

SADDLE—Troxel's "Scout," coil spring padded top

HANDLE BARS—"Schauer" 3 in. extension

GRIPS—Non-slip reinforced rubber

BOYS'—1" in. x 3 seat post 20 in. handle bars 3 in. extension, 20 in. rims, 3 in. motor, bumper

Put A Price Ticket On Every Item

PORTABLE FORGES

CHAMPION STEEL BLACKSMITHS'

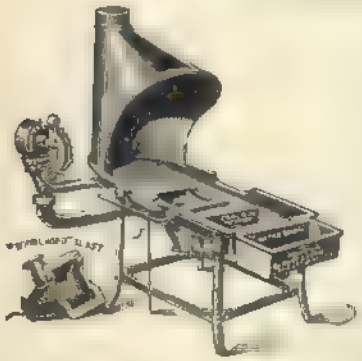
Adjustable ball bearings and half hood.

Especially designed and built for heavy as well as light work; well braced with angle steel. Crank turns either way to make a blast; each turn of the crank produces 46 complete revolutions of the blast wheel. Fan 12 inches in diameter, high speed, produces white heat blast.

No. 408. Hearth 30x36 inches, height 30 inches, complete with No. 400 Champion Whirlwind blast anti-clinker heavy nest tuyere iron; weight each 305 pounds .....each, **$130.00**

Extra. For water tank.....each, **10.00**

CHAMPION CAST IRON HEARTH BLACKSMITHS'

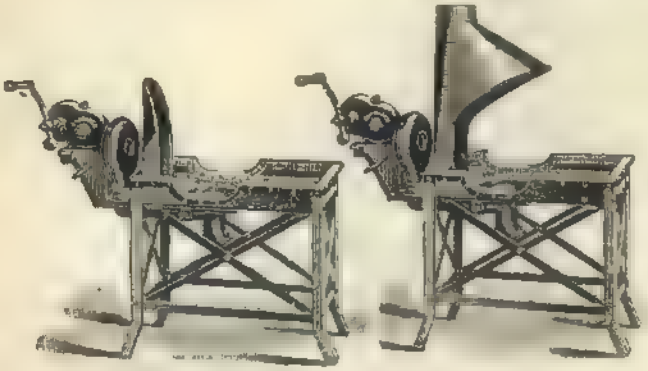


Adjustable ball bearings and half hood.

Recommended for the heaviest as well as the lightest work, and for use in blacksmith shops, garages, machine shops, etc., and any special work. Crank turns either way to make a blast; each turn of the crank produces 46 complete revolutions of the blast wheel. Fan 12 inches in diameter, high speed; produces white heat blast.

No. 433. Cast iron hearth 32x45 inches, complete with No. 400 Champion Whirlwind blast anti-clinker heavy nest tuyere iron; weight each 410 pounds.. each, **$110.00**

Extra. For water tank.. each, **10.00**



No. 404 with Shield **No. 405 with Half Hood**

CHAMPION STEEL RIVET AND TOOLMAKERS'

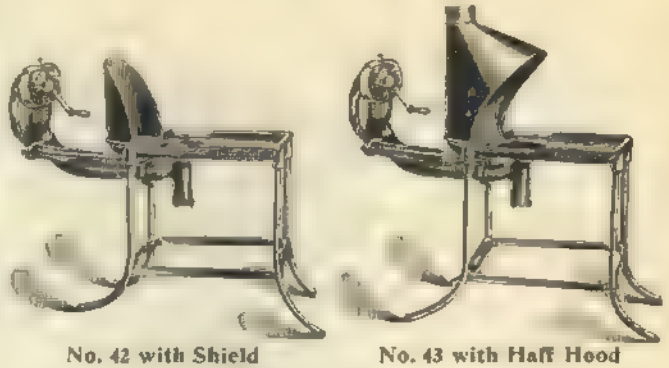
Adjustable Ball Bearings

A very light, stiff and practical forge for garages, horseshoers, tool makers, tank and bridge builders, boiler work, oil field work, or any inside or outside work. The blower and all machinery can be taken off for transportation.

No. 404. Champion steel rivet forge, with shield; hearth 24x24 inches, height 30 inches; fan 9 inches in diameter; weight each 180 pounds.....each, **$90.00**

No. 405. Champion toolmakers' forge, with half hood; hearth 24x24 inches, height 30 inches; fan 9 inches in diameter; weight each 185 pounds.....each, **98.00**

PORTABLE FORGES



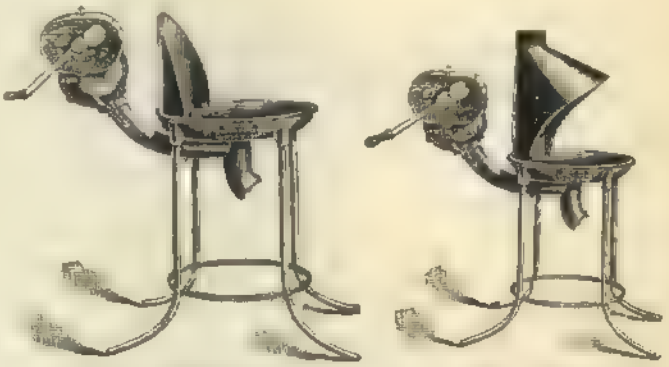
No. 42 with Shield **No. 43 with Half Hood**

LANCASTER GEARED AGRICULTURAL

A well built, low priced, direct drive forge; gives a good blast and is recommended for farmers' use. Well finished in every respect, with large hearth and fan. Blower equipped with extra large gears, accurately cut, running in a constant oil bath. High speed spindle with case hardened end, thrust ball bearing. Smooth running, with crank turning in either direction to produce the blast.

No. 42. With shield; hearth 23x35 inches, height 30 inches; fan 12 inches in diameter; heavy nest ball tuyere iron and shield; weight each 210 pounds.. each, **$72.00**

No. 43. With half hood; hearth 23x35 inches, height 30 inches, fan 12 inches in diameter, heavy nest ball tuyere iron and half hood; weight each 215 pounds .....each, **80.00**



No. 45 with Shield **No. 46 with Half Hood**

LANCASTER GEARED AGRICULTURAL

Recommended for farmers, garages and for general use where a well built, cut-geared, low priced, good blast producer is desired; suitable for all kinds of portable work; easily carried about, and makes a good rivet forge. Blower made with cut gears, noiseless and running in an oil bath; crank running in either direction to produce the blast.

No. 45. With shield; hearth 22 inches in diameter, height 30 inches; fan 10 inches in diameter; heavy tuyere iron and shield; weight each 140 pounds.. each, **$54.00**

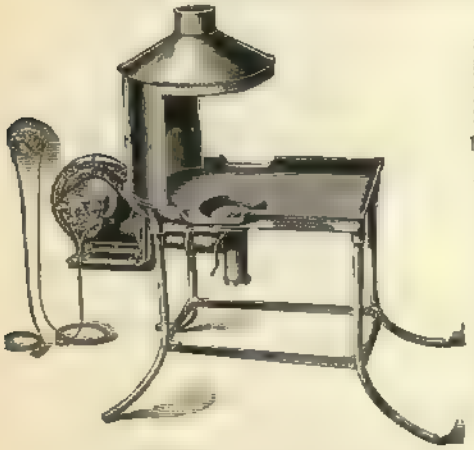
No. 46. With half hood; hearth 22 inches in diameter, height 30 inches; fan 10 inches in diameter; heavy tuyere iron and half hood; weight each 145 pounds .....each, **60.00**

PORTABLE FORGES

*Electric Driven

These electric driven forges are designed to meet the demands for all blacksmiths' heating purposes, from the smallest up to 4 inch square material, and the variations of the blast are governed by the six different changes in speed, as selected or desired, by movement of the lever on the detached rheostat; equipped with universal motor, for both direct and alternating current, either 110 or 220 volts, with detached rheostat for six speeds. Attachment plug to fit any electric light socket, and can be installed without any added expense.

CHAMPION MACHINISTS' CAST IRON



A particularly good forge for garage use in heating and tempering; all parts well finished and braced.

No. 443. With hood; complete with one fire, variable speed, electric blower and ball tuyere iron; hearth 23x35 inches, height 30 inches; weight each 215 lbs.. ....each, **$135.00**

CHAMPION BLACKSMITHS' CAST IRON

A very complete and practical outfit; large and roomy cast iron forge.

No. 441. With hood; complete with one fire, variable speed electric blower, whirlwind blast anti-clinker tuyere iron; hearth 32x45 inches, height 30 inches. weight each 400 pounds... ....each, **$160.00**

Extra. For water tank .. .. each, **10.00**

CHAMPION STEEL RIVET

Adjustable ball bearings, designed for use of railroads, bridge builders, boiler and structural iron workers. Equipped with a specially designed blower, which gives a strong positive blast, suitable to weld 3½ to 4 inch iron in 10 minutes. Gearing is the Champion No. 400, high speed, spiral construction; noiseless in operation and very efficient.

No. 401. With shield; round hearth 18 inches in diameter; height 30 inches; fan 9 inches in diameter; weight each 135 pounds ... .each, **$70.00**

No. 401½. With shield; round hearth 22 inches in diameter; height 30 inches; fan 9 inches in diameter; weight each 140 pounds.....each, **80.00**

*Not carried in stock; will ship from factory

PORTABLE FORGES

No. 152 with Shield

No. 153 with Half Hood

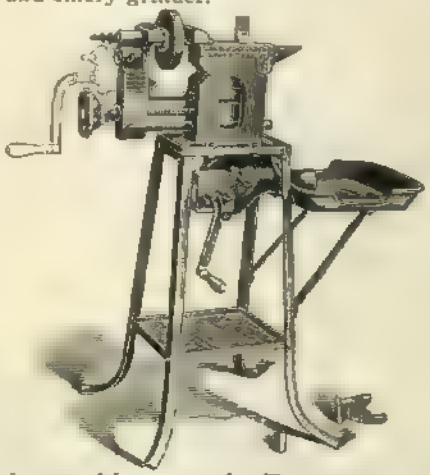
CHAMPION AGRICULTURAL CRANK

Especially adapted for farmers' use and very light repair work of all kinds; size of hearth is 18 inches in diameter, 4 inches deep; fan 8 inches in diameter with taper turned bearings; height 30 inches.

No. 152. With shield; weight each 75 pounds....each, **$28.00**
No. 153. With half hood; weight each 80 pounds.each, **32.00**

CHAMPION COMBINATION OUTFITS

Six tools in one; forge, vise, anvil, pipe vise, drill press and emery grinder.



A very high grade combination tool, built for hard service. Blower has silent running cut gears, and speeded high enough to produce a white pressure heat, so that welding can be done on any size work. Forge pan made large enough to heat a plow share. Blower gearing is detachable from the forge, and can be mounted on the front of the vise to form the drill press and grinder gearing. Gives three speeds for light, medium and heavy work. Emery wheel is screwed on the stud between the vise jaws and attached to the high speed gear, with a rigid support on each side of the wheel. Unscrewing emery wheel from its shaft and attaching drill chuck forms the drill press. Chuck uses ½ inch round shank, blacksmiths' drills. Vise has chilled faces and is supported by two heavy shafts, so that jaws meet perfectly, with no lost motion. Pipe jaws are chilled and easily attached. Anvil forms the rear part of the vise, and has true face, with horn and space for Hardie legs, made of angle steel, well riveted to the top plate and tool tray. Forge pan supported by two steel rods.

Height over all.....41 in.	Face of anvil..... 3x5¾ in.
Height to top of forge hearth .....26 in.	Size of Hardie.....⅝ in.

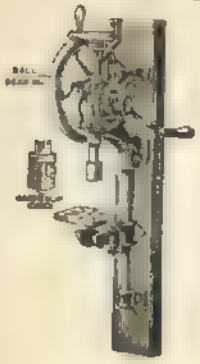
No. 30. Combination repair outfit complete; weight each, crated, 135 pounds.....each, **$70.00**

CHAMPION POST DRILLS

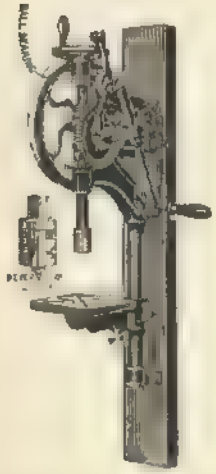
Self Feed, Ball Bearing



All bearings are ground out of solid metal. Automatic self feed, lathe turned and slotted table. Spindle bored like Neverslip chuck to take ½ inch straight shank drills.

Nos.	102	90
Drills to center of circle, inches	12	14½
Drills holes, inches	0 to ¾	0 to 1
Spindle diameter, inches	⅞	1¼
Spindle run, inches	3	3½
Table to spindle, inches	8¾	10
Height over all, inches	34	43
Weight each, pounds	75	105
Each	$26.00	36.00

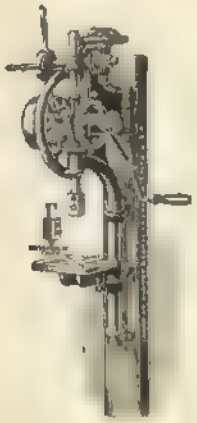
Original Ball Bearing, Self Feed Post Drills



Built with three gears with double journal bearings to each gear in order to give on the second speed the same turning direction of the crank as the first speed. All bearings ground out of solid metal. Drills to the center of a 16 inch circle; drills from 0 to 1¼ inch hole. Automatic self feed, lathe turned and slotted table. Spindle 1⅛ inches, up and down run 3 inches. Spindle bored like Neverslip chuck to take ½ inch straight shank drills. Distance from table to spindle 9½ inches; height of drill 46 inches.

No. BB. Champion original ball bearing self feed post drills, weight each 130 pounds.....each, **$49.00**

Hand Feed and Quick Return Self Feed Post Drills, Ball Bearing



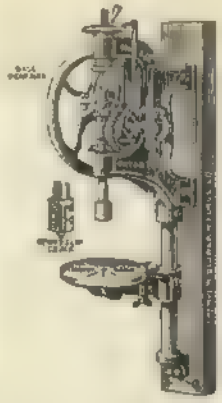
The propeller wheel hand feed and self feed are independent of each other, and for quick work the hand feed is unsurpassed and acts as the quick return for the drill bit. All bearings are ground out of solid metal. Drills to the center of a 16½ inch circle. Drills holes from 0 to 1¼ inches. Spindle 1⅛ inches in diameter. Up and down run of 5½ inches. Spindle bored like Neverslip chuck to take ½ inch straight shank drills. Distance from table to spindle 12⅜ inches, height of drill 50 inches

No. 97. Champion self feed and propeller hand feed, quick return post drills, weight each 175 pounds .....each, **$65.00**

No. 97P. Same as above, with tight and loose pulleys, 6 inches in diameter and 2 inch face for power. Speed 250 r.p.m., weight each 180 pounds....each, **75.00**

CHAMPION POST DRILLS

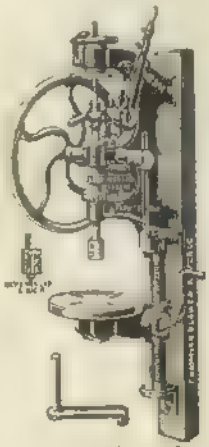
Combination Automatic Self Feed and Double Compound Lever Feed Post Drills, Ball Bearing



Automatic self feed and double compound link and rack lever feed are both independent of each other and are changed from one to the other instantly. With either feed, the drill spindle has instantaneous return of the drill bit out of the hole drilled and again instantaneous return on the material for the next hole. Drills to the center of a 16 inch circle. Spindle 1¼ inches in diameter, up and down run of 4 inches. Spindle bored like Neverslip chuck to take ½ inch straight shank drills. Distance from table to spindle 11 inches, height of drill 51 inches.

No. 200. Champion combination automatic self feed and double compound lever feed post drill, weight each 200 pounds.....each, **$90.00**

No. 200P. Same as above with tight and loose pulleys, 6 inches in diameter, 2 inch face, for power. Speed 250 r.p.m., weight each 205 pounds.....each, **100.00**

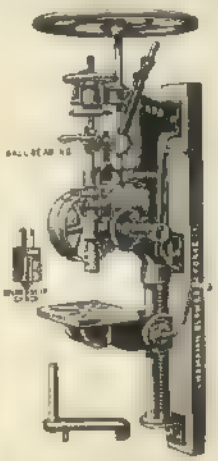


Compound Lever Feed and Automatic Self Feed Post Drills with Cut Gears and Ball Bearings

Drill spindle and bit is positively always raised up or down while using either feed, by the use of the quick acting lever, double geared for quick and slow work; quick action rack for raising or lowering the table. Drills to the center of 21 inch circle. Spindle 1¼ inches in diameter, up and down run of 5½ inches. Spindle bored like Neverslip chuck to take ½ inch straight shank drills. Drills holes up to 1½ inches. Distance from table to spindle 17 inches, height of drill 68 inches.

No. 201. Champion automatic self feed and compound lever post drill, weight each 415 pounds....each, **$144.00**

No. 201P. Same as above, with tight and loose pulleys, 11 inches in diameter, 2½ inch face, for power. Speed 100 r.p.m., weight each 440 pounds....each, **160.00**



Compound Lever Feed, with Cut Gears and Ball Bearings

Has a quick return, hand feed wheel, rack for raising or lowering the table, very quick in action and easy to work. Wheel holder attachment. Double gear for quick and slow speed, for light and heavy work. Drills to center of 21 inch circle. Spindle bored like Neverslip chuck to take ⅜ or ½ inch straight shank drill bits. Drills holes up to 1½ inch in diameter. Spindle 1¼ inch; up and down run of 5½ inches. Distance from table to spindle is 19 inches, height of drill 72 inches.

No. 203. Champion compound lever feed post drills, weight each 470 pounds.....each, **$180.00**

No. 203P. Same as above, with tight and loose pulleys, 11 inches in diameter, 2½ inch face, for power. Speed 80 r.p.m., weight each 495 pounds.....each **196.00**

CHAMPION POWER DRILLS

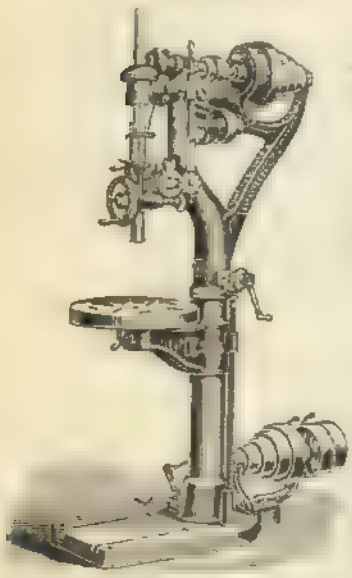
14-INCH UPRIGHT

A gear driven drill of the best and most improved construction. All beveled gears are planed which insures a perfect and smooth running drill. Bearings are large and powerful, upper bearing being split to take up wear when necessary. Spindle made of high carbon steel, graduated, ground and fitted throughout with ball bearings. Counterbalanced by a weight in the hollow column. Table is tilting and can be clamped at any angle. Quick acting screw for raising or lowering the table. All gears are carefully guarded. Hole in spindle bored to fit No. 2 Morse taper. Height of drill 69 inches, distance between table and spindle 34 inches, distance between spindle and base 45 inches from column to spindle center 7½ inches, diameter of column 4 inches, traverse of table on column 27 inches, size of table 11x11 inches, diameter of spindle ⅜ inch, traverse of spindle 6½ inches, size of tight and loose pulleys 7x2½ inches, size of four step cone pulleys 7⅛, 6⅜, 5⅝, 3⅛x2½ face; speed of driving pulleys 225 r.p.m.; floor space 16x18 inches; capacity ¾ inch; 1 horsepower required.

*Champion 14 inch upright power drill, complete, weight crated 490 pounds. each **$280.00**

20-INCH BACK GEARED UPRIGHT

Lever Wheel, Power Feed and Automatic Stop



An exclusive machine shop drill. All gears are machine cut, bevel gears are all planed, large and powerful bearings. Upper shaft has split bearings to take up the wear. Change from plain to back geared drill is made by simply sliding the gears. Has eight speeds with three distinct and complete feeds. Sleeve and spindle are ground and counterbalanced by weight in the hollow column, quick action screw for raising or lowering table. All parts carefully fitted and is one of the most accurate power drills made. Spindle takes No. 4 taper. Height of drill 75 inches; distance between table and spindle 27 inches; distance between spindle and base 42¼ inches, from column to spindle center 10¼ inches; diameter of crown gear 5¼ inches; diameter of pinion gear 3¼ inches; diameter of column 5¼ inches; traverse of table on column 18½ inches; diameter of table 16 inches; diameter of spindle 1¼ inches; traverse of spindle 8 inches; size of tight and loose pulleys 8x2¼ inches, size of four step cone pulleys 4, 5¾, 7½, 9x2 inch face; speed of driving pulleys 300 r.p.m.; floor space 16x46 inches; 1 horsepower required.

*Champion, 20 inch back geared drill, weight crated 825 pounds ..... each, **$560.00**

*Not carried in stock; will ship from factory

CANEDY OTTO POWER DRILLS

*20-INCH UPRIGHT

Equipped for hand lever feed or wheel and lever feed only. All gears are machine cut to insure smooth operation. Bearings are of the split type on the upper shaft with hydraulic pressed graphite cones. Spindle is accurately ground and counterbalanced by a weight in the hollow column. Bored to take Nos. 3 or 4 Morse taper. Spindle thrust is taken up by high grade ball bearings and graduated into ☆ inch divisions on the spindle sleeve. Height of drill 75 inches; drills 0 to 1½ inches; drills to center of 21 inch circle; diameter of spindle 1⅞ inches; vertical travel 9½ inches; diameter of crown gear 5⅞ inches; diameter of bevel pinion 3 inches; diameter of table 16 inches; vertical travel on column 19 inches; diameter of column 5⅝ inches; distance between table and spindle 27 inches; distance between spindle and base 39 inches; size of tight and loose pulleys 8x2½ inch face; size of four step cone pulleys 8⅝, 7¼, 5⅝, 4x2½ inch face; countershaft speed about 380 r.p.m.; floor space 15x41 inches

No. 35.	Plain lever feed	each,	**$242.50**
No. 35.	Wheel, lever feed	each,	**250.00**

CHICAGO HONEYCOMB RADIATORS

These radiators are made of brass, top and bottom tanks being drawn from one piece. Core is made of 36 gauge brass. As the radiator is assembled, it is dipped in molten solder which insures a leak-proof construction. Every tube is a water tube, giving the radiator greater cooling capacity than most radiators now offer. Due to this honeycomb construction, it will withstand frequent freezing without serious damage.

As additional features to eliminate leaks, the side brackets are soldered to the radiator instead of being riveted. They are of double hinge construction which permits flexibility and allows for vibration without damage.

Each Chicago radiator is fully guaranteed against defective material or workmanship and is thoroughly tested with air pressure under water before being shipped.

A stamped steel shell richly enameled in black is furnished with each radiator.

BUCKEYE STANDARD INCUBATORS

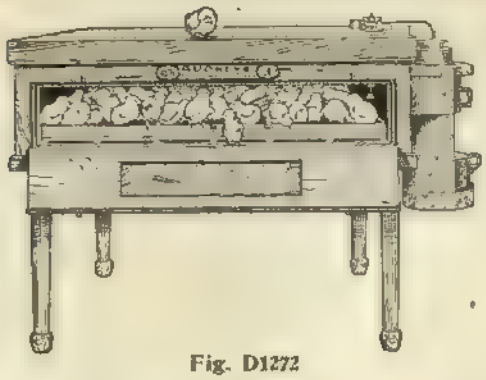

Fig. D1272

Constructed throughout the same as Nos. 1 and 2; with one large door and one small door in center; each door has small window protected by two lights of glass and trimmed with brass butts and spring catches; with oil heater.

No. 3. Capacity 250 hen eggs or 200 duck eggs; size of case 36⅛ x 36⅜ x 11⅞ inches; weight crated 170 pounds .....each, **$65.00**

NOTE—Buckeye Standard Incubators are equipped to burn artificial or natural gas, by substituting gas heater for the oil heater; incubators with oil heater will be sent unless otherwise specified

STANDARD COLONY BROODERS

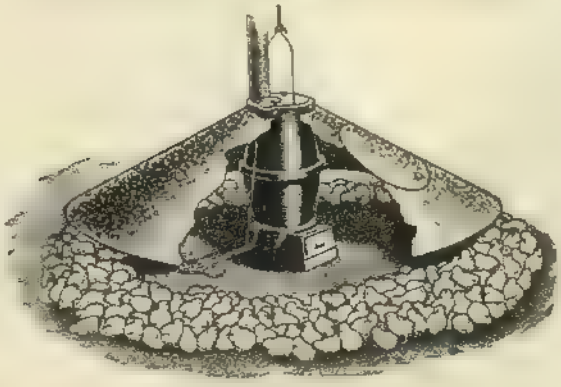

Fig. D1274

For Coal or Gas

Consists of galvanized sheet steel hover, with rope and pulleys, stove, pipe, thermostat regulator. The stove is of solid gray iron casting throughout, is self feeding and self regulating; burns hard or soft coal, artificial or natural gas; grates for coal are rocker furnace type, self cleaning and anti-clog; check valve is hung on knife bearings, opening outward and producing inward suction from outside atmosphere pressure; regulator consists of two double disc thermostats, tandem hitched; supported on substantial casting bolted to stove; low arm is movable and attached to check valve by iron rod, is chick proof, accurate and positive. Hover is mounted on ring casting that rests on top of stove, moulded to fit

Nos.	18	19
Stove height, inches	20¾	22½
Stove diameter, inches	10¾	12
Base, inches	11½	11½
Hover, diameter, inches	42	52
Capacity, chicks	500 or less	1000 or less
Weight, pounds	74	94
Each	$25.50	31.50

BUCKEYE STANDARD INCUBATORS

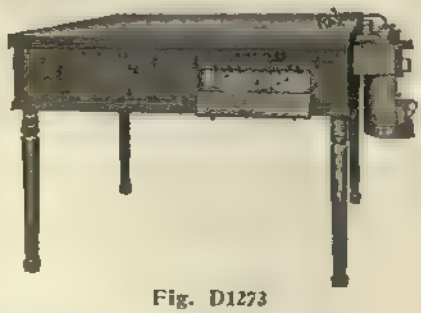

Fig. D1273

Constructed throughout the same as Nos. 1, 2 and 3, with double doors on front and back; each door has small window protected by two lights of glass, small door in center of each larger door. All doors trimmed with brass butts and spring catches. Has four egg trays, each tray holding 150 eggs. With oil heater

No. 5. Mammoth. Capacity 600 hen eggs or 480 duck eggs. Outside dimensions 54 x 54 inches, 36 inches high. Size of case 52⅞ x 52⅞ x 11⅞ inches. Weight crated 314 pounds .....each, **$120.00**

NOTE—Buckeye Standard Incubators are equipped to burn artificial or natural gas, by substituting gas heater for the oil heater; incubators with oil heater will be sent unless otherwise specified.

BUCKEYE PORTABLE BROODERS

Fig. D1275

For Kerosene Oil

Outside shell of brooder made of 28 gauge galvanized sheet steel; inner shell 28 gauge black sheet iron with one inch dead air space between. Supported by three cast iron legs. Curtain attached to body. Lamp bowl of seamless galvanized sheet steel fitted with Miller burner. Fittings of brass, chimney of black iron. Thermometer is mounted on hardwood turning which is dropped through top of brooder and brings the bulb of instrument down on level with chicks. Door in lamp chamber has large peep hole for observation of the lamp.

Nos.	21	22

No. P491D—Without Edger..... 19.50

Weight 30 Lbs Each

PONY LAWN MOWERS

RICHMOND GOLF

With Pony Attachment; Designed to mow large areas such as Golf Links, Public Parks, Cemeteries and large Lawns; Has Extra Bracing of Handle and Draft Attachment, together with Extra Heavy Shaft and Heavy Ball Bearings. The Lower Straight Blade is of the Laid Steel Pattern, very thick; Guaranteed the very best Blade in use; Mower can be used by one man, in ordinary grass; the Draft Attachment can be removed without trouble.

This Machine fills the bill exactly for a light running and durable, low priced Pony Mower, cutting a wide swath; Suitable for large lawns, with much shrubbery; Cuts within ⅜ in. of the ground; Very desirable where the expensive, extremely heavy, Roller Mower is not wanted.

Each

+No. F491E—Ball Bearing; Width of Cut 31 in.; Height of Drive Wheels 11 in., Diam. of Cutter 7 in ; Four Blade High Grass Reel....$74.00

One in Crate; Weight 80 Lbs.

+For Factory Shipment Only, F. O. B. Richmond, Ind.

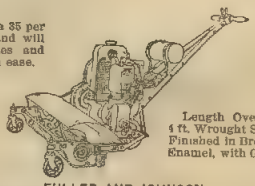
MOTOR LAWN MOWERS

COLDWELL COMBINATION ROLLER AND MOTOR

Does the work of four or five men, saving many times their cost in labor. They are simple in construction and easily handled. The operator simply guides the Mower. Negotiates any grade you would cut with a Lawn Mower. Capacity six to eight acres per day. Reliable Four Cycle Water Cooled Gas Engine, Two Horse Power.

Nos.	P491H	P491K
Model	H	G
Cut, In.	30	26
Weight, Lbs	850	950
Each	$850.00	950.00

Will climb a 35 per cent grade, and will handle Ditches and Terraces with ease.



Length Over-all 6¼ ft.; 4 ft. Wrought Steel Handle; Finished in Brewster Green Enamel, with Gold Striping.

FULLER AND JOHNSON

Combines Large Cutting Capacity with the Extreme Flexibility of the Hand Mower; Will do a beautifully finished job at one cutting, going around Trees, Shrubbery and anywhere a Hand Mower will go, and will cut 5 acres per day

Power from Motor is transmitted separately to Cutting Knives and to Traction Roller; Either can be thrown out of Gear instantly, or the Full Power of Motor can be given either.

Has a Reliable Four Cycle, 3½ H. P. Water Cooled Engine, requiring about one gallon of Gasoline per day.

Each

+No. F491M—Width of Cut 26 in.; Net Weight 240 Lbs.....$590.00

Shipping Weight 290 Lbs., Crated

+For Factory Shipment Only, F. O. B. Newburgh, N. Y.

INNER TUBES

"Pure Gum" red inner tubes are standard gauge, manufactured from pure gum, full floating stock of rubber, equal to any tube on the market. Will not leak at the splice or valve. The rubber is specially selected for its great tensile strength, elasticity, lightness in gravity and durability, forming an air tight tube. Each tube is full size, which is an important factor, as many tubes being offered the public are under sized.

HIBBARD gray inner tubes are made from the best grades of rubber selected for maximum wearing qualities. This tube has an acid cured splice, inside molded valve base, which greatly strengthens, at a point usually the weak part of a tube. HIBBARD tubes will be found to be practical, economical and satisfactory.

All the tubes are built on the laminated construction plan, which consists of a number of plies of rubber, laid one upon the other, all being forced and vulcanized into one thickness. This method of construction safeguards against pin holes, defect or porousness and destroys the grain, as a result of which the tube if punctured will not rip. Each tube is packed in an individual sealed carton, properly labeled and stamped and carries a full season's guarantee

ONE IN A SEALED BOX

COLTS AUTOMATIC PISTOLS

The action of these pistols is automatic, except that the trigger must be pulled to fire each shot, the cartridges being supplied from a detachable magazine inserted in the handle of the pistol. After the pistol is charged with a filled magazine, one opening movement is made by hand, bringing the first cartridge into the chamber. On pulling the trigger the cartridge is fired, the empty shell extracted, and a new cartridge loaded into the chamber, all these operations taking place automatically. This automatic operation of the pistol is effected by the recoil of the moving parts, and as a consequence the recoil is so absorbed in being utilized that it has no disturbing effect.

All Colts' Automatic Pistols are equipped with safety devices.

No. 1CNP.

Vest pocket model, hammerless, 25 caliber, 6 shots, 2 in. barrel, 4½ in. over all, rubber stock.

COLT AUTOMATIC PISTOLS IN CASES

Special cases, of the highest quality, made by the Colt Patent Firearms Mfg. Co., for Colt Automatic pistols, calibers 25, 32 and 380, that will appeal to the purchaser, of one of these pistols, who has in mind using the arm as a home defence or office weapon, or for presentation purposes. These cases are sturdily constructed of wood, covered with a high grade black leatherette. They are lined with velveteen and sateen, with a recess provided for the firearm. Two colors of lining are offered: dark blue and maroon. These cases will not be sold separately.

No. 1CX—Colt automatic pistol, 25 caliber, 6 shot, blued vest pocket model, hammerless, 2 in. barrel, 4½ in. over all, rubber stocks, in high grade black leatherette covered wood case, either blue or maroon lining ...**each $28.00**

No. 1NX—Colt automatic pistol, 25 caliber, 6 shot, nickeled, otherwise same description as No. 1CX, in high grade black leatherette covered wood case, either blue or maroon lining .....**each $28.00**

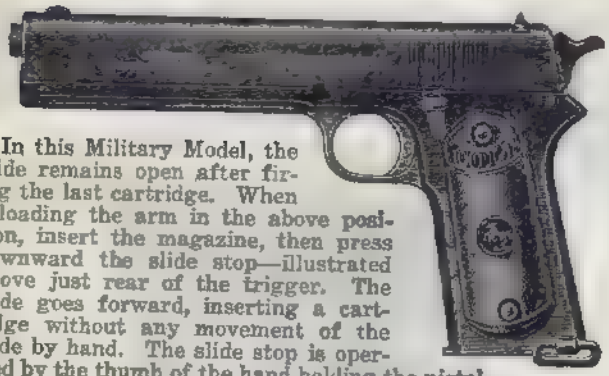
No. 1NPX—Colt automatic pistol, 25 caliber, 6 shot, nickel plated, Colt genuine pearl stocks with medallion monogram, otherwise same description as 1CX, in high grade black leatherette covered wood case, either blue or maroon lining .....**each $38.30**

No. 6X—Colt automatic pistol, pocket model hammerless, 32 caliber, 8 shots, blued 3¾ in. barrel, 6¾ in. over all, rubber stocks, in high grade black leatherette covered wood case, either blue or maroon lining ....**each $33.70**

No. 380X—Colt automatic pistol, pocket model hammerless, 7 shots, blued 3¾ in. barrel, 6¾ in. over all, rubber stocks, in high grade leatherette covered wood case, either blue or maroon lining .....**each $33.70**

ONE IN A BOX

COLT AUTOMATIC PISTOLS



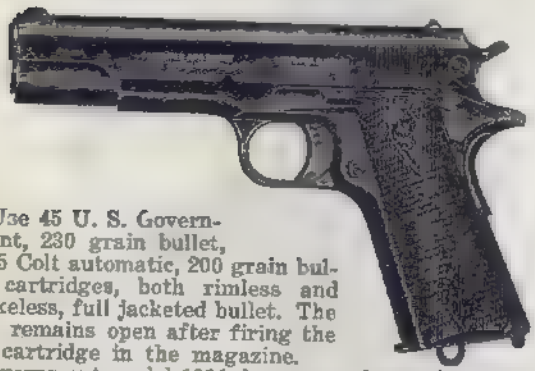
In this Military Model, the slide remains open after firing the last cartridge. When reloading the arm in the above position, insert the magazine, then press downward the slide stop—illustrated above just rear of the trigger. The slide goes forward, inserting a cartridge without any movement of the slide by hand. The slide stop is operated by the thumb of the hand holding the pistol.

Military Model, Hammer.

No. 7—38 cal., center fire, 8 shots, blued, 6 in. barrel, length over all 9 in., w't 38 oz. .....each **$62.00**

Extra Magazines, 38 cal., for Colt's automatic military pistols .....each **$2.50**

ONE IN A BOX



Use 45 U. S. Government, 230 grain bullet, or 45 Colt automatic, 200 grain bullet cartridges, both rimless and smokeless, full jacketed bullet. The slide remains open after firing the last cartridge in the magazine.

Government model 1911, hammer. Adopted by the U. S. government as the service side arm.

No. 45— 45 cal., center fire 7 shots, full blued, checkered walnut stocks, 5 in. barrel, length over all 8½ in., w't 39 oz. .....each **$54.40**

Extra Magazines, 45 cal. .....each **$2.50**

ONE IN A BOX

Pocket Model, Hammer.

No. 5C—38 cal., center fire, 7 shots, 4½ in. blued barrel, length over all 7½ in., w't 32 oz. .....each **$59.70**

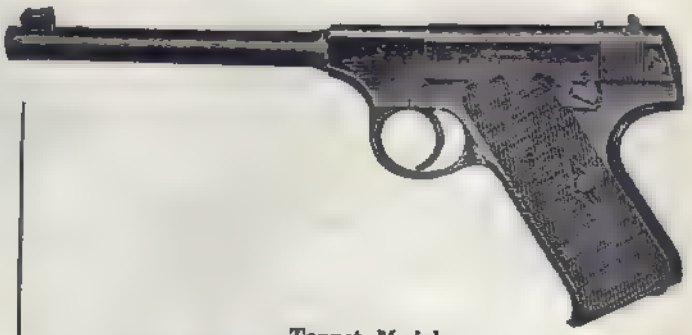
ONE IN A BOX

COLT AUTOMATIC PISTOLS



Target Model.

No. 22G—22 long rifle rim fire caliber, 10 shots, 6½ in. barrel, blued finish, check English walnut stocks, adjustable bead front and rear sights, lenght over all 10½ in., w't 28 oz. .....each **$43.50**

ONE IN A BOX

2175

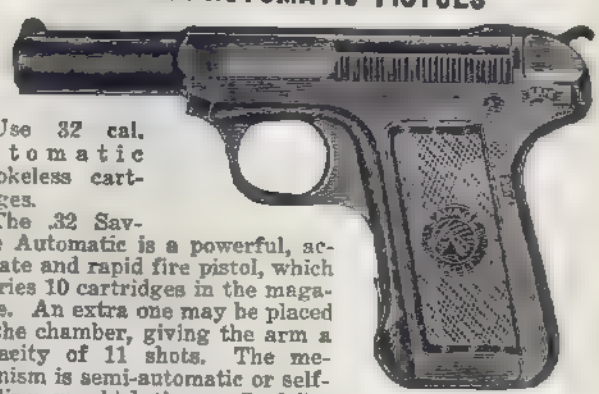
Chambered for 22 Long Rifle Rim Fire Semi-Smokeless cartridges—lubricated cartridges only.

Extra Magazines, 22 long rifle rim fire caliber, for No 22G pistols .....each **$4.00**

With its long barrel, light trigger pull, splendid balance and adjustable target sights—the front sight adjustable for elevation and the rear for windage—it possesses all the advantages of a single-shot target pistol, with automatic action in addition, obviating the inconvenience of reloading for each shot and allowing rapid fire and snap shooting.

The pistol has a slide lock safety which when the hammer is cocked may be pushed upward, thus positively locking hammer and slide. This cannot be done when the hammer is down. The safety acts as an indicator, showing whether or not the arm is cocked.

SAVAGE AUTOMATIC PISTOLS



Use 32 cal. automatic smokeless cartridges.

The .32 Savage Automatic is a powerful, accurate and rapid fire pistol, which carries 10 cartridges in the magazine. An extra one may be placed in the chamber, giving the arm a capacity of 11 shots. The mechanism is semi-automatic or self-loading, in which the recoil of firing the cartridge extracts and ejects the empty shell, also cocks the pistol, reloading it in readiness for the next shot, to fire each of which the trigger must be pulled.

Pocket model, new style hammer or cocking lever.

Blued automatic, 11 shots (including one in the chamber), length of barrel 4 in., length over all 6½ in., w't 19 oz.

No. 15— 32 caliber .....each **$30.50**

No. 16—380 caliber .....each **30.50**

EXTRA MAGAZINES

Single flue, top opens at back to allow fuel to be put in, either charcoal or live coals from common wood may be used.

No.	4C
Weight each, lbs	6½
Size base, inches	4¼x6¾
Per Dozen	$50 25

Half dozen in a wood box.

CHARCOAL SAD IRONS

SELF-HEATING
Tailors' Size.

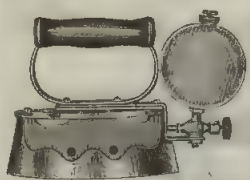
Cast iron; polished face and sides aluminum bronze top; painted wood handle; bright tin shield.

Single flue, top opens at back to allow fuel to be put in, either charcoal or live coals from common wood may be used.

No.	18C
Weight each, lbs.	18
Size base, inches	3¼x11¾
Per Dozen	$111 75

Half dozen in a wood box.

GASOLINE SAD IRONS
COMFORT



Cast iron nickel plated core, pointed on both ends; ebonized wood handle with heavy steel brace, protected from the heat by two asbestos pads and an air space; cast brass highly nickel plated gasoline fount.

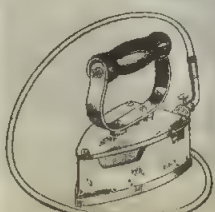
The iron is quickly lighted, and requires only ½ teaspoonful of gasoline to generate. The heat can be regulated to suit the operator. Operates 5 hours on one filling.

Each

No. CG—Size face 6⅞x8¾ in.; weight 6½ lbs.; capacity oil fount ¾ pint $11 70

One in a cardboard box.

GAS SAD IRONS
FAIRY QUEEN



Steel base, highly nickel plated and polished; black enameled wood handle Absolutely safe and odorless. Equipped with needle valve regulator and can be adjusted to gas pressure. Spreads a hot torch flame evenly over base of iron. Heats quickly and remains perfectly heated while ironing.

Furnished complete with 6 feet metal tubing and stand; size base 4x6¾ ins.

Each

No. FQA—For artificial gas. $9 75

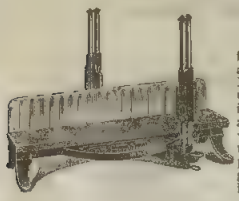
No. FQN—For natural gas. 10 20

One in a carton; weight each 5¾ lbs.

MITRE BOXES

STANLEY

Without Saw.



One piece cast iron frame, base and back accurately machined. Nickel plated trimmings. Cuts moulding up to 4 inches in size; saws at any angle from 45 to 90 with work lying parallel to back of box and is provided with depth gauge. Will take either back or panel saw.

Each

No. 50½—Length 18 ins., height 13½ ins., capacity at right angle 7¾ ins.; capacity at mitre 4¾ ins. $20 85

One in a wood box; weight per dozen 21 lbs.

IMPROVED NEW LANGDON

With Saw.

Cast iron frame, painted dark brown, malleable iron legs, corrugated back, polished steel uprights, cuts by using the circular arms or guides, from right angles to 75 degrees on 2¼ inch stuff, also cutting from right angles to 45 degrees. The only box adjustable for mitreing circular work to patterns, emery wheels and segments of various kinds.

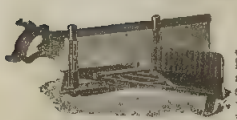
Capacity 9⅜ inches at right angle, 6¾ inches at mitre.

Nos.	31	32	34
Size	2	2	2½
Size saw, inches	22x4	24x4	28x5
Length frame, inches	19½x4¼	19½x4¼	19½x4¼
Weight each, lbs.	30	32	35
Each	$48 00	48 00	58 50

One in a wood box.

NEW LANGDON

With Saw.



Cast iron frame, painted corrugated back. Malleable iron legs, adjustable saw guides with spring lever clamping device to hold at any angle, notched to lock at regular angles from right angle to 45°; capacity 6⅜ inches at right angle and 4½ inches at mitre

Each

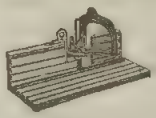
No. 20—Size, with 24x4 inch saw; length frame 19½x4¼ inches $39 75

One in a wood box; weight each 27 lbs.

MITRE BOXES

PERFECTION

Without Saw.



Japanned malleable iron frame, polished cast steel post, varnished inlaid hardwood base, tongued and grooved. Guide is held at any desired angle by sliding key and depth of cut is controlled by clutch on guide post, saws at any angle from 9° to 90° with work lying parallel to back of box. Detachable from wood base and takes hand, panel or back saw.

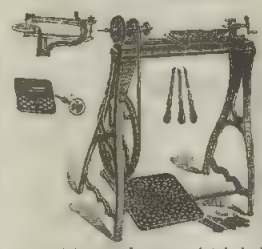
Each

No. 10—Length base 16 inches; width 6 inches, 4x3¼ inch back $9 00

Two in a wood box; weight each 5½ lbs.

LATHE, WITH SCROLL SAW ATTACHMENT

COMPANION



Japanned iron frame drive wheel and treadle; 7½ inch iron tilting table, 20½ inch hardwood arms, with blower attachment; 13 inch drive wheel, round leather belt. Height 39 inches. Base 25x15 inches, bed 24 inches long, has 2 inch face plate, one spur center and one screw center. The scroll saw can be taken off by loosening one bolt. The tailstock has a screw feed center which is secured at any point desired by a clamping device like that on modern engine lathes.

Driving wheel is made with two grooves of different depths to give change of speed, as the belt runs from it to the cone pulley. On the outer side of the pulley is a 4½x1½ inch solid emery wheel.

Each

No. 1—Complete with lathe attachment, 12 saw blades, wrench, sheet of designs, long tool rest, short tool rest, 6 drill points, 1 straight turning chisel, 1 skew turning chisel, 1 turning gouge and screw driver (no circular saw attachment included) $68 25

One in a wood box; weight each boxed about 75 lbs.

Each

No. 1S—Circular Saw Attachment only $4 20

Packed loose, wrapped; weight each about 3 lbs.

SCROLL SAWS

NEW ROGERS

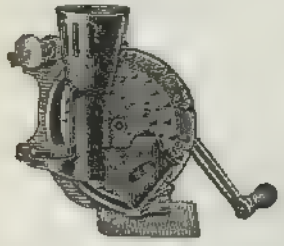
Japanned iron frame, drive wheel and treadle, frame ornamented in red and gold. Eight inch nickel plated iron tilting table, 20½ inch hardwood arms; with blower attachment, 12 inch drive wheel, round leather belt; height 37 inches. Base 23x16 inches, 6 inch Emery Balance Wheel, drilling attachment on right hand side.

Each

No. 2—Complete with 12 saw blades, wrench sheet of designs and three drill points $34 50

One in a crate; weight about 35 lbs.

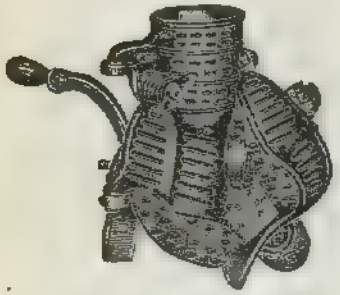
CORN SHELLERS



The tension of the hopper spring allows the hopper to expand and contract according to the size of the ear. At the outlet of the hopper a flange holds the ear close to the shelling disc or wheel, thus assuring a thorough shelling of the ear.

No. T100—Little Giant, 10 in. sheller disc or wheel with projecting teeth, spring hopper, adjustable for different sizes of ears, malleable iron frame, disc, crank, etc., heavy steel hopper spring, long axle bearing and hook, 7 in. crank with wood grip, w't per doz. 150 lbs.,
per dozen $24.00

ONE IN A CARTON



Manufacturer guarantees to furnish free any part that ever breaks, wears out or gets lost.

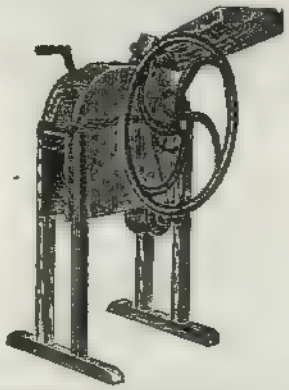
BLACK HAWK, 8½ in. shell wheel with round teeth, long chilled bearings, malleable iron hopper, separator and crank, will shell all sizes of ears, fastens to side of box by means of two clamps with winged nuts, capacity 8 to 14 bu. per hr., w't per doz. 180 lbs.

HALF DOZEN IN A BARREL

No. T1903—Full one-half dozen barrel, per dozen $54.00

No. 1903—Less than half dozen, per dozen $54.00

CORN SHELLERS



HIBBARD, hardwood frame, body and legs painted vermilion, striped in black and varnished. All iron parts painted black. Heavy balance wheel, light running gears and easily adjustable spring to receive and shell any size ear of corn. All parts strong and durable, 21 in. fly wheel, height 3½ ft., length 2 ft., width 12 in.

The HIBBARD shells prfectly clean, does not break the cob or throw out corn with the cob. Has hand wheel for regulating springs and cast iron frame for all boxes. It can be used with light power by replacing crank with pulley.

WITHOUT FAN

No. F5—Without feed table, w't each 138 lbs.★ .....each $24.00

No. F5T—With feed table, w't each 145 lbs.★ .....each $25.00

WITH FAN

No. F5F—Without feed table, w't each 143 lbs.★ .....each $27.00

No. F5FT—With feed table, w't each 150 lbs.★ .....each $28.00

ONE IN A CRATE, PART KNOCKED DOWN

No. F5P—Pulley Attachment, diam. 8 in., 2 in. face, for running [illegible] Sheller with 1 or 1½ h. p. engine, takes 2 in. belt, w't each 5 lbs., each★ $2.00

PACKED LOOSE

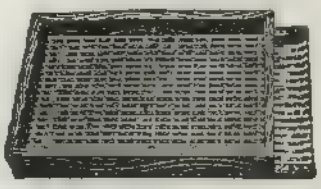
FODDER SQUEEZERS

For tying fodder and other bulky materials in shocks and bundles.

No. 4—Blair's, malleable iron japanned, for ¾ in. rope, w't per doz. 7 lbs. .....per dozen $7.00
Price does not include rope.

ONE DOZEN IN A BOX

SEED CORN GRADERS



No planter will drop right with ungraded seed.

Graded seed insures perfect dropping, stronger plants and increases yield 5 to 15 bushels per acre.

The Perfection has a special lower screen construction that sorts out the THIN wafer-like kernels as well as the ROUND and NARROW ones.

Both screens are corrugated giving every aperture an incline guard on lower screen which prevents spilling corn while grading, permitting action of entire screen on corn at once.

No. M21—Perfection, double screen, corrugated, beveled apertures, three kinds of holes in the lower screen, retains corn on lower screen until separation is complete, **size 11x19 in. capacity 6 to 10 bushels per hour,** per dozen $23.20

HALF DOZEN IN A BOX

A rotary screen never clogs, constructed so that kernels are turned on edge or on end that they may readily pass through. Will handle any variety of field corn. Crated for shipment with legs detached. Measures and basket not included.

No. N50—Double Rotary, 5 grade, height 30 in., length 32 in., width 15 in., composed of two corrugated steel drums, the finer screen drum surrounding the other; simple easily operated, accurate, quick acting, w't each crated 50 lbs.,
per dozen $232.00

★ Items Marked Thus ★ Are Shipped From Factory Only.

COUNTER PLATFORM SCALES

BUFFALO UNION

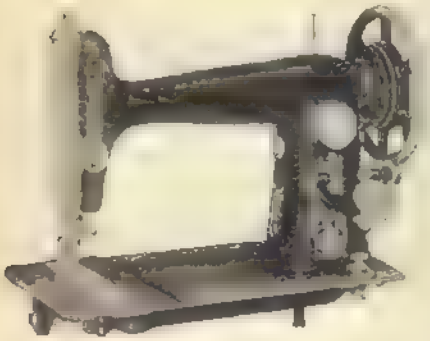
SEWING MACHINES

The sewing machines illustrated and described under our own special brands are manufactured especially for us by the recognized makers of high grade sewing machines. Every machine is accompanied by a ten year guarantee certificate, which we, as well as the manufacturers, will stand back of; this guarantee protects both you and your customers from any possible defect in the material, sewing qualities and workmanship of these machines.

Description of Style L Head



Style L

A high grade head of the lock stitch type, with vibrating shuttle movement and long, self threading shuttle. It is fitted with a square foot motion feed, devoid of any springs, and equipped with all up-to-date appliances and improvements, such as automatic bobbin winder, loose pulley stop motion and capped needle bar. Needles are interchangeable with the Free, Singer, VS Nos. 27 and 66 machines. Has the shortest take-up combined with a link movement, giving perfect thread control. Needle bar is enclosed from view. The toggle link needle bar drive is very powerful, making the machine strong and accurate in its work. Full high arm provides sufficient open space for the bulkiest work. Disc tensions insure an even adjustment of stitch, is automatically released by raising presser bar, allowing removal of work without breaking the thread. Finished in three coats of black enamel, hand rubbed and richly decorated. Steel parts nickel plated.

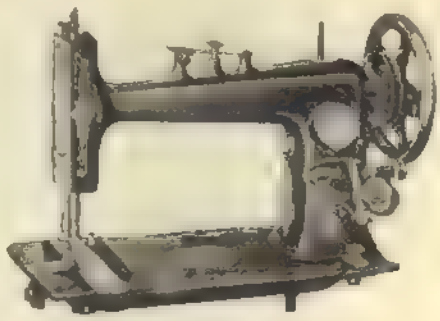
CRANBERRY

Equipped with Style L Head

The case is full quarter sawed oak, thoroughly hand rubbed. Highly polished, golden oak finish; swell panel front, drop head with steel bar automatic lift; six crescent shaped drawers, with wood knobs and steel drawer slides. Latest improved ball bearing French leg stand; ball bearing pitman, treadle and high balance wheel combine to make this a very light running machine. Griest attachments and a set of accessories furnished with this machine; also a ten year certificate of guarantee.

Cranberry. Equipped with Style L head; weight crated 145 pounds.....each, **$60.00**

Description of Style K Head



Style K

This head is of the lock stitch type, vibrating shuttle movement with long, self threading shuttle. The size of the stitch is regulated by an adjusting device placed on the bed of the machine just beneath bobbin winder. Tension device is placed on top of the arm. The needle is short, strong and self setting, interchangeable with the Free, Singer, VS Nos. 27 and 66 needles. Has automatic head latch, bed plate stitch regulator, large especially reinforced self threading shuttle, etc. Head is 5½ inches high under the arm; enameled in black and decorated in colors. Steel parts nickel plated.

CHEROKEE

Equipped with Style K Head

A neat case of solid oak, with veneered lid. Finished in a high luster or gloss polish. Panel front. The stand is of the ribbon French leg design, with long steel ball bearing pitman, high drive wheel, cone bearing treadle, drop head, four drawers, fitted with steel drawer locks; requires no keys for the drawers. A complete set of Griest attachments and a set of accessories furnished with this machine; also a ten year certificate of guarantee.

Cherokee. Equipped with Style K head; weight crated 135 pounds.....each, **$51.75**

A16	6	¾	5 oz.	$0.65
A18	8	1	10 oz.	.80
A110	10	1⅛	18 oz.	1.25

Adjustable Automobile Wrenches

Fluted drop forged bar, rounded edges, case hardened, black finish.

No.	18
Length, in.	9
Opens, in.	2⅛
Thickness of bar, in.	⅝
Weight each, oz.	14
Each	$0.55

Bicycle Wrenches

A first class wrench for the bicycle and for small adjustments around the auto.

No. A1 Length 5 in., opens 1¼ in., thickness of jaw ⅛ in., depth of jaw ⅛ in., bright finish....each, $0.35

Han-D Hammers

One of the most practical tools on the market. Useful around the automobile, in the garage and workshop and should be in the tool box of every mechanic.

It is nickel plated and polished all over. Measures 7½ in. long and weighs 10 oz. Head of hammer is a good grade of steel.

Three good serviceable screwdrivers of different sizes are nested inside the handle. The blades of the screwdrivers are made of high grade tool steel and all parts are nickel plated and polished.

With every unit package of 10 Han-D hammers a handsome display card is furnished free.

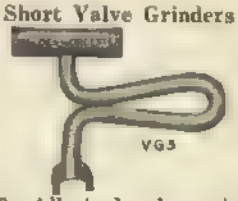
Han-D Hammers ..... each, $1.50

Adjustable Valve Grinders

This brace type adjustable valve grinder is instantly adjustable to all valve taps, whether slotted or drilled. Its simplicity of construction and directness of action from hand to work, results in a sensitiveness that experienced users will appreciate. Length over all, 16 in.

No. 60.....each, $1.00

Short Valve Grinders



No. VG3 All steel valve grinder. The original wire handle valve grinder redesigned with ⅝ in. bar handle which swivels on cone bearing. Sockets are shaped to fit valve heads and fitted with hardened steel pins ....each, $0.55

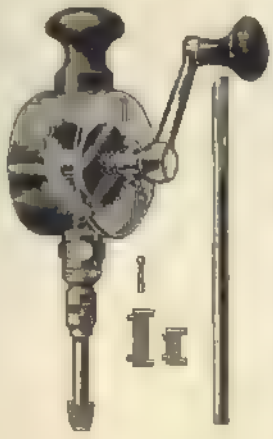
Ten in a Box

Long Shank Brace Grinders

No. VG2 Long Shank Brace Grinder. Some garage men prefer the brace grinder in place of short grinder VG3, a specially desirable tool for all garages. Length of shank, 11 inches. Size of sweep 9 inches.....each, $0.88

Ten in a Box

Sioux Valve Grinders



The hand grip is close to the crank center, thereby relieving the valve of the sidestrain that tends to cause irregularities in cutting.

Easy action is attained through ball bearings, and serviceability and durability by use of the best material and accurate workmanship.

By continuous movement of the handle in one direction, the valve is given a reciprocating motion, always traveling slightly forward in one direction, then in the opposite.

No. 400.....each, $7.00

One in a Box

Valve Grinders

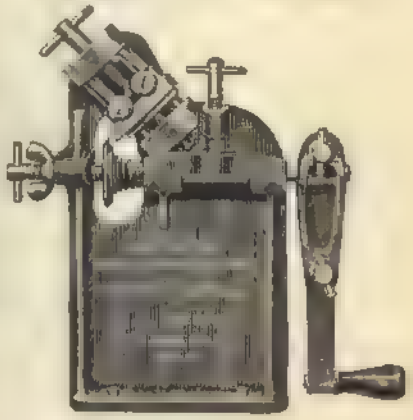
Little Sioux

Designed for individual use and is especially adapted for grinding Ford and other small valves.

Has ball bearings throughout, insuring easy action and less wear. Well balanced and has perfect stroke. Made of the best materials.

No. 401 Complete with six interchangeable driving points .$3.50

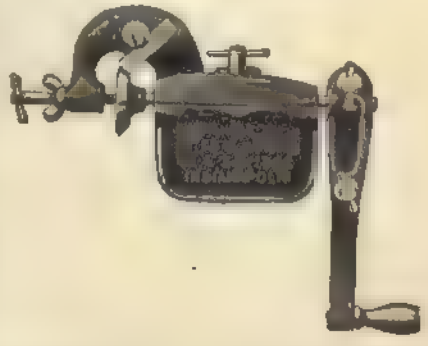
Universal Bench Valve Lathes



A simple, rugged, accurate and efficient lathe, with that real lathe action so necessary for many valves with steel heads. It will insure a smooth, non-carbon collecting surface and a perfect concentric fit. Has a capacity of valves with 45° or 30° heads up to 2½ in. diameter heads and ⅜ in. stems.

Universal Bench Lathe..... each, $15.00
Extra cutters..... each, 1.20

Junior Valve Lathes



For Ford valves and other valves with valve heads of cast iron or of ordinary hardness.

Outfit is light, compact, is easily clamped in vise or held in one hand and operated with other, and it cuts quickly and easily.

It requires no skilled machinist to operate and it saves time, yet produces a complete job.

Lathe complete with high speed steel cutter ready for use.

	Each
Junior	$7.50

SIOUX STANDARD VALVE TOOLS

Pat. Feb. 17, 1914; Nov. 26, 1918.

The SIOUX Valve Tool Set illustrated here is complete enough to take care of practically all the jobs that an average garage or auto repair shop is likely to get.

Sioux Valve Seat Reamers reface valve seats with the same dispatch, accuracy, smoothness and general satisfaction that the Sioux Valve Refacing Tool refaces the valves. The Standard Set is made in 45 degree angle only

No. 300—Price complete.....$28.50

Refacing Tool

Pat. Feb. 17, 1914; Nov. 26, 1918.

The construction and operation of this device is very simple. The cutter is made of the best kind of Tungsten Steel, hardened and tempered to stand hard service. It locks into your vise and is ready for use in an instant. One cutter only is furnished as regular equipment.

No. 304—Price with 45 degrees.....$7 25
No. 301—30 degree cutter..... 1 25
No. 302—45 degree cutter..... 1.25
No. 303—60 degree cutter..... 1.25

Beardsley Universal Valve Lifters

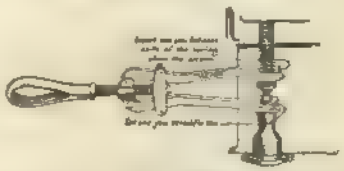
For All Cars

The Universal Lifter is made strong and durable with adjustable feature which will fit 90 per cent. of all makes of motors with removable head, valve in head or pocket, styles T. L. & I. With the adjustable feature and the size this makes a practical lifter for the mechanic who works on all makes of cars.

The foot is formed to fit the spring seat with large enough opening to eliminate all chance of hooking on the pin in the valve stem.

Universal Valve Lifters.....each, $2.50

Vichek Valve Lifters



Drop forged. The sliding cam increases the leverage as the valve spring is compressed and allows quick action with greatest ease.

No. 814..... each, $2.00

Victory Piston Ring Compressors

Adjustable tool can be arranged to fit rings from 2 to 5⅞ inches in diameter. Can be used on all type motors. Handles stamped from high quality steel. The adjustable band is in one piece from special grade steel.

Each..... $2 00

Valve Spring Releases

Pressed steel, japanned. Ratchet holds in whatever position it is left. Can be used on practically any type of motor, affording quick adjustment and easily operated.

No. 201.....each, $0.65

Chain Valve Spring Releases

Will fit any motor. The lever has a narrow fork at one end and a wide one at the other to accommodate valves having split washers or pins to hold the spring on the stem.

No. 200.....each, $0.75

Cady Piston Ring Compressors

Entirely automatic. No adjustments necessary. Fits all sizes from 2¾ to 4½ in. diam. Draw compressor over lower end of piston, place piston in cylinder and pressure on top of piston closes rings as they enter cylinder. White nickel finish.

Each.....$5.00

CRUSO HAMMERS

Under our Cruso Brand we offer a line of good quality, forged steel Hammers, suitable for all ordinary purposes, and which will be found highly satisfactory for use around the farm, house or shop. While Cruso Tools are neat and attractive in appearance, they have not the high finish or superior grade of handles used in our [redacted] or HIBBARD tools. Every Cruso Hammer is a surprising value for the price we ask.

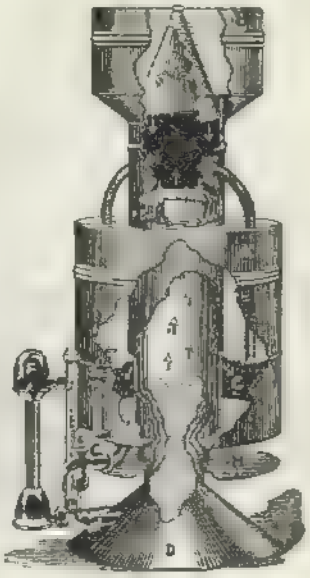
ICE CHAMBERS AND COVERS

For converting Nos. 61 to 66 filters into combination filters and coolers.

Nos.	061	062	063	064	066
For No.	61	62	63	64	66
W't, lbs.	4½	5	5½	8	11
Each	$1.10	1.40	1.60	1.80	2.00

ONE IN A BOX. W'T 25 LBS.

WATER STILLS



In operation vessels A and B are filled with cold water. Set still on fire, just like an ordinary tea kettle, and in a very short time pure, aerated distilled water will collect in reservoir C. The water feeds automatically from supply reservoir A to boiling chamber D, and when water has reached proper height, it is shut off by automatic valve at F. Gauge E indicates height of water in boiling chamber and gauge G shows distilled water in reservoir C.

NOTE—Deflector H prevents heat from stove or boiling chamber striking distilled water reservoir to drive off oxygen.

No. T11—Rose Automatic, heavy copper, nickel plated outside, all parts exposed to water are block tin lined, height 25 in., diam. of bottom 10½ in., capacity ½ gal. per hour, each $72.00

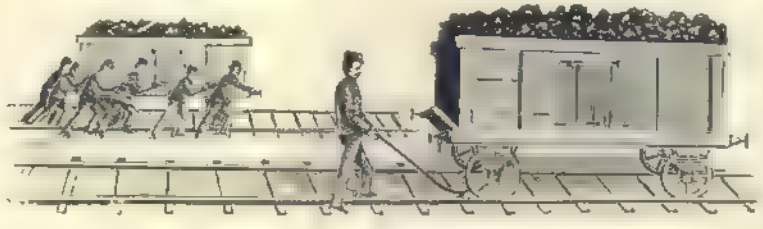
"THE CYCLOPS"
RAPID RAILWAY WAGON PROPELLER.

[PATENTED.]

"Le Cyclops"
Propulseur Rapide de Wagons de Chemins de Fer.
(Breveté.)

"The Cyclops"
Impulsor Rápido para Vagones de Ferrocarril.
(Patentado.)

OLD STYLE.



This invaluable tool can be worked by a youth. It will move locomotives or the heaviest wagons rapidity long.

Saves calling a number of men from their work.
Supersedes Horses or Switch Engines.

The heel has lugs downwards at both sides to hold it firmly in position as it slides along the rails, and to prevent it slipping sideways. When the pressure is released, a steel spring lifts the bit off the rail to save wear. The bits have three sharp edges, and may be turned as they get dull. A spare bit and spring are supplied with each Propeller.

FWO OPINIONS.

"It is better than a Switch Engine as it is always ready and does the work."
"It is the best thing I have come across and worth five times its cost to me."

LARGE NUMBERS ALREADY IN USE.

"MAJELLA"
RAIL AND GIRDER SAW.

FOR HAND POWER.

Scie "Majella"
Pour Rails et Poutres,
A Bras

"Majella"
Sierra para Railes y Vigas,
Para ser Accionada á Mano

INVALUABLE TO RAILWAYS, TRAMWAYS, GAS WORKS, CONTRACTORS, ENGINEERS, Etc.

Will cut Railway Rails, Tramway Rails, Joists, Channels, Angles, etc.
It takes 14-in. Power Blades and makes a clear cut of 9 ins. at one setting.
It is portable and can be moved and operated by one man.

DISTINCTIVE FEATURES:—
Accurate Cut, no Trimming required.
Economy in Blades, due to perfect alignment with provision for wear.
Speedy Adjustment for a wide Variety of Work.

IT IS SUBSTANTIALLY BUILT OF CAST IRON WITH GIRDER PARTS OF STEEL BUT CAN BE MADE, IF DESIRED, IN MALLEABLE IRON

Double Prepared Railway Carriage Roofing, "CALEDONIAN" BRAND

In response to the demand for a Roofing to withstand the trying and varied conditions of a tropical climate we have introduced **"Caledonian" Brand Double Prepared Roofing,** which has been severely tested in actual use and has been found to give the utmost satisfaction

It is made on scientific principles from genuine materials, and is admitted to be the best Roofing on the Market.

This Roofing is made in lengths up to 150 feet and widths up to 15 feet in **Seamless Pieces.**

It is easily, and should be lightly, yet firmly, stretched into position on the roofs, and then tacked down under the eaves.

NO BEDDING MATERIAL WHATSOEVER IS NECESSARY.

The Roofs are complete when "Caledonian" is used.

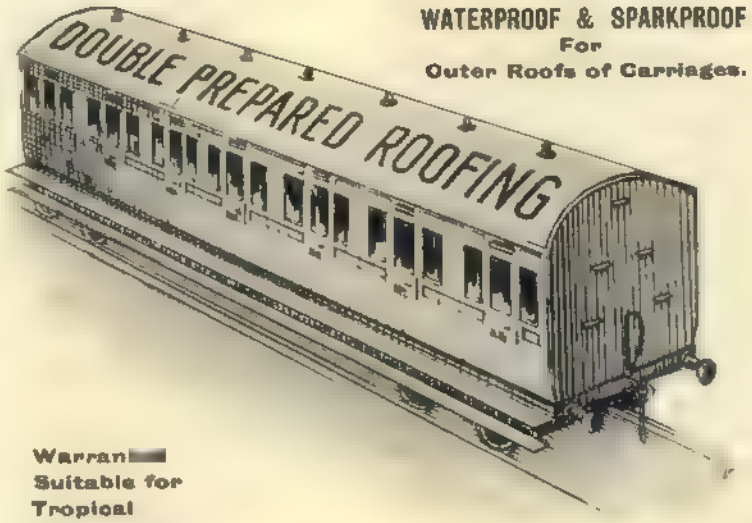
About six weeks are required for the preparation and thorough maturing of this Roofing, and the advantages specifying "Caledonian" are :—

1.—The Roofing can be prepared as the coaches are being built, so that carriages and covered wagons can be turned out complete without delay.

2.—The roofs are complete as soon as the "Caledonian" Roofing has been fixed down, thus saving labour, time and expense.

3. A stock of "Caledonian" Roofing enables the carriage superintendent to fit new roof cloths to his vehicles in a day or two, allowing carriage stock to be constantly on the road.

4.—The Roofing is made from genuine canvas without any admixture of jute, and no paper pulp is used in its preparation.



WATERPROOF & SPARKPROOF
For
Outer Roofs of Carriages.

Warran[illegible]
Suitable for Tropical Climates.

PACKED FOR EXPORT. When ordering please state length and width of roofing, including overlaps.

Code Word "Caledonian," *e.g.* Twenty Caledonian 64 12 ; *i.e.* Twenty pieces "Caledonian" Roofing 64 feet long and 12 feet wide.

COUVERTURE, Marque "CALEDONIAN," à Double Préparation pour Voiture de Chemins de Fer.

SHOP EQUIPMENT

C-O-BURNING-IN AND RUNNING-IN MACHINE

For Ford Motors

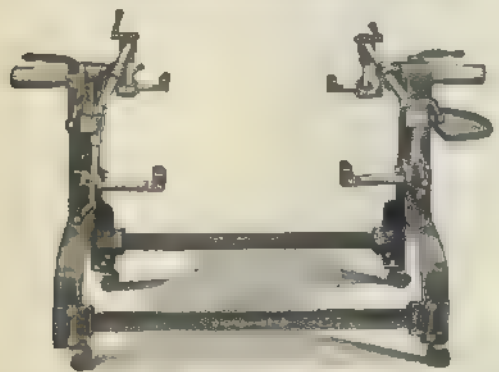
Is compact, well built, speedy, reasonably priced, accurate and durable and will produce a perfect bearing surface.

Due to rigid construction, vibration is eliminated. Has heavy properly balanced fly wheel. Heavy duty toggle type clutch. The clutch is equipped with a positive gripping surface and is adjustable to any pull. All bearings are in full view of operator while being burned in, which permits making adjustments and tests. After bearings are properly burned in. Motor is assembled and placed on running-in stand and run under its own power until it is sufficiently limbered up. Gas tank, coil box holder and water connection are regularly equipped.

Specifications:—Width of base, 18 inches; length 76 inches; total width 28 inches; total height 32 inches; diameter fly wheel 23 inches; face of fly wheel 9 inches; R. P. M. of fly wheel 450 to 500; height from bottom of base to center of main shaft 20¾ inches. Weight 775 pounds; shipping weight 945 pounds.

C-O-Burning-In Machine (for Ford Motors) Each $194 00

C-O UNIVERSAL MOTOR STAND



Will accommodate any type of internal combustion motor either three or four point suspension. Is the most flexible stand manufactured. The round bars are accurately machined permitting fixture heads to be easily moved to any position and turned at any angle and instantly clamped.

The up and down, and end to end, round and round movement permits the fixtures to reach any convenient place for bolting to any part of motor. Motors can be perfectly balanced on this stand, through the up and down movements of the heads. Stand is amply strong to support motor while being run in under its own power or in connection with C-O Universal Burning-In Machine.

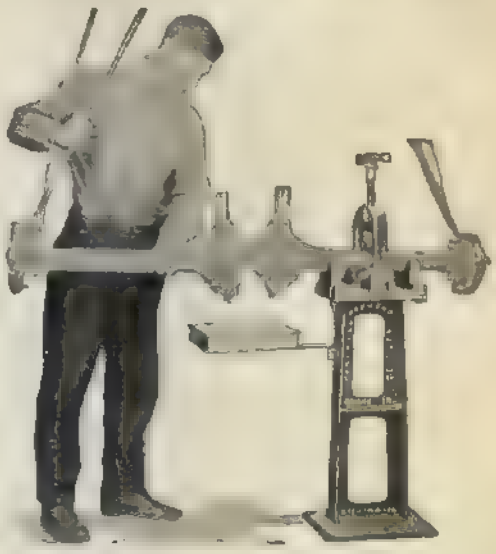
Tool Tray furnished as regular equipment.

Height 38 inch Floor Space fully extended, 50x32 inches. Weight 420 pounds. Shipping weight 465 pounds.

C-O-Universal Motor Stand.....Each $61.00

Gasoline Tank extra.....Each 6.75

C-H UNIVERSAL REAR AXLE STAND

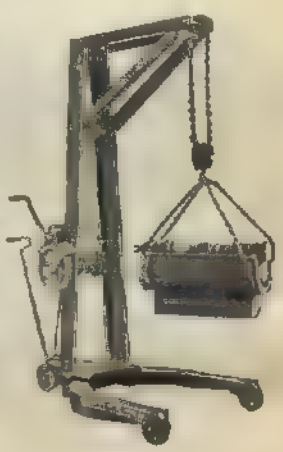


Will hold rear axle assemblies, drive shafts assemblies, drive shafts or rear axles in any position desired. Base is of very heavy construction, the clamping device consists of large V Blocks with a sturdy pipe vise mounted in center, making a very substantial clamp, will hold the heaviest assemblies without danger of slipping or turning while assembling, disassembling, fitting bearings, or any other job that may be necessary to perform. Weight 80 pounds.

C-H Universal Rear Axle Stand.....Each $34 00

C-O PORTABLE CRANE

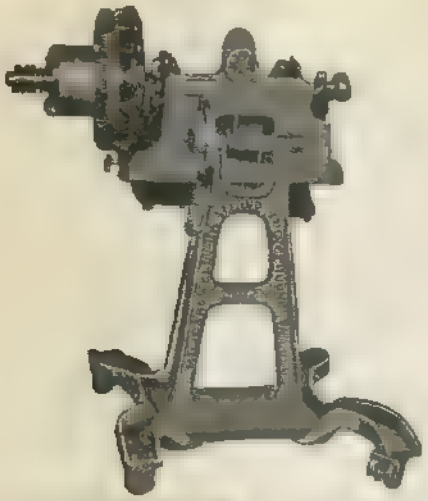
Is designed especially for garages and service stations. Frame is of light steel and base is of heavy cast iron, making it well balanced. The overhang is sufficient to reach the center of any car or truck. Base will pass under all axles. The handle and front casters work on an accurate, which automatically locates crane while standing equipped with single overset winch pulley and steel drum sheaves with ratchet lock. Total height 8 feet 3 inches, height of boom 7 feet, overhang 3 feet; Outside width of base, 3 feet, inside width of base 2 feet 3 inches, length of boom 4 feet 5 inches, height of base, 8 inches; Lifting capacity 1 ton; Weight 630 pounds.



No. 0—C-O Portable Crane.....Each $90 00

GARAGE AND SHOP EQUIPMENT

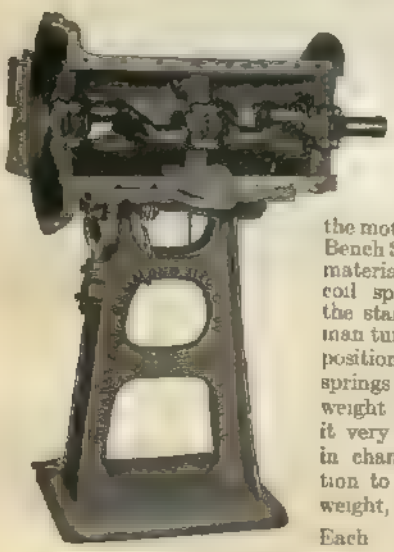
CARSWELL-HAMMOND MOTOR BENCH STAND FOR FORD



Built and designed especially for the Ford motor. The stand makes it easier for the workman, enabling him to work from all sides. The repair man simply turns the motor to any desired position (**notice the heavy coil spring to help the repair man turn the motor from one position to another**), thus doing away with the several stationary bench plates that are required for the same operations. When motor is once placed in the stand, it can be dissembled or assembled without removing. The motor block is held firmly in the bench without any interference as to the operations on it. The stand has a foot lever to operate the dog, so the repair man can use both hands in turning the motor to the position he desires. Shipping weight with portable base, 260 pounds. Without base, 170 pounds.

Motor Stand, without Portable Base $42 50
Motor Stand, Portable Base only 19 50

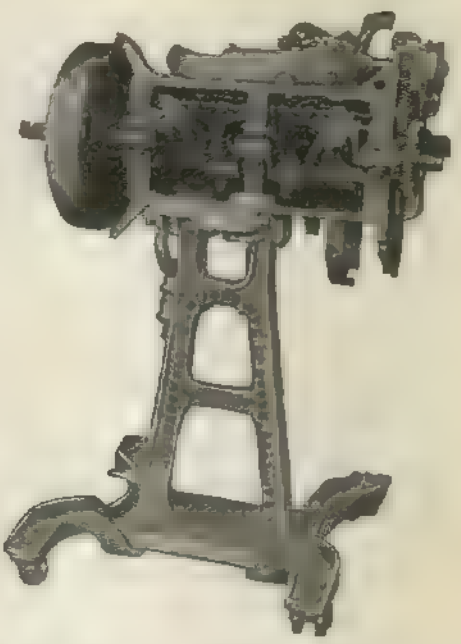
CARSWELL-HAMMOND REPAIR STAND FOR FORDSON TRACTOR MOTOR



This machine handles the motor in the same way as the Motor Bench Stand for Ford motors. It operates in the same manner, all the work being done without removing the motor block. This Motor Bench Stand is built of heavy material throughout. Heavy coil springs are placed on the stand to help the repair man turn the motor from one position to another. These springs support part of the weight of the motor, making it very convenient and easy in changing from one position to another. Shipping weight, 325 pounds.

Each $70 00

CARSWELL-HAMMOND REPAIR STAND FOR DODGE MOTORS



Built and designed especially for the Dodge motor to speed up the repair shop, to save time and do better work. The stand makes it easier for the workman, enabling him to work from all sides. When the motor is once placed in the stand, it can be dissembled or assembled without removing. The motor block is held firmly in the bench, without any interference as to the operations on it. The stand has a foot lever to operate the dog, so the repair man can use both hands in turning the motor to the position he desires.

Shipping weight, with portable base, 300 pounds. Without portable base, 210 pounds.

Repair Stand, without Portable Base $47 50
Repair Stand, Portable Base only 19 50

PORTABLE BASE

This base with casters makes the Dodge and Ford Motor Bench Stands portable. Where repair shops are limited for room and it is impractical to bolt the bench to the floor, this base makes it possible to easily move your work as necessity demands. Weight, 9 pounds.

Portable Base ..... Each $19.50

WYANDOTTE DAIRYMAN'S CLEANER AND CLEANSER

Before scientific dairying demanded the most exacting cleanliness possible to obtain, it was commonly believed that most any kind of cleaning material could be used in the dairy. However, with the growth and development of this great industry came the demand for a new high standard of sanitary cleanliness. To fill this need a new cleaning material known as Wyandotte Dairyman's Cleaner and Cleanser was developed and standardized to cope successfully with all dairy cleaning problems.

This extraordinary cleaner produces safe, sweet, wholesome, sanitary cleanliness when used for washing milk pails, strainers, coolers, separators and cans. It cleans sanitarily clean with such a saving of time, labor and cleaning material that it lowers the cost of production thereby making its use economical. Moreover because of its exceptional cleaning qualities it helps produce high quality products which bring bigger financial returns.

Shipped from Chicago Stock or from various storehouses in all principal cities of U. S. and Canada.

Sold only in cases and barrels.

For All Kinds of Dairy and Domestic Cleaning.

No. W1—Cases of twenty-four 5-lb. sacks .....per case $15.40

No. W2—Barrels of fifty 5-lb. sacks only .....per barrel $29.80

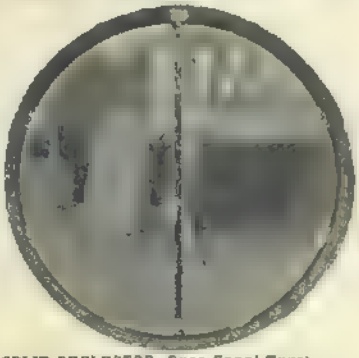
C. A. PARSONS & COMPANY. LTD.

MANUFACTURERS OF SEARCHLIGHT REFLECTORS AC OF ALL DESCRIPTIONS AND SIZES.



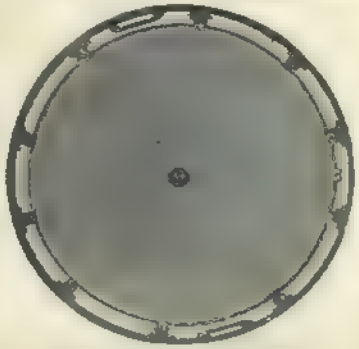
SPLIT REFLECTOR (Suez Canal Type).
The view above shows a Reflector of which the halves are hinged together. By this means a single or divided beam or two beams at varying angles with each other can be obtained. With a combined Parabola Ellipse Curvature a beam can be obtained of any width from half to the full width of the Reflector or two beams at an angle to each other, with a dark centre between. The hinged parts are manipulated by a small lever at the back of the Reflector

RÉFLECTEUR EN SEGMENTS (Type du Canal de Suez)

La gravure ci-dessus représente un réflecteur dont les moitiés sont jointes par une charnière. Par ce moyen on peut obtenir un faisceau unique, un faisceau divisé ou deux faisceaux présentant entre eux un angle variable. Une zone d'ombre centrale peut également être obtenue avec une courbure combinée parabole-ellipse. Les parties articulées sont manipulées par un petit levier situé à l'arrière du réflecteur.

REFLECTOR HENDIDO (Tipo Canal de Suez)

El grabado de arriba representa un reflector, cuyas dos mitades se hallan engoznadas entre sí. Por este sistema se obtiene un rayo sencillo o dividido o dos rayos á ángulos diferentes entre sí con una zona de sombra entre ellos. También se puede conseguir un rayo de cualquier amplitud desde la mitad hasta la totalidad del ancho del Reflector ó dos rayos en ángulo uno con el otro, con un centro obscuro entre ellos. Las partes engoznadas se hallan manipuladas por una palanca pequeña en la parte posterior del Reflector



REFLECTED IMAGE OF TWO SETS OF PARALLEL LINES AT RIGHT ANGLES TO ONE ANOTHER.
The Reflector is mounted in its supporting ring.

RÉFLEXION DE DEUX FAISCEAUX DE LIGNES PARALLÈLES À ANGLE DROIT L'UNE DE L'AUTRE. Le réflecteur est monté sur son anneau de support.

IMAGEN REFLEJADA DE DOS HILOS DE LINEAS PARALELAS EN ANGULO RECTO

El Reflector se halla montado en su anillo de sostén

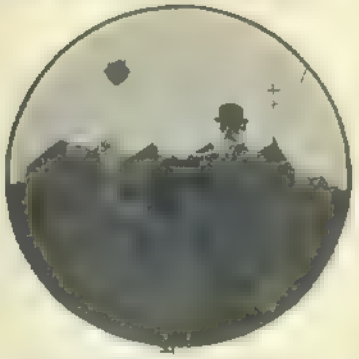
59½	1,510	25½	654	103	46,72	172	78,02



The view above shows the front of a protected Reflector which has been pierced by a rifle bullet. Although shattered to a considerable extent, the Reflector is held together by the protection on the back and gives practically as good a beam as before.

La gravure ci-dessus représente la partie antérieure d'un réflecteur protégé, qui a été percé par une balle de fusil. Quoique fracassé dans des proportions considérables, le réflecteur ne s'est pas mis en pièces parce qu'il est maintenu par le chemisage, dont celui-ci est recouvert, et il projette encore un rayon aussi puissant qu'auparavant.

El grabado de arriba representa la parte delantera de un Reflector protegido que ha sido atravesado por una bala de rifle. Aunque destrozado considerablemente, el Reflector se mantiene junto por su protección en la parte posterior, y proporciona un rayo de luz casi tan bueno como anteriormente.

The view above shows the protection on the back of the Reflector, consisting of lead and wire netting covers secured to the edge of the Reflector by a clamping ring

La gravure ci-dessus représente le blindage postérieur du réflecteur, consistant en chapes de plomb et de treillis métallique, fixées aux bords du réflecteur par un anneau à griffes.

El grabado de arriba representa la protección en la parte posterior del Reflector, y consiste en cubiertas de plomo y tejido de alambre sujetas al borde del Reflector por un anillo de sujeción.

Height over all, inches	31	34	36
Weight crated, pounds	75	85	100

NOTE—When ordering motors for alternating current, specify voltage, cycle and phase. For direct current, specify voltage only.

FOLDING IRONING TABLES

RID-JID

Showing table open with its rigid construction. The simplest, lightest and sturdiest folding table built. The truss construction makes it strong and sturdy; will not tip over. The open end construction permits ironing skirts at full length without lifting the board. Stands rigid on uneven as well as even floors. The sliding stretcher rods are made of heavy gauge wire, which prevents binding. Main legs are attached to a sheet metal housing which in place is attached securely to board. The inner braces of main legs are steel and prevent spreading. A sleeve board can be easily attached at a small additional cost. Made of aeroplane spruce

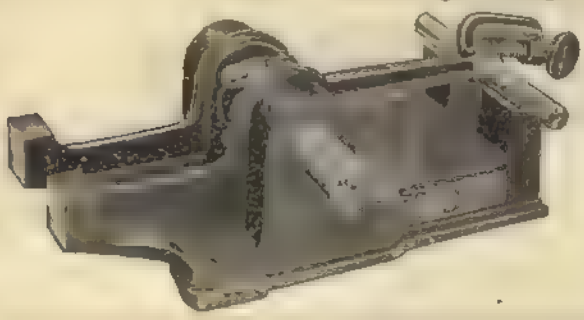
Dearborn Connecting Rod Aligning Devices

For Fords



A compact, well built jig for aligning, testing and straightening Ford connecting rods.

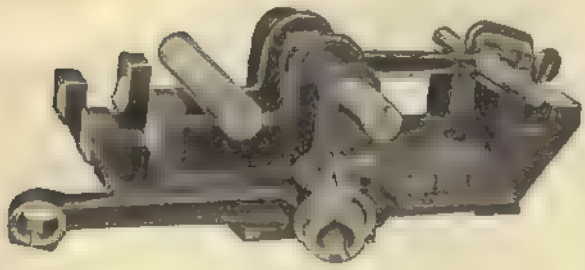
It enables the operator to determine whether or not connecting rods are bent or twisted.

Weight, 32 lbs.

No. C1.....each, **$25.00**

Dearborn Connecting Rod Aligning Devices

For Fordson



A compact, precisely machined and neat appearing jig for aligning, testing and straightening Fordson connecting rods.

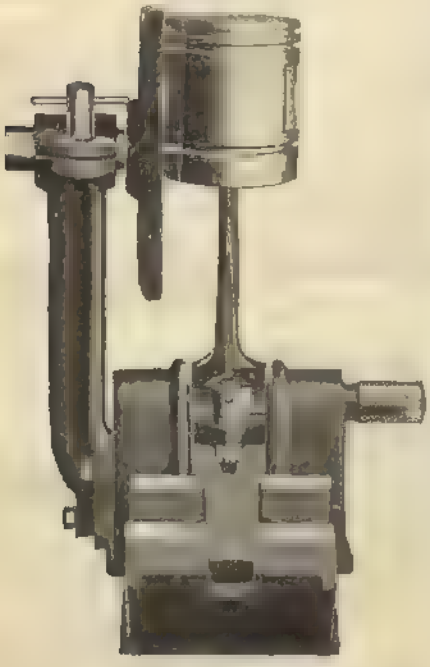
It helps the mechanic to quickly determine whether or not connecting rods are bent or twisted.

Weight, 46 lbs.

No. C2.....each, **$37.50**

Dearborn Connecting Rod and Piston Alignment Devices

For Ford and Fordson

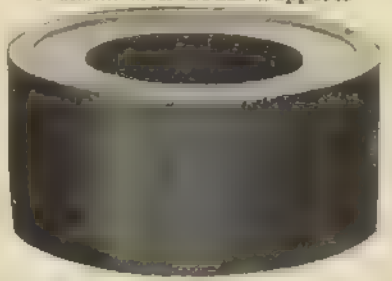


This device is for aligning, testing and straightening Ford and Fordson connecting rods, also for squaring pistons with crank shaft bearings. It enables operator to determine whether or not connecting rods are bent or twisted and allows straightening or adjusting to be done without removing rods from mandrel.

Weight 60 lbs.

No. C3.....each, **$50.00**

Transmission Drum Supports



Supports Ford transmission drums on arbor press while removing and replacing bushings.

No. 13M .....each, **$2.50**

H-M Transmission Band Relining Machines

For Fords

Regulation split or tubular rivets can be used in this machine. The upsetting die turns the tip of the rivet over and forces it into the strands of the lining. The strongest kind of purchase is thus provided for the rivet. The rivets are clinched with a uniform smooth surface and cannot score the transmission drums. The lining cannot buckle, as the operator has one hand free at all times to hold the lining to a perfect fit. No trouble is experienced in using this machine should the hands of the operator be greasy.

No. MM22..... .....each, **$22.50**

Combination Gear Pullers

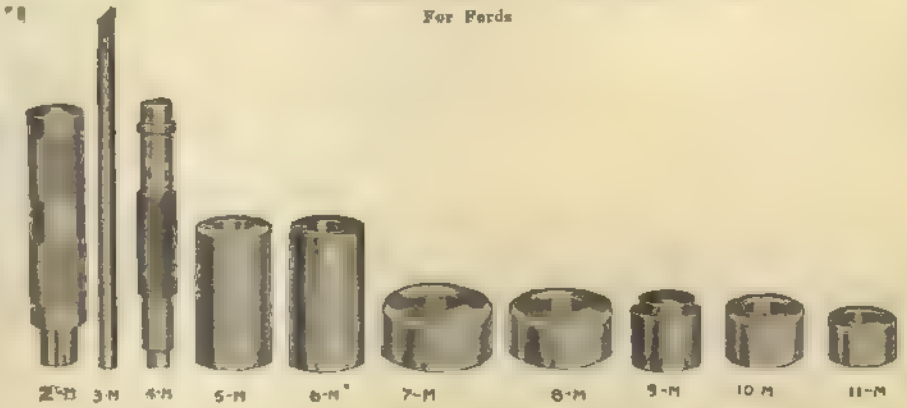
For removing small gears. Behind each finger is a coil spring, making action quick and easy. A collar slips over the fingers, and holds them in place.

Shipping weight, 10 lbs.

No. HM26.....each, **$10.00**

Arbor Press Bushing Drivers and Ball Race Tools

For Fords



These tools are made of the highest quality hardened steel.

All specifications of ship's fittings should specially stipulate that all glass must be "Triplex" because it cannot splinter or fly in fragments, and even when smashed remains airtight and watertight and is absolutely transparent.

Effect of Gunfire on a Triplex Glazed Bridge Screen.

Toutes les spécifications d'appareils pour usage dans les navires devraient stipuler d'une facon spéciale que tous les verres soient en "Triplex" parce qu'il ne peut ni se fendre ni voler en éclats et que même quand il reçoit un choc il reste étanche à l'air et à l'eau et est absolument transparent.

Todas las especificaciones de accesorios para navíos deberían estipular específicamente que todo el vidrio sea "Triplex," porque no puede romperse ó saltar en fragmentos, y, aún cuando quebrado, permanece estanco al aire y al agua siendo absolutamente transparente

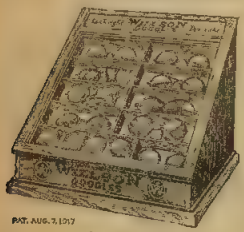
WILLSON'S GOGGLES

FOR AUTOISTS

All material used in the manufacture of Willson Goggles is of the highest standard, and every pair of goggles has to measure up to the highest standard of quality before being placed on the market. These goggles are manufactured for all purposes in various styles, shapes of frame, and colors of lense, including the new Fleuzal color, which is a shade between light green and a smoky color that eliminates the ultra-violet rays, and is very easy and restful to the eyes.

Display Assortment

Mahogany finished metal display case, with glass front and hinged top. Case measures 13⅞x15½x12⅝ in. Contains 30 pairs of Willson's Goggles, assorted as follows:



No Pair	No.	Each
6	N65	$0.25
2	Z57	1 00
4	N86	1.00
3	K7	1.00
3	A1	1.25
2	K1	1.25
2	Z21	1.00
2	Z1	1.25
2	Z2	1.75
2	Z5	1.25
2	Z51	.75

NO.	Wgt. Asst.	ASSORTMENT
1W Asst.	16 lb.	$32.25

Rust-proof white metal frame; easy cable temples. 1⅞-in. amber and Fleuzal colored lenses.

THE DENZAR LIGHTING FIXTURE

"THE UNIT OF DAY BRIGHTNESS"

Prices on Application

PENDANT TYPE

Canopy and chain hanger gun metal finish, holder white enameled porcelain, length over all 34 in.

Nos.	E4E Junior	E1E	E1½E	P2E
Watts	100-150	200	300	400-500
Reflector, in.	14	17	17	20
Bowl, in.	8	10	10	12
Socket	Medium		Mogul	
Each	*$18.90*	*24.40*	*26.00*	*32.00*

COMPLETELY ENCLOSED

The upper part of the DENZAR bowl is of highly polished, clear glass, permitting all the upward rays from the lamp and the rays reflected from the lower part of the bowl to reach the reflecting dome in their full strength, while no part of the lamp is visible.

The lower part of the bowl is of white enameled glass which conceals glare, softening and diffusing the light with practically no loss.

There are no large openings for the entrance of dust, dirt or insects, so that one-half the cleaning required by ordinary commercial units will keep DENZAR as bright as a new dollar all the time and year out.

FLEXIBLE CEILING TYPE

Special spun canopy, gun metal finish. Holder white enameled porcelain, Beardslee patent bar.

Nos.	P200E	P201E	P201½E	E202E
Watts	100-150	200	300	400-500

Socket	Mogul	
Length, in.	13	14
Each	*$26.00*	*32.00*

BABY DENZARS

It will accommodate either a 75 or 100-watt Mazda C lamp and makes an admirable lighting unit for kitchens, hotel bedrooms, private game rooms, doctors' and dentists' offices, candy kitchens, butchers' refrigerators, and scores of other places where a single good light of not more than 100 watts is required. Finish, white enameled porcelain.

COMPACT CEILING TYPE

For installation at any ceiling outlet.

No. P475E—75-100 watts, 12 in. reflector, 6 in. bowl, medium socket, length 9⅝ in., each *$13.75* **15.50**

REPLACEMENT TYPE

May be attached directly on any pendant or ceiling fixture which is equipped with a 2¼-inch shade holder. No socket is furnished and the deflector is attached independent of the socket.

No. P475RE—75-100 watts, 12 in. reflector, 6 in. bowl, length 6⅛ in., each *$8.65* **9.74**

REFLECTING DOME

This is made of opal-glass, and is so shaped as to gather the upward rays of light and distribute them equally on the working plane, while the reflector re-directs any rays which otherwise would be wasted.

THE AIR INTAKE

A current of cool air entering through a small hole in the bottom of the bowl is continually passing upward around the lamp, carrying all superheated air out through the outlets in the holder.

MANY DIFFERENT TYPES

DENZAR is made in many different types, to suit all requirments and to harmonize with any style of architectural and decorative treatment. All of these different types are of handsome appearance and embody the same features of efficiency and economy.

Special catalogue furnished on request.

Each DENZAR Unit Is Packed In A Separate Carton Complete (Except Lamp), Ready For Hanging.

WE DO NOT FURNISH LAMPS WITH ANY OF THE ABOVE UNITS.

SPECIAL FEATURE

All Disteel Wheels are now equipped with a special right angle valve stem extension made by the well known firm of A. Schrader's Son, Inc.
This simple and efficient device makes tire inflation easier on Disteel Wheels than on any other type of wheel.
There is no extra charge for this equipment and all of these extensions are guaranteed by the makers of Disteel Wheels.

DISTEELS FOR DODGE BROTHERS CARS

DISTEEL—THE SAFE WHEEL—adds beauty, economy and convenience to the sturdy Dodge Brothers Car.

A set of type "D" Disteel Wheels for Dodge Brothers cars is a complete equipment and consists of the following parts:
5 wheels with rims permanently assembled to the discs
5 right angle valve stem extensions installed
2 front hubs
2 rear hubs with brake drums
Socket wrench
Mounting bar
4 hub caps when Disteels are to replace wirewheels, or
1 spare wheel carrier bracket when Disteels are to replace wood wheels.

In ordering Dodge Brothers equipment be sure to specify tire size, mode and whether wood or wire wheels are to be replaced

As a special feature all Disteel Wheels for Dodge Brothers cars are now equipped with right angle valve stem extensions as described above under "Special Feature." No extra charge.

Wheels painted Dodge Brothers standard dark blue with two white stripes.

List price complete equipment $100.00 f. o. b. Detroit, war tax included.

DISTEEL WHEELS FOR FORD CARS

The equipment for Ford cars is complete and includes
5 demountable Disteel Wheels, rims attached for 30 x 3½ clincher tires
2 front hubs.
2 rear hubs with brake drums
1 spare wheel carrier bracket.
1 license bracket
1 socket wrench.
Wheels painted blue with white stripe or gray with black trimming —no extra charge
List price, complete equipment as listed above, $60 00, war tax included, F. O. B. Detroit

Eight Points of Superiority

1. STRENGTH Being single discs of steel, Disteels have no spokes to break. They stand severe strains and side thrusts without collapsing They will protect your car.
2. LIGHTNESS—Even with their great strength, Disteels are lighter than Ford demountable rim wood wheels.
3. APPEARANCE—With graceful lines and handsome colors, Disteels will beautify and enrich your car.
4. QUICK WHEEL CHANGE—Disteels are easily released and slipped off and on. They save time and temper whenever tires have to be changed
5. EASILY CLEANED—You can keep Disteels looking neat and trim with very little trouble. The smooth surfaces are easily cleaned.
6. SPARE WHEEL—Disteel equipment will give you a spare wheel for emergency use in case of tire trouble.
7. TIRE SAVING—Because Disteels run true they save the rasping wear on tires caused by wobbly wheels.
8. NO ADAPTERS REQUIRED—Not necessary to break up your old wheels. Disteel Wheel equipment is complete. No rights or lefts—each wheel is interchangeable on front hubs, rear hubs or carrier bracket.

COMPARATIVE BALL BEARING DATA

New Departure Single Row and Radax Ball Bearings are made in the same bore, diameter and width sizes as other standard makes, both foreign and domestic. New Departure may, therefore, be used for replacing other bearings. This table shows the name and number of bearings that correspond to the New Departure Single Row and Radax

When you take a bearing out you will find it stamped with a number. Find this number in the table below and then by running along the line to the right of the page you can find what New Departure bearing should be used to replace the discarded bearing.

PHYSICIANS' OR BATHROOM SCALES

No. T115 [illegible].

These scales have no loose weights, full capacity indicated on beams marked on both sides so that weight can be noted from either side.

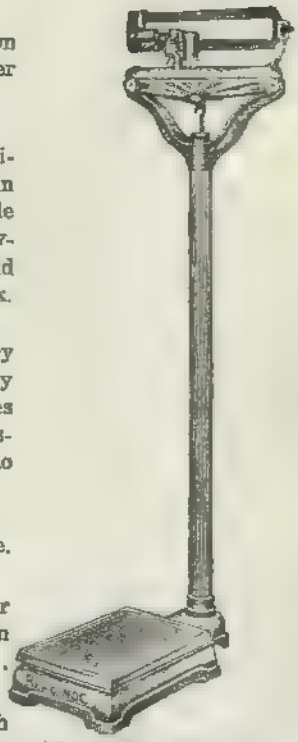
Very handy scales for Hospitals, Sanitariums, Schools, Gymnasiums, Offices or Homes. Especially useful in bathrooms to obtain true personal weight without clothing which is at all times desirable and in cases of medical treatment often absolutely necessary. Growing children should be weighted and measured at regular intervals and results compared with standard tables. A weight table is in every box.

The very best material, most expert labor and modern machinery obtainable used in manufacture of these scales. Every scale carefully inspected and tested with U. S. Standard test weights. These scales also made upon order to conform with standards of weights and measures of various other countries of the world. Special graduations to order.

The finish, white enamel, is as high grade as is possible to produce.

Capacity 300 lbs., on nickel-plated, heavy brass double beam, upper bar graduated 50 lbs. by ¾ lb., lower bar 250 lbs. by 50 lbs. graduation notched, hardened bearings and tool steel pivots throughout.

Platform 10½x13 in., height 60 in., w't each set up 60 lbs., w't each boxed for shipment 112 lbs.



No. T125 [illegible].

No. T115 [illegible]—With standard nickel plated measuring rod, 4 ft. to 6½ ft. by ½ in., special lever check attachment prevents levers from becoming disengaged, cork inlaid in platform with waterproof cement ....each **$64.00**

No. T125 [illegible]—**Without measuring rod, etc.** .. ..each **$54.50**

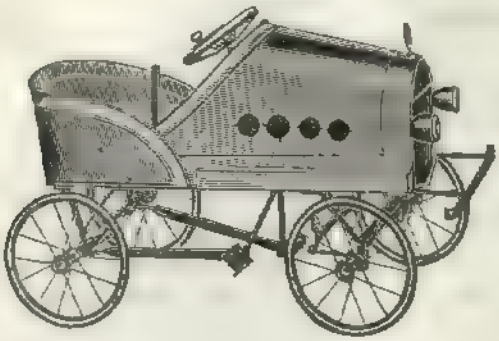
ONE IN A CASE

★ Items Marked Thus ★ Are Shipped From Factory Only.

SHIPPING FACILITIES

With our immense stock and very modern facilities for shipments we are enabled to fill orders with unequaled promptness. On some of the roads we have special through cars which enable us to reach distant points 24 hours ahead of shipments made in the regular way.

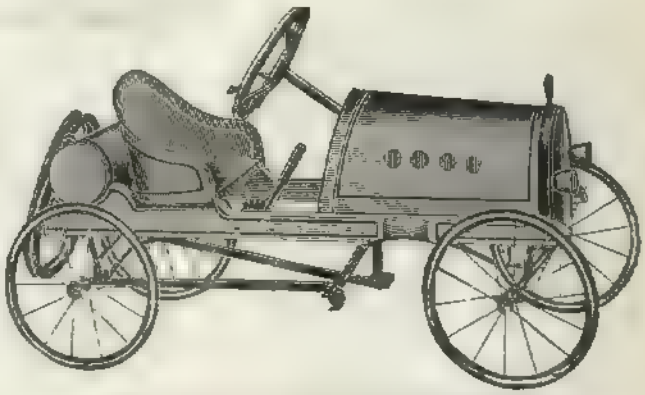
AUTOMOBILE WAGONS



No. N601—Body 12x20 in., stencilled Dodge; finished in red, gray, blue or yellow with brilliant striping and decorating; wheels 10 in. with ¾ in. rubber tires, with nickel plated hub caps; equipped with shifting lever, knuckle joint steering gear, wood rim steering wheel with nickel plated gas lever attachments, motormeter, self starter button, two imitation wooden headlights and bumper; running gears finished in black enamel, wheels finished in red enamel, w't per doz. 540 lbs., per dozen $135.00

No. N6010—Black finished body and ivory finished wheels with ball bearings and ¾ in. rubber tires, equipped with horn, w't per dozen 555 lbs., per dozen $195.00

ONE IN A CRATE



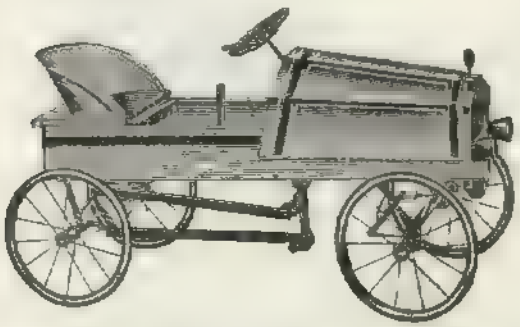
Stencilled No. 6, finished in red, gray, blue or yellow with brilliant striping and decorating. Barrel hubs with ¾ in. rubber tires and nickel plated hub caps.

Equipped with shifting lever, gas tank, two spare tires, nickel plated gas lever attachment, self starter button, two imitation wooden headlights. Running gear and wheels in black enamel.

No. N387—Wheels 14 in., w't per doz. 660 lbs., per dozen $249.60

No. N386—Body 13x43 in., wheels 12 in. and with knuckle joint steering gear, w't per doz. 636 lbs., per dozen $218.40

ONE IN A CRATE



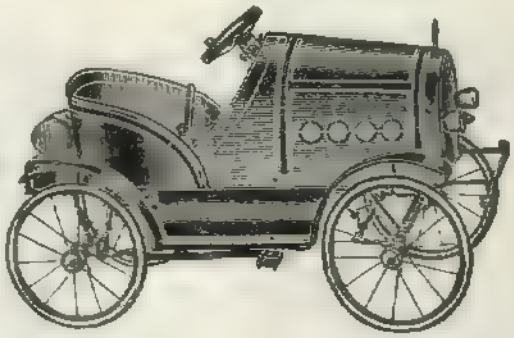
Finished in red, gray, blue or yellow with brilliant striping and decorations. Wheels 12 in. barrel hub, with ¾ in. rubber tires and nickel plated hub caps.

Equipped with shifting lever, knuckle joints steering gear, nickel plated steering rod, with wood wheel and nickel plated gas lever attachment, motormeter, self starter button, two imitation wooden headlights, seat adjustable to two positions. Running gear and wheels in black enamel.

No. N392—Body 13x42 in., w't per dozen 660 lbs., per dozen $256.80

No. N391—Body 14x36 in., shipping w't per doz. 588 lbs., per dozen $175.20

ONE IN A CRATE



Body 18x38 in., stencilled Overland. Finished in red, gray, blue or yellow, with brilliant striping and decorating. With ¾ in. rubber tires and nickel plated hub caps.

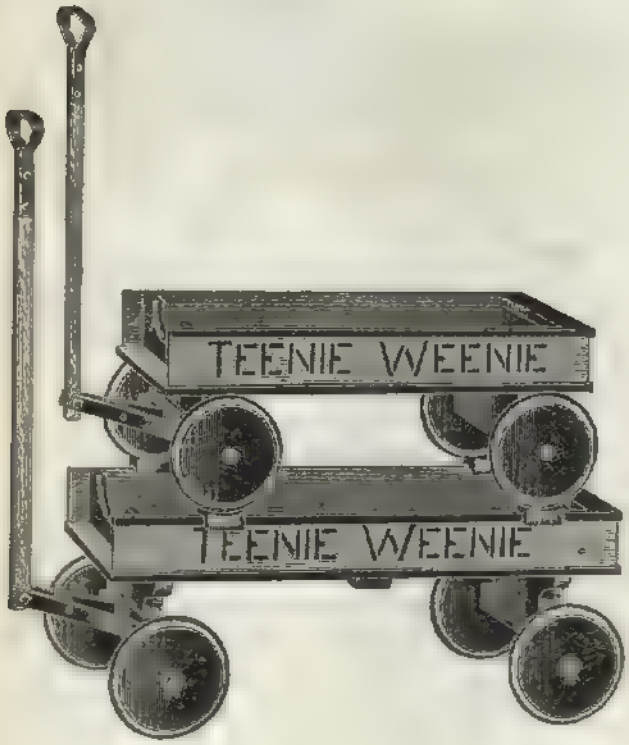
Equipped with shifting lever, gas tank, knuckle joint steering gear, nickel plated gas lever attachment, motormeter, self starter button, two imitation wooden headlights and bumpers. Running gears finished in black enamel. Wheels in red enamel.

No. N6020—12 in. ball bearing wheels, fenders and horn, w't per doz. 880 lbs. ..... per dozen $285.00

No. N602—12 in. wheels, **without ball bearings, fender and horn,** w't per doz. 540 lbs. .... per dozen $195.00

ONE IN A CRATE

TENNIE WEENIE COASTERS



Sturdy little wagons built to stand rough treatment by the little folks.

Wheels solid hard maple painted red, bodies natural varnish finish, trimmed in red. Bolsters ⅞ in. hard maple, 5/16 in. iron axles, nickel plated hub caps loop grip handles, heavy wrought iron tongue holders. Well braced throughout.

WITHOUT RUBBER TIRES

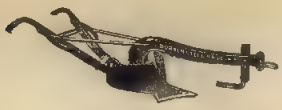
RAILROAD AND GRADING PLOWS



DORSCH

EIGHT OR TEN HORSE RAILROAD

On a straight pull, 20 horses cannot break this Plow; Heavy Selected Plow Steel Share, Double Shinned; With Heavy Durable Point, unexcelled for wear; Can be welded and sharpened by any blacksmith; Steel Beam with Wide Flanges on top and bottom from about top of Moldboard to Clevis Point; Moldboard is of heaviest and best Steel, carefully forged and tempered; Heavy Cast Iron Landside; Heavy Oak Handles, plated on Moldboard side, and fitted with Heavy Runners; Adjustable Gauge Shoe.

	Each
No. P432A—(4) Plow, 11 in. Cut; Weight 285 Lbs. Each	$140.00
No. P432B—Extra Steel Moldboards; Weight 25 Lbs. Each.	24.00
No. P432C—Extra Cast Iron Landsides; Weight 10 Lbs. Each	5.00
No. P432D—Cast Steel Shares; Weight 15 Lbs. Each	18.00

FOUR HORSE RAILROAD

For Gravel, Hard Pan; Also for lighter work; Heavy Selected Plow Steel Share, Double Shinned, easily welded and sharpened; Heavy Steel Beam with Wide Flanges; 1¼x3 in. Oak Handles; Moldboard Handle heavily plated with Steel from bottom to end of the Handle, to prevent wearing when Plow is turned on side; Handles braced to Beam with 1 in. Wrought Pipe; Heavy Gauge Wheel; Hand Forged Clevis.

	Each
No. P432E—(2) Plow, 9 in. Cut; Weight 175 Lbs. Each	$100.00
No. P432F—Extra Steel Moldboards; Weight 20 Lbs. Each.	20.00
No. P432H—Extra Cast Iron Landsides; Weight 8 Lbs. Each	5.00
No. P432J —Forged Steel Shares; Weight 10 Lbs. Each	16.00

For severe grading, not ordinary Agricultural Plows, such as some makers recommend for grading; All Sizes cut narrow, deep Furrows, and all parts are Extra Heavy and thoroughly braced to withstand enormous strain, without breaking.

SIDNEY

Beams are of Selected Hardwood, Heavily Ironed; Moldboards and Shares are alike and interchangeable, made of Best Quality Plow Steel, and scour freely; Cutters are reversible; Handles are Iron Strapped on both sides and have Iron Handholds; Gauge Shoe furnished.

	Each
No. P432K—(2) Six to Eight Horses; 7½ ft. Beam; Complete with Extra Share	$90.00
Weight 270 Lbs. Each	
No. P432L—(5) Four to Six Horses; 7½ ft. Beam; Complete with Extra Share	$76.80
Weight 200 Lbs. Each	

RAILROAD PLOWS

SAMSON

For Heavy Railroad or Township Work; Steel Moldboard, Steel Share, Cast Steel Landside, Steel Coulter, Adjustable Gauge Shoe, Heavy Iron Beam, White Oak Handes, Ironed and Braced; a strong compact light Plow for rough usage.

	Each
No. P432M—(26) Plow, 12 in Cut; Weight 196 Lbs. Each	$85.30
No. P432N—Extra Moldboards; Weight 21 Lbs. Each	15.50
No. P432P—Extra Landsides; Weight 9 Lbs. Each	5.30
No. P432R—Extra Shares; Weight 8 Lbs. Each	8.50

ROOTERS

S&S ALL STEEL

Solid Cast Steel Beam, Tensile Strength 75,000 Lbs. to square inch against 50,000 for Malleable and 30,000 for Cast; High Carbon Tool Steel Reversible Point, specially tempered; Cast Steel Adjustable Gauge Shoe, Case Hardened; Wrought Steel Adjustable Hitch; Double Braced Steel Handles with Steel Grips.

Can be handled by two horses, but will stand pull of twelve horses or traction engine; For Hard Pan, Cement, Macadam, or any ground too hard for standard grading Plows.

	Each
No. P432T—4 ft. Handles; Length Over-all about 7 ft.; Weight 280 Lbs. Each	$94.50
No. P432V—Extra Reversible Points, for No. P432T; Weight 25 Lbs. Each	13.00

PLOWS

MOORE

Two or Three Horse; General Purpose

Made of Best Material and with most careful Workmanship with close Attention to Detail and Finish; When properly adjusted, they are light Draft, easy for Operator and do Unexcelled Work; **Moldboards** are shaped to allow Plow to run steadily and with light Draft and are high to prevent Soil and Litter from running over Top and loading between Handles; Steel **Moldboards** are made from highest grade extra heavy soft center Steel and will scour readily; **Steel Beams** are of high Carbon Steel and will not bend or break.

Light and Strong; Adapted to all Soils and Conditions; Has greater height Beam than other Plows of this style, a Feature greatly appreciated by the Farmer; Moore Plows have Equipment to meet all conditions as follows: **Reversible Colter** for New Land Plowing; **Knife Colter** or **Jointer** for Old Land Plowing.

Main Standard is made from Malleable Iron and will not break; Clevis has wide Adjustment and all Plows work with three as well as with two Horses; Steel **Landside** is long and wide, making Plow run steady; **Trimmings** are Malleable Iron, except Wheel Standard which is Steel; **Handles** are in 5½ and 6 ft. lengths and are well braced and adjustable for any height Person; Equipped with Brace Rods

PLOWS

MOORE

Two or Three Horse; General Purpose

Made of Best Material and with most careful Workmanship with close Attention to Detail and Finish; When properly adjusted, they are light Draft, easy for Operator and do Unexcelled Work; **Moldboards** are shaped to allow Plow to run steadily and with light Draft and are high to prevent Soil and Litter from running over Top and loading between Handles; Steel **Moldboards** are made from highest grade extra heavy soft center Steel and will scour readily; **Steel Beams** are of high Carbon Steel and will not bend or break.

Light and Strong; Adapted to all Soils and Conditions; Has greater height Beam than other Plows of this style, a Feature greatly appreciated by the Farmer; Moore Plows have Equipment to meet all conditions as follows: **Reversible Colter** for New Land Plowing; **Knife Colter** or **Jointer** for Old Land Plowing.

Main Standard is made from Malleable Iron and will not break; Clevis has wide Adjustment and all Plows work with three as well as with two Horses; Steel **Landside** is long and wide, making Plow run steady; **Trimmings** are Malleable Iron, except Wheel Standard which is Steel; **Handles** are in 5½ and 6 ft. lengths and are well braced and adjustable for any height Person; Equipped with Brace Rods

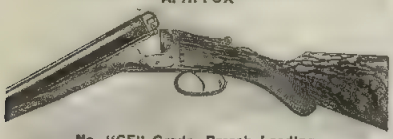
SHOT GUNS

DOUBLE BARREL, HAMMERLESS
A. H. FOX



No. "CE" Grade, Breech Loading.

This is the grade that is making good everywhere. In every respect it is unusual, a high grade gun at a very moderate price. Its a beauty in looks and finish, no gun will stand up better in hard work.

Engraving—Is the work of an artist, scroll and picture work stands out clear and beautiful in design.

Barrels—Best quality Krupp fluid steel; cylinder, modified and full choke bored.

Stock—Choice selection of dark, curly English walnut, the grain is beautifully brought out in the finish, straight, half or full pistol grip; rubber butt plate; checkering is of a fine diamond pattern, on grip, panels and fore-end.

Weights—12 gauge, 6½ to 8 lbs.; 16 gauge, 5¾ to 7 lbs.; 20 gauge, 5¼ to 6¼ lbs.

When ordering, specify length of barrel, weight, style of grip and boring wanted.

With Automatic Ejector.

	Each
No. CEF12—12 gauge, 26, 28, 30 or 32 inch barrels	✤$298 65
No. CEF16—16 gauge, 26, 28, 30 or 32 inch barrels	✤ 298 65
No. CEF20—20 gauge, 26, 28, 30 or 32 inch barrels	✤ 298 65

One in a cardboard box; ten in a wood case.

No. "XE" Grade, Breech Loading.

This grade is the result of the increasing demand for a trap gun which shall be as nearly perfect for the purpose as it is possible to be made. Each gun receives an elaborate amount of hand work, which in spite of the number of cheap machine made guns built, is still the only way to produce a really accurate and high grade gun.

Engraving—A new design conforms to the artistic standard of the other high grade Fox guns. It has never been equalled before in a gun under $200.00.

Barrels—Krupp fluid steel; cylinder, modified or full choke bored.

Stock—Beautifully marked Circassian walnut, straight, half or full pistol grip, or in the Monte Carlo type; rubber butt plate; grip, panels and fore-end beautifully checkered.

Weight—12 gauge, 6¼ to 8 lbs.; 16 gauge 5¾ to 7 lbs.; 20 gauge, 5¼ to 6¼ lbs.

When ordering, specify length of barrel, weight, style of grip and boring wanted.

With Automatic Ejector.

	Each
No. XEF12—12 gauge, 26, 28, 30 or 32 inch barrels	✤$458 70
No. XEF16—16 gauge, 26, 28, 30 or 32 inch barrels	✤ 458 70
No. XEF20—20 gauge, 26, 28, 30 or 32 inch barrels	✤ 458 70

One in a cardboard box; ten in a wood case.

Note—From Factory can furnish higher priced Fox Guns. Write for catalog and prices.

✤F. O. B. Pennsylvania Factory Only.

SHOT GUNS

THE FOX-KAUTZKY SINGLE TRIGGER
FOR THE A. H. FOX GUNS

This single trigger is recommended and guaranteed by the A. H. Fox Gun Company. It is exceedingly simple and is operated by the locks of the gun. No matter how heavy the recoil, the trigger will not engage the locks of the second barrel until you release it. It cannot double and will never balk When only one barrel is fired and gun reloaded, trigger returns to original barrel without attention from the shooter. The only trigger with automatic safety. This trigger fitted to any A. H. Fox hammerless gun, new or old, at an extra charge.

For Any A. H. Fox Hammerless Guns.	Each
Single trigger	✤$54 45

Note—To have single trigger fitted to guns already in use, the entire gun must be returned to factory, shipping charges prepaid.

DOUBLE BARREL, HAMMERLESS
PARKER

The mechanical construction of all Parker hammerless shot guns is the same. A special feature is the coil main spring, which the manufacturers guarantee for twenty-five years against breakage. Parker guns are bored on the latest improved system for shooting nitro or smokeless powder. All guns are tested before they leave the factory.

Regular dimensions carried in stock; length of stock about 14 inches; drop measures about 3 inches.

By shipping from factory, we can supply Parker guns (except 12VH (Grade), with stocks 13½ to 14½ inches long, with drop 2 to 3¼ inch without extra charge. Extra charge for dimensions varying from above. If 12VH grade with 14¼ inch stock or longer and special drop is wanted, same will involve additional charge. Six to eight weeks are required to make Parker guns to order.

Pistol grip guns sent unless otherwise specified. No extra charge for straight grip except on 12VH.

Trojan Grade, Breech Loading.

A most excellent well proportioned gun at a very low price

Barrels—Imported Trojan steel, matted top rib; cylinder modified or full choke bored.

Stock—American black walnut, of good color and finish; made only with full pistol grip; hard rubber butt plate, fore-end and grip neatly checkered.

Weights—12 gauge, 7½ to 8 lbs.; 16 gauge, 6½ to 7 lbs.; 20 gauge, 6½ to 6¾ lbs.

Automatic ejectors will not be furnished on Trojan grade guns.

Without Automatic Ejector.

	Each
No. TP12—12 gauge, 28 or 30 inch barrels	$146 85
No. TP16—16 gauge, 26 or 28 inch barrels	146 85
No. TP20—20 gauge, 26 or 28 inch barrels	146 85

One in a cardboard box, ten in a wood case.

✤F. O. B. Pennsylvania Factory Only.

SHOT GUNS
DOUBLE BARREL, HAMMERLESS
PARKER

VH Grade, Breech Loading.

A strictly high grade gun at a very low price; the best made gun of its grade ever produced; a gun for hard usage.

Barrels—Vulcan steel (black); cylinder, modified or full choke bored.

Stock—American walnut, checkered and engraved, with pistol grip, checkered rubber cap, hard rubber butt plate.

Weights—12 gauge, 7 to 9 lbs.; 16 gauge, 6 to 8 lbs.; 20 gauge, 5¾ to 7½ lbs.

DULUTH SECTIONAL GARAGE EQUIPMENT

The store equipment shown on this and the following page was designed primarily for the display and storage of automobile accessories and supplies. However, it is also well suited for hardware and electrical goods, as well as many other similar lines.

Any combination of cabinets, drawer units and bases can be arranged to suit the requirements of the individual store.

They are made much like the popular sectional book cases on the market and can be rearranged or added to at any time.

All of this equipment is 50½ in. long; the cabinets and drawer units are 13 in. deep and the bases 23¼ in. deep.

When it is desired to use the cabinets or drawer units without the regular base, it is necessary to use a sub-base, (F747B4) or, they can be set on any counter or wall base already in use.

The tops or cornices (F747B) for these cabinets come separately and are not sent unless ordered. A top or cornice is only required for each cabinet or drawer unit on top of the stack.

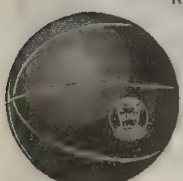
MEDICINE BALLS

REACH



The physical benefit derived from the use of a medicine ball is unlimited. The catching and throwing of it develops the chest, exercises the back, arms and legs; in fact it is beneficial to the whole system. A number of persons can exercise with it at the same time.

Each

No. 2M—Fine buck dressed leather, well stuffed and sewed; 36 inch $15 00

One in a cardboard box; weight 6 lbs.

✦F. O. B. Missouri Factory Only.

Per Dozen

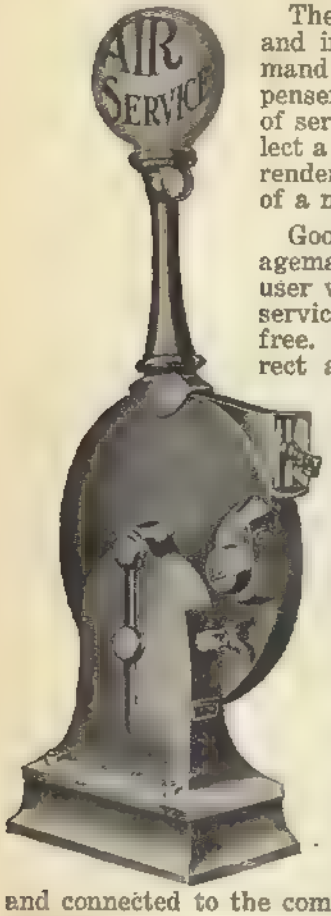
No. 2—Shipping weight each 14 ozs. $135 00

One in a cardboard box.

ECO AIR AND WATER STATIONS



These stations are being built and installed to supply the demand for an automatic air dispenser which will give the best of service to the autoist and collect a fair charge for the service rendered without taking any time of a mechanic or garageman.

Good air service costs a garageman considerable and an auto user would rather pay for good service than have poor service free. Good service means correct air pressure at all times, clean air and no waiting for attendants. And good service means satisfied customers.

Eco air and water stations can be furnished without the coin device if desired.

Eco air station No. 12 can be furnished in any one of three styles—complete with automatic valve and coin box—complete with automatic valve but less coin box—without either automatic valve or coin box.

These stations are located outside the garage and connected to the compressed air system of the garage.

These stations are built of gray iron. Each station contains a patented, enclosed, spring operated steel hose reel, running on Hyatt roller bearings. The spring is in an oil bath and the spring tension is adjustable. Each reel carries 32 feet of special Eco brand oil resisting air hose. All bearings are amply proportioned.

In the coin operated machines the reel is geared direct to a spring barrel controlled by the coin device, which makes it necessary to deposit a coin before air can be obtained.

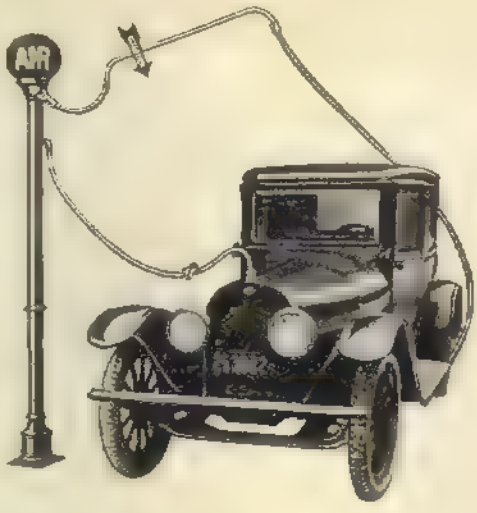
An automatic cut-off in the base of the station cuts off all air pressure except when the hose is pulled out. When the hose is released the spring draws the hose back into the station, automatically locks the device and makes it necessary to deposit another coin before station can again be used.

Gauge in top shows tank and tire pressure. Water faucet can be connected to city water or other source of supply.

All mechanism as near fool proof as possible and protected from dust and weather. Finished in weather-blue enamel finish with top provided for electric light.

No. 12C Complete with automatic valve and coin box.....each, **$125.00**
No. 12B Complete with automatic valve, but without coin box.....each, **115.00**
No. 12A Without coin box or automatic valve .....each, **95.00**

ROMORT AIR AND WATER STATIONS



Romort air and water stations furnish not only a convenient service but combine with these features an effective advertising device in the 12 inch green electric light globe on the top which attracts attention.

When these stations are installed at the curb they do not impede traffic in the least when not in use. When in use, the arm through which the air hose passes is drawn down, allowing air service to be applied to the tires of the car in position at the station. After air has been supplied and the hose is released by the user, the arm returns to a vertical position, where it remains until again used.

Both air and water hose are at all times clear of the ground and particularly so when the hose is not in use. This not only lengthens the life of the air hose and valve, but affords a clean method of inflating tires and supplying water to the radiator.

Romort air and water stations have an oil governor built into the head, which controls the return of the extension arm. If this governor were not used the sudden return of the vertical arm would possibly cause damage by being abruptly checked because of the strength of the spring used in returning the arm. Adjustment is made by means of an adjusting screw in the head. The chamber of the governor is filled with a 50 per cent solution of kerosene and lubricating oil or other non-freezing oils.

This model has a large, roomy round base, with a large door, which makes the installation and connection to the air, water and lighting lines a very simple matter. It also contains an electric wire junction box, having a swivel, where the conduit pipes connect.

The electric light globe is sandblasted with white letters and has a standard 6 inch base held firmly in place by a metal ring.

Height, base to head, 6 feet. Height to top of arm, 12 feet. Radius of hose, 17½ feet.

All fittings furnished, ready for installation.

Model SB Globe type.....each, **$90.00**

Gro. **10.50**

ELECTRIC MOTORS

The best models of the best manufacturer; every number is durably constructed, accurately tested, runs easily, and will give satisfactory service

T3481 (P52)—Two terminal motor for operating light running models; operated either on battery current or attached to transformer, height 2¾ high; 1 in box. Each 72

T3486 — Heavy cast base and modeled after the highest type motor; wound for battery use or for attaching to transformer; 4¾ in. high; 1 in box. Each 1.68

T3482 —Two terminals, pressed steel base, latest type tubular holders, copper gauze brushes; operates on battery current or attached to transformer; height 3¾ box Each 1.10

T3487 — Heavy cast black enameled iron base, 3¾x4 in., full nickel polished ... 160 ... 60 cycle operating on either direct or alternating current; furnished with ... foot cord and plug; height 3⅞ Each. 3.68

T3483—Same as T3372, but mounted on reverse switch base, permitting toys to run backward or forward; for battery current or transformer, ... high; 1 in box. Each 1.42

ELECTRIC THRILLER

T3495—Not only a practical musical toy, but one that all boys and girls appreciate; finished in bright colors; small parts nickel plated and polished; mounted on neat, strong wood base; size 4x2¾ ins. Each 1.45

T3484 (P58) — Made especially for operating erector and mechanical toy models; operates on battery current or attached to transformer; height 2¾ ins.; each in box Each 1.42

Our cloth, gauze and paper masks represent the most popular style sellers made; the majority of the numbers come assorted, giving you a fine variety for a small investment.

TRANSFORMERS

That embody all the latest improvements, they are designed to be connected to the ordinary alternating light circuit for reducing the current to operate all classes of electrical toys

T3462 — "Little Jeff," 40 watts, 60 cycle equipped with regulating switch and 2 binding posts, delivering 4 to 12 volts in 2 volt steps; finished in black enamel; complete with cord and plug, size 3x4x2¾ ins Each 2.25

T3464 ... 100 watts, 60 cycle, delivering from 1½ to 24 volts in 1½ volt steps, 6 per ... at voltages, ranging from 8 to 18 ... 3 volt ... finished in black enamel; complete with cord and plug; will also operate Christmas tree outfits up to sixteen 14 volt lamps; size 4½x4½x3½ ins. Each 4.00

T3463 "Midget;" 50 watts, 50 cycle; equipped with regulating switch, delivering from 1½ to 24 volts in 1½ volt steps; 3 permanent voltages, 6, 10 and 16, finished in black enamel; complete with cord and plug; size 3¾x3¾x3 ins. Each 2.75

T3465—Same, 150 watts, 60 cycle, equipped with regulating switch delivering 1½ to 30 volts in 1½ volt steps; 8 permanent voltages ranging in 3 volt steps; finished in black enamel; complete with cord and plug, size 5¾x5½x4¼ ins. Each 5.30

Our miniature cedar chests for dolly's clothes and fittings are exact duplicates of the large size chests; selected cedar

LIONEL "MULTIVOLT"

T3467 110 volt, 60 cycles, 75 watts; 17 ... ages, 2 permanent. ... able with rheostat, ... ranges for 2 to 25 volts in two volt steps; the rheostat regulates the ... age and enables you to run trains at different speeds; finished in black enamel; complete with ... foot cord and plug; ... 3.50

T3468 ... 60 ... 100 watts, 30 voltages 15 permanent ... able, with rheostat, ... age from 1½ to 24 ... volt steps; will not ... the trains but switches, lights, lamp posts, etc., can be ... always remains cool under any loads; finished in black enamel complete with 7 foot cord ... plug; size 3¼x4½x5 ins. ... 5.45

T3469 — 200 watts, 60 cycle; equipped with regulating switch; delivering 14 voltages, 10 permanent and 4 with rheostat; ranges from 2 to 19 in 2 volt steps with rheostat; complete with cord and plug; size 4x6¼x6½ ins. Each 8.25

DIRECT CURRENT REDUCER

T3470—Slate base 8x10x¾ in., supporting four porcelain tubes wound with best quality resistance wires, tubes are protected by perforated Russian iron cover lined with heavy asbestos; sliding lever regulates voltage, fast or slow; complete with 7 ft. cord and plug, *110 volts, and is for direct current use only.* Each in box. Each..7.50

ELECTRIC AEROPLANES

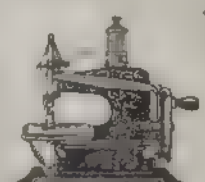
Built like the big machines, fine window attraction

T3477—Scout Plane model; monoplane type, with powerful little motor; operates on 2 to 4 dry cells or on reduced current; finished in khaki enamel, trimmed with red; red, white and blue rudder; spread of planes 12 in.; complete in box with counter balance, conducting wires, etc. Each..3.00

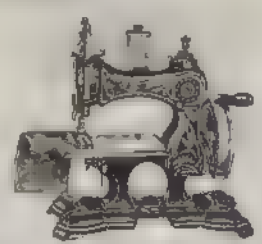
T3479—Bi plane; latest type; equipped with powerful aero motor, 8 in. aluminum propeller, and fitted with stream lined struts and steel stay wires; spread of planes 22 ins.; operates in 4 to 8 dry cells or reduced current; finished in khaki enamel red and gold trimmed; complete in box with counter balance, 30 ft. double connecting wire and instructions. Each. 9.00

SEWING MACHINES

Simple in construction; easy to operate; well built and nicely finished

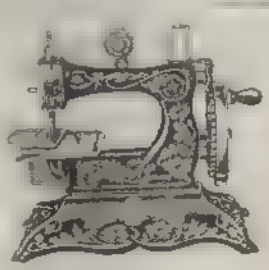


T5102 — A practical little sewing machine that sews smoothly; cast metal base and frame, black enameled floral stenciled in colors; nickel plated arms, wheel and sewing table; tension holder for thread, lever for raising foot and easy running shuttle; chain stitch; size 3½ x6½ ins., 7 ins. high; in box, complete. Each..... 1.00



T5104 ... cast metal base and arm, black ... gilt scroll decorate; has tension holder for thread, lever for raising and lowering foot; tension for regulating size of stitch; easy acting shuttle; nickel plated sewing table, heavy fly wheel nickeled; chain stitch; embodies all the principles of the large sewing machines; size 3¾x 7¾ ins., 8 ins. high; in box, complete. Each..... 2.50

T5103—Same as T5102, larger, size 4¼x7½ ins., 7 in. high; in box complete. Each..... 1.45



T5105—This is the finest small sewing machine made; has all the features of the large machines, and will do as good work; black japanned metal base and arm, floral decorated in colors and gold; automatic tension, drop, lever for regulating size of stitch, nickeled sewing table, heavy fly wheel making it easy running; chain stitch; size 5x8½ ins., 8 ins. high; in box, complete. Each..... 3.75

DOUBLE FRICTION TOYS

Strongly constructed of sheet steel, insuring durability; enameled and gold striped, packed one in box. Have no springs to get out of order, but are operated by cast iron, balanced fly wheel, which when set in motion transmits the power to the wheels by friction

T3408—Assorted 6 kinds, engine coal two autos, dock and boy on scale, finished in bright colors, length 8½ ins., width 3½ ins., 3½ ins. high; sorted in box. Each 2.25

T3506—Stutz Racer; nicely finished in bright, attractive colors, length 8¼ ins., width 3½ ins., 3½ ins. high; each in carton. Dozen 3.85

T3503—Dreadnaught; white enamel; red turrets, black cannon, gilt wheels; length, 10⅝ in.; width, 2⅛ in.; 4 in. high; each in carton. Dozen 4.15

T3505 — Delivery truck; enameled red, gilt trim; gilt wheels; high power and long running; length, 10⅛ in.; width, 3⅛ in.; 4⅛ in high; each in carton Dozen 4.15

T3524—Roadster; body finished in red enamel, trimmed in green and gold; runs forwards, backwards and in circle; length 11 in., 4½ in. wide, 4 in. high, each in carton Each 62

T3513—Truck body green enamel, trimmed in red and gold; runs forward or backward; length 13¼ ins., 4¼ in. wide, 6¼ in. high; each in carton Each .... .89

T3523—Street Car; body yellow, trimmed in red and gold; runs forward and backward; length 16 in., 4 in. wide, 5 in. high, each in carton. Each..... 89

T3507 Delivery Van; body orange trimmed in green and gold; length 12⅛ ins., width 4⅜ in., 6½ ins. high; each in carton. Each... .89

T3520—Chemical Truck; body red trimmed in green, gold striped; length 12⅜ ins., width 4⅜ in., 5 in. high; each in carton. Each .89

T3530—Touring Car; body red, trimmed in green and gold; runs forward, backward and in circle length 12½ in., 5¼ in. wide, 6 in high; each in carton. Each 1.00

T3529—Hook and Ladder; three steel ladders, which can be hoisted and lowered and having an extension of 26 ins.; body red, trimmed in green, gold striped; length 18 ins., width 4⅝ ins., 6⅛ ins. high, each in carton. Each.....1.00

T3541—Aeroplane; body yellow, trimmed in red and gold; runs either forward or backward; length 16 inches, width 9½ ins., 5 in high; each in carton. Each...1.00

FRICTION LOCOMOTIVES

T3504 — Locomotive and tender; red enameled, gilt trim, gilt wheels; length, 12 in.; width, 2¾ in.; 3¾ in. high, each in carton. Dozen 4.15

T3535—Engine and Tender: steel throughout; four track wheels, all being put in motion when double friction power is started; painted red and green, striped in gilt, gilt wheels; size, length 20 ins.; height 5½ inches; each in a carton Each 1.00

IRON PASSENGER TRAINS

Locomotives are cast iron, tenders and cars are stamped out of heavy gauge steel and embossed; handsomely finished in baked enamels in bright colors

T3552—5 in. black enameled locomotive, gilt trim, with tender, one 4 in. red enameled passenger coach and one 4 in. red enameled [illegible] total length 15 ins.; ½ dozen in box. Dozen.. 2.00

T3553 — 6½ in. black enameled, gilt trim locomotive and tender, one 6½ in. red enameled [illegible] 6½ in. red enameled observation car; total length 19 ins.; [illegible] 4.25

T3554—7 in. black enameled gilt trim locomotive and tender, one 7 in. [illegible] passenger coaches, and one 7 in. [illegible] total length 28 ins., [illegible] box. Each 75

ALL STEEL PASSENGER TRAINS

T2877—Sheet steel pull train; finished in yellow and red enamel and striped in gold bronze, length 33⅛ ins., width 2⅝ in., 4 in high; each in box. Each ..... .68

PULLMAN

T2879—Sheet steel pull car; finished in bright red and yellow enamels; length 24 ins., width 4 ins., height 8 ins.; each in carton. Each 1.10

TROLLEY CAR

T2580—Steel pull street car finished in bright red and yellow [illegible] length 24 ins., width 4 ins., height 8 ins., each in carton. Each 1.10

EXTRA LARGE LOCOMOTIVE AND TENDER

30 inches long, perfectly modeled, handsomely finished

T2878—All steel, can be pulled with [illegible] on [illegible] with steel [illegible] across the room; substantially [illegible], finished in red enamel and striped in gold; equipped with 10 double steel wheels and automatic bell; size 30 inches long; 8¼ inches high; 5 inches wide each in carton. Each 1.22

WEATHER HOUSE BAROMETERS

Will Prophesy Weather Changes 8 to 24 Hours in Advance

E384—House representing a forester's cottage, made of wood, finish black, green thatched roof, regulator on top; wood shaped painted figures; thermometer attached to front; labeled "Fair," "Changeable," "Rain"; if [illegible] figures appear look for fine [illegible] for bad [illegible] 5 ins. high, [illegible] Dozen ..1.25

E385—[illegible] E384, larger size 4½x [illegible] 7 in. high; 1 dozen in box 2.00

E366—[illegible] clock and natural [illegible] size 5½x3 ins., 8 ins. high; ⅛ dozen in box. Dozen 4.00

ELECTRIC SAD IRONS

UNIVERSAL TIP-UP MODEL

Hand wound heating element covers practically the entire surface of the sole plate and is made of best quality high chrome wire, with high grade mica insulation. Unit contacts are made by attaching the resistance wire to the leads by a ¼ inch contact secured by a bolt and nut, absolutely preventing burnouts at this point. The faces of the pressure and sole plate are ground perfectly true and securely clamped together with the heating element between. All air space is eliminated and the heat is distributed where most needed. Asbestos lined hood prevents heat radiation through the top of the iron. All irons have interchangeable elements and 7 point connection plugs.

No. E902. Tip-up model, full nickel plated finish, ebonized handles, attached heel rest. Consumes 580 watts. Complete with 6 feet flexible cord, attachment plug and heatproof stand. Made for 110 and 220 volts. Weight of iron 6 pounds.....each, **$8.50**

32 Volt. Weight of iron 6 pounds.....each, **9.50**

Extra Cords for Universal Iron .....each, **2.50**

One in a box

DOMESTIC

Heavily nickel plated and polished, making this one of the handsomest electric sadirons on the market. Made throughout of the highest quality of materials and after the most approved plans of construction. The heating element is so constructed that it retains the heat and continues serviceable for a long time after the current is turned off. The cord, which is equipped with plug, is readily detached from the iron or from the light socket.

Domestic. 110 volts. Weight of iron 6 pounds....each, **$7.50**

Extra Cords for Domestic Iron ..... .each, **1.25**

One in a box

DUO-POINT

Double pointed base, with two hot points instead of one as on regular irons. Gives even distribution of heat over the entire heating surface. Heating element made of the best materials and covered with heatproof hood. Large, comfortable wood handle, which is always cool. Iron is perfectly balanced, highly nickel plated and polished. Equipped with heater cord, switch plug, separable attachment plug and nickel plated stand.

Duo-Point. 110 volts. Weight of iron 6 pounds..each, **$8.50**

Extra Cords for Duo-Point Iron.....each, **2.50**

One in a box

ELECTRIC FANS

NON-OSCILLATING MODEL

Suitable for all services where the direction of breeze is fixed. Hinge joint permits the blades to be tilted to any angle of elevation and adapts the fan to desk or bracket mounting. Swivel makes it possible to turn the blades in any direction horizontally. Motor has three speeds, with shutoff, a good starting torque, and comes up to speed quickly. Starting switch located in the base. Each fan equipped with heavy wire guard and 8 feet new code reinforced cord with separable plug, attached to base of fan

8 Inch. For alternating or direct current. 110 volts ..... each, **$18.75**

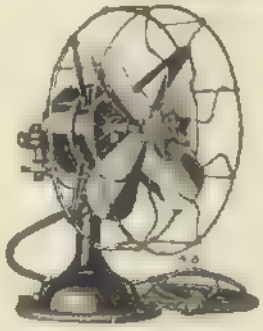
12 Inch. For alternating current. 110 volts... .each, [illegible]

***12 Inch.** For direct current. 110 or 220 volts . each, **31.90**

16 Inch. For alternating current. 110 volts,....each, **35.00**

***16 Inch.** For direct current. 110 or 220 volts....each, **37.50**

OSCILLATING MODEL



Suitable for all classes of service. When oscillating the fan will direct the breeze to every part of a large room. Can be adjusted to any desired elevation and can be used in either a desk or bracket position. Oscillating mechanism is positive in action, durable, and produces a slow, even motion. All gears and worms are carefully machined and adjusted. Does not require much power to operate and can be locked in three different oscillating positions for different degrees of angles or may be locked in a neutral position, which makes the fan stationary. Motor has three speeds with shutoff, a good starting torque and comes up to speed quickly. Starting switch located in the base. Each fan equipped with heavy wire guard and 8 feet new code reinforced cord with separable plug, attached to base of fan.

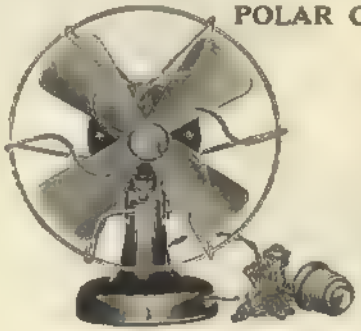
12 Inch. For alternating current. 110 volts.... each, **$38.10**

***12 Inch.** For direct current. 110 or 220 volts....each, **40.60**

16 Inch. For alternating current. 110 volts.....each, **43.75**

***16 Inch.** For direct current. 110 or 220 volts....each, **46.25**

POLAR CUB



Die cast frame, guard spot, two speeds and stop. Fan adjustable to any angle. Mica filled commutators. Motor nickel plated, base finished in rich velvet black, rustproof, black japanned blades. Will operate on either direct or alternating current 105 to 120 volts

Model D, 6 Inch Individual Fan

Model D. Height 8 inches to top of guard, 6 inches to top of motor. Diameter of blades 6 inches. Equipped with 8 feet cord and plug.....each, **$7.35**

Model 9, 9 Inch Room Fan

Model 9. Height 10½ inches to top of guard, 7½ inches to top of motor, diameter of blades 9 inches. Voltage 105 to 120. Equipped with 8 feet cord and plug. Construction and finish same as Model D ..... each, **$10.65**

Packed one fan in a protected carton

*Not carried in stock; will ship from factory

SEWING MACHINE MOTORS

Motor

Speed Control

Motor Attached to Machine

SEW-E-Z

Easy to attach and operate. No screws, bolts or belt is needed. The pulley of the motor is simply set against the hand wheel of the machine. Attach the plug to electric lamp socket and the motor is ready for sewing. Fast or slow speed. From a stitch at a time to 800 stitches per minute. The speed is regulated by a slight pressure of the foot on the speed control. Motor will operate on either alternating or direct current from 105 to 120 volts.

Sew-E-Z Motor, complete with speed control, cord and attachment plug.....each, **$22.50**

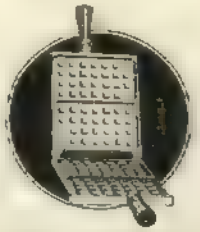
Note—Specially wound motors for any other voltage can be furnished at a slight additional charge

Fan Attachments

Consists of a fan blade, which is attached in place of the pulley, and a strong guard which protects the blade while it is in operation.

Each **$3.50**

ELECTRIC TABLE STOVES



Waffle Attachment

Frame is made of pressed steel and finished in polished nickel. All cooking vessels are made of aluminum, including a heavy griddle. Operates on direct or alternating current of any voltage between 105 and 125 volts. No special wiring required. Simply place it on the table, attach to any lamp socket, turn on the current. Heats instantly and consumes 600 watts.

Cooking vessels consist of a heavy griddle for frying, a deep vessel with a grid for broiling and an egg poacher with four egg cups.

Toasting is done in the wire drawer which is between the two heating elements, so that both sides of the toast are exposed to the intense glow of the heating elements. The deep vessel is used above the heating chamber for boiling, poaching, steaming, etc., and below the heat chamber for all cooking operations where the heat is applied from above such as broiling, etc.

Standard Electric Stove, complete with connection plug, cord and attachment plug.....each, **$15.00**

Waffle Attachment. Made of cast aluminum, with rubberized handles. Used between the heating element in place of the toaster drawer.....each, **5.00**

ELECTRIC VIBRATORS

HAMILTON BEACH

Made of the highest quality material. Each machine must pass a number of severe tests for electrical and mechanical efficiency before being shipped from the factory. Each outfit consists of the machine with seven feet of flexible cord, separable plug for connecting to the electric socket and six applicators of different styles. Full directions included with each model for the treatment of rheumatism, lumbago, headache, indigestion, deafness, throat troubles, scalp and facial massage, etc

Vibrators, unless otherwise ordered, are furnished wound for 110 to 120 volts, 25 to 60 cycles alternating current. Specially wound machines for 32 to 250 volts furnished at a slight additional charge. Machines for direct current supplied on request

Type D

Meets the demand for an efficient low priced machine for family use, and for the professional operator who calls on patrons in their homes. Operates on either A. C. or D. C. Light weight, die cast case. No speed regulator, but has starting switch in handle

Type D. Complete in leatherette case .....each, **$15.00**

Type A

A favorite for home use. Gives both rubbing and percussion strokes. Equipped with speed regulating switch. Finished in highly polished aluminum.

Type A. Complete in leatherette case .....each, **$18.50**

Type C

Heavy construction and with a powerful motor for professional use by physicians, barbers, masseurs and nurses. Its deep penetrating vibration makes it indispensable for cases requiring strong treatment.

Both rotary and percussion movements. Aluminum case.

Type C. Complete in leatherette case.....each, **$25.00**

TABLE LAMPS

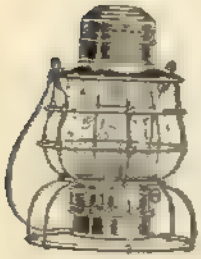
RAILROAD LANTERNS

VULCAN

For Kerosene



No. 39 Vulcan

Bright tin, strong wire frame, double guard, stamped fount and top.

The globe is removed through the frame by turning back the hinged top.

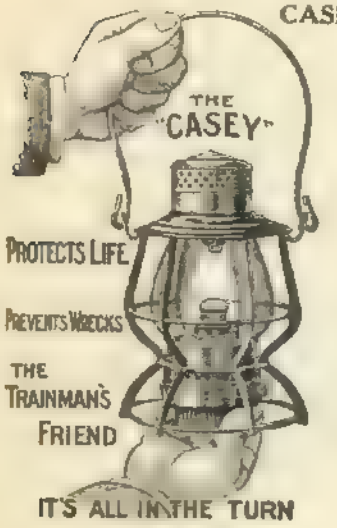
The wing lock burner is firmly attached to the fount by patent locking lugs. The fount fastens to the frame by a patented positive locking device, operated by a twist of the hand. Fount has a safety oil well.

For strength and long life, ease in cleaning, filling, lighting and regulating (outside wick raiser) and dependability in making signals they are unexcelled.

No. 39 Vulcan. Height over all 10 inches, fount capacity 24 hours, Vulcan No. 39 white globe, No. 1 wing lock convex burner, 1 inch wick, weight per dozen 49 pounds.....per dozen, **$23.15**

One dozen in a box

CASEY



Any signal can be given with it, without danger of extinguishing the light.

Light is always under control of operator without removing globe or oil cup.

When gloved or when numbed by cold, the complete hand can do easily with the Casey outside wick raiser what the finger and thumb find difficult in regulating the light in the old fashioned railroad lanterns. Weight per dozen about 50 pounds.

Casey R. R......per dozen, **$25.50**

One dozen in a box

ADLAKE

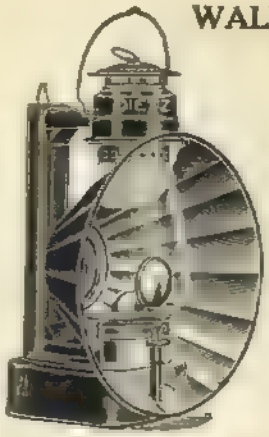
Wire guard, rigid bail lock, perfected ventilation, removable globe holder, encased oil pot, outside wick raiser, clear white globe, lard oil ratchet burner to take No. 1 5/8 inch wick or No. 2 1 inch wick as ordered.

No. 11. Adlake R. R. Per dozen.....**$30.00**

WALL LANTERNS

BEACON

Cold Blast



Finished in green enamel, large fluted reflectors, outside filler cap; the globe lifts clear of the burners to permit trimming and lighting. These are not intended for a portable lantern but are specially suitable for platforms, sheds, etc.

Burns 150° kerosene.

Volume of light 50 candle power.

No. 30. Height over all, 15¼ inches, count capacity 35 hours, Blizzard white bullseye globe, 1 inch wick, patented burner No. 262, weight per dozen 100 pounds .....per dozen, **$42.20**

One quarter dozen in a box
